YOKOHAMA.—The continuance of unfavourable advices from Europe has at last checked operations, and their tenor becoming known to holders, decided symptoms of weakness are being manifested. Telegrams to the 10th August, reporting the price on the London market for new seasons No. 3 chop Tsatlees as 26s. 6d., by the French mail on the 7th Sept., had an almost immediate effect. Although the quality of the arrivals is improving a decline of $10 to $20 has been established for Hank sorts, and there is little doubt that, if foreigners will only restrict their purchases for a time, much larger concessions will be obtained. Money is scarce in the Japanese town, and we hear that some of the Silk is under advance to the Government bankers and now lying in their godowns. Arrivals are steadily increasing the stock, and nothing but a little patience is required to make the current season profitable to foreign buyers. The decline noted is in Hank sorts; Oshus and Koshus remain as last quoted, and the demand for them continues. Settlements amount to about 280 piculs, and stocks to at least 800.

SHANGHAI.—During the interval a fair amount of business in Silk has been transacted, the settlements being estimated at fully 600 bales, chiefly Tsatlees. The prices paid have been very irregular, some parcels having been settled at last mail's rates, while others have been purchased at an advance of Tls. 5 to 15 per picul;—Tls. 527½ are reported to have been paid for Chop 3 Tsatlees. The unsold stock is estimated at about 3,000 to 4,000 bales. The prices asked by Chinamen are about the same as those ruling at the close of last mail, with the exception of Chop Tsatlees, for which an advance of Tls. 5 to 10 per picul, is asked.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Amsterdam, Sept. 1, Despatch.

At SHANGHAI.—From Sunderland, Sept. 7, Ocean Chief; from Shields, 8, Onsuri; from London, previous to Oct. 5, Tamerlane, Cora Linn (reported by telegram).

At HONG KONG and CANTON.—From Newport, Sept. 11, Tonia; from London, 18, Corea; from Hamburg, 11, Hugh and Otto; from Cardiff, 15, Sultana.

At SINGAPORE.—From Liverpool, Sept. 28, Panic; from Falmouth, 26, Adeline (str.); from Cardiff, 27, Graafstroom; from Greenock, Royalist (str.).

DEPARTURES.

From YOKOHAMA.—For New York, Sept. 9, Yokohama.

From SHANGHAI.—For London, Sept. 5, Sir Wm. Wallace, Evelyn Wood; 13, Polmaise; Oct. 4, Albuera (reported by telegram).

From HONG KONG and CANTON.—For New York, Sept. 19, Princess of Wales; for London, Sept. 18, Hyacinth.

From SINGAPORE.—For New York (via Penang), Sept. 28, Martha Rideout; Oct. 1, Kalahome.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

The U.S. *Wyoming*, having completed three years service in China, proceeds homewards.

ARRIVALS NOT IN THE TABLES.—Nov. 2, at Cuxhaven, from Macao, Peru; at Bremen, from Rangoon, Westburn; Oct. 31, at Brouwershaven, from Batavia, Pres. v. Ryckevorsel.

DEPARTURES.—Nov. 5, from London, for Shanghai, Maitland; 1, from Shields, for Galle, Wallace; from Penarth Dock, for Shanghai, Robin Hood.

SPOKEN.—Templar, Boston to Galle, Oct. 15, 23 S., 29 W.; Wild Rover (Amer.), Manila to Rio de Janeiro, Sept. 14, 33 S., 18 E.; Batavia (Dutch), Batavia to Amsterdam, Sept. 26, 11 S., 11 W.; Zambezi, Penang to London, Sept. 4, 35 S., 23 E.; Clyde, for Colombo, 16 days out, Oct. 1, 7 N., 25 W.; Anna and Sophia, Cardiff to Sourabaya, Sept. 29, 7 N., 24 W.; Minister Thorbecke, Batavia to Middelburg, Oct. 9, 27 N., 32 W.; Nieuwland, Cardiff to Sourabaya, Sept. 20, 12 S., 32 W.

MISCELLANEOUS.—Off Cape de Verds, Sept. 11, Pasig (s.), Ferrier, from the Clyde for Manila.

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY.—This was an application on the 4th inst., before the Chief Clerk of the Rolls, in a voluntary winding-up matter, which was specially taken at an early hour on account of its importance, for the chief clerk to sanction an advance of £5,000 to be sent to Singapore to prevent the works of the company being stopped and considerable property sacrificed. Mr. Mackenzie showed the assets of the company to be large, and beyond the liabilities. A call was to be made, and, if the directors might advance the money, a telegram could be sent, which would reach the mail, and the Oriental Bank would make the advances. On the part of shareholders, Mr. Gibbon and Mr. Meeser appeared; Mr. Davies and Mr. Vallema represented creditors. Mr. Mackenzie urged the application to save the property. The Chief Clerk, after a lengthened discussion, decline to accede to the application. It was no doubt a case of importance, but he did not feel himself justified in authorising an advance to increase the liabilities. There were other summonses, and it was proposed forthwith to make a call.

Literature.

A new uniform and standard edition of Thackeray's works is announced, the chief interest of which will lie in the last volumes of the series, which are announced to contain the new and hitherto unreprinted writings of the author. The latter alone would form a considerable collection. Some of them were not included in the author's own collections of his miscellanies for reasons which have now passed away, or which at least would not have the same force in the case of an edition published by others. Many of these are of the highest interest, while to most of Mr. Thackeray's admirers they will be almost entirely new. We trust that the editors will not fail to include those frequent critical papers on Mr. Dickens' earlier works which were also contributed by Mr. Thackeray to *Fraser*. The overflowing admiration which young Titmarsh displayed in many a critical and many an eloquent passage are remarkable as coming from one whose name was afterwards so often linked with that of his illustrious contemporary novelist. Mr. Dickens knew them well, though till long afterwards he knew little of the hand which wrote them; and perhaps never dreamed that the writer was that same young gentleman who, believing that his vocation was not for literature but for art, called on him—now some thirty years' since—at his chambers in Furnival's-inn with an offer to draw the illustrations for Pickwick, then appearing in shilling numbers. The feeling with which Mr. Thackeray refrained from reprinting these in his lifetime can be readily understood. So warm a tribute from one great novelist to another, whom the world, in spite of their wide diversity of genius, would persist in regarding as rivals, would have had in it a certain indelicacy, or would at east have evidenced a certain want of taste which the writer himself would have been quick to feel.

The Christmas numbers of the various periodicals are beginning to be talked about. The Christmas number of *All the Year Round* will this year be written entirely by Mr. Dickens and Mr. Wilkie Collins. The latter gentleman, who has long been suffering from ill health, is happily now sufficiently recovered to take his place once more as a writer of serial fiction. A new continuous story from his pen is also announced to appear in *All the Year Round*.

There is a rumour current, we believe with some foundation, that the *Daily News*, an ably conducted paper, which has never met with the success it deserved, is to be reduced in price, and to enter the lists with the penny daily papers. Certain novel features will be introduced into it. The antecedents of the *Daily News* are enough to make it a literary curiosity. Under the successive editorship of Charles Dickens, John Forster, W. H. Wills, and other gentlemen of ability and experience, it has always retained on its staff good talent; and should it be published at one penny, will make a formidable rival to the *Standard*, the *Star*, and the *Telegraph*.

It is said that Mr. Anthony Trollope intends to resign his duties in the General Post-office, St. Martin's-le-Grand, and that he contemplates offering himself as a candidate for a seat in Parliament to one of the new constituencies to be formed under the Reform Bill. Mr. Trollope's politics are decidedly Liberal.

Mr. Charles Dickens will sail from Liverpool in the *Cuba* on Saturday, November 9th, for the purpose of giving those readings from his works which have been so popular in England. He will leave the United States for Europe at the end of April next year. A public dinner will be given to Mr. Charles Dickens on the 2nd of November, at Freemasons' Hall, and Lord Lytton has consented to take the chair upon the occasion.

An interesting literary curiosity will appear in the forthcoming selection from the works of Sir Walter Scott, to be published in Messrs. Moxon and Co.'s series of Miniature Poets. This is a copy of the last verses Scott wrote, and which have never yet been published. They were written in the album of Miss Wordsworth, and have the following note appended to them, written by Sir Walter Scott the day he quitted Abbotsford for Italy. Mr. Wordsworth and his daughter had been with him a few days, having come at his request to pay him what he foresaw would be their last visit. In the first quatrain he alludes to his early friendship with Wordsworth; in the second he addresses himself to the daughter; the third is very imperfect, and shows what an effort it cost him to write. When he returned the book to the owner he said, "I would have done this for no one but your father's daughter."

The whole of Messrs. Day and Son's stock of works of art, print and chromo-lithographic publications will be sold by auction early next month. It will include a very large collection of proofs and prints of the publications of the house of Day and Son, and many others, and nearly a complete set of every chromo-lithograph that has ever been published in London, most of them touched by the artists. Amongst the photographs are the stock of the work entitled Bedford's Photographic Pictures in the East.

The following is our usual summary of the most important publications of the past fortnight:—

In Literature, Science, and Art, we have a *Translation of Aristophanes*, comprising eight of his Comedies in Rhymed Metres, by Mr. Leonard-H. Rudd; Mr. John Attfield give us an *Introduction to Pharmaceutical Chemistry*; the famous *Shooting Niagara*, by Mr. Carlyle, is reprinted with important additions from the pages of the magazine in which it originally appeared; Mr. William E. Hearn writes on the *Government of England, its Structure and Development*; and Mr. E. W. Pugin publishes the *Designs for the New Palace of Justice*.

In History and Biography Mr. William Cates gives us a *Dictionary of General Biography*, with a classified and chronological Index of the Principal Names; the *Chronicles of the Picts and Scots* are edited by W. F. Skene; Mr. Travers Hill gives us *English Monasticism, its Rise and Fall*; Lady Wallace translates the *Letters of Distinguished Musicians from the German*; and Mr. R. R. Madden gives us the *History of Irish Periodical Literature from the 17th to the 19th century*, with notices of the most remarkable persons connected therewith.

In Geography and Travel we find Mr. George Peacock's *Handbook of Abyssinia*, a book likely to be useful just now; and Mr. Henry Latham's *Black and White, a Journal of a Three Months' Tour in the United States*.

In Fiction we have a *Stormy Life*, by Lady G. Fullerton, 3 vols.; *Humphrey Dyot*, by James Greenwood, 3 vols.; *Old Sir Douglas*, by the Hon. Mrs. Norton, 3 vols.; and *Not Wisely but Too Well*, by the author of Cometh up as a Flower.

The London & China Telegraph.

LONDON: WEDNESDAY, NOV. 6, 1867.

GRANT'S TRANS-MONGOLIAN TELEGRAPH LINE.

WE have frequently expressed surprise that the facilities afforded by the Kiachta line of telegraph for the transmission of messages to China had failed to bring it into more general use for mercantile purposes. Doubtless, many merchants who have given it a trial have been discouraged by the delays that have too often arisen in the delivery of messages—delays attributable solely to imperfections in the Russian Government line between St. Petersburgh and Kiachta. For several months indeed (between June and August of the present year), the wires have been constantly out of order, and most vexatious delays have resulted. Latterly, however, it has been working more satisfactorily, and we trust that by increased care on the part of the Director-General at St. Petersburgh—who in answer to complaints has given repeated promises of amendment—the communication will henceforth be better maintained. These shortcomings in the intermediate links of course completely nullify the efficiency of GRANT'S Trans-Mongolian line, which is thus unfairly made to suffer by the mismanagement of the Russian telegraph service. Late advices from Tientsin and Kiachta inform us that the couriers now perform the distance between those two places regularly in, twelve days. We hear fewer complaints, too, of the Indian line than formerly; but taking the average of the season it is probable that as much inconvenience has arisen from the delays, blunders, and general mismanagement of the Galle line as from the breaking down of the Russian wires. In fact, until a more perfect system is somehow arrived at, it seems to be advisable that those who wish to ensure anything like certainty in results should make use of both systems simultaneously.

THE OPENING OF NEW PORTS FROM AN AMERICAN POINT OF VIEW.

THE trade of the United States with China has for many years been second in importance only to that of Great Britain. The Americans, too, were the pioneers of foreign trade with Japan; and the newly-established line of steamers across the Pacific cannot fail, when fully developed, largely to extend the commercial interests and influence of America in both countries. This being the case, the opinions of thinking Americans on questions relating to foreign intercourse and trade generally must be allowed to have considerable weight. The vain-glorious boastings of a few transatlantic journals—which on the strength of a few successful voyages made by the *Colorado*, already represent the American Eagle as flapping his wings in triumph over the humiliated and defeated British Lion, shorn alike of glory and profit—may be dismissed without even a word of comment. No sensible Englishman grudges America her share of the China trade, and every sensible American knows that such is the case. But the views publicly expressed by Mr. LOW, an eminent New York merchant, on the subject of new ports, are at the present juncture both instructive, interesting, and valuable. Mr. LOW has recently made a tour of some duration in China and Japan, and on his return to New York was entertained at a public banquet by the New York Chamber of Commerce—a fact amply sufficient to show the estimation in which he is held by the mercantile community in that city.

In a recent article on the rumoured intention to open some additional ports on the China coast, we strongly deprecated any attempt to create new seats of trade, destined probably only to languish through a useless, feeble existence, or at best to enjoy a short "burst" of prosperity at the expense of the old-established ports. Mr. LOW, in view of the proximate opening of Osaka and Yedo, adopts almost the same view with regard to Japan. "At the period of our arrival," says Mr. LOW, "the foreign Ministers were contemplating a visit to "Osaka, by invitation of the SHIOGOON, to arrange for the open- "ing of new ports. The death of the MIKADO caused a delay; "but the meeting, as you are aware, has since taken place with "satisfactory results. There appeared to be a good deal of in- "difference, if not positive objection to this fulfilment of the "treaty obligation, on the part of the American merchants of "Yokohama, because of the amount of money invested in houses, "godowns, and other buildings at that place. *If the trade was "to be divided between two ports, without being materially increased, "two establishments would be necessary instead of one, and without "a corresponding benefit.* The necessity of sustaining numerous "branches at different places on the coast of China, by houses "originally established at Canton, has contributed, directly and "incidentally, to the commercial disasters which have occurred "during late years, and similar consequences are naturally appre- "hended in Japan if the trade is divided." There is much truth in this. The elasticity of trade is so great that in prosperous times it seems capable of almost indefinite extension; but such a trial as China is now passing through—in common with most other countries—opens men's eyes to the fact that the basis of a permanent and sound trade cannot be created at the will of a few speculators. In fact, no particular branch of commerce can be enlarged or made more profitable, solely by multiplying the number of places at which it is carried on. The *New York Times*, in an article on Mr. LOW'S speech, fully endorse his opinions on this point:—

"There is no sure evidence that the aggregate foreign trade of Japan would be materially increased by creating at present a new port, while there is a certainty that the investments made by the merchants of Yokohama must be depreciated—for a time at least—to a most serious, if not ruinous extent. . . . If Mr. Low found opportunity to make himself acquainted with the condition of affairs at Shanghai, he would have been made aware of the state of commercial depression into which business has been thrown there from causes not dissimilar from those which the Yokohama merchants foresee, and are naturally eager to deprecate. The rapid opening of one Chinese port after another, on the Yangtsze River, has had a deplorable effect upon the trade of Shanghai. The opening of Hankow, which gives no promise of becoming a permanently available commercial centre, was followed by the gradual decadence of the trade which Shanghai for years enjoyed. Many of the greatest and most substantial houses have become either so discouraged as to give up the enterprises in which they had engaged, or have succumbed altogether under the divergence of their trade to other points.

"The decadence of Shanghai, moreover, we are assured has not been followed by any commensurate accession to the prosperity of the new ports higher up the river. Many of the Shanghai merchants invested at Hankow, doubtless thinking to save some of their previous investment; but the opening of Hankow was followed by the establishment of other river ports, whereby the wholesale trade generally became entirely deranged. Imports at Hankow commanded scarcely any higher price than down the river at Shanghai, and at the interior ports the prices demanded for tea and other articles of export were far higher than they had ever been at Shanghai. . . . What is needed is that we should concentrate our thoughts and energies upon improving the ground we occupy rather than distribute them too hastily over new ground, which we cannot at present occupy with advantage."

Such arguments as these, however, are not applicable to Japan in the same degree as they are to China. In the latter country we have already numerous well-situated ports, which practically afford access to the entire land; and the capital itself is moreover open to us, and this is surely enough for the present. In Japan, on the contrary, we enjoy neither of these advantages. The punctual opening of Osaka and Yedo are the vital points of the treaty, and must be carried into effect apart from all mercantile considerations. After what has happened, should we be weak enough to waive these rights, such policy would be attributed not to forbearance or moderation, but to weakness and the fear inspired by Daimios' threats and assassin's outrages—and then we might bid a long farewell to all hopes of a peaceful tenure of our footing in the country. But with Yedo and Osaka opened, in addition to the existing ports, no others in the Imperial territory can be necessary. All future attempts for the extension of trade in Japan must take another direction—that of procuring free access to the territory of those wealthy Daimios who are at present either excluded altogether from foreign trade, or compelled to seek it under vexatious restrictions through the narrow channels to which it is confined by Government monopoly.

THE NEW SEASON'S TEAS.

The inferior quality of the present season's crop of Congou tea, taken as a whole, appears now to be an established fact, more especially as regards Kaisow and kindred sorts from Foochow. At first, these latter were condemned as being mixed with old leaves, but we are told on pretty good authority from a close and critical inspection after infusion, that this is not so much the case as it has been in former seasons, but that on the contrary the leaves are more uniform in colour, and show less indication of not being entirely new crop leaf. They are, however, much darker in colour than usual, and appear to be thin or less pulpy. The inferiority of quality may be attributed to these conditions, as there appears to be no fault in the preparation or manipulation of the leaf; it may, therefore, be interesting to endeavour to trace their causes. The first (darkness of colour) may be attributed to the effect of heavy rain which prevailed, as it is said, at the time the leaves were at the height of their ripeness, and when they were being picked. The second (thinness and want of pulp) in a great degree to the injury sustained by the rain, and also from another cause, which, however, can only be suggested for the consideration of tea growers and tea buyers in China; but which, if found to be true, may be the most important as regards the crops of the next year or two. It is this—the impoverishing effect of the hard treatment that the shrubs were subjected to in 1865-6 and 1866-7, when the Chinese, to meet the demands upon them, increased their export by eleven millions of lbs. in the former season, and five millions in the latter; and to do that not only packed and shipped broken leaves, siftings, and dust, but in 1866-7 added to these the stalks and broken up twigs of the plants, and even then (taking no account of the inland trade with Russia), China and Japan together only contributed 166 millions of lbs. towards the 188 millions which at least were the requirements for the consumption of all countries. On this subject we have received the following letter:—

(To the Editor of the *London and China Telegraph.*)

Sir,—The inferiority of this season's Kaisows is an undoubted fact, and I think the chief reason for this is to be found in the increased demand consequent upon the repeated reductions of duty in England and also in Russia, in order to supply which the Chinamen, instead of restricting the first pickings to the young and tender leaves, year by year continue to add the full grown, and therefore sapless leaves, to their first selections; in the infused leaf this fact will be fully verified. That the weather affects the tea plant there can be no doubt; but statements as to rain having fallen just at the time of picking must be received with great caution, as the Chinamen always start some rumour calculated to mislead and prejudice people, and thus induce buyers. My own opinion is that the tea crop is just about as often affected by this cause as our own wheat harvest. The rainy season—*i.e.*, from February to the end of March—is usually over, and tends rather to improve and nourish the tea plant than to injure it. Besides, the plantations or gardens are usually so placed (on the slope) that no great amount of water could lodge for any length of time.

The principal cause of the deterioration of quality is to be found in the increased demand.—Your obedient servant, Old Foochow.

City, Nov. 4, 1867.

The last mail brought advices from the Engineer who was sent out from this country some months since, in charge of a gas apparatus intended to light the *Yamun* of an enterprising mandarin at Peking. He was then at Tientsin, but had visited Peking, and reports that he anticipated no difficulty in erecting his miniature gas works, which will supply 100 lights. This fact must not be regarded as a step towards lighting the entire city with gas, for the writer states that even were it desired, such a thing is rendered utterly impossible by the present construction and condition of the streets. We have no doubt, however, that other wealthy officials, when they see the present experiment successfully carried out, will gladly avail themselves of so great a boon as gas.

We believe that the difficulties in the way of erecting a second English Bishopric in China having been overcome, the proposed see of Ningpo will be founded without further delay, and that the first Bishop will be the Rev. W. A. Russell, M.A., of Trinity College, Dublin.

Intelligence from San Francisco, dated the 14th ult., states that on that day the steamer *China* sailed for Yokohama and Hong Kong with one million and seventy-six thousand dollars in treasure, 785 tons freight; fifty-four cabin and 900 Chinese steerage passengers.

Mr. C. J. Andrews and Mr. J. O. Driscoll have been appointed student interpreters for the China, Japan, or Siam Consular Service.

Monetary and Commercial.

The Hong Kong and Shanghai Banking Corporation has invited applications for 2,000 shares, to be issued on the London register of the bank. These shares have we believe, fallen in from failures and other causes, and have been placed in the hands of the London manager for sale here, with the view of establishing a London share-list. Ultimately these shares will be recognised on the Stock-Exchange, and become negotiable on the same footing as other bank shares.

At a meeting of the Singapore Gas Company, held on the 29th ult., the directors' report, noticed in our last issue, was duly passed by the shareholders. The latest accounts from Singapore showed an increase in consumption. The question of expenses, alluded to by a shareholder as too heavy, was answered by Mr. Stephenson, the chairman, who stated that he intended to consult with Mr. Read and Mr. Patterson, now in London, as to the increased demand made by Mr. Wells, the manager in Singapore. A vote of thanks was carried to Mr. Wells and the directors.

The liquidators of the China Steamship and Labuan Coal Company have issued a circular, calling a meeting of shareholders to decide whether the working of the mines shall be continued or the liquidation rendered absolute. This step is necessitated by Messrs. Laird and a few other shareholders having opposed the resolution formerly adopted to continue operations. The meeting will take place at the London Tavern at 2 P.M. on the 8th inst.

The Agra Bank (Limited) is prepared, on behalf of the late Agra and Masterman's Bank (Limited), to anticipate payment of its promissory notes falling due on the 15th March, 1868, under rebate of the same rate of interest which the notes carry. This instalment will complete 17s. 6d. in the pound, with interest thereon in full.

At a second meeting of the creditors of Messrs. Moore, Phillips and Co., of Birmingham, a statement of accounts was submitted, together with the report of the investigation committee, which recommended that the offer of an additional 2s. 6d. in the pound (making, with previous payments, a total of 8s.,) should be accepted. This was agreed to by the meeting. Mr. Philip Cohen has left by the extra French steamer *en route* for China with the view of making fresh arrangements for conducting the business of the Hong Kong and Manila branches, and we hope the endeavour to maintain the position of this old-established and respected firm will be successful.

A dividend will shortly be declared in the estate of Messrs. Small and Co.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton November the 4th, was—In gold, to Alexandria, £23,000; to Madras, £721; to Calcutta, £2,000; in silver, to Hong Kong, £154; to Shanghai, £8,950; total in gold, £25,721; in silver, £9,104.

BOARD OF TRADE RETURNS.

The Board of Trade returns for September show a steady but not active business, the declared value of our exportations having been about 3 per cent. below those of the corresponding month of last year, while compared with September, 1865, there is a falling off of nearly 7 per cent. This reduction, however, is virtually only nominal, since it is due entirely to the reduction in the price of cotton, which has caused the value of our exports of Lancashire manufactures to figure for a diminution of 8 per cent., although in the actual quantity shipped there has been an increase of 6 per cent. The shipments of cotton yarn, also, while they show a decline of ½ per cent. in value, show an increase of 3 per cent. in quantity. Iron is again one of the most favourable items of the list, an augmentation of 26 per cent. being exhibited, which is owing mainly to a great increase in the Russian demand for railway descriptions, and also to a little improvement as regards the United States and India. In the shipments of coal there has been an increase of 22 per cent. Haberdashery and hardware continue to be affected by the dulness of the American and colonial trade, and show a decrease respectively of 6 per cent. and 22 per cent. In silk manufactures there has been a falling off of 27 per cent., and in linen manufactures, for which the American demand has been very light, the reduction is equal to 25 per cent. in value and 40 per cent. in quantity. The woollen trade has on the whole been steady. Consequent on a good Continental demand, the shipments of yarn exhibit an increase of 42 per cent. in value, and 60 per cent. in quantity, while of manufactured goods, although they were 6 per cent. less in value than in the same month of

Digitized by Google

last year, they were 2 per cent. more in quantity. The total value of our exports for the first nine months of the present year has been £137,202,497, showing a reduction of only about 3½ per cent. from the unprecedented total of last year, notwithstanding the lower valuations at which our principal goods have been shipped in consequence of the altered prices of cotton and other staples. Contrasted with the first nine months of 1865, there is an increase of 14½ per cent. The total value of the Imports for the month of August was £19,784,915, and for the eight months ended 31st August, £141,448,055, showing a reduction for the month of 5 per cent., and for the eight months of 9 per cent., upon the corresponding totals of last year.

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and nine months ended 30th Sept., and the value to the 31st Aug., are thus given:—

From	1865.	1866.	1867.
Quantity for the Month ended 30th Sept.			
China	16	15,438	— cwts.
British India	640,008	724,712	1,094,399 „
Egypt	100,817	37,093	39,723 „
Total from all parts	899,030	980,713	1,452,553 „
Quantity for the Nine Months ended 30th Sept.			
China	301,525	33,387	4,707 cwts.
British India	2,581,409	4,163,799	2,963,850 „
Egypt	1,106,271	772,553	891,398 „
Total from all parts	5,460,070	9,790,314	8,844,283 „
Value for the Month ended 31st Aug.			
China	£239,251	£19,742	—
British India	2,783,299	2,234,826	£1,972,045
Egypt	802,338	458,709	398,626
Total from all parts	5,409,669	4,634,860	3,983,015
Value for the Eight Months ended 31st Aug.			
China	£1,449,586	£78,000	£20,965
British India	10,244,094	£16,139,879	6,942,842
Egypt	8,094,171	6,626,740	6,074,842
Total from all parts	29,944,508	58,204,544	39,752,424

The quantity and value of the Raw Coffee imported into the United Kingdom from British Possessions are thus shown:—

From	1865.	1866.	1867.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct. 24.

On the 19th the interesting ceremony of the unveiling of the statue of the late Joost van den Vondel took place at Amsterdam in the presence of an enormous multitude. The festival lasted three days, and has given general satisfaction. On Saturday next the inaugural ceremony of the statue of Gysbert Karel Graaf van Hogendorp will take place here. The King will be present at that festival.

A new post convention is on the point of being concluded with France. The tax for single letters will thereby be reduced from 30 to 20 cents.

For the last fortnight Mr. Reuter has furnished to the Dutch papers direct

Digitized by Google

telegrams from Java about commercial and shipping news. This is undoubtedly a great improvement, because these despatches are much more expensive than those which were formerly published by the *Rotterdamsche Courant* and the *Handelsblad*. The improvement would, however, still be greater were the telegrams more correct in future. I wonder that I did not find these despatches in English papers, as the news must be of interest to English shipowners, because the greatest part of Indian produce of private cultivation is conveyed now to our harbours by English vessels.

COMMERCIAL.

COFFEE.—In anticipation of the sale of the Dutch Trading Co. of 130,361 b. Java, Padang and Menado, held to-day, the market was very quiet. The valuation is for Java good ordinary, 37½c. At Amsterdam were sold of private imports 1,200 b. Padang ex Swanley, 2,300 b. Macassar ex Robertus Hendrikus, and 203 casks and 125 b. Ceylon.

SUGAR (RAW).—The market is firm; the low prices, principally of the white sorts, begin to attract attention; 4,000 b. Java were taken for export, and 2,500 b. ditto, somewhat damaged, ex Monitor, were sold at 26f. to 33¾f. The quotation now is ½f. above the Sept. sale. Stock on the 15th inst. 45,416,026 kilo, against 42,087,212 kilo in 1866.

RICE.—The market is in a good position, 2,458 b. Java 2nd sort table rice, ex Robertus Hendrikus, were sold at prices that did not transpire. For the clean-mills some cargoes Bassein and Rangoon were sold.

SPICES.—quiet; of pepper 650 b. Sumatra, ex Brouwershaven, were sold at 17c. in bond.

TEA.—Of China, 4,255/4 and 194/12 chests Congou, 71/10 chests Souchon, and 166/4 chests Pekoe, ex Yeavering Bell, and 284 chests Green Tea, ex Sea Witch, will be offered for sale on the 30th inst. On the 14th November the Netherlands India Commercial Bank will hold on auction of 1,965/4, 112/12 and 136/16 chests Java, from the district of Braghlan. From this quantity are 182/4 chests Boei, 239/4 chests Congou, 1,504/4 chests Souchon, and 130/16 chests Pekoe. Of private import were sold here, 415/8 chests Green China Tea, ex Sea Witch, and in auction at Amsterdam, 1,720 chests China at the following prices:—

Souchon ...	100 to 105 c.	Uxim... ...	64 to 193 c.
Tonkay ...	62 „ 82	Joosjes (G.B.)..	80 „ 179
Haysant ...	94 „ 181	Joosjes (F.B.)..	119 „ 205
Haysant Tonkey	100 „ —		

TOBACCO.—The 10,061 b. Java offered in auction were sold at prices which are very high for the good sorts. On the 21st Nov. 1,498 b. Java (Havana) and 900 b. BD.R will be sold.

CIGARS.—Of 830 mille Manilla 2a Cortadoes 1863 (somewhat damaged) 27 mille were sold at from 14¾f. to 19¼f.; 96 mille do. 1862 were sold at from 8½f. to 11½f.

RATTANS.—The 87,897 b. which will be offered on the 29th inst. by the Dutch Trading Company are valued at 6f. to 10f. according to quality.

INDIGO.—The stock is very insignificant, and the arrivals per Fransen van de Putte are not yet brought into the market.

COTTON.—600 b. were sold at firm prices.

COFFEE.—The result of the Dutch Trading Company's sale of 130,361 b. Java was as follows:—

Bales.							
7843	...	Menado	...	c.48½ to 56	...	50¼ to 55

ARTICLES OF IMPORT.

TEA.—The chief interest has been in the Souchongs from Foochow, and the finest have fetched 2s. 10d. to 3s. The sales yesterday and to-day have passed with fair spirit.

SILK.—The periodical public sales were held on the 23rd. The quantity offered was about 1,800 bales Bengal silk, 2,800 bales Shanghai, 700 bales Japan, and 1,100 bales Canton Silk, and the result very unsatisfactory Some few small parcels announced to be sold without reserve were taken, but almost all the other portions of the catalogues were allowed to be passed rapidly without biddings. In China Silk transactions have been limited, and prices are without alteration. Japan Silk: Some few parcels are occasionally sold to supply immediate requirements, but there is no general demand. Deliveries from 1st to 24th inclusive: China, 2,035 bales; Japan, 448 bales; total, 2,483 bales. The following quotations are nominally the same as before.

		s. d.		s. d.
CHINA:—Tsatlee, No. 1 & 2		28 6	to	30 0
„ No. 3		27 0	to	28 0

No. 3		23 0	to	24 0

COTTON.—Since our last report the improvement manifested in this market has suffered a check, but subsequently recovered its former tone of activity, and the demand is now well sustained at advancing quotations. No sales of China or Japan.

COFFEE.—Supplies of all colonial sorts have been very scanty, but in the face of the Dutch Trading Company's sale held on the 23rd inst. the market assumed a rather tamer appearance, and since the result has become known this tendency has further developed itself, although prices remain tolerably steady. In Native Ceylon there has been no business, but in Plantation 197 casks, 265 barrels and bags, realised—ordinary to fine fine ordinary, 66s. to 73s. 6d.; low middling to middling, 74s. 6d. to 81s.; good middling, 82s. to 91s. Of Java 120 bags middling yellow quality sold at 76s. 6d. The Dutch Trading Company's sale of 130,400 bags passed off irregularly, and excepting for the fine yellow sorts, below the rates of the October auction; good ordinary Java at 37½ cents, against 38½ cents in September.

CUTCH.—The market for Pegu is very firm, and good private business has been done at 35s. 6d. per cwt.

COCOA-NUT OIL.—The market is very dull; business limited, with an entire absence of transactions in Ceylon.

CAMPHOR.—Very dull; no business either in China or Japan.

GAMBIER.—Prices are lower, a limited private business being done at 17s. per cwt. No transactions at public sale.

GALLS.—China and Japan rather cheaper; of 267 boxes China at auction two-thirds sold at 58s. to 60s. per cwt., and 404 boxes Japan mostly sold at 52s. 6d. to 53s. 6d.

INDIA-RUBBER.—In the absence of offers of good qualities there is but little business. Of 17 baskets Singapore at auction about half sold at 1s.8d. per lb. for middling, and 1s. 3¾d. for ordinary foul.

MANILA HEMP.—The market for this import remains very quiet, and 500 bales offered at auction were nearly all withdrawn.

PEPPER.—At public sale 1,062 bags Black Singapore went at 8¾d., a few lots 3¼d.; 898 bags Penang were about half sold, good Acheen 3¾d., Trang 3⅝d. to 3½d., good West Coast held for 3 3-16d. Privately few sales have been made.

PLUMBAGO.—Fine qualities of Ceylon are dearer, and of 724 barrels at auction about one-third sold at 25s. 6d. to 29s. per cwt. for good to fine lump, 12s. to 17s. 6d. for chips, and 10s. for dust.

RICE.—Since our last report the disposition to realise has been more decided, and sales were made at a decline of 3d. to 6d. per cwt. from the late highest quotations, but there is firmness again, and in some cases former rates have been paid. The sales comprise: 250 tons Ballam at 11s. (ex ship), to 11s. 6d., 100 tons Dacca at 12s. 6d., and 100 tons (on the spot) 13s. 9d., 700 tons Rangoon at 12s. 6d. to 13s. 1,100 tons Bassein at 12s. 3d. to 12s. 7½d., a cargo of 700 tons soft grain, of next season's shipment, on the basis of 11s. 6d. for Rangoon, and 600 tons Nakrenzie at 11s.

SUGAR.—The demand has been of quite a partial character, and where directed towards useful refining grades has found a difficulty in supplying itself. Common descriptions have in some instances been rather more readily obtainable, by reason of a willingness of holders of secondhand lots to realise. We have no transactions to report in Manila, nor privately in Penang. In public sale 1,600 bags brown and middling yellow Penang realised 31s. 6d. to 33s. 6d. Private returns make the imports of raw sugar into the four chief ports of the United Kingdom, to the 19th Oct., 440,100 tons, against 441,100 tons in 1866. The clearances for home consumption, 425,700 tons, against 394,340 tons, and the stock at that date, 182,080 tons, against 223,830 tons.

SPICES.—Cinnamon: The quarterly sales commenced on the 28th inst., only 1500 bales Ceylon have been placed on offer. We quote 1st quality 1s. 9d. to 2s. 9d. per lb.; 2nd, 1s. 5d. to 2s. 6d.; 3rd 1s. 3d. to 2s. 1d.; 4th and Jungle, 10d. to 1s. 8d. Cloves: Penang descriptions are rather cheaper, and 8 cases fair quality sold at 10¾d. per lb. Mace: Remains firm; 12 cases Penang at auction, mostly sold at 2s. 11d. to 3s. 4d. per lb. for middling to fair palish, and 1s. 6d. to 2s. 4d. low red to middling reddish. Nutmegs: Medium sizes 1d. to 2d. per lb. lower; other kinds firm; of 129 cases Penang at auction, half sold at 2s. 11d. to 4s. per lb. for middling to fine bold, 1s. 3d. to 2s. 4d. ordinary small to fine medium.

SAPANWOOD.—Good Manila wanted, and dearer; other sorts steady: of 82 tons Manilla at auction, one-fourth sold at £7 to £11 12s. 6d. per ton; of 59 tons Siam, half sold at £11 to £12; of 43 tons Ceylon, half sold at £8 to £11 15s.

SHELLS.—Market steady; and 166 cases Manila Mother-o'Pearl realised in public sale £7 15s. to £7 17s. 6d. per cwt. for fair qualities.

TIN.—Since our last report this market has been very quiet; transactions mainly confined to Straits, in moderate quantities, at £89 to £90 per ton cash, or nearly so, on the spot, and £90 10s. to £91 10s. for near to distant arrival. The market has assumed a firm tone at its close. Banca, in Holland, after being quoted 53¼, is now rather stronger at 53½ to 53¾.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 10s. to £7 15s.; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £7 15s.; rails, £6 5s.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £82 to £84 per ton; yellow metal, 7d. to 7¼d. per lb.

LEAD, &c.—English pig, W.B., £21 15s.; shot, patent, £23; shee

Digitized by Google

£20 12s. 6d.; spelter, £21 7s. 6d.; zinc, English sheet, £26 to £26 10s.; quicksilver, £6. 17s., in bottles of 75 lbs. each.

The following is from the Circular of Messrs. French and Smith:—Business has been quiet, with but little change in prices. Iron is without alteration. Copper a shade firmer. Tin, English, in steady inquiry. Tin plates quiet. Lead rather easier. Spelter has been freely dealt in at £21 10s.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

Freights to the Eastern ports are firm, at previous quotations. Coal freights from the Northern outports remain unaltered, and vessels are somewhat in request.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £47. For Singapore: £32. For Shanghai: £56. For Saigon: £50. For Yokohama: £50. For Batavia: £27. For Colombo, £29. For Galle, £35. For Chefoo, £57 From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 3s. For Singapore: £1 9s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 8s. For Chefoo: £2 15s. For Trincomalee, £1 17s. For Galle, £1 13s. For Colombo, £1 9s. For Manila, £1 5s. For Batavia, £1 10s.

CASUALTIES.

The Diana, Teengs, from Batavia, arrived at Brouwershaven Oct. 29 with loss of both anchors and chains, and was lying at her kedge anchor.

The Lord Raglan, Williams, from Manila, with sugar, which arrived at Falmouth Oct. 30, was leaky.

The Colombo (Italian barque), of Spezzia, which sailed from Cardiff to Galle Oct. 25, with steam coals, without a Channel pilot on board, was seen Oct. 27 at the north end of Lundy Island with signals of distress flying, and was afterwards run ashore on the east side of the island in a sinking state. The Vanderbilt (s.) proceeded from Bideford to get her off into a place of safety; but on the 29th she took fire, and was burnt to the water's edge. Most of the sails have been landed, and portions of the wreckage have been saved.

The Amazon, Dannberg, from Sourabaya for Rotterdam, arrived at Falmouth 27th October, with damage to starboard side, having been in collision with a barque, supposed Spanish. The master, mate, and a seaman jumped on board the latter vessel.

Advices from Amsterdam, dated 25th October, state that the Salatiga, Kettler, from Batavia to Rotterdam, which put into Algoa Bay 23rd July, leaky, would be sold. A portion of her cargo, as well as the remainder of the cargo of the Krimpenerwaard, from Batavia to Rotterdam, wrecked at the same place subsequently to 22nd July, would be brought on to Rotterdam by the ship Ilva.

MISCELLANEOUS.

Captain A. Nicolson, of the Argonaut, which arrived at London Oct. 29, reports that he left Foochow on the evening of the 10th July, made the passage to Anger in 39 days, and from Anger to dock in 71 days, making a total of 110 days from Foochow to London.

In the month of Sept. last 4,281 vessels, 1,273,867 tonnage, employed in the Foreign Trade, were entered inwards, and 5,294 vessels, 1,416,058 tonnage cleared outwards. In the corresponding month of 1866 the numbers were respectively 3,786 vessels, 1,123,546 tonnage, and 4,627 vessels, of 1,244,033 tonnage.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring espatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them

---

NOTICE TO SHIPOWNERS.
SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

W. CLOUGHTON, Managing Director.

AUGUST BEHN,
Chairman of the Board of Administration of the Germanic and International Lloyd's.

* The agents appointed to foreign ports represent the society where no district association has been formed, and have to report upon the condition of any vessel, in case no fit person should be available as surveyor for the Germanic and International Lloyd's. They may, however, appoint for any one survey any competent captain of a vessel, or any other competent person as an assistant. They have further to watch over and extend the interests of the society, and to report upon all matters which may be considered as useful to the society.

NOW READY, PRICE 21s.

Entirely free from Veneer. A large general assortment always on view.

IRON AND BRASS BEDSTEADS

In the choicest Designs. 2,500 Bedsteads kept in Stock.

HEAL & SON'S PATENT HORSEHAIR MATTRESS

prevents the material from felting into a mass, as is the case in all ordinary Mattresses. The Patent Mattresses are made of the very best Horsehair, are thicker than usual, and the prices are but a trifle higher than those of other good Mattresses.

ILLUSTRATED CATALOGUES

Of Bedsteads and Bedroom Furniture, designed for INDIA and the EAST, SENT POST FREE TO EVERY PART OF THE WORLD.

HEAL & SON, Bedstead, Bedding, and Bedroom Furniture Manufacturers 196, 197, 198, Tottenham-court-road, London, W.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist's Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

BISHOP'S

GRANULAR

EFFERVESCENT CITRATE OF MAGNESIA,

INVENTED, INTRODUCED, AND PREPARED BY

ALFRED BISHOP, Manufacturing Chemist

17 & 18, SPECK'S FIELD'S, MILE END NEW TOWN, LONDON.

THIS perfectly white and delicately clean granulated preparation possesses remarkable effervescent qualities, which far surpasses the ordinary Seidlitz Powder in its cooling, refreshing, and mild aperient properties, as well as in its flavour as a saline draught. It is particularly well adapted for women and young children, on account of its most agreeable flavour and mild effect.

N.B. The genuine has the name BISHOP upon the Bottle, also the Name and Trade Mark upon the Label, and is sold in convenient sizes, and secured in so perfect a manner that it may be shipped with safety to any part of the world.

Manufacturer also of Granulated and Effervescent Carbonate of Iron, Citrate of Iron, Citrate of Quinine, Citrate of Quinine and Iron, Carbonate of Lithia in Tubes, Citrate of Lithia, Vichy Salt, Seidlitz Mixture, and all other Granulated Preparations.

IN CHANCERY.—CAUTION.—BISHOP'S GRANULAR EFFERVESCENT CITRATE OF MAGNESIA.—Mr. Bishop, having discovered that the Label which he has used for the last five years was being imitated, recently applied to the COURT OF CHANCERY for an INJUNCTION to restrain such imitation. The injunction was immediately granted, and the defendant was ordered to pay all Mr. Bishop's costs and destroy the labels complained of.

Mr. Bishop is determined to stop the imitation of his label, and will, without notice or delay, take proceedings in Chancery against any person who may copy or colourably imitate the same.

HOLLOWAY'S OINTMENT and PILLS.—EXPERIENCE BEFORE AUTHORITY.—For nearly the third of a century have these remedies stood in the foremost rank for overcoming ulcers, sores, swellings, rashes, and all descriptions of skin diseases. At first the faculty denounced these medicaments, but the experience of sufferers soon overthrew all interested opposition. Those whom Holloway's medicines had cured told other invalids the benefit they had derived from their use; these in their turn tried them, found equally satisfactory results, and thus are these admirable curatives used and prized throughout the habitable globe. The Ointment has always been applied with the most marked success in erysipelas, varicose veins, swelled ankles, and numberless other inflamities by which thousands around us are sorely pressed.

THE

SILICATED CARBON WATER FILTERS,

FOR

DOMESTIC, MANUFACTURING, AND GENERAL PURPOSES.

The next inward mail, with Hong Kong dates to Oct. 15, is due on the 27th inst. The latest telegrams are, from Hong Kong, via Galle, to Oct. 25; from Shanghai, via Kiachta, 22nd Oct. (received on the 12th inst.).

THE MAIL SERVICE.

The terms of a new contract have been settled with the P. and O. Company. The Bombay mail will be weekly, the Calcutta and China fortnightly. The latter to be despatched every alternate Friday, and arrive every alternate Monday. The Marseilles route is adhered to. China, Calcutta, and Australian steamers connect at Galle as at present. The new service will commence in February.—See page 845.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer Syria, arrived Nov. 14.—From Hong Kong: Mr. Ingram, Mr. Alfred Laurie, Mr. P. Gomes.

To Gibraltar, per P. and O. steamer Ripon, expected to arrive Nov.—From Hong Kong: Brigadier J. Ferreira Mendes, Dr. Alexandre Meneses de Tavora, Messrs. K. Fonseca, Eams Caleras, Paul Lerra, Z. Elela, and Juan Zarogosa.

To Southampton, per P. and O. steamer Ripon, expected to arrive Nov. 23.—From Hong Kong: Mr. Jno. Oliver and servant, Mr. Chas. T. Haggens, Dr. Kane, Mrs. Rosina A. Record, Mr. J. Mousley, Mr. W. Boost, Mr. T. Acton. From Singapore: Mr. Tizzard, Mr. Lys, Capt. Mott.

PASSENGERS OUTWARD.

Per French steamer Moeris, from Marseilles, Nov. 19.—(Booked from London.)—To Hong Kong: Mr. E. W. von Bergen, Mr. R. M. Hobson. To Singapore: Mr. and Mrs. Lisle. To Ceylon: Mr. J. B. Pennington, Mr. D. Jackson, Major Chadwick, Mr. G. S. Williams, Mrs. Williams, Mr. W. H. Gray.

Per P. and O. steamer, from Marseilles, November 20.—To Shanghai, via Bombay: Mr. R. C. Antrobus.

Per P. and O. steamer Pera, from Southampton, November 20.—To Yokohama: Mr. and Mrs. McDonald, two children, and two servants. To Hong Kong: Mr. W. H. Hooper, Lieut. Dawson, Mr. Morris. To Singapore: Mr. F. A. Sheppard. To Ceylon: Mr. Armitage, Mr. H. G. Lavie, Mr. Reck.

From Gibraltar.—To Singapore: Mr. Wright.

From Marseilles, Nov. 28.—To Singapore: Mr. Jose, Mrs., and Miss d'Almeida, Mrs. Veige. To Hong Kong: Mr. Tait, Mr. Pedder, Miss Marsh, Mr. and Mrs. G. N. Minto, Mr. R. H. Bruce, Mr. G. A. Medlen. To Ceylon: Mr. and Mrs. Gunter. To Penang: Mr. P. Nieuhuys. To Shanghai: Mr. Rodocanachi, Mr. E. L. Livingstone.

Per P. and O. steamer, from Southampton, Dec. 4.—To Ceylon: Mr. and Mrs. W. Thompson, Mr. Hoyes. To Singapore: Miss Mary Thompson, Rev. B. and Mrs. Morrell, Mrs. Willans and two children, Miss Willans. To Hong Kong: Mr. N. J. Hannen.

From Marseilles, Dec. 12.—To Yokohoma: Mr. R. E. Price, Mr. King, Mr. Vernede, Mr. Mottn, Mr. Jacquenot, Mr. Still. To Shanghai: Rev. F. King, Mr. F. King, Mr. E. C. Essex. To Hong Kong: Mr. H. Smith.

Per P. and O. steamer from Southampton, Dec. 20.—To Hong Kong: Mr. H. Voss. To Ceylon: Mr. R. E. Crickett, Mrs. F. B. Templer, Miss Templer, Mr. F. Templer.

From Marseilles, Dec. 28.—To Ceylon: Mr. W. T. Sendall, Mr. J. S. Findlay

Summary of News from the Far East.

JAPAN.

H.M.S. *Pelorus* arrived at Hong Kong on 25th September, with dates from Yokohama to 16th, or five days later, but there is no news of any importance. The *Pelorus* reports the outward mail of July 26th going in as she left port.

Four men belonging to H.M.'s 9th Regiment arrived at Hong Kong in the *Pelorus* from Yokohama, to undergo a term (18 months) of imprisonment in Victoria Gaol for having attacked and robbed the Japanese mail in the interior of the country.

CHINA.

TIENTSIN.

The correspondent of the *North China Herald* writes:—

Since writing to you on the morning of the 6th September we have been put in possession of further and more accurate news regarding the outbreak at the town of Wangkeakow, 90 li from Tientsin. It appears that it was a body of mounted robbers, or rebels as people choose to name them, who first commenced the outbreak by plundering the money shops and pawnbrokers' hongs, and who were finally aided by the starving people to plunder the opulent inhabitants generally. Considerable fright was created amongst the people in Tientsin city and suburbs by the collecting and despatching of troops during the night of the 3rd. The number of rebels who were reported to have appeared at Wangkeakow was at first greatly exaggerated, and the inhabitants of Tientsin were led to think that a large body of rebels were close at hand and were meditating an advance on Tientsin; hence the fright and great excitement during the whole of the night in question among the Tientsin people. It appears that, on the troops reaching Wangkeakow a few shots were exchanged with the rebels, after which the latter mounted their horses and went westward, the Imperial legions being left masters of the field. They accordingly declare themselves victors in the battle of Wangkeakow.

CHEFOO.

A correspondent writes from this port as follows:—It is reported that, in forcing their way through the Imperialist lines, the rebels seduced 10,000 Imperial soldiers to join them; but inasmuch as they did not pass through the said lines at all, but escaped by the sea, this rumour is open to question; though it is quite probable that a smaller body may have deserted to them. The commander of the renegades is said to have committed suicide. The Taotai has spread a report that the rebels have gone to Nganhwei, but certain news has been received here of their being near Tsinan And as there are more insurgents close by there, matters are not *likely* to improve. It is a question whether the rebels will now go back to Honan or march northward towards the capital. There are rumours that Li-hung-chang has attacked and beaten them near Tsinan; but nobody believes it, as the Taotai would be only too glad to announce the fact, instead of saying that they had gone to Nganhwei. It is a critical moment for the Chinese Government, as strong bands of independent banditti are roaming through Pecheli, with whom the Honan Nienfei may at any moment join, and place the capital itself in danger. Although things are kept pretty close at Peking, it is known that the foreign Ministers do not speak of helping the Chinese Government.

Digitized by Google

Contrary to most prognostications we have had in the form of weather, nothing scarcely but rain since I last wrote to you; and the roads in town and out of it have almost become impassable. Consequently the few traders here have not moved abroad, and there has literally been no business done in imports. I understand that now all hopes are given up of gathering in a pea and buckwheat crop, owing to too much rain and cool weather. Last night the thermometer fell to 61 Fahr., and it has evidently become colder in Mongolia, as the wild fowl are beginning already to appear from thence at Tientsin. I have heard nothing further regarding the large body of rebels which lately left Shantung province for the westward.

HANKOW.

The following is the decision of the Consular Court on the bankruptcy of Mackellar and Co., which is to the effect that the net profits in the business, personal and family expenses excepted, of J. Mackellar and W. G. Gordon, or salary, emoluments, and after-acquired property of the same, be equally divided between the bankrupts and their creditors for four years.

In re MACKELLAR & Co.'s BANKRUPTCY, Sept. 16th.

This case of John Mackellar and William Grant Gordon (trading under the firm or title of Mackellar & Co.) is an exceedingly difficult and very responsible case. We have studied the evidence, and arrive at the following facts.

In the first place, the foreign firms, foreign, and Chinese banks, and the Chinese tea brokers, who kept Mackellar and Co. up in their speculations and trade, are directly responsible for the fact of their bankruptcy; but there were other firms, banks, and brokers which did not do so, and they are, of course, irresponsible. At the very outset of our reasons for judgment, we stigmatise, in conformity with the evidence adduced, with the utmost severity, those foreign firms, those foreign and Chinese banks, and those Chinese tea brokers, who allowed, nay, assisted, Mackellar and Co. to trade and to speculate far above the capital of the firm or of any means at the firm's command. We can scarcely wonder at William Grant Gordon's (the partner of the firm in China) want of judgment, when the foreign firms, foreign and Chinese banks, and Chinese tea brokers, absolutely encouraged and abetted his rash speculations, with loans, orders, and goods. The law, of course, is unable to take hold of them, and it must rest with their own consciences to affirm the morality or the reverse of such flagrant, unwarrantable and unbusinesslike proceedings.

In the second place, we object to the way in which Mackellar and Co.'s subsidiary books were kept, but as to the principal books we have no fault to find. The cash book was deficient in information, and if the court had not appointed a first-rate accountant to write up the books so it would have remained. No securities for loans, no records of godown orders, no files of these godown orders, were at all to be had, for the very sound reason that none were kept. W. G. Gordon, partner of Mackellar and Co.'s firm in China, replies to this objection by saying that among twenty or more constituents such labours as keeping accounts of his securities and filing his godown orders was unnecessary. But if the business had worked smoothly and satisfactorily, such information as this could have been furnished at small expense. The principal books, however, are in proper order, and the learned counsel who opposed for the majority of creditors "had no charge against Gordon for false entries in his books." But Mr. Evans, creditors' assignee, asserted in his evidence that, "on behalf of the majority of creditors I have given you (the learned counsel) authority to oppose Mr. Gordon getting his discharge, until such time as the accounts are thoroughly explained." The only accounts that require explanation is the cash-book, and that the accountant has done; and the bill-book, and that the accountant could not do. The securities and the godown orders are lacking in information, because no information was kept. Gordon did not only keep this information in 1867, '66, or '65, in the background but he has kept this information back in his business as a general rule. However flagrant such a proceeding may be (I am informed by certain merchants that such proceedings are not unusual in China), I cannot prevent myself from thinking that Mr. Evans has adjourned Mr. Gordon's discharge to the "Ides of March," for explanation cannot be given, as no information has been kept. We are sorry to differ from one of the assignees, but we cannot assent to the proposal.

In the third place, we have studied the evidence, and are convinced that W. G. Gordon's speculations betray, not fraud or any criminal misdemeanor, but want of judgment. His land speculations; his purchases of teas in previous years at 2 or 3 taels per picul above every other merchant in the place, and that too in a falling market at Shanghai and at home; his purchases of tea this season—the immediate cause of Mackellar and Co.'s bankruptcy; and even the keeping of his books expose a mind not lacking in force of character or want of will, but in business-like judgment. A man surrounded by difficulties such as Gordon was, ought to have stopped long ago, although no pressure had been exerted against the firm. The firms who assisted Gordon said nothing, the banks said nothing, the Chinese said nothing, during the whole of his career till now. It was impossible for Gordon during the last two years not to know he was in difficulties, and that unless trade revived, of which there was no visible prospect, insolvency must come as a matter of course. Whenever he found himself in difficulties, not anticipating the future, he ought to have stopped.

In the fourth place, we think Gordon has committed a most grievous fault—he traded recklessly; but, according to the evidence, there is no reason for accusing him of any criminal charge; no fraud, no misdemeanor under the Bankruptcy Act, has been proved against him. We will not imprison him; that would be a sentence of revenge; as he has been guilty of no criminal charge there is a far better plan of punishing a bankrupt—that is, to attach his property for a specific period. Our judgment, therefore, is, that the assets, public and private, of John Mackellar and William Grant Gordon be distributed among the creditors *pro rata*; that a discharge be granted to the bankrupts, coupled with the condition that for four years the net profits in the business, personal and family expenses excluded, of John Mackellar and William Grant Gordon, or the salary, emoluments, and properties hereafter acquired by the same, be divided into two portions, one half to go to the said bankrupts, and one half to go to the creditors; the half to go to the creditors to be apportioned *pro rata*.

In case of appeal the bankrupts to have the legal fees out of their present estate.

JOHN GIBSON, Barrister at Law, Judge of the Court.

KIUKIANG.

The following account of a fracas alluded to in our Shanghai news is from the *Hankow Times* of Sept. 16:—

There are few of our readers who have not, when visiting our neighbours at Kiukiang, spent a few pleasant hours at the Lushan Hills; and many have been the regrets that we in Hankow had not a similar range of mountains in our immediate vicinity, where, in the delightful weather which precedes and follows the extreme heat of summer, we could snatch a few hours from the dull monotony of business routine and the sameness of our sandy plain.

In the spring of the present year a company was formed at Kiukiang to build and furnish a bungalow at the Loong Tarn—a small land-locked pool in one of the most beautiful gorges of the Lushan Hills, about eight miles distant from Kiukiang—to which the subscribers and their friends might go and pass a few days. Due arrangements were made with the proprietors of the land and building was commenced. Some amount of trouble was experienced in getting the house completed through the opposition of a wealthy landholder, living about two miles distant; and the subject, we are informed, was the occasion of several communications between the Taoutai and one of the leading promoters of the scheme. H.B.M. Consul was also we believe, addressed on the matter.

H.E. the Taoutai, however, finding that entreaties and even threats were ineffective to induce the Kiukiang residents to abandon their privileges and their property, another course was pursued, and one of the head men of the small village adjacent was seized and bambooed. He has been left in prison; and we understand that another victim has been seized and punished—doubtless with the object of raising the animosity of the inhabitants of the village.

On Sunday morning last the object of the mandarins was obtained; for a party of four excursionists—two Englishmen, an American, and a Frenchman, whilst quietly having their early breakfast, preparatory to starting back to Kiukiang, were attacked by between 60 and 70 men, with spears, sticks, and stones, and forced to make a hasty flight along the edge of the mountain stream, along which their pursuers followed them for nearly three miles. We are glad to learn that no serious personal injury was inflicted; but the bungalow has been razed, and its contents looted.

We most sincerely hope that the matter will be taken up by the representatives of the several nationalities to which the assailed party belong. We learn that a French gunboat may shortly be expected in Kiukiang on her way hither, and we hope that H.I.M. Consul will, in conjunction with the British and American Consuls, obtain ample compensation and satisfaction for the injuries done, and for the insults offered.

SHANGHAI.

The dates are down to the 21st September, the latest mail from London being the 26th July. Telegraphic advices *via* Kiachta had been received to the 23rd August.

The Customs returns had been issued, and show an increase in the total value of the trade of Shanghai during the year of 5,000,000 taels over that of the previous year, and this notwithstanding a falling off of 4,000,000 taels in the value of exports, so that the imports show an excess over 1865 of 9,000,000. The decrease is principally attributable to a falling off of 9,000 piculs in the value of silk exported, though this was partially counterbalanced by an increase of 27,000 piculs in the export of tea. The total value of imports from foreign countries, exclusive of treasure and minus re-exports, amounted to 44,768,516 taels, and that of exports to 25,324,670, giving an aggregate of 70,000,000 taels.

The monthly return of trade at Shanghai for June shows an increase of Grey Shirting, from 141,470 pieces, in 1866, to 194,160; from 9,170 to 25,094 in Chintzes and Furnitures; from 21,098 to 55,114 in Lastings; and from 2,000 to 7,000 tons of coal. White Shirtings fell from 45,952 to 27,249 pieces; Camlets from 11,023 to 9,199; Long Ells from 12,550 to 9,300. The import of Hankow black tea was 96,653 piculs against 37,274, and of Kiukiang 16,221 against 9,417; while

Digitized by Google

46,457 piculs were exported. The total amount collected by the Customs during the month was 201,990 taels.

We (*North China Herald*) alluded last week to the fact of the *Dartmouth* having picked up the deserted barque *Siam*, laden with beancake, outside the light ship. The circumstances of the abandonment of this vessel are likely to form the subject of judicial inquiry; and in the meantime the officers and crew have been imprisoned by the Bremen Consul. The *Dartmouth* has lodged a claim for salvage against the *Siam*, and handed her over, in the meantime, in custody of the English Admiralty Court; though we presume, as her owners are a Bremen firm, any claim concerning her will eventually be tried before the Bremen Consul. As the cargo was swelling and threatening to burst the vessel, it has been landed. It is, we believe, chiefly owned by Hong Kong Chinese

An amusing instance of the paternal care exercised over their subjects by Chinese officials has occurred. A case of stabbing was brought before the Mixed Court, in which one party had been so gravely injured, that his life was in imminent danger. The Che-hsien was consequently requested to take down his deposition speedily. Being unable to come at once, the latter sent a deputy to examine him in the meantime, together with a packet of expensive Chinese medicine known as the "seven *cash* powder," which, he said, would support and cheer the sufferer during the interval. It is needless to say that the latter was not crammed with the nauseous mixture, and the would-be examiner was turned incontinently out of the hospital. Yet, strange to say, there is a fair prospect of the patient's recovery.

The quarterly missionary meeting was held on the evening of the 13th Sept., when an interesting paper on "Ancestral Worship in China" was read by the Rev. Mr. Yates.

A brutal assault was committed in the police court, which was promptly and severely punished by the sitting magistrate. The captain of a vessel in harbour had summoned two sailors for refusal of duty. While in the witness-box, giving evidence, one of the two edged gradually towards the box, and making a sudden spring struck him a violent blow in the face. He has been committed to prison for six months.

Chinkiang residents have been gratified by the discovery of coal near the port, which it is hoped may be worked with advantage.

A serious attack has been made at Kiukiang on some gentlemen who were picnicing at a bungalow belonging to one of the number, a few miles out of the settlement. The local mandarin appears to have been a party to the outrage.

CUSTOMS NOTIFICATION.—The Commissioner of Customs having communicated with the Inspector-General on the subject of the Chinese Pilotage Regulations, the undersigned has been instructed to state that the said Regulations, published on the 22nd of April, 1867, for all the Treaty Ports, and notified here on the 26th day of July last, and which Regulations have been approved of and assented to by their excellencies the representatives of France, the United States, Prussia, Russia, and Great Britain, the treaty-power Ministers resident at Peking, will be in force at Shanghai on and after the 1st of October next, after which day pilotage in the adjacent waters can only be carried on by persons licensed at this port in accordance with Article 6 of the said Regulations.—JAMES BROWN, Deputy-Commissioner of Customs in Charge. Office of Maritime Customs, Shanghai, September 20th, 1867.

The following cases in bankruptcy have been heard and reported in the *Supreme Court and Consular Gazette*:—

C. Treasure Jones for various proofs of debts, amounts tendered including W. H. Lay, 760 taels; Watson and Co., 606; Hall and Holtz, 1,893; J. W. Morice, 600; G. Cowie, 167; Thos. Smith, 385 and 150. Mr. Mitchell applied on behalf of the bankrupt for an adjournment for two months. The creditors were agreeable. The meeting was adjourned accordingly to Monday, November 25th.

E. Warden.—Bankrupt to pass his last examination. No accounts were filed. Mr. A. Phillippe, for Comptior d'Escompte, produced an account of a claim for default in delivery of coal. This was deferred for reference. Meeting adjourned to Monday, 25th Nov., 1867.

Meeting of creditors, &c., of Kenneth Mackenzie fixed for 1st October; also of Samuel Clifton, and of Dent and Co. on 23rd Sept.

The estate of Smith, Kennedy, and Co. has been taken out of the Court and will be wound up under inspection. A meeting is announced for the 18th September at Kiukiang, of creditors of Hay and Co., merchants of that port, and declared bankrupt. Mr. Medhurst, the Consul at Hankow, was in Shanghai, in reference to the judgment of the Court in the case of E. A. Reynolds.

In addition to the above notification from the Customs the following has been issued:—

Whereas it is provided by the China and Japan Order in Council 1865, Sections 84, 85, 86, that if any British subject violates or fails to observe any treaty stipulation, he shall be liable on conviction to a penalty not exceeding the penalty stipulated for in the treaty.

And whereas it is also provided that Her Majesty's Minister in China may from time to time make regulations for the peace, order, and good government of British subjects resorting to or resident in China, and for the observance of treaty stipulations, and for the maintenance of friendly relations between British subjects and Chinese subjects and authorities, and may by such regulations impose certain penalties.

And whereas certain regulations, having been duly promulgated under date April 24th, 1867, entitled "Chinese Pilotage Regulations," with the said Minister's sanction and authority, and declared urgent, with order to give them full effect in the several consular districts in one month after the date on which they shall have been affixed and kept exhibited in the public offices of the consular officers.

And whereas by Article 10 of the aforesaid regulations it is enacted that any one piloting without a licence, or making use of another's licence, shall be subject to prosecution before his own authorities, who will deal with the offender in accordance with the laws of his country; and any pilot lending his licence will be proceeded against and dealt with in the same way, in addition to forfeiting his licence.

Be it now ordered that if any British subject in China violates or fails to observe this Article X. of the aforesaid "Chinese Pilotage Regulations," it shall be competent to Her Majesty's Consular officers, on conviction, to punish such offenders by a fine not exceeding one hundred dollars.

And the foregoing regulation, being hereby declared urgent, shall take full effect in the several Consular districts in one month after the date on which it shall have been affixed and kept exhibited in the public offices of the Consular officers, and so remain in force until disapproved by Her Majesty, such disapproval to be signified and made public in the manner provided by Section 85 of the said Order in Council.

Given under my hand and seal at Peking, this 5th day of September, 1867. RUTHERFORD ALCOCK.

HONG KONG.

The latest dates are to the 27th September, or three days later than received by the French mail. The latest London date was to the 10th August. The steamer *Achilles* is announced to leave for London, calling at Singapore, Penang, and Mauritius, on 2nd October. She is reported by telegram as arrived at Penang. The steamer *Far East* is announced for New York by Messrs. Gibb, Livingston, and Co., should sufficient inducement offer. The British bark *Foochow* was to be sold by auction. The *Great Republic* leaves for San Francisco on the 15th October.

The steamer *Courier* lately despatched from Glasgow under Russian colours is announced to leave Hong Kong for Yokohama on the 28th Sept.; consignees, Russell and Co.

The barque *Amy Douglas* was lost about 40 or 50 miles to the northward of Hong Kong, in the late typhoon. Only one of the crew, a Malay, was saved, and his right arm was broken. He was picked up by a Chinese pilot boat, while he was floating about on a log and brought to Hong Kong. The *Amy Douglas* left on Sunday the 8th Sept., at daylight, for Amoy; in the course of the afternoon, fell in with the typhoon which carried away masts, sails, and rudder; the vessel consequently lay at the mercy of the waves,—went down at 2 A.M. on the 9th. The name of the captain was Wolfi, a German.

The *Veritas* is loading coolies for Surinam, and will be despatched about the middle of October. The *Veritas* has now a hundred and fifty of these emigrants on board, and is expected to make up her full complement of three hundred, but in the meantime, although the generality of them are quiet enough, some discontented spirits have been repeatedly clamouring for their advance, and the interpreter heard two of them hatching a plot to take the vessel and murder the crew two days after leaving port.

The Harbour-master announces for sale the hulk *Royal Saxon*, by tender, on Sept. 30.

A correspondent writes:—"Canton, Sept. 24.—Whilst the late typhoon and the magnolias of the Old Factory garden form the subject of after dinner chat amongst the foreign community, our Celestial friends seem to have a more fiery topic of conversation amongst them. In the forenoon to-day (Tuesday) another alarm of fire was given, which in the natural order of things set the Honamites in motion in order to ascertain the position of the devouring element. A run up the roofs of the shaky 'shanties and pack-houses' at the risk of tumbling down headlong, disclosed the painful spectacle of a blazing fire on the back part of Honam, such an one that only our Yeh would have rejoiced at, for it is a well-known fact that, after the destruction

Digitized by Google

of the factories in 1856, his Excellency's digestion was considerably improved, and his night's rest was undisturbed from Admiral Seymour's nocturnal game at shells. The fire seems to have originated in a large tea stores whilst a quantity of tea was undergoing the process of firing, and as it was blowing at the time almost half a gale of wind from the north, the flames soon communicated to the adjourning premises used as tea-stores likewise, resulting in the total destruction of the building with their respective contents. The teas thus destroyed are stated to have been of the description of Orange Pekoes, Capers and Canton Greens, entailing a loss on their proprietary of one lakh of dollars or thereabout. Once more the promptness and dexterity of Chinese firemen deserve to be commendably noticed, for had it not been for them the consequences would have been more serious. The fire at Cheongtam reported in my communication of the 30th ultimo, is stated to have devastated property to the extent of thirty lakhs of dollars."

One of the P. and O. Company's stewards named Thomas Fenn, committed suicide by jumping overboard from the steamer *Delhi*.

In our latest telegrams another typhoon at Hong Kong is announced, and it appears by the state of the atmosphere on the 26th Sept. that it was expected.

A general meeting of the Foochow community was held on the 9th Sept., to receive the report of the committee appointed to deliberate upon Treaty alterations. Amongst other matter, the establishment of the Le-kin system upon a proper footing, the reduction of the duty on tea, and the opening up of the mineral resources of China are to be forcibly urged upon H. M. Minister.

Mr. Swinhoe, of H. B. M. Consular service, has lately paid an official visit to the Pescadores, to report on the quality of coal existing there; and that he has spoken of it unfavourably. Mr. Swinhoe is, we believe, likely to visit Hainan so soon as Mr. Pedder's return to Amoy relieves him from his duties at that port, with a view to report on the advisability of opening it up to foreign trade. At present, the general impression of the island, as a mart, is unfavourable.

We *(China Mail)* understand upon good authority that the company who work the gambling farm have up to date lost something like four thousand dollars, so that thus far it has not been a profitable speculation. Strange to say, the bulk of gamblers consists of Europeans; and we moreover hear that the compradores of the leading houses have strictly forbidden the boys and coolies under their control from frequenting the miniature pandæmoniums which, as they truly observe, are only patronised by low classes of Europeans and a still lower class of Chinese blackguards; and the appeal to the self-respect of the respectable native domestics appears to have been successful.

The *Hong Kong Punch* of the 25th of September contains rather coarse skit on the new Gambling Act.

STRAITS SETTLEMENTS.

SINGAPORE.

The latest date is the 4th of October, or two days earlier than given in the P. and O. time table.

The *Straits Times* says:—A brief comparison which we made in our last between the cost of administration of the colony while under India, and as it is now under the colonial system, showed that the latter only exceeds the former by a marginal difference. The increase, which is considerable, in the cost of civil establishments is compensated by the reduction in the amount of our military contribution; and if the revenue keeps equal to that of previous years, there are no grounds to fear for the financial condition of the Settlements. The revenue is consequently a subject of the first solicitude, and as its rise or fall is chiefly dependent upon the rentals of the opium and other excise farms which have been periodically sold by auction, these latter must be carefully dealt with. There are numerous objections to the open-auction method of sale, such as the chances of combination or of intimidation; and we believe it is the intention of the Government to dispose of them for the future by tender. The lease of the chief farm, that of opium, expired in April last, but has been continued temporarily to the previous holder at the same rent, owing to the recent change in Government; and it is expected that a considerable advance will be bid for it as soon as it is again put up to competition. The present rent is about £50,000 a year.

The report which we lately alluded to, that it was the intention of Government to abolish the Municipal Councils at the three Settlements, is incorrect so, far as that at Singapore is concerned.

The visit of the Raja of Kedah to Singapore has resulted in the conclusion of the long-pending negotiation opened by Colonel Man for the rectification of the Eastern boundary of Province Wellesley by an agreement fixing the boundary by a straight line drawn from the Muda Pillar to the most eastern point of Bukit Martajam and a line continued thence along the rank of hills to Bukit Panchur and the Krian. The Raja in modification of our treaty with Siam, which provides for the importation of provisions from Kedal into this settlement, free of duty, is to acquire the right of levying a duty of a dollar a head on cattle, $8 a coyan on rice, $4 a coyan on paddy, and $1 a hundred on poultry so imported. This is a much more valuable concession to him than he makes to us.

LATEST TELEGRAMS.

(RECEIVED VIA GALLE, NOV. 7.)

CHINA.

HONG KONG, Oct. 15.

Another violent typhoon has occurred here, and caused immense damage to property along the shore.

The Manila steamer *Malespina* is missing.

Grey shirtings, 6½ catty, $3.50. Water twist, 16-24, $170. Tea quiet, but little inquiry; total export, 77,000,000 lbs. Exchange on London, 44½.

SHANGHAI, Oct. 9.

Grey shirtings, 6½ catty, 260 taels. Tea—Congou quiet. Silk irregular; No. 3 Taatlees, 515 taels; settlements in fortnight, 3,000 bales; export to date, 26,750. Exchange on London, 6.1¾. Freights, £3.

EXCHANGES ON LONDON.

[For dates, see first page.]

Singapore	4s. 4d.	—	4s. 4¼d.	4s. 4¾d.
Manila	—	4s. 2d.	—	4s. 3d.

At Shanghai, bills on India, Rs. 303 per 100 taels. At Hong Kong, Rs. 218 per $100. Bar Silver at Shanghai, tls. 111.4.0; at Hong Kong, 11¼ per cent. premium. Mexican dollars at Shanghai, tls. 72.9 per 100; and exchange on Hong Kong, 28½ discount. Hong Kong and Shanghai Bank shares, new, 1¼ dis.; Gas Company, par; Hong Kong and Whampoa Dock, 7 to 14 per cent., prem.; Union Dock Company, 30 per cent. dis.; China Traders' Insurance, $200 per share premium.

Exchange.—The business done in Exchange during the past fortnight has been very small. In spite of the limited amount of sterling paper placed upon the market, the closing rates of last mail have been fully maintained, and now show a slight advance. The paper sold for this mail has been almost exclusively at six months' sight, and there now seems a conviction daily growing stronger that the four months' usance as applied to the trade of China must shortly be abandoned as being both ill-advised and impracticable. The estimated amount of business by the present opportunity may be placed at £230,000, say £110,000 bank paper, and £120,000 private paper.

Bullion.—There is no movement whatever in silver bullion. A small amount of bar silver has been received from California during the past fortnight, but no sales have been effected. It may still be quoted at 1¼ per cent. premium, the last sale made having been at that rate. There is no Sycee in the market, and the value is therefore entirely nominal.

Shares.—A fair business has been doing during the past fortnight in shares. Bank shares have materially advanced, and are still in good demand at quotations given. Some transactions in old have been done at par. Steamboat shares are also in good demand, over three hundred having changed hands within the last ten days. The Union Dock Company held their annual meeting on the 19th instant. The report of the board of directors shows a total profit of $16,040 for the year or about 6 per cent. on the paid-up capital. Great dissatisfaction was expressed as to the progress of the new dock, and there are rumours of another call being contemplated. The shares have further declined, and there are sellers at to-day's quotation. There are buyers of Hotel Shares at 75 per cent. disconnt.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FARR.—On the 14th Oct., at 333, City-road, the wife of F. Farr, Esq., late of Shanghai, of a daughter.

RICKETTS—On the 1st Nov., the wife of Loftus H. Ricketts, Esq., of Banwell, Somerset, of a son.

MARRIAGES.

LAITY—NEARY.—On the 6th November, at Stoke Church, by the Rev. H. Everett, G. F. Laity, Esq., Havelock-terrace, Stoke, youngest son of the late R. J. Laity, Esq., to Anna G. Neary, youngest daughter of John Neary, Esq., Trafalgar-villa Stoke, Devonport.

WOOD—BOWRA—On the 7th Nov., at St. George's, Hanover-square, Captain Wood, to Elizabeth Fanny, relict of the late W. A. Bowra, Esq., of Surbiton, formerly of Hong Kong.

DEATHS.

BAILEY—On the 24th Sept., at the Seaman's Hospital, Hong Kong, Edward Bailey aged 30 years, native of Birmingham, England.

BOWRING—On the 8th Nov., at No. 1, Westbourne-park, Catherine, wife of S. Bowring, Esq., late of the Bengal Civil Service, aged 46.

GIBB—On the 8th Nov., at his residence, The Grove, Ramsey, Isle of Man, Mr. Duncan Gibb, one of the oldest merchants and shipowners belonging to the port of Liverpool, aged 74.

GUYER—On the 13th Sept., at Whampoa, Edward Todd Guyer, late of the Globe Hotel, Hong Kong.

HALKSWORTH—On the 31st July, at sea, in command of the s.s. Royalist, on her voyage to Sarawak, Borneo, Captain William Mette Halksworth, only son of William Halksworth, Esq., of the Colonial-office, Downing-street, and of Park Lodge, Barnes, Surrey, aged 30.

HOLME—On the 1st Nov., at Warnham Court, Sussex, after a few days' illness, Wilfred Henry, fifth son of Samuel Holme, Esq., of Liverpool, aged 24.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—We have no later market advices from this port than those brought by the French Mail.

SHANGHAI.—The business transactions in Imports have been very limited, prices show no material alteration. Grey Shirtings: Still command 2.55 to 2.62 tls. for 8¼ lbs. with a fair inquiry, and but few sellers. 7 lbs. Cloth is scarce and wanted at 2.30 to 2.35 tls. per piece. T-Cloths: Small sales of ordinary 7 lbs. at 2. to 2.05 tls. Woollens and Fancy Goods: No alteration. Metals.—Iron, Nail Rod: The business has not been large, this is however rather owing to the absence of stock than to any disinclination on the part of the Chinese to operate 2.65 tls. has been paid for a parcel, something inferior to "best assortment." Flat and Round, neglected. Lead, offering at from 4.75 to 4.85 tls. per picul; the latter figure will secure best brands. Coals: The arrivals have been excessive, chiefly Australian, and rates for most descriptions are easier. Newcastle, N.S.W., have realised for part cargo from ship's side, 11 tls., but are now quoted 10 to 10.50 tls. nominal.

HANKOW.—A quiet tone has prevailed, which has been increased by the preparations for the Chinese settling-day and festival, which took place on the 11th and 12th Sept. In Plain Cottons the demand has been almost entirely confined to Grey Shirtings and Grey Drills. The inquiry for Woollen and Worsted manufactures has been less active. Fancy Cottons have again met with attention, but prices have still a downward tendency. Grey Shirtings, 8¼ lbs., advanced to 2.7.0tls. per piece, but declined again to 2.6.0 tls, to 2.6.7 tls. per piece. White Shirtings have met with a little attention at rather higher prices. T-Cloths have been neglected. Drills have been in better request, but values have receded 2 to 3 mace per piece. Camlets and Lastings have been difficult to move, and to effect sales a reduction of 3 to 4 mace per piece had to be submitted to. Long Ells have given way in value about 2 mace per piece, and met with less inquiry. Spanish Stripes have not been asked for.

CANTON.—There is still but little business doing in Metals, at about last quotations. Settlements are as follows:—Lead, Common, $7.10 to 7.50 per picul; WB, $7.20 to 7.30 per picul; 700 piculs. Quicksilver, $72 to 73 per flask; 300 flasks.

HONG KONG.—The Corea, Osprey, and Chetah, all from London with general cargoes, have arrived. These arrivals, coming so soon after those noticed in our last, have for the time being completely paralysed the market, and prices of all classes of goods have suffered more or less. Grey Shirtings: 8¼ lbs. have been forced off to the extent of nearly 19,000 pieces at gradually declining rates, each concession in rates only leading to further reduction without bringing forward buyers. No 7 lbs. have changed hands. White Shirtings continue to be entirely neglected, and settlements are again confined to a small sale of fine quality. Grey T-Cloths had declined a good deal in value, 7 lbs. having been recently sold at $2.80 per piece. 6 lbs. are also lower, but only by a few cents in addition to the previous fall. Grey Drills: These goods have suffered like all others, and to effect sales a reduction of probably 75 cents on last quotations would have to be submitted to. Dyed and Fancy Cottons: These remain quite out of request, the only sale reported being a small one of Dyed Spots at $4.25 per piece. Long Ells continue totally uninquired for. Spanish Stripes have also been entirely neglected. Camlets: For these a few buyers have come forward, but in order to induce offers lower rates have had to be accepted. Assorted SS of best quality are not now worth more than $18.25 per piece. Lastings: A sale of 500 pieces of medium quality at $16.50 per piece comprises the whole business. The winter demand for these and the Woollen Goods had not commenced. Metals: Nail Rod Iron, no sales. Bar is in moderate demand at $3.33 to 3.45 per picul. Lead has changed hands to a trifling extent at $7.20 per picul.

COALS.—At Shanghai, English 13 taels; Sydney, 10 taels. At Hong Kong no sales, and quotations as before.

CHINA AND JAPAN EXPORTS.

TEA.

SHANGHAI.—Black Teas: During the earlier part of the fortnight, the market for Congous was very quiet, and the continued discouraging advices from home caused buyers to make lower offers. Thereupon a few purchases were made actually at London rates, but this reduction has been lost, and late settlements show an advance of one tael on last mail's quotations. Business has again been confined to medium Ningchows and Oonams, very few Oopacks being on offer. Settlements have been as follows:—5,900 chests common to fair Hobow and Oonam, at 15 to 20 tls., 11d. to 1s. 2½d.; 7,500 chests fair to medium Ningchow and Oopack, at 17.2. to 23.7.5 tls., 1s. 0½d. to 1s. 4½d. Green Teas: There has been a good business done in new Teenkais and Fychows, chiefly for the London market, at about one tael under previous rates. Several chops of the former have been taken by two English firms for shipment to the States at from tls. 38 to 42; but American buyers do not seem disposed to follow at these prices, which, taking the proportions of the chops into consideration, are only two taels under last season's opening rates. Pingsueys have been in fair demand at rather easier prices, but the quality is undesirable. Only a few chops Moyune have arrived, but large supplies were expected. The settlements comprise—2,100 half-chests Fychow, fair to good, tls. 30 to 34.5, 1s. 8½d. to 1s. 11d.; 800 half-chests Moyune, fair to good, tls. 35 to 37, 1s. 11½d. to 2s. 1d.; 13,100 half-chests Teenkai, good to fine, tls. 36 to 42, 2s. to 2s. to 2s. 4d.

HANKOW.—A moderate business had been done, the bulk of purchases consisting of common to fair Oopacks and a few Oonams, at 14 to 15 tls. per picul. The discouraging news from home had not caused a decline of more than one-half to one tael, for the teamen showed no anxiety to force sales. Settlements of common Oonams were few in number at about former rates. Quotations: Oopacks, fair to medium, 1s. 1d. to 1s. 2½d. per lb.; Oonams, fair Oonfa, 1s. 1½d. to 1s. 2d. per lb.; do., common to fair, 11½d. to 1s. 2½d. per lb.

FOOCHOW.—Congou: The market continued inanimate during the early part of the fortnight, since when, we have to report a large business for both England and Australia. Prices have ruled very irregularly, but the anxiety of teamen to realise has resulted in favour of buyers. We quote a decline of 1 tael. Souchongs: Unchanged; Pekoe: The bulk of the settlements are for Bombay; Oolong: Arrivals are in excess of last season. The market for America is not yet opened. Settlements have been:—Souchon: Fair to good 3,682 chests at 1s. 2½d. to 1s. 6d.; Pekoe: Fair to good mixed leaf, 641 chests at 1s. 3½d. to 1s. 8½d., fine to finest even leaf, 150 chests at 1s. 10d. to 2s. 4½d.; Oolong: Common cargo, 130 ½-chests at 1s. 2d.; finest, 101 ½-chests at 2s. 3½d.; Scented: Fair, 3,432 boxes at 1s. 1¾d. to 1s. 4½d.

KIUKIANG.—Black Teas: Of the arrivals, upwards of 10,000 packages, three chops of second crop Ningchow had been taken at taels 15 to 16 (1s. 2½d. to 1s. 3d.) showing a reduction of 1 to 1½ taels per picul on former rates. As usual, most of the teas had been shipped on Shanghai, and the stock on the market amounted to 2,800 packages. Green Teas: Arrivals from the country had been on a large scale, and some 20,000 packages were in stock. Buyers had been holding off for low rates, but at the last moment the settlement of 400 packages of fine Moyune at 33 taels (equal to 40 taels in Shanghai) was reported, which would probably encourage the Teamen to hold firmly.

CANTON.—Canton Congous have been taken moderately at lower prices, the reduction being about 2 tls. per picul. Scented Teas: Scented Capers have been in good demand, and 13,500 boxes have found purchasers at 11½ to 25 tls. per picul. These prices may also be considered 2 tls. below those ruling at the date of our last report. Scented Orange Pekoes maintain their value better, and of these some 8,000 boxes have been taken at 18½ to 30 tls. per picul. Canton Green Teas: Gunpowders are a shade lower, but purchasers are not eager to buy, and only 2,500 boxes have been settled.

SILK.

SHANGHAI.—The circular of Mr. Holdsworth states:—There has again been an extensive business transacted in this market, and the settlements are estimated at full 2,500 bales, consisting chiefly of chops and market Tsatlees. Prices paid have been very irregular; early in the mail, owing to the limited business then being transacted, purchases were made at about the same or rather easier rates than those ruling at the previous mail, but owing to the subsequent receipt of news from the interior, advising higher prices still ruling there for good silks, coupled with the arrival of telegrams from Home reporting the opening price for chop 3 Tsatlees to be 28s. per lb., rates here advanced, and as the Chinamen perceived the demand to be chiefly for chops and the higher classes, and the stock of these descriptions being very limited, they increased their prices until they succeeded in establishing an advance of fully 10 to 20 taels over last mail's rates for these particular grades; the lower classes, on the other hand, can be purchased at prices showing a decline on those paid last mail. The arrivals from the interior having been about on the same scale as the settlements, the unsold stock remains unchanged, say about 3,000 bales, chiefly medium and lower grades of silk.

CANTON.—Purchases have been on a small scale since the departure of the last mail, but prices paid have been higher. The crop arriving at market is of very good quality but scanty yield.

Digitized by Google

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From Newcastle, Sept. 14, Alliance; from London, Tyburnia; from Shields, Yeavering Belle; from Felix, Mendelshon (reported by telegram).

At HONG KONG.—From Sunderland, Sept. 13, Malvern; from Ramsgate, 15, Vander Palm; from Shields, Glenroy; from Newcastle, 17, Gother.

At MANILA.—From London, Sept. 13, Ercilla; from Liverpool, 15, Doriga.

At SINGAPORE.—None.

VESSELS LOADING.

At YOKOHAMA.—For London, Conrad; for United States, Pauline, Caractacus.

At SHANGHAI.—For London, Achilles (st.), Albuera, Allendale, Douglas Castle, Georges, Weymouth, Elmstone; for New York, Amicus, Onsuri, Resolute.

At FOOCHOW.—For London, Prudhoe (cleared), Canadian, Ettie, Naomi (all full), Cleveland.

At HONG KONG and CANTON.—For London, Kelso; for Liverpool, Veronica; for New York, Magnet.

At MANILA.—For London, Fortuna; for Havre, Ille et Vilainer; for Hamburg, Voladora; for Cadiz, Concepcion; for New York, Norval; for Boston, Herald.

At SINGAPORE.—For London, Sebastian Cabot, Unrivalled; for Liverpool, Eastern Chief; for Bordeaux, St. Vincent de Paul, Imperatrice Eugenie (via Penang).

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—For London, Sept., Amazone.

From HONG KONG and CANTON.—For New York, Sept. 19, Princess of Wales.

From MANILA.—For London, Sept. 19, Anne Longton; for Falmouth or Cork, 16, Fort Regent; for New York, 10, Stuart Wortley.

From SINGAPORE.—For Liverpool, Oct. 2, Janet Ferguson; from—Florence Nightingale, (Reported by telegram.)

From PENANG.—For London, Oct. 4, La Plata, Achilles (str.) (Reported by telegram.)

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: cotton and tea, £3 to £3 10s. per ton; silk, £4 to £4 10s. of 50 cubic feet. To New York £2 10s. to £3, per steamer, $45 per ton of 40 cubic feet.

At SHANGHAI.—To London: the rates remains at £3, at which first class vessels obtain good despatch; for New York, three vessels have been put on the berth at £3 5s. per ton of 40 cubic feet. In coasting charters there is very little doing.

At FOOCHOW.—To London: £3 to £3 5s.

At HONG KONG and CANTON.—For London direct no fresh charters have taken place, and the only vessel on the berth is loading at £2 10s. per ton. To the northern ports there is a slight improvement in rates to Saigon; the quotation is 40 cents per picul; to Bangkok, 47½ to 52½. The circular of Geo. Holmes estimates the number of disengaged ships in harbour (exclusive of Siamese) at 23, representing 13,920 tons.

MANILA.—The current rates for A1 vessels are for London or Liverpool £3 Dry Sugar, £3 5s. Wet Sugar, £3 10s. for Hemp, and £4 per 50 feet measurement. Same voyage from the outports £3 10s. Wet Sugar, and £3 15s. for Hemp.

At SINGAPORE.—Tonnage continues scarce, with a good demand for vessels to load from Java to Europe. Vessels on the berth for London and Liverpool direct are getting £3 dead weight and light freight.

At PENANG.—There is no vessel on the berth for Europe.

COMMERCIAL POSTSCRIPT.

The call of £10 on the shareholders of the Commercial Bank of India was not sanctioned to-day, and the case being opposed, is to be heard before the Vice-Chancellor on the 21st inst.

ARRIVALS NOT IN THE TABLES.—Oct. 15, at Queenstown, from Rangoon, M. A. Evans.

DEPARTURES.—Nov. 15, from London, for Manila, Aurelians; 10, from Newport, for Hong Kong, Aurora.

LAID-ON.—At London, for Hong Kong, Wemyss Castle.

SPOKEN.—Laura and Adele, Sunderland to Sourabaya, 38 days out; Marie, Rotterdam to Batavia, Oct. 9, 7 S. 29 W.; Thames, London to Ceylon, Oct. 12, 4 N. 29 W.

MISCELLANEOUS.—At Mauritius, Agamemnon steamer, from China, arrived Oct. 1, and left on the 3rd for London.

COMMERCIAL INTERCOURSE WITH JAPAN.—Her Majesty's secretary of embassy at Japan, in his report on the trade and commerce of Japan, gives the result of inquiries which he made on the occasion of the late visit of the foreign representatives to Osaka and Hiogo. "These ports are situated within 20 miles of each other, and about 365 miles by sea from Yokohama, on the northern shore of a deep bay on the south coast of the island of Nippon. A large portion of the native produce which finds its way into the hands of the merchants and shopkeepers of Osaka consists originally of the rents received by the daimios or large landed proprietors from the rural population in the surrounding districts. During last year 1,967 junks of 200 kokus burden and upwards entered the city of Osaka. Of these 1,843 belonged to merchants, while the remaining 124 belonged to daimios. The merchants and small traders are divided into about 200 guilds. Each guild is composed of a number of merchants engaged in some one particular branch of business; thus, there may be a Rice Merchants' Guild, a Metalfounders' Guild, or a Silk Merchants' Guild. While at Osaka I received an invitation to pay a visit to the Foreign Goods Merchants' Guilds. They informed me that their business has increased very much since the arrival of the foreigners eight years ago, but especially during the last year. Though they complained of the late rise of prices, owing to the depreciation of the ichibu, they stated that this was more than compensated for by the increased, and daily increasing, desire of the Japanese to obtain foreign articles, in consequence of which goods are now eagerly bought up, almost as soon as landed in Osaka. Until quite recently most of their goods were brought from Nagasaki, but the last year or two a brisk trade has sprung up with Yokohama, from which place they now obtain the larger portion of their supplies. There can be little doubt that the foreign settlement of Hiogo (Kobé), taken in connection with that of Osaka, will prove an important trading port. The two are almost essential to each other. Without Hiogo foreign shipping would have no safe anchorage—no means of lading and unlading. Without Osaka the foreign merchant at Hiogo would find himself exposed to the same drawbacks—the same isolation, of which there has been so much complaint at Yokohama. With Osaka as well as Hiogo thrown open; with our merchants established almost in the heart of the city, able to receive natives in their own houses, or to go and find them out in theirs, it will be impossible for the officers of the Government to keep up that surveillance and exercise that interference of which they have been so frequently accused elsewhere. Large sea-junks arrive daily from distant parts of Japan freighted with merchandise for Osaka. This they have to unload into cargo-boats, which carry it up the river. Our ships must follow somewhat the same plan. It may be an expensive and a troublesome one, but it will not place our merchants at a disadvantage as compared with the natives. Nearly every bale of English cotton now selling in Osaka has been shipped at Nagasaki or Yokohama, purchased by the native agent, shipped in a junk, and transferred into smaller boats off the Osaka. With silk and tea for their homeward freights, with a new and extensive market for their imports, and with a supply of fair coal at hand for their steamers, there appears to be no reason why the foreign settlements at Osaka and Hiogo should not become as large and thriving as those in any other part of Japan."

THE "SINGAPORE."—The story of the *Singapore's* wreck, says the *Daily Telegraph*, is a disaster, and not a tragedy, simply because the boats were kept ready, and could be lowered the moment they were wanted. If, as usually happens on certain passenger vessels, the plugs had been mislaid, the seats covered with gear and rubbish, the falls knotted or out of reach, and nothing "ship-shape and Bristol fashion," a hundred or more lives would probably have been lost, and we should have deplored the distressing "accident." This word wants to be sent into etymological exile! Innocent enough in its Latin sense, its English use has been to cover up laziness, imbecility, and neglect with excuses. "Accident" is our expression for what might have been prevented, as Chance is our vocable for causes which we cannot comprise and name. Both ought to be condemned to grammatical death on the spot, by the fact that the compartments of the *Singapore* kept her for awhile afloat though her side was stove in, and that her boats, which were ready when wanted, did their function of rescue.

NARROW ESCAPE OF THE CZAR.—The report which spread two months ago of a dangerous illness of the Czar arose from an acciden which befel him while staying at Livadia, his Crimean summer residence. His Majesty was entering the dining-room with his family and suite, when at the moment of stepping over the threshhold the ceiling fell down. In another instant the Imperial family must have been crushed in its fall. The shock was very great.

A JAPANESE acrobat, one of the company now performing at the Cirque Napoleon, fell one evening from the rope on which he was performing. He was seriously hurt, but was able to make a bow to the audience.

MR. GRAVES, M.P., and Messrs. C. E. Rawlins and P. H. Rathbone, of the Liverpool Chamber of Commerce, had an interview yesterday with Lord Stanley at the Foreign-office on the subject of the Government survey of the route from Rangoon to Western China.

MR. J. C. HALL has been appointed a student interpreter, China, Japan, or Siam Consular Service.

Continental Intelligence.

HOLLAND.

[(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 14.

Political news is very scarce. The Second Chamber of the States-General met to-day for the despatch of business. A smart debate will at once ensue, and it is considered that the position of the Cabinet is most critical, especially as that most eminent member of the Cabinet, Mr. Borret, died on Sunday last at the Hague. He was born in Bois-le-Due in 1816. Of course it will be almost impossible to find a successor to him who will dare to defend the Budget of Justice. Mr. Heemskerk, Minister for the Home Department, is appointed to hold the portfolio *ad interim*.

The rumour that Baron von Zuylen van Nyevelt would be appointed Governor-General of India, to fill the post of Mr. Myer, who was to be called back, is contradicted by the *Handelsblad*. It seems that a misunderstanding brought this *on dit* into circulation.

It is quite certain that the relations between Holland and Belgium are more friendly than they have been for a long time, which is principally due to the influence of Mr. de Beaulieu, the newly appointed Belgian Ambassador at our Court. Even the Scheldt question has entered into a phase that will not disturb those friendly relations any more, so that Belgium will no longer protest against the damming up of the Easter Scheldt, which in a very short time will be a *fait accompli*, the public works being nearly finished.

It is more certain than ever that the company for the construction of a canal from Amsterdam to the North Sea will be a failure. So much is certain—that the finances are, or will be very soon, *en deconfiture*.

Mr. Borret, the Minister of Justice, is so ill that his death may be daily expected.

COMMERCIAL.

COFFEE.—The market remains very firm and there was much demand; for Tenger sorts ¾ to 1¼c. was paid above the sale prices, and for Malang ½ to 1c. Good ordinary greenish and pale Java is very scarce; white sorts are firm. The opinion is that in the sale, to be held on the 20th inst., the ordinary sorts will be paid a little higher. For private account 593 b. Padang good white with some greenish, ex Gerredina Wilhelmina, were sold at 42¾ to 43¼ c.

SUGAR (RAW).—The market was very firm but inactive, because there is but little offered. For 895 b. Samarang, ex China No. 17, good quality some damp 34½f. was paid, and for 479 b. Sourabaya, ex Coquetdale No. 9¾, inferior quality 29f. On the 26th inst. 28,000 baskets will be offered by the Dutch Trading Companys. Stock, 89,674,820 kilo. against 37,107,371 on 9th Nov. 1866.

RICE.—Uncleaned without transactions. The quotations are unaltered.

SPICES quiet. There is, however, some demand for pepper. A lot of 3,350 b. Sumatra, fine quality, ex Bremen, was sold at 17c. in bond.

TEA.—Yesterday were sold 271/8 and 13/16 ch. green China ex Lady Louisa, the following prices were paid:—

8/8 ch. Thunkay ...	70– 90c.	156/8 to 6/16 ch. Uxim...	70-210c.
2- „ Hysant Schin	70 —	29- — Imperial	175-230
44- „ Hysant	100-190	32- to 7/16 Gunpowder	210-275

TOBACCO.—For Java there was much demand, and the good qualities were sold at high prices. The important sales, which are to be held here and at Amsterdam these days, will have a good result. 365 b. Java Blitar ex Yokohama, and 169 b. Java Tandem, besides 55 b. do. A.M., were sold at very firm prices. The market is also very firm for Manila, and same lots brought higher prices. 40 b. Cagayan and Isabella, ex Her Majesty, were offered in auction.

INDIGO.—67 ch. were sold at firm prices, and high terms were paid for fine quality.

COTTON.—With a good demand for export 1,900 b. were sold at very high prices.

MANUFACTURES.—The market is unaltered. The quotation is for 6-4ths Madapollams and Calicots 4.40f.; No. 28 Warps 11⅜d., No. 14 11¼d.; No. 30 Cops 10½d.

TIN.—2,000 slabs Banca were sold at 53f., 1,200 do. at 53¼f., and 250 slabs Billiton at 52f.

ARRACK.—Ex Hendrika were sold—74 casks Batavia at f.227.65, 20/1 to 10/2 at f.225.65, 30/1 to 50/2 at f.215.50, 95/2 at 231f., 46 do. Indramayoe at 146f.

RATTANS.—170 piculs ex Nederland en Oranja were sold; 250 pic. ex Cortgene; 402 pic. ex Eva Johanna; and 50 pic. ex Maarten van Rossum.

HIDES.—The following transactions took place:—313 p. Padang Buffalo ex Gerredina Wilhelmina at 27 to 32c.; 333 p. Padang Cow at 40 to 45c.; 287 p. Sourab. Cow at 44½c.

MISCELLANEOUS.—Java and China Camphor 78c.; Cubeds 30c.; Japan Wax is very scarce and the prices are very high. Of preserved Ginger the stock is exhausted. For 240 ko. Bourbon Vanilla 5f. to 8 per ½ kilo. was paid. Gum Damar, f.4.3.

TOBACCO.—Of the 4,718 b. Java trade marks TANL and SR was only a small parcel sold at 29 to 152c., another part was bought in at 25½ to 150c., and the rest retired.

MONEY AND STOCK MARKET.—The general appearance is somewhat firmer, operations continue, however, to be extremely limited. Dutch, Two-and-a-Half per Cents., 53½; Three per Cents., 63; Four per Cents., 84; Trading Company, 135¼; International Bank, 50; Rotterdam Bank, 99¼, 100¼; Netherlands Bank, 248.

BANK DISCOUNT.—3½ to 4 per cent.

EXCHANGE.—London, 3 mo., f.11.85½; 2 mo., f.11.87; short, f.11.92. Paris, 3 mo., f.47.10; 2 mo., f.47.15; short, f.47.40. Hamburg, 3 mo., f.35; 2 mo. f.35.05; short, f.35.20.

SHIPPING.

PASSENGERS OUTWARD.—For Java, per Mina: Mrs. Hinsen and family, Mr. Mara and family, Mr. Engelhard and family, Messrs. Repelius, Burgerhoudt, Tyll, Terspill, Hellendoorn, J. Harders, and Wertzler. Per Electra: Messrs. E. V. Jeltes, W. F. O. Hoyel, A. G. R. Maurenbrecher, E. E. O. Otken, J. J. van Oostersee, G. T. Albrecht, J. C. Cloesmeyer, L. M. Jolly. Per Christina: Mr. A. Salm and family, Mr. L. A. M. Riemens and family, Messrs. D. Nuysink, F. F. de Boer, F. W. van Leeuwen, Lindhout, Smit, C. de Roo, and Grondhout, Mrs. J. Lindeman, Miss A. Woortman. Per Landbouw: Mr. J. G. Buekers, Mrs. Heintze-Hageman, Mrs. Scheuer and family, Mr. van Beusekom and family, Messrs. Oster, Rykschroef, Reif, van Gelsteren, A. L. van Hoogstraten, Ohl, Reitzemat, and Beuckers.

ARRIVALS.—Nov. 6, at Texel, from Batavia, H.M. St. Java, Electra Vooruet; from Sourabaya, Christina; Nov. 11, at Hellevoet, from Sourabaya, Amazon.

DEPARTURES.—Nov. 9, from Texel, for Batavia, Landbouw, Admiraal de Ruyter; for Japan, Prinses Amelie; Nov. 10, from Texel, for Sourabaya, Mina; Nov. 13, from Texel, for Batavia, Willem II.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, November 18.

The Russian *Bulletin of Laws* gives official notice that the Emperor has issued orders to abandon the quarantine to which raw cotton was hitherto subjected at the Russian frontier on arrival from Khiva, Khokand, and other parts of Central Asia, passing through the Custom-houses of Orenburg and Siberia.

The Minister for the navy has chartered four vessels from the house of Messrs. Pallisen to convey 8,500 kools of flour to the Amoor. They are taking in their cargo with all despatch, and will sail from Cronstadt at the end of this week.

The Central Commission, appointed by the Russian Government to draw up the proposed alterations in the tariff, is to meet at St. Petersburg this day, being the 1st of November, old style.

The *Siberian Messenger* complains of the low state of education in the province from the want of a sufficient number of teachers, who are so badly paid that men of education find no inducement to devote themselves to the profession, and can make a better livelihood with greater facility in some other career. There are only 560 elementary schools in the whole province, with 12,178 scholars, whilst there is room for more than double those figures. It concludes by expressing a hope that the Government will send out a number of properly qualified teachers, under contract to act as such for a certain numbe. of years.

One day last week the splendid African elephant in the St. Petersburg Zoological Gardens fell suddenly ill and expired the same evening. It was a great favourite of the public, being quite tame, and taught to perform many ingenious tricks. It had cost 5,000 roubles.

On the arrival of the Japanese *troupe* of jugglers in this city by steamer they proceeded on at once to Berlin, where they gave several performances, then went to Magdeburg, and thence came here, and are now gone to Vienna. During their stay at Berlin one of the party—Hang-Son by name—fell ill, and was left behind in the Catholic Hospital, and whilst the company were performing in this city intelligence was received of his death; his brother remaining with him to the last. As this was the first native of Japan that had ever died at the "centre of German intelligence and civilisation"—as the inhabitants of Berlin love to call their city, though in this instance they might have added "religious intolerance"—the question arose as to where he should be buried. The Catholic clergy resolutely refused him admission to their cemetery on the ground of his being a heathen, and I regret to add that the same refusal was made on the part of several Protestant burial grounds, so that nothing remained but to inter the corpse in the public cemetery of the poor-house, when at length the authorities of the suburb of Dorothiastadt were induced to allow the corpse to be buried in their Protestant cemetery. As the funeral took place on the 1st inst., which is one of the great Catholic Saints' days (All Saints' Day), the Catholic community was very numerously represented in their cemetery, which is just opposite the above-named Protestant one, and it therefore created much curiosity and caused a rush to witness the interment, but the corpse was buried without any religious ceremonies. The "pig-tail" of the deceased was cut off by his brother and deposited in a white satin bag, which was packed up in an ornamented box to be sent home to Japan, and buried in native earth. This death, though purely accidental, as the deceased was always weak and sickly, but would nevertheless not be persuaded to stay at home, will cost the director a deal of money. This gentleman is a German by birth, and has been for several years an officer in the Japanese military service so that he is well acquainted with the manners and customs as well as the language of the people. Before he could obtain permission to take the company out of the country he had to deposit a heavy sum as security for bringing them all back again. A part of this will now be forfeited. He also had to submit to other very onerous conditions, one of which was to pay them all in the interests of their families the remuneration of each for a whole year in advance, and as there was no opportunity to ship them he had to charter a vessel on purpose. He has given orders to have a handsome monument, with a Japanese inscription, erected over the grave of the deceased in the cemetery at Berlin.

COMMERCIAL.

The produce markets generally are quiet, but there is no indication of prices giving way. The transactions in rice have been less extensive this week than in the preceding ones, but previous rates were easily obtained, and as the stocks are much reduced, and no large supplies expected for the present, no reduction of prices is anticipated. Cassia lignea continues in demand, and a further rise has been effected; the 1,200 chests lately arrived from Canton, per *Peru*, are not yet in the market. There is an easy sale for pepper at full quotations. Spelter is calm, the prices demanded being too high to attract many purchasers; the only transaction reported being 5,000 centners for December delivery at 14 mks. 6 sch. banco. The money market is rather easier, discount 2½ per cent.

SHIPPING.

SAILED.—Marie to Macassar; Isabelita to Manila.

LOADING.—Friesland for Batavia; Schwan for Singapore; Herman and Emma, Amaranth, and Mobil, for Hong Kong; Miranda for Hong Kong and Shanghai.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON: SATURDAY, NOV. 16, 1867.

THE NEW MAIL CONTRACTS.

AT length the terms of a new contract for the conveyance of the India and China mails have been arranged with the PENINSULAR AND ORIENTAL COMPANY; and the new service, which will come into operation in February next, will be organised on a basis which in most respects must be considered very satisfactory. The contract is for a longer period than the previous one (which was for seven years), and its terms are considerably higher. On these two points we are unable to give more precise information at present, it being considered inexpedient to publish full details until they are submitted to Parliament at the approaching session.

The Marseilles route will still be adhered to, and between that port and Alexandria there will be a weekly direct line of steamers, in conjunction with a weekly line between Suez and Bombay. The Bombay mails will be made up in London each Friday evening, and the service abroad will be arranged with a view to ensure the delivery of the homeward mails in London on Monday morning. There will be a fortnightly service between Suez and Calcutta and China, connecting at Galle, as at present; and the mails for these places will be despatched with every alternate Bombay mail. In like manner the homeward China and Calcutta mail will be timed to reach Suez simultaneously with every alternate Bombay steamer. In short, the China mail in future will be a fortnightly one, instead of twice in the calendar month; it will be despatched every alternate Friday, and delivered here, all circumstances being favourable, every alternate Monday. On this side of the Isthmus the whole system will consist of a weekly vessel between Marseilles and Alexandria direct, with another to and from Southampton, touching at Malta as at present. It will be observed that no contract has been made for a line between Brindisi and Alexandria; as the port of Brindisi could not be substituted entirely for Marseilles, an extra service has been decided against, on the score of outlay. The Australian mail will likewise be a fortnightly one, joining the China steamer at Galle, as at present.

The advantages of the scheme are obvious. The uncertain intervals between the making up of the mails, owing to the difference in the lengths of the months and the intervention of Sundays, disappear in favour of a system of regularity and fixed days. The partial amalgamation of the two services cannot fail to have a favourable effect in promoting increased punctuality in the delivery of the inward mails. The days selected for despatch and arrival are beyond doubt the most suitable ones. And it is satisfactory to know that the new era we are about to enter upon is a permanent and not an experimental one. It will be observed that the existing system of one line between Suez and Calcutta, and another between Bombay and China—with transhipment at Galle—is still to be retained, instead of giving place to the direct trunk line from Suez to Hong Kong that we have always advocated. We must, however, rest content with this arrangement for the present, as the outlay involved by the direct line is more than the Post-office will sanction. We are assured, however, that the boat from Calcutta will always be despatched in time to avoid the possibility of detention to the China mail. It will be seen that the new service, however satisfactory in itself, will not harmonise with the French line at all; indeed, if the Messageries steamers continue to be despatched on the 19th of the month, probably in most cases the facilities at present offered by the French mail will be absolutely nullified. We imagine, however, that the French company will find it expedient to make a corresponding alteration by despatching their vessels on a given day in every fourth week, so as to bring their departure midway between two of the P. and O. mails. We trust some such arrangement as this will be urged by our own Government on that of France. We may add that Saturday is the day fixed for both arrival and departure of the Southampton steamers; and that the duration of stay at Singapore, and the question of calling at Penang, are still undecided.

THE SALT TRADE WITH CHINA.

IT is a long time since we noticed the efforts made by the Salt Chamber of Commerce, of Northwich, to induce the Chinese Government to consent to the legalisation of salt as an article of import. The subject has, however, been revived at a recent meeting of the Chamber, and in the annual report read on this occasion considerable space is devoted to it, as the appended extract will show. However praiseworthy their efforts may be, the extract does not say much for the practical sagacity of the Chamber. They contend "That instead of being compelled to pay a high price for an inferior article, an opportunity should be afforded to the salt dealers in China to obtain a good article at a comparatively small cost; and this could be afforded them by means of bonded stores such as exist in India." And yet, almost in the same breath, they express a willingness that the salt, thus introduced, should be subject to "payment of whatever duty the Chinese Government choose to levy." A very slight knowledge of Chinese character would suffice to show the Chamber that the duty the Government would undoubtedly "choose to levy," even if they allowed the article to be landed at all, would be a prohibitory one; or if it were admitted into the tariff at a fair rate it would be subjected to such illegal "squeezes," in addition to the nominal duty, as would virtually exclude it as an article of commerce.

The efforts made to induce the Chinese Government to try the experiment of importing English salt have so far been unsuccessful, as would appear from the despatch of Her Majesty's Minister there, which will be found in the correspondence; but the Chamber are not discouraged by this circumstance, remembering as they do the great difficulty and extraordinary prejudices which existed amongst their own countrymen in India, and which were only overcome by sheer perseverance. It must be evident to all who have studied the subject that a vast field exists in China for the importation of English salt, and that the people of that enormous country are compelled to use an inferior article at a fabulous cost, kept up by the system of monopoly prevailing more or less throughout the Chinese empire. No doubt a very large revenue is derived from salt, nor does the Chamber seek to interfere at all with the revenue. They contend that instead of being compelled to pay a high price for an inferior article, an opportunity should be afforded to the salt dealers in China to obtain a good article at a comparatively small cost, and this could be afforded to them by means of bonded stores such as exist in India, where they could obtain the salt on payment of the local duty, whatever that may be. From all the evidence the Chamber has been able to collect on this most important question, it would appear that it is the Junk Interest who are opposed to its being imported from this country, under an impression, no doubt, that it may interfere with their monopoly; but this is quite a mistake. All that English salt manufacturers contend for is, that the Chinese Government shall allow them to take salt to Chinese ports for sale like any other merchandise, and that bonded depots shall be provided for its reception, to which purchasers can have access on payment of whatever duty the Chinese Government choose to levy. Some extracts from Shanghai and Singapore papers will show that it only requires an astute people like the Chinese to see their own interest in a matter of this kind in order to obtain their co-operation; but herein lies the whole difficulty. The great obstacle in China, according to the documents which the Foreign-office has received and allowed the Chamber to peruse, although it has placed an interdict upon their publication, is, as already observed, the interest which the junk owners and Chinese salt makers bring to bear on the Government, which meets us with the question—"How are we to provide a livelihood for the millions of people employed in the salt manufacture?" We can only answer, hundreds perform in this country the work of the cited millions in China, and political economy would not allow Europeans to raise such a question. Under all these circumstances the Chamber are of opinion that renewed efforts should be made by Her Majesty's representatives in China to induce the Chinese Government to follow the example of Calcutta, and provide Government depots, where salt could be stored until taken out on payment of duty. The Chamber has frequently pointed out the importance of this question to our shipping interest, which requires rough freight for China, and could afford to take salt on moderate terms if the needful facilities were afforded for its reception at the ports. In concluding their remarks on this subject, the Chamber are forcibly impressed with the ignorance that prevails in China as to its real bearings, and it is only through the persevering efforts of diplomacy they can expect to succeed in their object.

From our special correspondent we have some account of the result of the Japanese Embassy to St. Petersburg, sent for the

Digitized by Google

purpose of adjusting certain differences between Russia and Japan. The island of Krafto or Saghalien, at the mouth of the Amoor, has been hitherto by virtue of a former treaty the joint territorial property of the two empires, an inconvenient arrangement that has frequently given rise to misunderstanding and disputes. The Japanese Embassy therefore, proposed to draw a line of demarcation, giving Russia the sole sovereignty over the northern part, and transferring the southern half entirely to Japan. This offer however was declined by Russia, who made a proposal to Japan to cede to them their share of the island, and as a compensation transfer to Japan the Russian island of Urup, to the north of the boundary line fixed by the treaty of January 26, 1855. As this could not be conceded an agreement has been made between the Japanese Embassy and the Russian Government, securing to the inhabitants of both nationalities on Saghalien the liberty to settle in any part of the island they might deem desirable.

THE Liverpool Chamber of Commerce has addressed a remonstrance to Sir STAFFORD NORTHCOTE, the Secretary of State for India, remonstrating against the stoppage of the survey undertaken between Burmah and the frontier of China. A more short-sighted policy can hardly be conceived, and it is very far from being creditable to Sir STAFFORD, who has evidently given way to the obstructors in his council.

We understand that the stoppage of the mail steamers *Ellora* and *Orissa* at Singapore, by the captains of H.M.' ships *Satellit* and *Zebra*, has been brought to the notice of the postal authorities and the Admiralty, and those officers are not likely to repeat the experiment.

A PAMPHLET has been put in circulation by Mr. E. H. POLLARD relative to his case with Chief Justice SMALE at Hong Kong. We understand that the Duke of BUCKINGHAM, the Secretary for the Colonies, referred the matter to the Privy Council.

THE despatch of messages from London to China via Kiachta, will cease after Tuesday the 19th inst. The latest messages from Shanghai are to 22nd October received in London on 12th November (21 days).

CHINESE ART.

The following critique on Mr. Owen Jones's *Examples of Chinese Ornament* is from the *Pall Mall Gazette*. It will be interesting to collectors of "curios" and Chinese *objets d'art*.

"To most people this will be a surprising book. With the exception of a few well-instructed connoisseurs, we have been, most of us, in the habit of regarding a love for Chinese art as something little better than a morbid passion for collecting curiosities, and a taste for old china has been Great Western, and Great Northern lines. It would be difficult to estimate the loss, not merely to merchants and manufacturers, but to the community in general. Railways are a recognised part of our social system, and we cannot do without them. It is impossible that we should allow them to drift into such financial destruction that the working could only be carried on at a loss, and therefore would cease altogether. Under these circumstances the State would doubtless interfere to prevent such a contingency. But here we come to the second part of the question. How would the shareholders fare? If the line passed into the hands of the Government they would receive nothing more than the net profits, which, considering the expenses of Government management, would represent at best a vanishing quantity. It may be urged that this is in a great degree the present position. True, but the statement admits of some qualification. Affairs are usually best conducted by those who are chiefly interested. The motive for economy enforced by a reduced or non-existent dividend, is far more powerful than all the care and conscientiousness of a public official. As we have already said, shareholders must take their own business in hand, and submit to the trouble of looking after their own interests.

A certain amount of self-denial will undoubtedly have to be practised. It was certainly pleasant to hear a chairman propose a dividend at the rate of 5½ per cent. per annum out of net earnings which, as it has proved, had no existence. These fictitious distributions must be abandoned at once and for ever. What sort of responsibility rests upon the late directors of the London and Brighton Company for pushing this system to its utmost limit we do not care to inquire. However the circumstances may be explained away, the actual fact remains, that the company has been brought to such a financial state of destitution that it cannot pay its guaranteed dividends. Apparently, when the power of borrowing ceased, the power of paying ceased also. Happily the payment of fictitious dividends has received a severe if not fatal blow. Railway companies cannot raise money on capital account as easily as they used to do. Expenses of renewals and repair of rolling stock will have to come out of actual revenue. If the shareholders get less income they will at least have the satisfaction of knowing that their property is comparatively secure. The chief sufferers by the change of system will be contractors, engineers, Parliamentary lawyers, brokers, and negotiators of that most ruinous specimen of ingenuity, Lloyd's bonds. The parties, however, have done so well in late years that they can have no reason to complain.

If directors are to blame for the present decadence of railway affairs, the ordinary proprietors have at least been *participes criminis*. It is only just to say that (to put it in moderate terms) a highly coloured report was received at a half-yearly meeting with all the outward signs of utmost satisfaction. The price of the shares rose perhaps the next day, and this simply condoned for suspicions of reticence or false statement. Besides, were not the accounts certified by competent and well paid auditors? This confidence has had most fatal results. A proper railway audit entirely independent of the directors is required, if possible appointed by the Government, and working from day to day.

Some misapprehension exists with regard to the additions to capital made by railway companies in late years. There is no doubt that the plan has been greatly misused, but it does not follow that it is altogether wrong. Take, for example, an analogous case, that of a manufacturer. He finds his business increasing, and wishes to add a new wing to his factory. Capital is required for this purpose, and he borrows or takes a partner with, say £5,000. This transaction is perfectly legitimate; but what would be said, supposing that the manufacturer were to deal with this £5,000 by constructing his new building with £2,500, and putting the remaining £2,500 in his pocket as part of the general profits of the year? This is precisely what the railway companies have done, at least in some proved cases. It is no wonder that the same kind of transaction is suspected in many others, and that railway stocks, as banking shares were last year, are favourite marks to "speculators for the fall."

THE EFFECTS OF USURY ON TRADE.

A pamphlet, entitled "Usury, its Nature and Effects," by Mr. W. C. Sillar, has just appeared, and will be read with much interest at the present juncture. It is written with the view of combating the growing tendency to usury, by pointing out its immorality and its detrimental effects on trade. Usury, says Mr. Sillar, by promising profit without risk, withdraws capital from *bona fide* trade, while trade carried on with borrowed capital undermines and destroys credit. The man who trades on borrowed capital virtually pledges his future labour, and thus becomes a slave. As a proof that usury is prejudicial to both the parties concerned, the writer points, on the one hand, to the long list of banks that have lately come to grief, each bank being, in effect, an association of usurers; and, on the other, to the still longer list of mercantile failures, arising from over-trading encouraged by facilities for borrowing capital, and by competition among inexperienced or reckless speculators furnished with money on usury by the banks. Mr. Sillar, however, goes much further than this; he regards usury as the bane of our railway system also (the usurers here being the debenture-holders), and even includes among the class thus stigmatised depositors in banks as well as shareholders. For, he argues, the man who may profess to abhor usury, and plumes himself on being content with receiving a modest 3 per cent. interest for his money from a joint-stock bank, knows full well that the bank may lend it to any financial company at a far higher rate; and for whatever ultimate harm results, he must be held responsible, on the principle "*Qui facit per alium, facit per se.*" According to this theory, all depositors or shareholders, in whatever undertaking, must be regarded as usurers. The pious old lady, and the timid clergyman, who invest their savings in the funds, are guilty of the worst kind of usury, for they lend money on interest to the State, which may use it for the most unholy of all purposes—war. Again, if investing money in public companies be usury, and if usury be an unmitigated evil, then such undertakings as our noble mail steam companies—which we regard as the chief engines by which commercial prosperity is promoted, and civilisation spread throughout the world—must be gigantic evils too; which is something very like a *reductio ad absurdum*. Regarded from this point of view, Mr. Sillar's ideas do not seem very practical. They are however expressed with great force and clearness, and exhibit a depth of thought and a degree of conscientiousness that must command the respect of even those who remain unconvinced by them.

MAIL SUBSIDIES.

An excellent leading article in the *Times* of the 9th, *apropos* of the recent heavy losses of the Royal Mail Steam Company, concludes with the following reflections on the subject of subsidies, which apply equally to the P. and O. Company at the present juncture:—"The British public is always apt to overwork the willing horse, and will often throw away a large sum in lavish generosity, or pure waste, and at the same time deal shabbily with those who do the work. Are they now prepared to see our mail companies virtually handicapped in the world's race? The company which has just suffered this crowning calamity has to contend with a French company expressly paid to beat it out of the field. It is a matter in which money must turn the scale, and is all but omnipotent, for the French lines may put their prices as low as they please if their Government is ready to pay all their expenses. It in effect may really one day come to this—that if you choose to go by the French line you may have your passage paid for you. We are not fond of subsidies, yet the present is the time, if ever, that a good word might be said for them. The British company has to fight against this difference of subsidies by better speed and accommodation, by paying more attention to the comfort of the passengers, by providing better cabins, better food, and so forth. But by the aid of money the French will not be behind us in the race, for even without Government aid their railway accommodation is quite as good as ours at lower fares. This is a question of fairness. It is also a question of the general good. Are we prepared to see our mail companies beaten by mere force of higher subsidies? A race of subsidies is impossible, or at least madness. But a great inequality suggests consideration and invites to a broad treatment of the question."

Legal.

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY.—In the case of this company, which is in process of liquidation, an application was made to the Master of the Rolls for permission to send out money to Labuan for the purpose of continuing the trade of the company. It

Digitized by Google

appeared that the main object of the applicants was to save one of the ships of the company from being sold under a great disadvantage, to defray the liabilities to which the ship was subject. Lord Romilly said that in the case of companies pecuniarily embarrassed he invariably refused to accede to applications for permission to carry on business on the ground that a loss would ensue if business were not carried on, because he had found by experience that loss did ensue when such permission was given. To accede to this application would most probably only add to the liabilities of the company.

BANKRUPTCY COURT.—IN RE LYALL.—Mr. George Lyall, a member of the firm of Lyall Still, and Co., of Leadenhall-street, and of Hong Kong. This was an adjourned sitting for examination and discharge. The debts and liabilities of the firm at Hong Kong were returned at £173,384, against assets £30,544, and the liabilities of the London house were £75,860, against which a claim of £75,860 was made upon the house at Hong Kong. Mr. Reed appeared for the assignees, and Mr. Lawrence for the bankrupt. The Court, by consent of all parties, granted an adjournment for the completion of an inquiry now in progress in reference to the bankrupt's affairs.

COURT OF BANKRUPTCY.—RE LEWIS BALFOUR, JUN.—This was a first sitting for proofs of debts and choice of assignees. The bankrupt was described, upon his own petition, as of Spring-grove, Middlesex, and formerly of No. 2, Mussion-row, Calcutta, merchant. The only noticeable feature in the case worthy of report is the enormous amount of liability, which is returned in the preliminary statement of accounts at no less a sum than £392,632. The assets are at present undisclosed. The bankruptcy is ascribed to ill-health, and to the failure of Messrs. Small and Co., East India merchants, of Leadenhall-street, to whom £172,000 appears to be due. The Agra and Masterman's Bank (Limited) are creditors for £12,138; Chartered Mercantile Bank of India, London, and China, about £30,500; the Oriental Banking Corporation, £26,651; Compte de Paris, Calcutta, £23,713; the New Consolidated Discount Company, £9,000; the Discount Corporation, £5,000; the General Credit Company, £4,000; Sanderson and Company, £8,000. No creditors' assignee having been chosen at the sitting, the case will be referred to Mr. Aldridge, the solicitor to the official assignee. Messrs. Duffield and Bruty are the solicitors under the petition.

BANKRUPTCY CASE.—IN RE FRANCIS QUITTER.—The bankrupt was an East India merchant, of Great St. Helen's and Mincing-lane. This was a prison adjudication. The bankrupt's liabilities are £9,739; good debts, £788; bad and doubtful ditto, £2,852; assets not yet realised, £3,073. This was the sitting for examination and discharge. Mr. Aldridge, who represented the official assignee (no trade assignee having been chosen), examined the bankrupt as to the item of £3,073, "assets not yet realised." It appeared that it represented consignments on which advances had been made, and that the amount would go to the secured creditors. This rendered an amendment of the accounts necessary, and his Honour directed an adjournment for that purpose.

BANKRUPTCY CASE.—IN RE W. PARKER HAMMOND.—The bankrupt was an East India merchant of Great Tower-street, trading as W. P. Hammond and Co. This was the first sitting. Debts of between £4,000 and £5,000 were proved; but the aggregate liabilities are said to be about £20,000. Mr. Thomas Brooke, merchant, of Huddersfield, was chosen trade assignee. Messrs. Linklater and Co. are the solicitors under the proceedings.

RE THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED).—MACKRILL SMITH'S CASE.—Mr. Greene, Q.C., and Mr. Lindley moved on behalf of the official liquidator of the above banking company to restrain the Sheriffs of London and Middlesex from enforcing execution of a writ of *fi. fa.* obtained against the bank by Mr. Smith for the costs incurred by him in an action brought against him by the bank (in which they failed) on a guarantee he had given. The bank claimed a set-off in respect of a debt due to them of larger amount in respect of bills of exchange given for calls. Mr. Dickinson, Q.C., and Mr. Eddis, for Mr. Smith, contended that no right of set-off existed, as the *jus tertii* intervened, Mr. Smith's attorney having an interest in the payment of the costs. The Vice-Chancellor held that whatever might be the rule of courts of law, in a court of equity no solicitor had such a lien for costs as could interfere with the right of set-off, and directed that, on payment of those costs, the sheriffs should withdraw; that proceedings under the execution should be stayed, and that the costs of the sheriff should be added to Mr. Smith's debt to the bank, and that the official liquidator should have his costs out of the estate of the bank.

NARRONDAS V. GLEDSTANES.—The question in this suit was substantially the same as that which arose in a case of "Narrondas *v.* Springfield," which was heard before the long vacation—namely, whether there was a specific appropriation of the proceeds of certain consignments of merchandise to this country to certain bills which had been drawn by the plaintiff, but not accepted. On the former occasion his honour had decided that there was, under very much the same circumstances; in the present case the defendants, merchants in London, having refused to accept two bills for £5,000, at six months, drawn on them by the plaintiffs, and not having returned the bills as to one consignment of cotton, though they had given up the cotton and the other bill. The reason alleged was that Messrs. Lindsay and Co., through whom the consignments had been made, were bankrupts, and that there was sufficient doubt on the correspondence to warrant Messrs. Gledstanes and Co. in holding their hands. The plaintiffs, a Parsee firm, had been obliged to pay the bill, the proceeds of which were in court, and inasmuch as Messrs. Gledstanes and the other parties now made no claim, and Messrs. Gledstanes and Co. submitted that they were stakeholders and trustees, the question was reduced to one of costs. Mr. Glasse, Q.C., and Mr. Eddis appeared for the plaintiffs; Mr. Druce, Q.C., and Mr. Everitt for Messrs. Gledstanes; Mr. De Gex, Q.C., and Mr. Lawrence for the assignees of Lindsay and Co.; Mr. Gardner for Messrs. Lindsay and Co. His honour said there was a clear appropriation. As to the costs, it appeared to him that Messrs. Gledstanes were bound to return everything, and, not having done so, could receive no costs. The plaintiffs did not inquire of Messrs. Lindsay and Co. as they might have done, and got the money out of court, and therefore they could have no costs. Messrs. Lindsay and Co. had caused the difficulty by not sufficiently earmarking the fund, and the same observation applied to their inspectors. All parties, therefore, must bear their own costs.

Naval and Military.

The Eclipse, 1,273 11-94 tons, 350-horse power, 6 guns, has been launched from Her Majesty's dockyard at Sheerness. She was christened and launched by Miss Florence Charlotte Walker, youngest daughter of Admiral Sir Baldwin Walker, K.C.B. The Eclipse is an improvement on the *Amazon*, and was designed by Mr. E. J. Reed, Chief Constructor of the Navy, and was built by Mr. A. B. Sturdie, Master-Shipwright, assisted by Mr. W. Mitchell, Assistant-Master-Shipwright, and is to carry two 6½lb. pivot guns and four 64-pounder guns. She is to be fitted up with 350-horse power engines by Penn and Son, and her screw will be a two-fang Griffith's. Her length between perpendiculars is 212ft.; length of keel for tonnage, 185ft. 8in.; depth in hold, 19ft. 4½in.; extreme breadth, 36ft.; breadth of tonnage, 35ft. 10in.; breadth moulded, 35ft. 2in.; and burden in tons, 1,273 11-94. One peculiarity in the vessel is that the frames are not at right angles with keel, but to the load water line. Designed load draught of water forward, 13ft. 6in.; and draught aft, 16ft. 6in. A considerable amount of iron has been used in the construction of the vessel for the purpose of strengthening her. She has iron beams, bulk-heads, deck stringers, and iron side binders. The launch was a most successful one, not a maul having to be used or a blow struck after Miss Walker had cut the cord which held up the weights which had to knock the dog shores away.

A good deal of dissatisfaction prevails regarding the flow of promotion in the navy. The *Army and Navy Gazette* observes that the Government has this year passed over a dozen of the officers who came to the front in the Crimea, in China, and in the Arctic regions, to serve those with no better claims to one honour or the other. "If war-services, decorations won in action, and distinguished conduct against the Queen's enemies govern the award, we should like to know in what respect Captains Francis Egerton, Richard Powell, and George Preedy have claims superior to Captains Arthur Cochrane, Leopold George Heath, H. S. Hillyar, Lord John Hay, John Hayes, or Sherard Osborn. If, on the other hand, it is pleaded that the election of those officers, especially Captains Powell and Preedy, was made on the grounds of their long and arduous service, apart from their opportunities in war of distinguishing themselves, then, we say, compare either their sea-going services—actual, not harbour service—with those of Captains George Richards and Sir Leopold M'Clintock, both of whom served in the Polar Seas, and the latter of whom, apart from being the discoverer of Franklin's fate was in those regions almost continuously from 1848 to 1859, and has now thirty years' sea service of no ordinary character. If length of time in the navy, or sea service, or harbour and sea service combined, are to be grounds for the award, why, we would ask Mr. Corry, step over the heads of so many deserving officers and halt at Captain Preedy? Why not go on to Matthew Nolloth, who has been five years longer in the service, and five years longer struggling through the junior grades, and whose career has been spent in remote, unhealthy stations, with actual sea-going work instead of being, as Captain Preedy has been, for the major portion of his career in the Mediterranean and home stations? Nay, why should my lords have halted at Captain Nolloth if age and long service in the humbler offices were to be weighed as a claim?"

An Admiralty order has been received at Chatham dockyard directing one of the two twin screw high pressure steam launches, returned to that establishment from the Paris Exhibition, to be fitted as a tender for the armour-clad ship Defence, attached to the steam reserve at Devonport, and the other to be retained as a tender for the iron ship Hercules, now under construction at Chatham.

His Netherlands Majesty's twin-screw armoured iron turret-ship Prins Hendrik, Capt. Jansen, has arrived at Spithead from Nieuwe Diep, on a month's cruise between the English and French Channel ports. Capt. Jansen, immediately after the arrival of the Prins Hendrik at Spithead, landed at Portsmouth, and was introduced to the chief naval and military authorities of the port and garrison by the Chevalier L. A. Vandenburgh, the Netherlands Consul at Portsmouth. The Prins Hendrik will go into Portsmouth harbour this morning from Spithead, and remain there until her departure for other ports. She will visit next in succession Plymouth, Cherbourg, and Brest, and from the last-named port return direct to Holland. She sailed from Nieuwe Diep on the 1st inst., experiencing very fine weather, and exhibiting very good qualities as a sea-boat. Very satisfactory practice with shot and full powder charges at long range was made from the guns in the two turrets between Nieuwe Diep and the English Channel. The turrets worked admirably. The Prins Hendrik is manned with a crew of 230 men, and carries two turrets each mounting two 9-inch 12-ton rifled muzzle-loading guns. She has a length between perpendiculars of 230ft., a beam of 44ft., and a tonnage measurement of 2,096. The armour-plating on her sides and the backs of her turrets is 4½ inches in thickness on a backing of the Warrior's target strength; but round the gunports of the turrets, or the turret's face proper, the thickness of the armour-plating is 11 inches. She is fitted on the upper deck with a poop and forecastle of elliptic iron form, and similar to those of Her Majesty's ships Wivern, Scorpion, and Captain. The ship is three-masted, with square yards on the fore and mainmasts and both fore and main lower masts fitted on Capt. Cowper Coles tripod principle. The machinery of the ship consists of a pair of engines each of 200-horse power nominal, driving a pair of independently working twin screws *a la* Dudgeon. Messrs. Laird Brothers, of Birkenhead, built the ship, and constructed her machinery under a special contract with the Dutch Government. The draught of water of the Prins Hendrik now is 17ft. 6in. forward, and 18ft. 6in. aft.

The following petition is in course of signature at Portsmouth and Plymouth for presentation to the House of Commons on the reassembling of Parliament:—

"To the Hon. the Commons of the United Kingdom in Parliament assembled,—

"The humble petition of the undersigned widows of seamen and marines

Digitized by Google

of Her Majesty's navy, showeth that whereas the charter of 1694 of Greenwich Hospital enacts, among other purposes, that it is 'for the sustentation of the widows and the maintenance and education of the children of seamen happening to be slain or disabled in sea service, and whereas the Act of 1696 (7th and 8th William III., cap. 21), states that the widows and children of such seamen as shall happen to be slain, killed, or drowned in sea service may in some reasonable manner be providnd for and educated; and whereas this provision is repealed in Act of 1703 (2d and 3d Anne, cap. 6), and whereas these statutes provide for the maintenance and education of the orphaned children of seamen without distinction of sex, entitling girls equally with boys to the privileges of the hospital, and that girls at present derive no benefit whatever, and that widows of seamen with families of girls only are thus deprived of that assistance which widows having sons receive. Wherefore your petitioners humbly pray that your hon. House will be pleased to apportion some part of the funds of the said hospital for the maintenance of such orphan girls, either in the establishment of an asylum, or to supplement the funds of existing charitable institutions, or in such way as to your hon. House shall seem most fit, and your petitioners, as in duty bound, will ever pray."

The Clara, East Indiaman, has been chartered by the Hon. Council of India for the conveyance of troops to India, and will be ready in the course of a few days to embark her detachment of artillery and infantry troops of various regiments at Gravesend.

In our last issue we gave the names of the colonels, majors, and captains under orders for Abyssinia. We now complete the list with the names of the subalterns, which are as follows:—1st Battalion 4th Foot.—Lieutenants: H. A. G. Todd, W. J. Holt, C. R. Durrant, W. S. Brown, G. W. Hughes, G. A. Sweny, H. C. Borret, E. M. Kemp, C. T. Hooper, B. H. Vidal, R. Simpson, C. M. Davidson, E. J. Lugard, and J. Macleod. Ensigns: J. B. Irving, J. T. Carruthers, E. R. P. Woodgate, J. C. Scott, A. W. Drury, and W. C. Harrison; Paymaster F. E. Maunsell; Quartermaster Stokes. 26th Foot.—Lieutenants: Lewis Cubitt, H. P. Wolferstan, H. C. Sharp, W. B. Wade, G. Douthwaite, A. D. Eden, H. M. E. Brunker, J. S. Greer, C. H. Dougherty, V. Davenport, and C. W. Hemphill. Ensigns: G. H. Wilson, L. Clarke, H. F. Townsend, F. S. Alexander, J. B. Clarke, J. Macfarlane, E. M. Dougherty, R. A. Gilchrist, J. de Witt Jebb; Paymaster H. A. Berry; Quartermaster W. H. Topp. 33rd Foot.—Lieutenants: M. D. V. T. Grant, E. Jervis, G. M. Douglas, E. S. Wason, C. C. Goring, F. W. Durrant, C. A. Carthew, R. M. Miller, T. J. Tidmarsh, R. S. Green, E. Quin, L. F. Heath, W. A. D. Eden, E. Nesbitt, N. V. Richards. Ensigns: H. Melliss, W. A. Wynter, D. W. K. Barr, B. J. Barton, H. A. Vincent, A. H. Fraser; Paymaster J. Thompson; Quartermaster E. Vyse. 45th Foot.—Lieutenants: F. D. Johnson, O. W. de Thoren, A. H. Lefroy, G. G. Peterkin, J. O. Gage, G. F. Chambers, J. T. Watling, H. N. Bayly, A. A. Pollard, F. T. Goad, W. P. Townley, N. H. Reene, H. Lambard, J. E. Curtis, W. Bridge, and W. F. Brown. Ensigns: W. T. Deverell, J. Humphrey, T. A. C. Grubb, B. F. Bagenal, P. C. Heath, and G. H. Fort; Paymaster H. D. Nightingale; Quartermaster F. W. Guernsey.

The chartered steamer Mendoza left Woolwich Arsenal for Abyssinia on the 4th inst. with the last battery of mountain guns, and a vast quantity of ammunition, rockets, shells, &c. Amongst the ammunition on board are 180 tons, filling 4,840 boxes, of Snider cartridges from the scene of the late explosion in the east laboratory of the Arsenal, together with 800 shells for the mountain guns. The number of persons on board is 150 officers and men of the Royal Engineers, including the 10th Company of Royal Engineers, in command of Captain Le Mesurier, with two detachments of scientific men, consisting of telegraph manipulators, artists, photographers, surveyors, well-sinkers, &c. There were also on board twenty assistant-surgeons for service in the Abyssinian campaign. As the Mendoza left she was vociferously cheered.

Lieut.-Col. Milward, R.A., Assist.-Director of Ordnance at the War Department, having been selected by Gen. Sir Robert Napier to command the mountain gun and rocket brigade attached to the Abyssinian expedition, is ordered to hold himself in readiness to embark on board the Indian troopship Crocodile, to sail on the 21st inst. Col. Milward has been granted six months' leave of absence, his duties at the War-office to be carried out in the meantime by Col. Younghusband, R.A., now in Paris.

The Himalaya, which has been taken up by the Hon. Council of India for the conveyance of reinforcements for the various corps serving in the Madras Presidency, embarked at Gravesend detachments of the Royal Artillery, from the 1st division of the depot brigade, 2nd battalion of the 19th Regiment, 2nd battalion of the 24th Regiment, 3rd battalion of the 60th Rifles, and the 76th Regiment, the whole numbering 359 non-commissioned officers and men, with 20 soldiers' wives and 25 children.

The chartered troopship Countess Russell, which has been taken up by the Government for the conveyance of troops to India, embarked at Gravesend, for Kurrachee, 309 non-commissioned officers and men, with 36 soldiers' wives and children, belonging to the 7th (Queen's Own) Hussars 21st Hussars, Royal Artillery, 36th Regiment, 104th (Bengal Fusiliers), and 106th (Bombay Light Infantry) Regiments.

The Lords of the Admiralty have just concluded another contract with the Thames Shipbuilding Company at Blackwall for a sister ship to the Volage. She is to have a very favourite old name—Active. She is to be built of iron, but is to have a wooden bottom, which is to be coppered. She is to be 2,322 tons, 600 horse-power, and is to be driven by twin screws.

Sir Alfred Horsford has received orders to proceed to Liverpool, in anticipation of Fenian disturbances, and take command of the troops there consisting of a battery of artillery, a squadron of cavalry, and a battalion of infantry.

The unarmoured screw sloop Rosario, 7, 673 tons, 150-horse power, Commander Palmer, sailed from Spithead last week on a term of foreign service on the Australian station.

The double-screw gun-vessel Ringdove, recently launched from Portsmouth dockyard, was masted last week in the steam basin of that yard, in the process of her outfit for commission.

The armament of the double-screw composite gun-vessels of the Beacon and Dwarf class is to be increased by the addition of a couple of 20-pounder breechloading Armstrong guns.

Monetary and Commercial.

The Peninsular and Oriental Steam Navigation Company have announced that the annual meeting of the company will be held on the 6th of December, but that the operations of the last financial year will not warrant the recommendation of a dividend. The directors also announce the settlement of terms of the new mail contract, to which we refer elsewhere.

The following is the text of the resolutions passed at the special meeting of the China Steam Ship and Labuan Coal Company held on the 8th inst. The renewed application to the Court of Chancery for permission to remit funds to Singapore, to release the *Mona* and carry on the company's business there, has been refused:—

1. That this meeting, having heard the statements of the liquidators and the present position of the company, desire to express their strong opinion that it is desirable, in the interests of the shareholders, to take such protective measures as are necessary to preserve the property, plant, and works at Labuan, and to prevent the staff and native labour from leaving the island.

2. That the liquidators be requested to represent to the chief clerk in Chancery the absolute necessity of an immediate remittance to the company's agents at Singapore of at least £5,000 to avoid the disastrous consequences that must ensue if not done, and the further sum of £6,000 to prevent the steam ship *Mona* from being sold at a sacrifice.

3. That it is of vital importance to the interests of the shareholders of the China Steam Ship and Labuan Coal Company (Limited), that an immediate remittance of £5,000 be made to the East, sufficient to prevent the impending sacrifice of the property of the company.

4. That it is expedient to call up the balance of the remainder of the capital of the China Steam Ship and Labuan Coal Company (Limited), for the purpose of paying off all the liabilities of the company and continuing the working of the concern until the liabilities are discharged.

5. That previous to the transfer of the property of the China Steam Ship and Labuan Coal Company (Limited), to the Labuan Company (Limited), a legal opportunity be given to the shareholders of the China Steam Ship and Labuan Coal Company (Limited), of fully considering, and, if requisite, amending the constitution of the company.

6. That until the conclusion of the liquidation a committee of three shareholders be appointed to confer with the liquidators in all matters relating to the interim working of the property, viz., Martin Ridley Smith, Esq., Dr. Cameron, D. Macgregor, Esq., with power to add two other large shareholders.

7. That this meeting, having full confidence in the present liquidators, request them to continue their services.

The official liquidators of Overend, Gurney, and Co. (Limited) have arranged for the payment forthwith of a further dividend of 1s. in the pound, which will raise the total thus far to 13s. It appears that, instead of waiting until they could realise a larger sum, they have thought it better, in the absence of employment for money, to distribute as soon as possible the receipts in hand. Each 1s. distributed cancels £200,000 of debt, and checks upon that amount the accumulation of interest.

The failure has been announced of Mr. John Swainson, of Preston, cotton and mixed goods manufacturer. The liabilities are not supposed to be of any extent. Mr. Robert L. Taylor, commission and shipping agent, has also suspended, with liabilities to the extent of £200,000. The house is of long standing, and has hitherto enjoyed high credit, and the suspension is stated to have been brought about by the endorsement of bills of Mr. H. W. Hubble, who failed some time since.

The coal mines of the East India Coal Company (Limited), situated in the district of Raneegunge, Bengal, have been sold by auction for £20,000 under the winding-up.

A report has been issued by the directors of the Chartered Mercantile Bank of India in anticipation of the meeting on the 19th inst. The directors on the occasion of the first interim meeting present a half-yearly statement of accounts, which they trust the shareholders will consider satisfactory, showing a profit of £82,502, or upwards of 20 per cent. per annum on the capital of the bank. The directors, however, regret to state that the winding-up of the operations of the previous very unfavourable year will entail a further loss to the bank, which will be provided for when the annual accounts are made up. An interim dividend of 3 per cent. for the half-year to the 30th June has been paid, and a balance of £60,002 has been carried forward to this half-year's account. The balance-sheet shows that the liabilities of the bank are £6,767,984, exclusive of the capital, £750,000. The reserve fund remains at £145,902. The issue of this report did not cause any fall in the shares.

The official liquidator of the Commercial Bank of India will appear before the court on the 16th inst., for the purpose of obtaining permission to enforce a call of £10 per share on the shareholders, who will then have the opportunity of laying their views before the Vice-Chancellor as to a resuscitation.

A meeting has been held of the creditors of Messrs. Vivanti, Annett, and Balfour, in the silk trade, who stopped payment on

Digitized by Google

the 26th ult. The balance-sheet, prepared by Messrs. Honey and Humphreys, the accountants, shows liabilities to the amount of upwards of £400,000, but only £30,245 is expected to rank against the estate, while the net assets reach £22,362. It was resolved to adjourn for a month, and meanwhile the affairs of the firm are to be liquidated under supervision.

The large parcel of Mexican dollars by the last West India steamer has been sold at 58 15-16d., showing a decline on last rates. The greater part was taken for refining purposes. The loss of the *Rhone*, with a further supply of dollars, will cause a recovery in prices.

The experiment of direct shipments from England to Chefoo and Tientsin has been at length tried by the despatch of the *Challenger* with a cargo, which is detailed in our Export Supplement.

The loss of the *Maggie Leslie*, owned by Messrs. Leslie and Co., Newcastle, in the Straits of Gaspar, has been reported. She left Foochow for London on 29th Aug. with 630,500 lbs. tea. The steamer *Agamemnon* arrived at Mauritius on 1st Oct., 23 days from Hong Kong, and left on 3rd for London. This information arrived by this morning's mail, and its non receipt by telegram caused some anxiety as to her safety, she having left Hong Kong on the day of the typhoon, 8th Sept.

There is little change to note in the markets generally. Trade continues depressed, and the Bank rate of discount unchanged. The last Bank return is not viewed as very favourable with regard to the prospects of trade. It is evident there is no expansion, because the revenue payments are not well supported. The decrease in the public deposits this week represents £251,736; the total standing at £5,145,163. The decrease in the bullion is only £94,491, the aggregate being £22,238,806. The increase in the reserve of notes is £390,080, the total being £12,000,665. The private securities show a decrease of £105,996, the amount standing at £16,682,646.

The Marine Insurance offices have had some heavy losses lately, and calls have been anticipated in several companies. The directors of the London and Caledonian Marine Insurance Company (Limited) have commenced the movement by announcing a call of £2 per share.

The 31st report of the directors of the Madras Railway Company has been issued. The gross receipts show an increase over the corresponding half-year of £9,706, and the net receipts of £10,722, a difference to be explained by the decrease in expenditure. The number of passengers has been greater than in any previous six months, though the receipts therefrom were somewhat larger in the corresponding period of 1866. The goods traffic, exclusive of railway materials, shows an increase over that period, both in tonnage and receipts. No further extension of the north-west line has taken place, but a section of about 32 miles of it, in advance of the present terminus at Moodanoor, is so far completed that material trains are already running over it. When opened, the railway will extend to within thirty miles of Gooty, and will be ready, it is hoped, to bring down the cotton crop of that and the adjoining districts in the beginning of the year. The half-million of share capital referred to in the directors' last report having now been nearly all paid up by the holders in advance of calls, and applied in part to meet expenditure, resolutions will be submitted to the meeting to authorise the issue of further capital for the prosecution of the company's undertakings.

In anticipation of the extraordinary general meeting of the Central Argentine Railway Company, the directors inform the proprietors that the negotiations entered into with the Government of the Argentine Republic and the contractors (Messrs. Brassey, Wythes, and Wheelwright), for raising the remainder of the capital requisite to complete the line to the city of Cordova, have been satisfactorily completed. The amount required is £600,000, being the portion not hitherto issued of the company's capital. Towards this sum the Congress has subscribed half, and the remaining moiety has been taken by the contractors in debentures at par, having five years to run, and bearing interest of 7 per cent. per annum, the same amount of interest as guaranteed by the Government.

The report of the directors of the Oriental Gas Company for the past twelve months has been issued. It states that the general revenue account shows a balance available for dividend, after adding £1,000 to the reserve fund, of £12,192 5s. 10d., from which the directors recommend a dividend of 6 per cent. free of income-tax, payable on the 3rd December next, making, with the interim payment of 3 per cent. in June last, a total distribution of 9 per cent. for the year. The report also states that the public lights have been increased, and that the results of the private lighting have been very satisfactory.

The Washington Marine Insurance Company of New York has collapsed, owing to the very heavy losses it has suffered from marine disasters during 1865 and 1866. The courts have ordered it into liquidation, and its balance-sheet shows liabilities amounting to $858,048, and assets only $97,660.

An extraordinary meeting of the National Provincial Marine Insurance Company (Limited) is called for the 26th inst., when a resolution will be proposed in favour of an amalgamation with the Etna Insurance Company (Limited).

The European Assurance Society has discontinued fire insurances, and restricted its business to life, guarantee, and annuities. Mr. J. Hamer Owens, late manager of the fire department, has been appointed London manager of the Etna, to which office the fire business of the European has been transferred.

The Nova Scotia and New Brunswick (Intercolonial) Railway Company has been registered in London, with a capital of £600,000, in 30,000 shares of £20 each, and with power to increase. This important undertaking, to which it is understood an imperial guarantee is to be accorded, will probably be soon brought out here.

Vice-Chancellor Malins made an order on Friday for the winding-up of the Royal Bank of Liverpool, subject to the supervision of the Court.

At an extraordinary general meeting of proprietors of East Anglian Stock on Friday the proposed rearrangement between the Great Eastern and the East Anglian proprietors was declined, and a committee was appointed to see what modifications could be made in the proposal.

The suspension of Messrs. W. A. White and Co., hop and seed factors, has been announced. The liabilities are stated at £90,000.

A prospectus has been issued of the Lincoln Gold Company, with a capital of £160,000 in shares of £2, to purchase some mining claims in California, after a certain trial of the property shall have been made by an agent from England.

The Master of the Rolls has directed the payment of a further dividend of 1s. in the pound to the creditors of the Joint-Stock Discount Company (Limited) on the 18th inst., making a total of 10s. thus far distributed.

Mr. Hugh Childers, M.P., has been elected chairman of the Great Indian Peninsula Railway, in the place of Mr. John Griffith Frith, who retires from ill-health.

ARTICLES OF IMPORT.

TEA.—The same quiet tone has pervaded the tea market during the week. The trade have bought most cautiously of the Monings ex Whinfell, and some chops have been much divided to effect sales. Foochow Congous: In Siftings and broken leaf we have nothing new to report. Fair to medium, of late import, continue as difficult of sale as ever, although we do not alter quotations; fine and finest also remain much as last advised. Black Leaf Congous: Common to fair is saleable in small quantities at 11½d. to 1s. Good medium Monings ex Whinfell have been sold at 1s. 8½d. per lb.; fine at 1s. 10d. to 2s. 2d. per lb., and a sale of finest is reported at 2s. 6d. per lb., but these have not sold so readily as the earlier arrivals. Tayshan Congous are unaltered. Scented Capers sell slowly at late prices, and Scented Orange Pekoes are almost entirely neglected. Green Teas: There is nothing new to report in these descriptions. The Indian sale of the 11th inst. comprised 2,776 packages. Considerable spirit was shown in the biddings, and prices showed an advance of 2d. to 3d. per lb. on all fine qualities. A China sale is advertised for the 19th inst., this will be small; so far only 8,513 packages have been advertised.

SILK.—The market is very little changed since our last report; there is, perhaps, a slightly better inquiry, but on the other hand prices are easier. Best chops Tsatlees maintain their price (No. 3, 27s. 6d.), but the lower grades have declined, No. 4's having been sold at 23s. Deliveries are still small, from 1st to 15th November—China, 1,247 bales; Japan, 292 bales.

COTTON.—Since our last report the market has been somewhat depressed, and prices have fallen about ⅛d. with a limited demand. The quotations in Liverpool are for American 7¼d. to 9¼d.; Surat 5d. to 7¼d.; Madras 6d. to 6⅝d.; and Bengal, Scinde, &c., 4⅝d. to 5⅝d. per lb.

COFFEE.—Plantation Ceylon: The market has been without animation, but prices have been so far maintained at former quotations. The sales have amounted to 433 casks, 26 barrels, and 575 bags, at 41s. to 50s. for triage; 62s. 6d. to 67s. fine ordinary to low medium gray; 69s. to 71s. 6d. fine ordinary small to fine fine ordinary colory; 72s. 6d. to 80s. low middling to middling bold; and 86s. to 92s. for peaberry. Native Ceylon: A fair demand has been experienced, and the offers at auction have sold steadily at previous rates, viz.: black garblings 15s. to 16s.; ordinary small 46s.; good ordinary 53s. 6d.; bold pale 62s.; and peaberry 67s. At these rates about 2,000 bags have been taken. The public sales have also comprised 138 bags ordinary mixed Manila at 25s. Privately 20 casks Plantation realised 73s., and 400 bags good ordinary Native 58s. 6d. per cwt.

CUTCH.—Fine Pegu remains steady at 45s. per cwt.

COCOA-NUT OIL.—Former quotations of £48 to £52 per ton are still maintained for Ceylon, but the market is extremely dull.

Digitized by Google

DRUGS.—Cantharides: Two boxes China were bought in at 5s. Cardamoms: At auction 18 packages Ceylon realised 2s. 7d. to 2s. 9d. Galls: 100 cases good Japan were bought in at 65s.

GAMBIER.—There has been no advance upon former quotations, and only small sales have been made at 16s. 8d. per cwt.

GUM BENJAMIN.—Of 96 cases Siam offered at auction 85 cases sold as follows:—firsts, £25 to £32; seconds, £21 15s. to £28 10s.; seed in block, £15 15s. to £16; very small almondy, £11 15s.; dark, £10 5s. to £11 15s.; siftings, £7 to £7 10s. Of 35 cases Sumatra 20 cases rather dark seconds realised £8 to £8 5s., and 56 cases brown thirds sold at £6 12s. 6d. to £6 15s. for good fair, and £6 5s. to £6 10s. for good medium.

GUM DAMAR.—At the public sales 10 cases Singapore sold good at 70s., very ordinary at 32s., and 52 cases good Batavian were bought in at 76s.

ISINGLASS.—The sales have included 11 cases Penang at 1s. 9d. for Manila sorts, and 1s. 11d. for pickings.

JAPAN WAX.—There is still an almost entire absence of offers, and 34 boxes saucers mealy stained and partly broken were held for high rates, and bought in at 85s. The only sale reported is of 6 boxes fair quality but rather mealy at 92s. 6d. per cwt.

MANILA HEMP.—No business of any importance has transpired since our last report.

PEPPER.—Black: The demand is still brisk, and 679 bags Singapore have been taken at 8¾d. to 8 7-16d.; while of 1,910 bags Penang placed on offer, about half sold at 8½d. for common West Coast, and 8d. to 8½d. for gray. White: The whole quantity offered at the auctions, amounting to 1,141 bags, met with ready sale, and was all taken, viz., 836 bags Singapore, at 5⅝d. to 5¾d.; and 305 bags Penang, at 5d. per lb.

SUGAR.—Manila has continued in steady demand since our last, the sales being 14,000 bags clayed, at 31s. to 31s. 6d., and 3,000 bags good Muscovado, at 28s. 9d. per cwt.

SPICES.—Mace: Six cases Penang were taken, low middling red at 2s. 7d.; ordinary, at 2s.; very ordinary broken, at 1s. 7d. to 1s. 8d.; and two cases Java were bought in at 1s. 9d. per lb. Nutmegs: Prices are slightly lower, and 49 cases Penang realised, fine bold, 65 to the lb., 4s.; 79 to lb., 2s. to 2s. 1d.; 92 to lb., 1s. 6d.; and 129-112 to lb., 1s. 2d. to 1s. 4d. per lb.

SAPANWOOD.—The only sale reported is of 2¼ tons of Ceylon, at £9 per ton.

TIN.—The market continues quiet, but previous rates are maintained. On the spot about 60 tons Straits sold at £89 15s. to £90 per ton cash, and to arrive 25 tons Straits realised £90 15s., with three months' prompt.

MANCHESTER MARKETS.

Mr. Sam Mendel reports:—"The demand is very limited; prices are not quotably altered, but the tendency is in favour of buyers, more especially in reference to the descriptions taken for the markets of India." Quotations are:—Grey Shirtings, 7lbs., 7s. 10½d. to 8s. 8d.; 8¼ lbs., 10s. to 10s. 8d.; Cotton Yarn, Nos. 16-24, 1s. to 1s. 1d.; Nos. 28-32, 1s. 1d. to 1s. 2d.; Maddapollams, 8s. 6d.; Long Cloths, 9s.; T-Cloths, 6s.; White Spot Shirtings, 10s. 6d.; Brocade do., 10s. 9d.; Damasks, 19s.

MIRELLA (Brit. ship), Sing. to Lon., Oct. 26, 37 N., 34 W., 145 days out.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports remain firm at previous quotation. In coal freights from the Northern outports there is but little alteration, though business has been somewhat brisker.

The Admiralty have invited tenders for the supplying and delivering into store at Trincomalee of 2,000 tons smokeless South Wales Coals.

We have no alteration whatever to note in outward freights since our last issue.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £47. For Singapore: £32. For Shanghai: £56. For Saigon: £50. For Yokohama: £50. For Batavia: £27. For Colombo, £30. For Galle, £33. For Chefoo, £57 From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 5s. For Singapore: £1 10s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 8s. 6d. For Chefoo, £2 15s. For Trincomalee, £1 17s. For Galle, £1 11s. For Colombo, £1 9s. For Manila, £1 5s. For Batavia, £1 10s.

The Admiralty have invited tenders for the conveyance of 7 tons (meast.) medical comforts from the Thames to Colombo.

CASUALTIES.

Intelligence has been received by telegram of the total loss at Gaspar of the Maggie Leslie, Stephen, from Foochow to London, with tea; crew saved.

MISCELLANEOUS.

At TENERIFFE.—Oct. 25, Ajax (s.), Kidd, from Liverpool, and left 26 for Singapore and China.

The P. and O. steership *Indus*, Captain Hicks, takes out to Hong Kong a new set of boilers for the company's steamers *Ellora*, *Malta*, and *Azof*, besides coals and sundries.

THE SINGAPORE AND RANGOON LINE.—The *Dacca*, recently launched by Messrs. A. and J. Inglis, for the British India Steam Navigation Company, has made her trial trip. When drawing 19 feet aft and 17 feet 4 inches forward she attained a speed of 12 knots per hour in "running the lights" between Cloch and Cumbrae. The principal dimensions of the *Dacca* are 274 feet by 34 feet and 19 feet, with accommodation on the main deck for 120 first class passengers. The vessel is fitted with a pair of direct-acting surface condensing engines of 300-horse power nominal. The prospects of shipbuilding industry on the Clyde are considered to have improved during the last fortnight.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishment at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their Large Granite Dock, 236 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing Plates for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineers' Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them

---

NOTICE TO SHIPOWNERS.
SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers, &c.

Apply at the Offices of Messrs. PATERSON, SIMONS, and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

W. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1867.

THE AGRA BANK (LIMITED).
ESTABLISHED IN 1833.—CAPITAL, £1,000,000.

HEAD OFFICE—Nicholas-lane, Lombard-street, London

BANKERS.
Messrs. Glyn, Mills, Currie, and Co., and Bank of England.

BRANCHES in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

CURRENT ACCOUNTS are kept at the Head Office on the terms customary with London bankers, and interest allowed when the credit balance does not fall below £100

DEPOSITS received for fixed periods on the following terms, viz.:—

At 5 per cent. per annum, subject to 12 months' notice of withdrawal.

" Busing, Schroder, & Co.	.....Batavia
" Ernsthausen & Oesterley	...Calcutta
Mr. A. C. Gumpert	.....Bombay
" Wm. Berg	.....Capetown

Hamburg, 24th October, 1867.

AUGUST BEHN,
Chairman of the Board of Administration of the Germanic and International Lloyd's.

* The agents appointed to foreign ports represent the society where no district association has been formed, and have to report upon the condition of any vessel, in case no fit person should be available as surveyor for the Germanic and International Lloyd's. They may, however, appoint for any one survey any competent captain of a vessel, or any other competent person as an assistant. They have further to watch over and extend the interests of the society, and to report upon all matters which may be considered as useful to the society.

TO BE LET, FURNISHED.

A CONVENIENT HOUSE, within 10 minutes' walk of Kensington Station. DRAWING and DINING ROOMS on same floor; FOUR BEDROOMS, DRESSING, and BATH ROOMS. Handsomely furnished. Trains to the City every 10 or 15 minutes. Very moderate terms to a careful tenant.

Address W. H., "London and China Telegraph" office, 2, Cowper's-court, Cornhill, E.C.

NOW READY, PRICE 21s.

THE HONG KONG AND SHANGHAI BANKING CORPORATION.

LONDON OFFICES:

32, NICHOLAS-LANE, LOMBARD-STREET

THE ORDINANCE of INCORPORATION having received the Royal assent, a London Register of Shares has now been established, and shareholders in the company desirous of having their shares transferred from the Hong Kong Register, can do so upon application at this office.

Certificates for shares so transferred will be granted in exchange for the original certificates, the conversion being effected from dollars into sterling at the rate of 4s. 6d. per dollar.

The Ordinance, Deed of Settlement, and London Register of Shareholders can be inspected by shareholders at this office on application to the manager.

Purchasers of shares can have their transfers registered at this office, and also obtain new share certificates in lieu of those surrendered by the transferrer.

Forms of transfer (according to the Ordinance of Incorporation and Deed of Settlement) can be obtained on application at this office.

Dividends on shares on the London Register will be paid in London, in sterling, at the rate of exchange for Bank bills at sight by the mail leaving Hong Kong after the declaration of each half-yearly dividend.

The transfer books for shares on the London Register will be closed for fifteen days previous to the 25th day of June and 25th day of December in each year.

By order of the Court of Directors,
W. H. VACHER, Manager.

Billiter-square, November, 1867.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Eau Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist's Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

PERRY and CO.'s PATENT ESSENCE OF INK

The CHEAPEST INK.
The BEST INK.

BISHOP'S

GRANULAR

EFFERVESCENT CITRATE OF MAGNESIA,

INVENTED, INTRODUCED, AND PREPARED BY

ALFRED BISHOP, Manufacturing Chemist,

17 & 18, SPECK'S FIELD'S, MILE END NEW TOWN, LONDON.

THIS perfectly white and delicately clean granulated preparation possesses remarkable effervescent qualities, which far surpasses the ordinary Seidlitz Powder in its cooling, refreshing, and mild aperient properties, as well as in its flavour as a saline draught. It is particularly well adapted for women and young children, on account of its most agreeable flavour and mild effect.

N.B. The genuine has the name BISHOP upon the Bottle, also the Name and Trade Mark upon the Label, and is sold in convenient sizes, and secured in so perfect a manner that it may be shipped with safety to any part of the world.

Manufacturer also of Granulated and Effervescent Carbonate of Iron, Citrate of Iron, Citrate of Quinine, Citrate of Quinine and Iron, Carbonate of Lithia in Tubes, Citrate of Lithia, Vichy Salt, Seidlitz Mixture, and all other Granulated Preparations.

IN CHANCERY.—CAUTION.—BISHOP'S GRANULAR EFFERVESCENT CITRATE OF MAGNESIA.—Mr. Bishop, having discovered that the Label which he has used for the last five years was being imitated, recently applied to the COURT OF CHANCERY for an INJUNCTION to restrain such imitation. The injunction was immediately granted, and the defendant was ordered to pay all Mr. Bishop's costs and destroy the labels complained of.

Mr. Bishop is determined to stop the imitation of his label, and will, without notice or delay, take proceedings in Chancery against any person who may copy or colourably imitate the same.

HOLLOWAY'S OINTMENT and PILLS.—Disease in some shape is ever rife amongst mankind. Impurity of blood or irregularity of function is constantly giving rise to despondency, debility, or distempers. In the above named remedies the community can have at a little cost the safe and certain means of preventing or checking and curing both outward ailments and inward maladies. Ample, plainly printed, and very intelligible directions accompany every package of both Ointment and Pills, which only require attentive study to enable every invalid to be his or her own medical adviser. The earlier these powerful remedies are employed after the discovery of the disease, the more rapid will be their action in expelling from the system all noxious matters, and restoring health.

THE

SILICATED CARBON WATER FILTERS,

FOR

DOMESTIC MANUFACTURING, AND GENERAL PURPOSES.

The most perfect Apparatus yet devised for Purifying Water for Drinking or Culinary Purposes, and the best possible safeguard against the diseases resulting from impure and unwholesome water.

*** These are the only Filters used in the General Post-office, and by the Metropolitan Free Drinking Fountains' Association, being adopted after the failure of all others tried. Also, by order, the Drinking Fountains of the International Exhibition of 1862 were fitted exclusively with the Company's Patent Filters.

Manufactured in great variety, and at prices varying from 2s. 6d. to £18 18s.

The inward French mail, with Hong Kong dates to Oct. 15, may be expected on the 5th prox. The latest telegrams from Hong Kong, via Galle, are to Nov. 1. Telegraphic communication between Malta and Alexandria has been restored since the 20th.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer Ceylon, arrived Nov. 25.—From Yokoham: Mr. Eagan, Mr. Bassolo, Mr. Cremeno, and one second-class passenger. From Shanghai: Mr. Provano, Mr. Hallum, Mr. Goodridge, Mr. Gundry, Mr. Asats. From Hong Kong: Mr. Pearey, Mr. Atkinson, Captain Wilkinson, Mr. Kinack (remained in Egypt), and one second-class passenger. From Galle: One second-class passenger. From Singapore: Mr. Tate, Mr. Robertson, three children, and servant, Captain Beltham. From Penang: Colonel Ripley.

To Suez.—From Yokohama: Mr. Gregialo and servant, and two second-class passengers. From Shanghai: Dr. Meyer.

To Malta.—From Shanghai: Mr. Carter.

To Southampton, per P. and O. steamer Sumatra, expected to arrive Dec. 3.—From Shanghai: Mr. Hawitt, Mrs. Ainslie and child, Mrs. Howes and two children and one second-class passenger. From Hong Kong: Mr. Huntingford, three second-class passengers. From Singapore: Capt. Carey and servant, Mrs. Carey and child. From Galle: Mr. Smedley, Mr. Gibbons and servant, Mr. Quinn and six second-class passengers.

By last Bombay mail, to Marseilles, per P. and O. str. Delta, arrived Nov. 19.—From Galle: Mr. G. H. Davidson.

To Southampton, per P. and O. steamer Tanjore, arrived Nov. 26.—From Hong Kong: Dr. Kane.

By last mail, to Marseilles, per P. and O. steamer Syria, arrived Nov. 14: From Ceylon: Mr. Labonadaire, Dr. Cowan, Mrs. Mais.

To Southampton, per P. and O. steamer Ripon, arrived Nov. 22.—From Hong Kong: Asst. Surg. O'Toole, Capt. Davies. To Suez.—From Shanghai: Mr. G. Zas.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, November 20.—To Yokohama: Mr and Mrs. McDonald, two children, and two servants. To Shanghai: Two second class passengers. To Hong Kong: Mr. W. H. Hooper, Lieut. Dawson, and one second-class passenger. To Singapore: Mr. F. A. Sheppard, and one second-class passenger. To Ceylon: Mr. Armitage. Mr. H. G. Lavie, Ensign Reck, Mr. and Mrs. Gunter, Musk.: Sergt. Salter, wife, and five children, and four second-class passengers. To Calcutta: Mr. and Mrs. Wyman, child, and servant, Mr. and Mrs. Graham, child, and servant, Mr and Mrs. Dulzel and ayah, Mrs. Aitken, child, and servant, Mr. F. B. Morris, Mrs. H. Douglas, child, and ayah, Miss McIntosh, Miss A. Weir, Mrs. Brunskil, Mrs. Rice and servant, Mr. M. R. McHaffie, Miss Savi, Miss Montrion, Mrs. Kent, two Misses Freer, Mr. Little, Mrs. F. King and two children, Mr. P. H. Cohn, Mrs. Taylor and child, Mr. Bence, Mrs. Folkard, Mr. O. Bowine, Mr. and Mrs. Pitcher, Mrs. Poyser, Staff Assist.-Surgeon Parkinson, Mrs. Beddon and servant, Surgeon Webb, Mr. W. H. Pinsent, Mrs. Castle, Mrs. Parker, Mr. Baron, Mr. C. Pickard, wife, and two children, and seventeen second-class passengers. To Madras: Mrs. Williams, Mrs. Hunter Adam, Capt. and Mrs. Hindle, Major McGrath, Mrs. Benton, child, and ayah, Mr. A. R. Hutchins, Mr. and Mrs. Macnaim, Mrs. Kennedy, Capt. and Mrs. Goldie and child, Capt. Rivers, and four second-class passengers.

From Gibraltar.—To Singapore: Mr. Wright.

From Marseilles, Nov. 28.—To Singapore: Mr. Jose, Mrs., and Miss d'Almeida, Mrs. Velge. To Hong Kong: Mr. Tait, Mr. Pedder, Miss Marsh, Mr. R. H. Bruce, Mr. J. A. Medlen, Mr. B. J. Morris. To Penang: Mr. P. Nieuhuys. To Shanghai: Mr. Rodocanachi, Mr. E. L. Livingstone, Mr. W. Harwood. To Calcutta: Mrs. Gregory, two children, and servant, Mr and Mrs. S. E. Collins, Mrs. Melitus and servant, Capt. and Mrs. Hamilton, Mrs. Hay, Mr. and Mrs. Brodhurst, child, and servant, Mr. and Mrs. E. Jackson and child, Miss Boddam, Miss Money and servant, Mr. J. C. Wordie, Mr. J. Stone, Mr. and Mrs. Beveridge, Capt. Plant, Miss MacKilligan, Rev. J. and Mrs. Roberts, Mr. R. Gray, Mr. and Miss Becher, Capt. Saunders, Mr. Lushington, Miss Cautley and servant, Mr. Laird, Mr. Reid, Hon. A. T. Peterson. Mr. G. Lockie, Mr. Westbrook, Mrs. and Miss Brooke, Mr. W. Stansfield, Mr. W. Halford. To Madras: Mr. and Mrs. T. W. Bayes, Dr. and Mrs. Campbell and two servants, Marquis of Huntly, Mrs. Harkness and servant, Miss Campbell, and one second-class passenger.

From Suez.—To Calcutta: Mr. Geoghegan, Assistant-surgeon Bellew, Misses O'Donnell.

Per P. and O. steamer, from Southampton, Dec. 4.—To Ceylon: Mr. and Mrs. W. Thompson, Mr. Hoyes, Dr. Assistant Commissary-General Randall, Mrs. Randall and child, Mr. Chas. Mackwood. To Singapore: Miss Mary Thompson, Rev. B. and Mrs. Morrell, Mrs. Willans and two children, Miss Willans, Mr. Theodore Kranse. To Hong Kong: Mr. N. J. Hannen.

From Marseilles, Dec. 12.—To Yokohoma: Mr. R. E. Price, Mr. King, Mr. Vernede, Mr. Mottn, Mr. Jacquenot, Mr. Still. To Shanghai: Rev. F. King, Mr. F. King. To Hong Kong: Mr. H. Smith, Mr. and Mrs. G. N. Minto.

Per P. and O. steamer from Southampton, Dec. 20.—To Hong Kong: Mr. H. Foss. To Ceylon: Mr. R. E. Crickett, Mrs. F. B. Templer, Miss Templer, Mr. F. Templer, Mr Mackenzie, Miss Saunders, Miss Lloyd.

From Marseilles. Dec. 28.—To Ceylon: Mr. W. T. Sendall, Mr. J. S. Findlay.

THE MAIL CONTRACT.

The terms of the new postal contract have been laid before the House of Commons. The subsidy is £400,000, and the duration twelve years. Details of the negotiations and correspondence will be found at page 620.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port the mail delivered this morning brings dates to October 1. The outward mails of Aug. 10 had not arrived out, but the *Great Republic* had brought London telegrams to the 2nd September. The following items of news are from the *Japan Times*:—

The Admiral has left for China in the *Salamis*. The *Perseus*, which left for Hakodadi on September 3rd to look after the missing *Singapore*, has not yet been heard of.

The Ministers are all in Yedo or Yokohama at present. We have the pleasure to announce the accession of another Power to the number of the Shiogoon's allies by the ratification of the treaty between Belgium and Japan. This ceremony took place at Yedo on the 10th inst. at the residence of H.E.M. T'kint von Roedenbeck, the Belgian Minister. There is no doubt in this country a market for many of the productions of Belgian industry; and, united as is Belgium with England by the ties of kindred institutions, kindred aspirations, and a common danger, against which both countries have raised the same shield—that of our noble Volunteer force—we cannot but wish Belgium and Belgians well in the career of commerce in the Far East which has just been inaugurated for them by the occurrence which we chronicle.

Mr. Seare has left for Osaca to organise the Japanese Custom-house and bonded warehouses in readiness for our advent in 1868. We are anxiously expecting letters from him, the information in which cannot fail to be deeply interesting to our readers.

Sir Edmund Hornby has left Yokohama on his return to Shanghai. We hope he will take seriously into consideration the possibility of establishing here a branch of his own court. The difficulty to be overcome is the unwillingness of the Home Government to incur the necessary large expense, but it must not be forgotten that the importance of the Japan trade is increasing every year, and we have as just a claim as Shanghai on the public purse of Great Britain for such a privilege.

Digitized by Google

The last fortnight has been one of almost incessant rain, which has quite made up for the lack of moisture of which we have had to complain before. The crops look well, but we ourselves have suffered the utmost discomfort from the state of our streets, some of which returned during the wet weather to their normal condition, that of swamps. The columns of the local Jupiter and Saturn have of course been filled with complaints of the condition of the roads and of the helplessness of the Municipal Council. How any member of that august body can retain office, and allow himself to be called a Municipal Councillor, in presence of our visitors from the well-governed capital of California, whose remarks, as they have floundered through the strips of ploughed land we call streets, have been the reverse of complimentary, utterly passes our comprehension.

We must not omit to record the establishment of a branch of the French bank, the Comptoir d'Escompte, which has recently opened its doors in Yokohama for the transaction of business. This bank has always been well conducted in China, and has been found of great service, not only to French merchants, but also to those of other nations. It will doubtless be received here with the same confidence it has met with elsewhere. We wish it equal success.

One of Prince Kanga's officers has arrived here *en route* for England, where he is destined for a three-year educational sojourn.

The principal event exciting attention in military circles is a court-martial now being held on Captain R. Hodson, R.A. There are three charges against him—the first of drunkenness, the second and third of disobedience to orders and absence without leave from parade. The case has already occupied nearly a week and the first charge is not yet disposed of. Under these circumstances we shall hold ourselves excused from saying more about the case at present.

The final examination of the bankrupts Alexander McKechnie and John Reddie Black took place on the 12th ult. The *Japan Herald*, put in such peril, first by Black and afterwards by the official assignee, has been rescued, and is now being carried on by the late Mr. Hansard's son-in-law, for the benefit of the orphan children. We very heartily wish him well through the difficulties which at present beset him.

We give extracts from Judge Hornby's decisions in these two important cases, of McKechnie's case his lordship said :—

"With reference to the bankrupt's discharge, I have to remark that it is impossible for any court of justice to sanction trading of the description which appears to have been carried on by him. In the first place he began without any capital whatever, and on nothing more than a mere promise of support from Hansard and Black, with no written undertaking, agreement, or engagement to that effect whatever. Then, it appears, the business turned out a failure—why, is not clearly shown, whether from ignorance of business generally, from buying bad, selling at unprofitable prices or other causes. At all events, it failed. A meeting of the bankrupts' creditors was then called, at which he was not present, and of the proceedings at which he knows nothing more than Mr. Black chose to tell him. His own letter, writen in June, 1867, says that he was bound to carry out certain arrangements made at this meeting (of July, 1866), and yet of these arrangements it appears the bankrupt knew nothing whatever except from Black. Since that meeting he had been acting, he said, under Black's instructions, getting goods wherever he could, and selling them off at once by retail and at auction, generally making a large loss and occasionally a small profit. Now the law of bankruptcy is at present in a most unsatisfactory state—in a state of transition. It has no power whatever to punish such commercial immorality as this, and what therefore can be done? The withholding of a certificate from a bankrupt must be done in such cases. At the same time, in the present case there are two points in extenuation to be considered—the bankrupt's blind faith in Black, and the facilities afforded to him of getting goods. Undoubtedly his creditors will suffer considerably. Therefore—although the punishment is very inadequate, in fact no punishment at all—the Court suspends the bankrupt's discharge for the space of one year, with protection meanwhile."

In the next case, that of Black, his Lordship said,—

"In this case, which is a sad one, a very sad one, and one most difficult to comprehend—unless the bankrupt has been acting in a way which I should be sorry to think he had—he appears to have been admitted a partner to a good business without any capital whatever. In that business he was to have no interest for three years, nor any interest in the plant; and yet, having no interest in his partner's business, he goes and backs the bills of people with whose business he had nothing to do, of whom he knows hardly anything. He becomes security for enormous amounts for McKechnie, puts his partner's name on the back of bills for these amounts, and gives bills of sale on his partner's property—pledging property in which he had no interest whatever, and which by his partnership deed he was expressly forbidden to engage in any way. In extenuation, he pleads that he thought, as a partner, he might pledge the property for the good of the firm, but the partnership deed distinctly forbid him this, it is clear that he must have known he was either acting wrongly to his partner or wrongly to his creditors; I don't see how he can escape from that. I most sincerely hope that throughout this painful affair the bankrupt thought, as he says he did, that he might do what he has done. I can only characterise it as extremely foolish, utterly without discretion, and such as must draw down on him the disapprobation of the law, and I should hope the disapprobation of his own conscience. It is my duty to put the law in force, and I must do all that I can in this case. I must suspend the bankrupt's discharge for the full term of two years. It would be folly, I think, to refuse him protection during that period. I don't see what good it would do his creditors to put him in prison and deprive him of the use of the undoubted talents which he possesses. I shall therefore grant him protection, but his discharge must be suspended for the full term allowed by law—two years from this date."

On the 30th Sept. was tried, before Sir Edmund Hornby, one of the most difficult and painful cases which we have ever had to report.

Mr. P. B. Walsh, of H.M. Consular service, sued the Oriental Bank for $450 sworn by him to have been deposited in the bank on the 12th July last. He swore positively that he deposited $900, including this $450, in the hands of Mr Ansell, an assistant accountant. The only evidence he produced was two pass-books, into each of which the sum of $450 had been entered hurriedly, without comparison with the bank's current account ledger. He produced no proof that he was in possession of the money at that date, and refused to show his books, in which he averred he had no cash account with the bank. He brought no witnesses. For the defence, Mr. Ansell gave evidence that Mr. Walsh deposited only $450—that he sent him with the money to the compradore. In this statement he was supported by the evidence of the compradore and a shroff.

Farther, Mr. Ansell explained that having a reversal entry to make, from one of Mr. Walsh's books—that of his private account, to another, that of his public account—he must have made the double entry by mistake; and, Mr. Walsh being anxious to get his pass-books and leave, that he made the entries before they had been passed in the bank's books. He produced the usual debit slip for 450 dols. only—the bank's current account ledger and cash book agreeing of course with it. The error remained undiscovered until the 15th September, when, for the first time since the 12th July, Mr. Walsh asked him to have his pass-books made up. The error being then noticed, Mr. Ansell drew his pen through one of the entries; and Mr. Walsh, objecting, appealed to Mr. Robertson, the agent, who listened to him and promised to investigate the matter, requesting Mr. Walsh to assist him by giving him such information as was possible respecting the particulars of the payments. Some correspondence passed, and Mr. Walsh finally refused to give any information, and brought his action. The Judge reserved his decision, which he will leave in writing. It is most anxiously awaited by the whole mercantile community.

NAGASAKI.

From this port we learn that the schooner *Duck* has been sold to Prince Satsuma for $5,000. The Japanese steamer *Eagle* still on shore, and not likely to float again for some time. The Nagasaki Municipal Council, under the guidance of M. Othmans (of Shanghai French municipal experience), are projecting great things in the way of wharves, and talk of raising a loan, though where the money is to come from out of such a small community is a matter of some doubt to those interested.

A correspondent writes :—"The day before the *Basilisk* left another British subject narrowly escaped mutilation, if not a worse fate, at the hands of a drunken Yaconin, who drew his sword without the slightest provocation, and attempted to rush upon him, but was restrained by a less inebriated companion. The matter reached the ears of the Minister, by chance I believe, who took it up vigorously and instituted inquiries, which did not however lead to the discovery of the Yaconin. He also told the Governor in unmistakable language that these atrocities must and would be put a stop to."

Another letter, dated Sept. 29, says :—

"We had a hard blow yesterday. The weather however has improved, though the greater portion of the Racket-court has been blown down, level with the foundations. The bricks were laid or rather thrown together in a scandalous manner, and the whole affair must come down, as it has been condemned as dangerous. The contractor will, doubtless, be the chief sufferer, as well as Mr. Norton, whose untiring perseverance against all obstacles is worthy of all praise. The men used salt water for the lime, so no wonder it fell down, not one brick binding to another.

"Reports are in circulation (on rather doubtful authority though) that an open rupture is imminent with Satsuma and the Yedo Government, and a steamer left here hastily bound north, crowded with men in fighting rig. Tosa is also dissatisfied, and a row somewhere is certain before the opening of Hiogo and Osaka."

Two members of the Gorogio were still aiding in an investigation into the *Icarus* murder case, and it was *on dit* that the Governor had been called to Yedo.

The following is from Alt and Co.'s Market Report, dated Nagasaki, 30th August :—

IMPORTS.—The improved demand noted in our last has not been maintained, and stocks of almost every description of manufactured goods continue heavy; as the cool weather however, sets in, we anticipate a resumption of business. Camlets: Stocks have slightly decreased, and Scarlet are wanted. Long Ells: The same remarks apply to these. Turkey Red Cambrics, 3 Catty are wanted. T. Cloths are inquired for at quotations. Shanghai Cotton is in small demand. Rice (Saigon) is in large stock, and prices declining. Saltpetre, but little inquired for, with ample stocks.

Digitized by Google

METALS continue in good request. Nail rod, hoop, and bar iron can be readily placed at quotations. Lead and Spelter are in small demand. English Coal: None in the place, and wanted.

EXPORTS.—We have again to report the same dulness in our Tea market which we noted in our last; a few parcels have been taken in barter for imports, and some small purchases have been made by Chinese and others for the Shanghai market, but no settlements of any magnitude have yet been made. Tobacco is in fair supply, but it is not in demand at the rates asked by holders. Wax has been taken in large quantities at extreme prices. Of Gulls the market is quite bare.

EXCHANGE.—Credits on London, at six months, 4s. 7d. to 4s. 7½d. per dollar. On Shanghai, ten days' sight, par. On Hong Kong, par Bous have improved in value, and are to-day worth 318 to 320 per 100 dols.

FREIGHTS.—To London, there is no rate. To Shanghai 2 dols. 50 to 4 dols. per ton of 40 feet. To Hong Kong 4 dols. per ton.

CHINA.

TIENTSIN.

A correspondent at Tientsin writes to the *Evening Express* as follows per *Szechuen:*—Grey Shirtings quoted at taels 2.4.8 to 2.5. Nothing doing in fancy goods and woollens. Cotton goods are reported more favourably on from Shanse, but the Nienfei robbers stop all business, as the Shanse men fear to trust their goods anywhere near their vicinity. The Admiral Sir Harry Keppel, in the *Salamis* with *Manila* in company, has arrived and will shortly proceed to Peking. All the Ministers and suites, except the Prussian, have returned from the hills to their winter quarters in Peking. An Italian Minister with the ratification of the Italian treaty is expected in about a month.

CHEFOO.

There has been a disturbance at Chefoo, and a stoppage of trade for one day, in consequence of a little too great energy in the suppression of the arms trade. The native merchants were seriously irritated by a too rigorous examination of all goods, either landed from ships, or passing through the inland barriers, and closed their hongs and held a public meeting. The question was a difficult one for the Taotai to decide, as trade cannot go on if every package landed is to be opened and pulled about; yet he is held responsible if any arms are smuggled in. Possibly he might do better to rely on espionage than on an impracticable attempt to examine everything. As it is, he has relaxed the stringency of his new regulations, and trade once more flourishes. The Tientsin drilled troops have gone back to Tientsin. Hopes were excited a short time ago that a coal mine had been discovered in close proximity to the port, but further exploration has resulted in disappointment.

The Taotai of Chefoo has, at the instance of H.B.M. Vice-Consul, remitted the tonnage dues on the *Finzel*, the first direct ship from England; and it must be conceded that he deserves great credit for this recognition of the importance, to the prosperity of the northern ports, of direct trade between them and Europe. Of course the remission will not be repeated. It is simply a graceful acknowledgment of an epoch in the history of the port—an acknowledgment which is, perhaps, the more creditable to his Excellency, as it is quite possible that his Peking superiors may insist on his paying up the amount out of his own pocket. In the meantime, a second direct ship from England has arrived at Chefoo, laden principally with coal, and others are expected shortly with shirtings. The great test of any new enterprise is success, and if these shipments succeed, we may confidently anticipate a wider and more prosperous future for the three northern ports.

HANKOW.

A full report is published by the *Hankow Times* of the proceedings in the bankruptcy case of Mackellar and Co. The report is far too long to reproduce here, and as the text of decision was received by last mail, we content ourselves with an extract from Mr. Mackellar's defence. The view of the case taken by the *Hankow Times* will be sufficiently evident from the following short quotation:—

"Mr. W. G. Gordon's offence—only offence, that we can see—is that he continued on in business just as long as he could. Mr. Gordon is, we believe, a very sanguine man; and his very sanguine disposition is shown in his hoping to right or better his position by "going in" for tea when he was so embarrassed with debt—even allowing the fact that tea is cheaper this season than it ever was before in Hankow."

(*Extract from Mr. Mackellar's Defence.*)

"I am placed at a double disadvantage—first, with having to contend with Mr. Myburgh, whose volubility of speech, and powers of vituperation, no one having heard his address can dispute; and, secondly, from having the misfortune of being opposed by such a man as Mr. Evans—a man whom, I think, I have proved to the satisfaction of the Court to be untruthful and unworthy of credence, whose character is too well known in Hankow to require any comment from me. . . Losses: On this head I need scarcely say that the principal have occurred through the enormous depreciations in land; also on teas shipped last season. Again, our losses through bad debts, both foreign and Chinese, have been extremely large. The nature of the former I need not refer to, but the latter consist chiefly of losses on teas over and above margins, which we have been unable to recover from shippers. The majority of such debts have been made since June, 1866. . . . In addition to the above, I have now, individually, claims on various parties to the extent of taels 13,000. I would point out the fact of our having purchased, each season, nearly one-fourth of all teas sold here, and also that in every preceding year we have been in the habit of having large amounts running with teamen, for periods of frequently six weeks, no anxiety for payment being evinced by them. The reasons for pressure this season are principally the exaggerated reports circulated, and the consequent withdrawal of facilities and stoppage of credit. I am sure it will be universally admitted that at present in China the majority of houses would be forced to succumb if facilities were withdrawn and pressure established. . . It seems to me that the whole gist of my case lies in the question—Did I go on in business too long, or did I not? Who is to settle the exact day or hour when a bankrupt firm is to suspend? Circumstances, and circumstances only. And, Sir who, may I ask, are to blame if I did go on in business too long? Why, the foreign creditors, who now oppose my discharge. They had a remedy. Pressure on their part would have brought me down long ere circumstances did; but it did not suit them to press. And why? Because they hoped to be paid their claims out of money paid to the Chinese. They were disappointed, and therefore their opposition. If my conduct is bad, how immoral is theirs! What object could I have except the benefit of all, in carrying on business till I was stopped. No one can consider it a pleasant position which I hold now, to stand here to be bespattered with foul abuse. (Stopped by the Court, and an apology tendered at Mr. Myburg's request.) I may have been foolishly sanguine, but even now I believe that all would have been well; no loss to any would have occurred if the times had not been against me. At the beginning of the tea season tea was cheaper in Hankow than I have known it and statistics better in England. My credit was very good. I bought, you must see, for no other object than to make money for my creditors. . . . . The means of paying the teamen for their teas if there had been a profit, however small, is not so difficult as the learned counsel thinks. The tea season lasts from May to January. A firm like ourselves would find no great difficulty in keeping teamen out of a small portion of their tea money until returns came from England, especially if buying as heretofore, and throughout the season. This becomes much simpler when the tea is sold in Shanghai (at a profit); but alas for me, cheap as the tea was here, it was, and in spite of a falling market, has continued to be, cheaper in Shanghai. I, for my own part, do not yet give up our English shipments, and believe that they will yet result well. . . . I have said my say, made my defence, and told a plain unvarnished story. I throw myself on the indulgence of the court, and trusting that where I have missed points in my own defence that your honour will help me, considering my being no lawyer, no orator, and without counsel. Some may say, that, so far, I have not expressed the slightest regret for the heavy losses of my creditors. I hate cant; but I do regret their losses. I may say that more sincere or heartfelt regret cannot be experienced by anyone. Promises made by me now would be mockery; but if the court are gracious to me, and grant me my discharge, though I am now at the bottom of the ladder, I feel that I can yet rise again. And if kind fortune smiles once more, no discharge granted by this court will prevent my attempting to liquidate at least a portion of the debts of my firm; and no factious opposition, however unkind to me now, will ever prevent my doing that which I may consider just hereafter.

CHING-KIANG.

A Ching-kiang correspondent gives the following information regarding the coal mines said to have been recently discovered in the neighbourhood of this port:—"The mines are about twenty miles from here, and are quite near a navigable creek. Our head-quarters, when we were up country visiting them, was a small village called Loong Tan, about half way between this and Nanking, on the banks of a fine broad creek. There are two mines, which we visited and examined. One, at a place called Koo-tsze-tan, is in a gorge between two hills, and is less than two miles from the Nanking canal, with a gentle incline to the water, perfectly suitable for a tramway. The pits there (four in number) had been opened and worked some years ago. They are at present closed and filled with refuse, but from some small specimens which we saw in the vicinity, there can be no doubt but that good coal exists. The other mine is at a place called Pa Whei Li Miao, and is much more promising. The beds were formerly worked before the rebels came, and have been abandoned in consequence of water gaining too much on the workmen. The coal which we saw there is really of excellent quality. Some specimens sent to Shanghai were pronounced equal to English coal. This mine is ten miles from Loong Tan, and three or four from a navigable creek. It is low undulating country, and far more easily worked than the Koo-tzé-tan mine."

SHANGHAI.

Advices hence are to the 9th October. The French mail of 17th August, with telegrams to 7th Sept., arrived on 7th Oct.; later telegrams to 11th Sept. had been received *via* Kachta.

Digitized by Google

A full report of the proceedings in the case of Mackellar and Co. had been published, and excited much interest. The creditors are dissatisfied with the sentence, and have appealed against it to the Supreme Court at Shanghai. They hold that he is guilty of fraud, and claim that one of the punishments assigned by law shall be awarded. It is clear that the value or worthlessness of the present sentence rests solely in the hands of the bankrupt himself, who may decline the trouble of earning more than his actual expenses, and so defeat any hope of future dividend that his creditors might entertain. Mr. Gordon's conduct has been severely commented on by the press in the north of China, while sympathy is expressed for Mr. Mackellar, who was in England and no party to his transactions, but is yet equally punished.

The following items of news are from the *North China Herald*:—Some interest has been excited by the movements of a person who lately opened a firm here under the name of Woodward and Co. He attempted to do some business in silk, but he failed, as there was a suspicious lack of ready money. A week or two ago he went to Hankow, and during his absence it was asserted that he was identical with a man named Drummond, who had suddenly left the Government service in Hong Kong under suspicious circumstances. A warrant was taken out for his apprehension on a charge of obtaining goods under false pretences, and he was arrested at Kiukiang. He was brought before the magistrate at Shanghai, committed for trial, and sentenced to three years' penal servitude.

Mr. Kinder, of the Hong Kong Mint, has been in Shanghai lately, endeavouring to arrange for the introduction of a coin (to be manufactured in Hong Kong) as an equivalent of the Shanghai tael. The specimen of what he proposes is a very handsome piece about as large as an English crown, with the Royal arms of Great Britain on one side and Chinese characters on the reverse.

The decrease which was noticeable in the imports of shirtings in July continued during August. From the Customs returns of trade here, during that month, we find that only 175,000 pieces were imported, against 275,000 during 1866. The same falling off is observable in other descriptions of cotton goods. T-cloths, 22,000 against 37,000; grey and Dutch drills, 889 against 28,000, and American, 5,000 against 10,000. Handkerchiefs, on the other hand, figure for 22,500 dozens against 774 dozens; camlets, 11,000 against 7,000; lastings, 4,800 against 2,400; long ells, 20,000 against 9,000; lustres, 57,000 against 18,000. The import of English coals was only one quarter of that during August, 1866; but other qualities again arrived in nearly the same quantities. Again, too, the import of sugar is largely in excess of that during the corresponding month. 34,000 piculs of black tea have arrived from Hankow, and 57,000 have been exported. About 3,000 piculs of silk have been exported.

The inquiry into the circumstances of the abandonment of the barque *Siam* has been held, and two of the crew imprisoned pending reference to the High Senate at Bremen. The master and mate are left at large, though suspicion is expressed by the Court of their complicity. It is generally felt that they ought, to have been detained. In the meantime the *Siam* lies in custody of the British Admiralty Court, pending the decision of the *Dartmouth's* claim for salvage; but the Bremen Consul claims that the case should be heard before his tribunal. Messrs. Pustau and Co., who are acting as agents for the Marine Insurance Office of Hamburg and Bremen, have, we believe, officially requested the Bremen Consul to claim the vessel for the Bremen underwriters, and to protest against a sale, if the British Supreme Court should refuse to give the vessel up to him, or refuse to consent to a joint decision with the Bremen Consul, according to Bremen law.

The S.S.N. Company is keeping up the reputation for bad luck which has well nigh passed into a local proverb. Their steamer *Plymouth Rock* got on shore a few days ago in going down the river, and had to wait till the flood tide made to get off. When eventually she did so she was found to be making water so badly that she had to put back to Shanghai. She has been obliged to discharge cargo, and will probably go into dock.

The Shanghai Club has been reopened under its new management. The ballot boxes for the new committee were opened on the evening of the 1st Oct. with the following results:—Shareholders' Committee: Messrs. Fearon, Hargreaves, Oliphant, Tyson, Lavers, Bell, and Duncanson. Members' Committee: Messrs. Myburgh, J. J. Miller, Hudson, Ashton, and Baker.

A meeting of the Shanghai Volunteer Corps has been held, at which it was decided to let the corps rest in obeyance, till more stirring circumstances may call it again into existence. Happily for us, the state of the settlement is such that there is no longer a necessity for those who cannot appreciate the pleasures of drill, to trouble themselves very much about it as a matter of duty; but such is the uncertainty of power in China, that the rebel hordes which now infest many parts of the empire may at any time descend upon Shanghai, and for this reason we should be prepared to protect our own against them.

The American barque *Vesta Vizie* has got on shore on the South Bank and been stripped and set fire to by wreckers. The captain and crew were obliged to abandon her to escape them. The wreck and cargo (coals) have been sold at auction for the sum of 425 taels, which, we learn, the purchasers are hardly likely to recover.

In the collision case of the *Tientsin* v. the *Malacca*, judgment has been delivered in favour of the latter; the Court expressing an opinion that the *Tientsin* was much to blame.

The *Shanghai Express* of October 18th says:—"A boat with one foreigner on board returning from Woosung, on Saturday last, was met by a small native craft with five or six men in it, who at once boarded, and commenced to loot, but, finding nothing of value, they began to cut away the masts and sails, &c. The foreigner, who was unarmed, acted energetically, caught hold of one of the pirates by the arms and threw him overboard, and the rest seeing his resolution jumped into their own boat and made off. The matter has been brought to the notice of the Hamburg Consul, the party attacked being subject to that flag, and we trust it will not be allowed to drop here."

On September 30th in the Bankruptcy Court Messrs. Maitland, Bush, and Co. passed their last examination, and applied for their discharge, which was granted, and will be delivered on November 1st provided no appeal is made in the meantime. In the same Court on October 1st a dividend of 8 per cent. was declared in *re* S. Clifton. A meeting held the same day *re* K. R. Mackenzie was, in consequence of the absence of the creditors' assignee, adjourned to the 9th October.

An event in the ship-building annals of Shanghai has taken place in the launch of the steam gunboat *Augusta* from the Old Dock Yard. The vessel is 145 ft. long and 22 ft. in the beam, and is fitted to carry a heavy pivot gun forward and four broadside guns.

The Grand Canal, which has been gradually drying up since 1857, has now become utterly impassable, vessels drawing a few inches only being unable to find water to float them.

The great event of the fortnight has been the ceremony of opening and dedicating the new Masonic Hall, lately erected on the Bund, some account of which we extract from the *North China Herald*:—

This handsome building, which has been nearly two years in course of erection, has been built entirely out of funds subscribed by the lodges working in Shanghai under the English constitution; and, exclusively of the land on which it is erected, has cost nearly tls. 40,000. The design for the building was originally prepared by Mr. Clark, but being found too expensive to be carried into execution as first proposed, the original drawings and specification were handed over to Mr. Kidner, on Mr. Clark's approaching departure from Shanghai, with instructions to make the modifications necessary to reduce the cost of the building to the sum at the disposal of the committee. The works were commenced on the 1st of April, 1866.

The style of the architecture is Italian. The facade to the Bund is divided by attached columns into seven bays, having double columns at the angles. It consists of a rusticated basement supporting two lofty Ionic and Corinthian orders. The windows have projecting balconies and are very deeply recessed. Extra height is gained by introducing a very deep frieze in the entablature. The whole is surmounted by an open balustrade, the entire height being fifty-six feet. The front portion of the building contains three stories and the block at the back only two, the total height of which is equal to that of the three storied part.

The ground floor contains the kitchens, servants' rooms, and cellars. At the back is the public hall, measuring 80 feet by 40, and 30 feet high. The first floor contains a vestibule 17 feet square, two rooms facing the Bund, originally intended for reading rooms, each 23 feet by 21, and a library 30 feet 6 inches by 23 feet 6 inches; a wide corridor connects the library, servants' lobby, and vestibule with the grand staircase, which occupies a space on the south side 22 feet 6 inches square, open the full height of the two stories, having a coffered ceiling resting on an entablature supported by Corinthian pilasters. Light is obtained from the centre of the ceiling, which is slightly coved and glazed.

On the second story is the banqueting hall, 61 feet by 23 and 23 feet high, which is by far the handsomest room in the building; it faces the Bund, and occupies the entire width of the front. The ceiling is coved and richly worked with mouldings and pierced ornaments. There are two large fire-places in the end walls, and ample ventilation is provided by means of the open-work in the ceiling. The windows command an ex-

Digitized by Google

cellent view of the river. Adjoining this room are the servant's staircase and lift.

The lodge occupies the whole of the back part of the building, and is, therefore, the same size as the public hall, 80 feet by 40. It has an open wood roof stained and varnished, with the spaces between the principal timbers plastered. At night the lodge will be lighted by eight gaseliers of five burners each, suspended from the roof. Six fire-places are provided with grates cleverly contrived with sliding doors to shut off the fire when it is necessary to darken the lodge. The dais is recessed seven feet beyond the end wall, and raised three steps above the general level. The walls are effectively panelled, and the floor is painted to an appropriate pattern. The organ gallery is constructed over the entrance lobbies, and is ascended by a small staircase from the body of the lodge. In connection with the lodge are the preparation-room, candidates' waiting-room, cloak-room, and tyler's room, all conveniently arranged. Gas is laid all over the building, and electric bells are fitted to the rooms and corridors.

The ceremony of dedication, at which all members of the craft in Shanghai had been invited to attend, took place yesterday afternoon. The meeting of the Grand Lodge had been fixed for 4 P.M., and shortly after that hour it was opened in due and ancient form by R. W. Bro. Murray, the District Grand Master of English Freemasonry in China, with the assistance of the following officers:—W. Bro. A. R. Tilby, D.D.G.M.; W. Bro. R. S. Gundry, S.G.W.; W. Bro. J. H. Gibbs, J.G.D.; Bro. R. J. Fearon, S.G.D.; Bro. J. A. Maitland, J.G.W.; Bro. C. E. Endicott, G. Secy.; W. Bro. G. H. Butcher, G. Chaplain; W. Bro. J. Nutt, G.D.C.; Bro. R. A. Houstoun, G.I.G.; Bro. G. Jeffrey, G. Tyler.

BANKRUPTCY COURT.—IN RE DENT AND CO.

Mr. Mitchell and Mr. Lawrence appeared for the bankrupts.

The Court wished to know if the other partners of the firm concurred in any proceedings that might be taken, which was answered in the affirmative.

Mr. White appeared for Captain Bell (late in the employ of Dent and Co.), who claimed an amount of Tls. 2.900 for wages due.

G. Bell.—I was formerly in Dent and Co.'s employ. I left their service on the 18th February, when their steamers were handed over to Russell and Co. The amount claimed is for wages up to June, 1867. I had been in the habit of drawing money from time to time. I was not aware that interest was allowed, till I saw it put in my account current. I never kept account of what I drew. On the 16th of July, I went to settle up, but was informed that I could get no money.

The Court said that, as Capt. Bell left the service without taking out the money due to him, the said money became a deposit and could not therefore be claimed as wages.

The amount, 2.948 taels therefore would be proved as a debt.

G. A. Lambert—I am a ship-builder, I have been receiving 8 per cent. on my account. I claim 1,897 taels.

This was admitted, with interest from 30th June to 9th July.

Alex. Johnston claimed 467.72 taels for various taxes due to the Municipal Council, which was allowed, subject to revision by the official assignee.

P. Johnson claimed 273 taels for passage money home and wages till he reached London, as per agreement made. This was admitted.

Mr. Mitchell claimed on behalf of the bankrupts, that they had passed their first examination, and applied for a second meeting in 60 days from that date.

An adjournment was then made till Monday, December 2nd, at 12 o'clock.

FOOCHOW.

A memorial drawn up by the residents at Foochow, on the revision of the treaty, has been forwarded to the British Minister at Peking. The following is an abstract of the chief suggestions embodied in it:—

Transit Duties on Goods to be Adjusted.

By far the most important grievance under the treaty of Tientsin has been the systematic breach of the 28th Article of the treaty, regarding the "Lekin" duties. This evasion we believe to have been practised at all the treaty ports; but in the province of Fuhkien the illegal exactions which have been added to the already too oppressive legal impost have far exceeded the demands made in other parts of the empire. And, severely as these exactions have been felt in Amoy, they have been even more oppressive in Foochow.

We would suggest the following alterations in the treaty; and we think that anything short of these suggestions will fail to grapple effectually with the crying evils that are involved in the present system.

1st. That the "Lekin" duty on all goods, whether native or foreign, should be equalised at all the ports, at the rate of half the import or export duty on such goods.

2nd. That, while the local authorities collect these duties themselves, there shall be an appeal to the Consul and the Commissioner of Customs, for any irregularity committed in such collection.

British Tariff of 1842 to be Revised.

The principle upon which the duties were calculated in the treaty of 1842 was, that they should approximate as nearly as possible to an *ad valor em* duty of 5 per cent. But while silk now pays a duty of about 2½ per cent., and even when prices were low never paid 5 per cent., tea is charged with a duty of two taels five mace; being about 10 per cent. on the average cost. We trust, therefore, that in the revision of the treaty the boon of a reduction in the duty, so clearly in keeping with the intention of the treaty, will be accorded to us.

Travel into the Interior with Passports.—The Yantsze River to be open to British Trade.

Hitherto the 9th article has been interpreted with great stringency. Indeed so much so, that practically the allowance to travel for purposes of business has been a dead letter. We would suggest that foreigners should now be permitted to travel for business purposes, and should have liberty to rent houses and ground in the interior (without which the former right would be useless), and that assistance should be accorded to them instead of impediments thrown in their way; while the British Consul would always have the power of withholding a passport, if he were not satisfied of the propriety of granting it, in the particular case. Article 10 does not affect Foochow, but we may suggest that steamers on the Yangtsze might now be permitted to carry passengers and goods, for all places on the river, as far as Hankow. We would most strongly deprecate the opening of one or two more treaty ports, with settlements and concessions, as entailing considerable expense on the Governments of both China and Great Britain, without any commensurate advantages; and would much prefer that matters should remain as they are for another period of ten years.

Coast Duties.

We think that coast duties, both native and foreign, between two Chinese ports should be abolished altogether; and as the Chinese Government are now in receipt of a large revenue, they may perhaps be induced to give way on this point, which is so clearly for the benefit of their country.

Working Mines by Foreigners.

In consideration of the great demand for coal for mercantile purposes, with the prospect of an equal, if not a greater number of steamers running upon the coast and rivers of this country, we are of opinion that every inducement ought to be held out to foreigners to bore for coal, or any other mineral, under the direct sanction of their nearest consular authorities.

The popular dread of the "Fung-Shui," which has hitherto interfered with such improvements, could we think be overcome, if the high authorities would exert their great influence in persuading the people of the futility of their objections. The saving between the English and Chinese systems of obtaining coal would, we are convinced, make all the difference to many steam companies of paying a good dividend and sinking money.

Making of Roads.

The claim of a foreign community upon the Chinese Government to construct roads for its pleasure and healthful recreation may by many persons be looked upon as a secondary consideration; but in the altered state of trade, and the prospects of a large number of foreigners spending years in the country, it becomes an important question whether the local authorities could not, at a trifling expense to themselves (but what would be a ruinous outlay to foreigners, owing to the "squeezes" of landowners) construct good roads for riding and driving across the island. We think the large income derived through the residence of foreign firms at this port does away with any excuse the Chinese may make as to want of means. If spread over two or three years, the cost would amount to but a small fraction of the Government's receipts.

FORMOSA.

Reports of an interesting nature again reach us from and respecting Formosa. Captain Horn has returned to Amoy, having recovered from its Chinese ransomers the body of poor Mrs. Hunt, as well as the various items of property belonging to the shipwrecked crew of the *Rover*, hitherto in the hands of the savages. He has also rendered another service to humanity by bringing away with him eight Bashee islanders who had been shipwrecked in the same neighbourhood as the unfortunate American vessel. Thus far then there is cause for satisfaction, as no uncertainties or doubts respecting the fate of any of the massacred crew remain to distress the minds of their friends, and with the recovery of Mrs. Hunt's body ceases any necessity for further inquiry. The importance, however, of inflicting upon the barbarous savages of south Formosa a punishment which shall both avenge the past and be a warning for the future has not been lost sight of by the American authorities, and though doubtful as to the adequacy of the force employed, we are glad to learn that such is the case. General Le Gendre, the U.S. Consul at Amoy, has, after some solicitation, obtained from the Taotai of Taiwan a force of some 450 or 500 Chinese soldiers, and a promise that more shall be immediately despatched to the south cape—say a total force of about a thousand Chinese braves. These are to form the nucleus of an avenging force, which is, it is said, to be supported by an American squadron, which will both afford a reinforcement, in the shape of "Naval Brigades," and cover the landing and any other operations within range of its guns. Mr. Pickering accompanies the American Consul as interpreter, the latter taking the command of the force—a post for which his military experience well qualifies him.

HONG KONG.

Dates from this report are to the 15th October. The outward mail of Aug. 26 was delivered on Oct. 7, with London telegrams to Sept. 19. The *Great Republic* arrived on the 5th Oct., with 600 Chinese passengers, but brought no late telegrams.

The principal topic of interest is the occurrence of the second disastrous typhoon, the bare announcement of which has already been reported by telegraph. In another column will be found a detailed account of it, extracted from the *Overland China Mail*.

The following items of general news are from the same paper:—The colonists are naturally becoming curious to know when the long expected memorial respecting the revision of the treaty will see the light. We are able to state that, owing to

Digitized by Google

public attention having been much occupied by the new Stamp-tax, it has been found difficult to convene a meeting of the Chamber of Commerce prior to the departure of the mail. The rough draft of the memorial is, however, finished, and it will be submitted to the committee shortly. We trust that the necessary discussions will be finished in time to forward the document by the next mail leaving Hong Kong.

We hear that Mr. Bowra, now serving in the Imperial Maritime Customs at Canton, has been appointed acting Commissioner at Ningpo, for which post he will leave shortly. Mr. Tainter will take his place as Customs Interpreter at Canton, Mr. Brown, the Deputy Commissioner at Shanghai, being ordered to act for Mr. Commissioner Glover during the absence of that gentleman at Pêking, whither he proceeded a short time since.

On the 2nd October some hundreds of tons of earth fell from a hill in the Chinese quarter of the town, knocking down and burying several houses and human beings—Chinamen, thirty at least. Several were taken out from the debris dead. An inquest has been held upon their bodies, and a verdict inculpating the Surveyor-General returned; but being only Chinamen who suffered, not much excitement has been occasioned by the catastrophe.

The colony's supply of gas was cut off in a somewhat novel manner on the evening of the 29th Sept. by the break and burial of about 50 or 100 yards of the main pipe. Excavations from the Praya landwards have been going on for some time past on the Battery-road, about half-way between the West Point Nullah and the gas works; and so dangerously near had those excavations come to the main that on the evening named about 50 tons of the hill gave way, and with it a large portion of the main pipe. Fortunately, no one happened at the time to be under the hill, else loss of life might have to be added to the regrets which follow such an accident. The gas was turned off at the works so soon as the accident was discovered, and consequently the street lamps and consumers' metres on the lower roads were very soon exhausted, considerably darkening the town. The damage has been repaired, and the supply of gas is secured again.

The Stamp Act came into operation on the 10th of October. Only one complaint has been publicly made respecting it, and that arose from the banks demanding a stamp of three cents or one dollar—they did not know which—on cheques. Cheques are not included within the schedule of the Act.

An insurrection is reported to have broken out among the Li savages inhabiting the interior of the island of Hainan, which is likely to give some trouble to the Chinese authorities, as these wild mountaineers are a peculiarly fierce and indomitable race.

The *China Mail* asserts that the operation of the "Gambling Ordinance" has led to some totally unexpected results, by arousing a desire for gaming among the European inhabitants of the colony. The *Mail* says:—

"The gambling houses are, undoubtedly contributing to results other than the demoralisation of the natives. Many Europeans visit them, and although their visits are passed off as the effect of mere curiosity to ascertain how the establishments are conducted, there is reason to believe that a hankering after a little quiet excitement is at the bottom of the causes which lead those who have once satisfied their curiosity to repeat their visits. Although licensed by Government, these houses are considered disreputable by all the respectable Chinese of the colony; and the feeling that one is patronising an establishment which is tabooed to your horseboy by the compradore who secures him, is not calculated to increase one's own self-respect. At some of the houses foreigners are shown into a sort of upstairs balcony or verandah, and the sums they stake are lowered down into the 'pit' by an attendant Chinaman. A few nights since a foreigner won $1,800 at a single swoop to the great dismay of the bank keepers, who refused to continue play any longer. We could, however, record losses, which if not as large as the sum above-named are sufficient to prove that the losers have thrown themselves into gambling operations *con amore*. We would also remind military men of the danger to which soldiers are now exposed since these shops have been opened. A large proportion of the foreigners present invariably consists of men of the regiments stationed here, and to these the taste thus fostered must necessarily be more pernicious than to the educated classes whose resources in the way of amusement are so far more varied and extensive. In conclusion we would warn our readers of two things. Firstly, that they cannot here, as at Macao, frequent gaming tables without fear of recognition, as the police and others employed make it their business to note as far as possible the individuals who visit them; and secondly, that however little they may object to the mere act of gaming, the heads of houses, commanding officers, and others in authority, are not likely to view with favour a habit which lessens Europeans in native eyes, opens the door to suspicions hitherto unthought of, and which, even by those who have most strongly advocated licensed gambling, is admitted to be both disreputable and ruinous in its eventual results."

THE SECOND TYPHOON.

Following the late typhoon, there came another storm, which though not so fierce in its fury, was more destructive to property on shore. The gale commenced on the evening of September 30, and reached its utmost fury shortly after noon on the next day. The heaviest gusts blew about 4 P.M., although the major part of the damage to the Praya wall took place between 12 and 1 P.M. Of this large portions of the coping have been washed away between Messrs. Lapraik's pier and the P. and O. office, while much havoc has been committed further to the westward. Most of the Chinese sampans and cargo boats were safely moored on the Kowloon side, as was also the Canton steamer. The results of the gale have proved even more disastrous on shore than had been anticipated.

Nearly the whole of the sea wall from Messrs. Lapraik's wharf as far as the H.K.C. and M. steamboat pier had it copings washed away, and the roadway has suffered severely, it being in many places cut up. The verandah of Messrs. Cama's house formed quite an imposing mass of ruin on the road. The houses situated on the old site of the Union Church had their verandahs ripped off, and the flagstaff of the Spanish consulate was blown down. The City-hall and Messrs. Augustine Heard's house were "as usual" after a heavy fall of rain and gale of wind; the scaffolding having suffered even more than in the late typhoon. The neighbourhood of Pedder's-hill and Wyndham-street suffered severely, the roadway being filled with broken tiles and roofing, our own office having suffered amongst the rest.

At Sowkewan one or two houses were blown down, and a large number unroofed. Several Chinese were killed in the fall, but we cannot ascertain the precise number. At Wanchi one or two houses were blown down, but no loss of life is as yet reported. At the Albany part of the house occupied by Mr. Sangster has been blown down, and the house of Mr. Masson has had its roof blown off and chimney carried away; several of the neighbouring houses have suffered to a similar extent. Seymour-road, Castle-road, and Upper-road have felt the effects of the gale severely. At Captain Thomsett's the retaining wall has been blown down, and the top of the cook-houses has followed its example. Three Chinese were killed by the falling debris. Part of the Reformatory wall has given way, as was expected.

We understand that the whole or a part of Messrs. Cama's house will have to be pulled down, the front portion being considered unsafe. Two houses in Mosque-street have been partially destroyed by the gale, and one of the houses erected on the scene of the late fire at Queen's-road West, is so seriously shaken, that it is hourly expected to fall down.

So strong was the fury of the gale, that at 2 P.M. the police party at the Praya were compelled for safety to lie down on the pier, where they were engaged in efforts to save the boats, &c., driving before the wind and waves. Experienced sailors have declared that they have seldom seen a gale of such fury. In its effect, it fully equalled those of a typhoon. We may note that the seaward and eastern faces of the clock tower were actually blown in by the force of the wind.

At the Aberdeen Docks the old engine-house fell about 2 P.M.; the blacksmith's shop also suffered, the roof being blown off, and one end having come to the ground. The boiler shed, iron store, coal store, and dock store buildings were all unroofed. The new engine-house has fallen as well as the old one. The damage done is very extensive, but its amount cannot be ascertained until the *debris* is cleared away. The two large matsheds built on the side of the hill for the accommodation of the men of H.I.M.S. *Guerriere* (at present in the Hope Dock) are also blown down. The Hope and Lamont Docks are uninjured, although the seas in some cases broke to a height of twenty feet over the caissons. Two Chinese were seen to go down just under the stern of the Hong Kong and Whampoa Dock Co.'s chop *Celestial*.

The casualties amongst the shipping were less than might have been reasonably expected. To commence with the latter, the U.S. ship *Rattler* was driven high and dry on Stonecutters' Island, and strange to say seems, except in her very awkward position, to be but slightly damaged. She has lost anchors, cables, &c., as a matter of course, but made no water during the night, despite the rough usage she encountered. A barque stated to be the *Lancaster* was ashore in Kowloon bay, and the steamer *Achilles* and the Dutch barque *Tonia* were both injured by other vessels coming into collision with them. An immense number of sampans, cargo-boats, and native junks have come to grief. Bodies of Chinese were seen floating past the naval yard at an early hour next morning, but it is (as usual) impossible to arrive at any of the statistics of the loss of native life.

The *Royal Saxon*, which vessel was not in a condition to resist so heavy a gale, commenced to leak seriously, and a gang of convicts have been kept on board her all day pumping. At 10 A.M. on the 1st, Inspectors Payne and Shead proceeded to the Praya to see if any assistance could be rendered to boats in danger. The first object attempted to be saved was the dockyard boat, but it was speedily smashed to pieces. Their next attempt was more successful; a boat and five Chinese being saved. The wreck of Messrs. Morgan, Lambert's cargo-boat, filled with cotton, afforded proof that the Chinese thieves have an eye to business in all weathers. The bottom of the boat came out, and the cotton "went to sea" in a manner quite foreign to the intentions of its owner. Everything was done to save it which was possible, but the masts alone rewarded the efforts at salvage. While the boat was sinking a Chinaman was apprehended in the act of stealing the cotton, and his person was forthwith appropriated by the guardians of the peace. The crew of a boat were saved by them near Dent's wharf. In one case a Chinese had been washed within reach and one of the inspectors grappled him by the seat of his trowsers. But alas! his tailor, or wear and tear, had prevented these garments from being of sufficient strength to bear a man's weight; they parted, and the unfortunate native sank to rise no more, while the shred of cloth remained in the grasp of the man who had pluckily endeavoured to rescue him.

PHILIPPINES.

—o—

MANILA.

From Manila we have advices to the 8th October, confirming the telegraphic news already received of a destructive typhoon, earthquakes, and inundations. The mail steamer *Malespina*

Digitized by Google

had been missing for 21 days, and was given up as lost. A correspondent writes as follows :—

We are getting very anxious as to the fate of the mail steamer *Malespina*, as we have advices that she was to leave Hong Kong (with our London mail of 10th Aug.) on the 18th ultimo, and would be due here on the 22nd at least; but as we have had several typhoons outside lately, it is possible she may have encountered one. If so she would have a very poor chance of weathering it, as her bulwarks are enormously high and with little or no outlet for any seas which may break over her.

For some time previous to August 23rd the weather had worn a most threatening aspect, the barometers falling and every appearance of something brewing. We were not deceived, for on the afternoon of that day it came on to blow from N.W. in earnest, with a perfect deluge of rain, and this lasted with more or less severity, wind veering westerly, until the 26th, during which time no less than sixteen inches of rain had fallen. The consequence was that some parts of Manila and its entire neighbourhood for miles was visited by one of the heaviest inundations ever known, the water being over the main roads just outside the town three to four feet deep. This has caused great distress amongst the poorer class of Indians, who have lost their houses, &c., which at all times are most light and fragile, being built of nepa and bamboo, consequently could not not stand the action of the elements.

The ship *Sooloo* from Hong Kong arrived here on the 23rd ult., reporting that the English mail of 10th August had arrived, and was to leave on the 18th for this port per *Malespina*. The ship *Ashburton*, also arrived on the same day, reports having encountered no less than three typhoons on the passage over. British ship *Sardinia*, hence to Australia, sugar laden, has returned to port, having encountered a heavy typhoon outside; she is leaky, and is discharging. She reports having been in company with the *Fort Regent*, hence to London, also sugar laden, the latter making bad weather of it. The British brig *Water Lily*, Amoy to Saigon, has put in here totally dismasted and decks clean swept. On the morning of the 1st October Captain Showers, with part of the crew (eight) of the British ship *Stuart Wortley*, hence to New York with a full cargo of hemp (11,000 pls.), arrived in the ship's long boat. Captain Showers reports the total loss of his ship on North Danger Reef, China Sea—all hands (24) saved; the remainder (14) elected to stay on the island in charge of the chief officer until assistance arrived. The Spanish Government here promptly placed their man-of-war steamer *Vencedora* at the disposal of H.M.B. Consul Ricketts (he providing coal, some 80 tons); she was despatched hence on the 3rd Oct. at 4 P.M. to the scene of the disaster, taking Capt. Showers on board; we trust they may have a quick run down and succeed in rescuing the poor fellows, who, no doubt, will be on the look out. Some Chinese were found located on the island (turtle fishers) and will be able to supply the shipwrecked mariners with fish maws, &c., as they had a stock. A cour of inquiry will be held by H.B.M. Consul into the loss of this ship on return of the captain.

On the morning of the 4th October, we experienced two rather severe shocks of earthquake, one occurring at 3.30 and the other at 4 A.M., doing no damage, but merely shaking the houses and rattling doors and windows; it is not, however, by any means pleasant to be aroused out of one's sleep by such visits as these.

STRAITS SETTLEMENTS.

SINGAPORE.

From this port we have advices to Oct. 23rd. The outward mails of Sept. 10 and 17 were delivered on the 16th and 20th Oct. respectively, the latter conveying London telegrams to Oct. 5. The *Straits Times* has the following summary of news :—

The Legislative Council has been pretty busily occupied since the return of the Governor from Malacca, having sat on no fewer than four days in one week. The chief result of these labours has been the passing of the Excise Act,—a measure of no interest to home readers, but which closely affects our revenue. The Act will do away with many anomalies, and clearly defining the privileges of the farmers and the rights of the public, will no doubt increase the value of the farms. Two bills affecting the practice and composition of the local bar have been referred to committee, and a feeling prevails that both these, and one which may shortly be introduced for the re-constitution of the Supreme Court, should be postponed, there being no pressing call for their enactment, until the Council can have the benefit of the long legal experience on the local bench of the Chief Justice, who is now on leave of absence at home.

The intelligence that Colonel Macpherson, resident councillor of Singapore for many years under the government of India, had been confirmed in the appointment of Colonial Secretary, which was made public after the departure of last mail, has given very general satisfaction. On the 14th instant, Colonel Macpherson's experience was availed of, and he was despatched in the colonial steamer *Peiho* to the west coast of the peninsula on a mission to the Sultan of Salengore, with a view to institute measures that would prevent disturbances such as those which prevailed in the Klang district some six months ago, to the interruption of trade. The mission proved entirely successful, and it is not likely that the valuable tin trade of that district will be again disturbed for some time to come. An arrangement has also been come to with the Rajah of Quedah, who has conceded to the reasonable demands of the local government, and had his pension restored to him. By this arrangement, too, the limits of Province Wellesley have been materially extended.

The fourth Criminal Session of the year was opened at the Court House on the 16th instant, by Sir William Hackett. No very important cases were on the calendar: but one which charged the second officer of the steamer *John Bright*, with the robbery of jewels from that vessel to the value of 5,000 dols., commanded a considerable amount of interest. This robbery was committed about a year ago on a voyage from Bombay to Calcutta, and all hope of discovering the perpetrator had been abandoned; it is most creditable, therefore, to the acumen of the Singapore police force, that, unaided by any official notification of the crime, and guided only by the reports of it in the local newspapers, they should have fixed xpon the real culprit during his passage through this place, for the men pleaded guilty when arraigned yesterday.

BIRTHS, MARRIAGES, AND DEATHS.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ANNESLEY—On the 27th Sept., at Nagasaki, the wife of Adolphus A. Annesley, Esq., of a son.

BARING—On the 15th Nov., at 11, Cavendish-square, Mrs. Thomas Charles Baring, of a daughter.

BROADBENT—On the 25th Nov., the wife of J. F. Broadbent, Birkdale, Southport (late of Shanghai), of a son.

BUSH—On the 1st Sept., at Newchwang, the wife of Henry Edward Bush, of a daughter.

COUTTS—On the 6th Oct., at Shanghai, the wife of J. C. Coutts, Esq., of a son.

D'EGA—On the 28th Sept., at Hong Kong, the wife of Mr. D. A. d'Ega, of a son.

HALL—On the 18th Nov., at 2, Hope Villa, Southsea, the wife of Lieut. W. H. Hall, R.N., of a daughter.

HOOPER—On the 19th Nov., at Manor Park, Lee, S.E., the wife of John R. Hooper, Esq., of a son.

INNOCENT—On the 27th Sept., at Shanghai, the wife of the Rev. J. Innocent, of a son.

LITTLE—On the 20th Nov., the wife of J. M. Little, Esq., of Bonnington House, Vanbrugh-fields, Blackheath, of a son, stillborn.

RISK—On the 21st Nov., at 8, Sussex-terrace, Plymouth, the wife of W. B. Risk, Esq., R.N., Secretary to the Commander-in-Chief, China Station, of a daughter.

SHEPPARD—On the 21st Nov., at Brackley Lodge, Walton-on-Thames, the wife of Samuel Gurney Sheppard, Esq., of a son.

SILVA—On the 29th Sept., at Macao, the wife of Joaquim Peres da Silva, Esq., of a daughter.

MARRIAGES.

BORLASE—EADY.—On the 12th Nov., at Madron, Cornwall, by the Rev. George Nugee, M.A., vicar of Wymering, Hants, George Borlase, Commander Royal Navy, second son of the late Samuel Borlase, of Pendren and Castle Horneck, Esq., to Marian, youngest daughter of the late William Eady, of Campsbourne, Hornsey, Esq.

BROOM—WHITE.—On the 21st Nov., at the Parish Church, Brighton, by the vicar, George Broom, Esq., of Gaunt House, Wargrave, Berks, to Evelyn Margaret, second daughter of James White, Esq., M.P.

DEATHS.

CHAPMAN—On the 14th Nov., at sea, Henry Young Chapman, Esq., Surgeon of the Peninsular and Oriental Company's steamer Poonah, youngest son of the late Sir John Chapman, J.P., of Windsor, Berkshire.

FREEMAN—On the 30th Oct., at San Francisco, California, Simeon B. Freeman, aged 63.

PEARCE—On the 15th Oct., at Kong Kong, James William, the infant son of James and Louisa Pearce, aged 23 days.

PRICHARD—On the 7th Nov., at Suez, on his way home, after a short illness, John Bayley Prichard, Esq., of the Peninsular and Oriental Company's Service, aged 22, fourth son of the late William Taylor Prichard, Esq., of Inverness-terrace.

RITCHIE—On the 30th Sept., at Shanghai, the wife of Mr. John Ritchie.

RITCHIE—On the 3rd Oct., at Shanghai, John Ritchie, aged 50 years.

Commercial Report.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Cotton Yarn: For all counts but 28-32s demand has ceased, and a fall of $1 to 2 has been established. For 28-32s full inquiry continues, and prices are maintained. Grey Shirtings are in less demand, and prices weak, although no business has been done below quotations. Stocks are moderate. Dyed Cottons are in the same position as plain. Black Velvets maintain their position at an advance of $0.50. Stocks are light. These goods may safely be sent regularly to this market; they have become a staple. Taffachelass shows slight symptoms of recovery; a trifling advance on last rates has taken place. As we observed some time ago, the Japanese buy our yarns to make similar goods themselves. Camlets, S.S., in fair assortment, are wanted as usual. For the favourite colours the demand continues, and Black has advanced to $18-18 50.

SHANGHAI.—Soft Goods: The market has continued very quiet: very little doing in any description of goods except Grey Shirtings, in which a fair amount of business has been transacted during the fortnight at rates much on a par with those current last mail. At one time 8.4 lbs. Eagle Chop touched taels 2.67 per piece, but this figure was not maintained, and the closing quotations of 2.55 to 2.60 for ordinary to best makes may be taken as fairly representing the market; 7lbs. are still in small supply, and asked for at last rates. T-Cloths: Arrivals have been ample, and prices of fine cloth have a downward tendency; ordinary cloth is still worth taels 2 to 2.05 per piece. White Shirtings: Sales very small at last quotations. Fancy Goods: Have not improved in demand or value, and the usual inquiry for the northern markets has not yet set in. Woollens: Small sales are reported of Camlets and Long Ells, but the rates paid continue to be far from remunerative. Metals: Iron Nail Rod: The market is without change. The vessels arrived having added but little to stocks quotations realisable. Coals: The market generally is less active, and prices for most kinds rather depressed.

HANKOW.—Since our last report extreme dulness has characterised the trade of this port, and in almost every article lower prices have been es-

Digitized by Google

tablished without leading to the demand usually current at the season. Money is very scarce among the natives, and the position of many of the banks and shopmen is considered precarious; in addition to which, advices from the inland marts are very unsatisfactory, due in a great measure to the failure of the crops through the long-continued drought.

CANTON.—The market has been very quiet, the only thing noticeable being a fall of about a dollar and a half in the price of Cotton. There is no Quicksilver in stock, and an advance on quotations would readily be given for it.

HONG KONG.—Last mail's report on Grey Goods, and Manufactures generally, must be confirmed and repeated by this. Holders have continued desirous to effect sales both of goods on the spot and "to arrive," and have submitted to a further decline in rates, which is more marked this mail than it was last, and amounts to $5 all round in Yarn, 5 to 10 cents. in 8.4 lb. Grey Shirtings (the heavier qualities remaining firm), and about 10 cents. in T-Cloths. The dealers have shown little or no desire to enter the market, and business has been stimulated more by the anxiety of holders to reduce stocks than from any "healthy" demand. White Shirtings remain as before, and nothing new to notice in Fancy Cottons save a sale of 1,000. pieces Turkey Red Shirtings at $3.40, which raises quotations slightly. Raw Cotton: Large shipments continue daily to arrive, and stocks are rapidly accumulating. Only a moderate demand is now found for the staple, and a further decline in rates of $1 to $1½ per picul has been established. No sales of China Cotton are reported. Woollens: Although there is generally a brisk market for woollen goods at this time of the year, there is as yet no appearance thereof. Dealers hold back, and, as is the case with Cotton Goods, to effect sales a reduction in price must be submitted to. Metals: Considerable settlements of iron of all sorts have taken place, but without weakening the market. Lead is now firmly held, as stocks are supposed to be reduced very low, and inconsiderable shipments on the way. No sales are reported at Hong Kong, but 800 piculs have been placed in Canton. Quicksilver is also in demand in that city. Coals remain very dull, and quotations nominal, no sales ex ship being reported. The only arrivals have been to consumers.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—We have to report a business a little in excess of last mail's, and prices, which looked weaker have recovered and close firm as at that date. Arrivals were of course checked to some extent by the bad weather, but less than was expected, and supplies are nowe oming forward freely. They consist almost entirely of Medium, Good Medium, and Fine descriptions. The stock at present is about 6,000 piculs—purchases have been nearly 4,000. The Conrad left for London on the 28th ult., were 294,506 lbs. Quotatations laid down in London are:—Finest on offer, 1s. 6½d. to 1s. 6¾d.; Fine, 1s. 5½d. to 1s. 6½d.; Good Medium, 1s. 3½d. to 1s. 5d.; Medium, 1s. 2½d. to 1s. 3½d.; Good Common (nominal), 1s. 2d. to 1s. 2½d.

SHANGHAI.—Black Teas: A very small business has been done in Congous during the fortnight, the reported telegrams being somewhat contradictory, and written advices not in any way confirming the desirability of operating. Prices for the teas bought, however, have been fully up to last mails. Settlements have been as follows:—Exchange 6s. 3d. and freights £3 per ton.; 3,400 chests common to fair Hohow and Oonam, at 11½d. to 1s. 1d.; 3,700 chests fair to medium Ningchow and Oopack, at 1s. 1d. to 1s. 3½d.; reshipments, 700 chests; stock, 30,000 chests. Green Teas: A very large business has been done, American buyers, anxious to have something in the first ships, having at length entered the market. Prices were at first the same as last mail, and one or two settlements were made on very favourable terms, but later there was established an advance of fully one tael on good and fine kinds. The demand has been chiefly for the latter; most of the best chops have been now cleared from the market, but fresh arrivals of fine Teenkais are expected. Seng Seng Mow Kee is among the settlements at 39 taels, but it is inferior to last year's, both in quality and proportion. The Moyune teas, which are coming down fast, seem much inferior to last season's quality. Shipments to England continue. The fortnight's settlements comprise:—11,400 half-chests Moyune fair to finest, 1s. 11½d. to 2s. 4½d.; 2,500 do. Fychow fair to good, 1s. 7½d. to 2s. 0½d.; 22,800 do. Teenkai good to finest, 2s. 0½d. to 2s. 3d.; 6,000 do. Pingsuey common to fair, 1s. 9½d. to 2s. 0½d.

HANKOW.—The latest date is 3rd October. The market had been quiet, but the stock being moderate in extent and unencumbered, the teamen had been able to hold for former prices, and for some parcels of the common grades had obtained an advance of nearly one tael per picul. Settlements, consisting chiefly of fair Oopack kinds, at 14 to 15.2.5 taels per picul, amounted to 8,400 chests, contracts and native shipments making nearly 6,000 chests more. Quotations are—Oopack, common to fair, 1s. 0¾d. to 1s. 3d. per lb.; Oonams, common to fair Oonfa, 1s. 1½d. per lb.; Oonams, common, 1s. to 1s. 0½d. per lb.

FOOCHOW.—Congou: The continued gloomy advices from home do not seem to have the slightest effect upon this market, and we have to report a large business for the fortnight at firmer prices. Teas are coming down freely, but the falling off in arrival is still some 35,000 chests as compared with same date last year. Souchong: In some demand for the Continent, at rates on a par with those previously ruling. Pekoe: Only one small chop taken for India. Oolong: The chief feature of the fortnight has been the opening of the market for New York on the 2nd October at taels 24 to 29. Buying has since become general and settlements amount to 73,000 half-chests. Prices are nominally 5 taels lower than last year, but taking into consideration the inferiority of the crop, we make them actually only taels 2 to 3 cheaper. Quotations are, fair to good cargo taels 19 and 20 to 23. Superior taels 20. Fine to extra fine taels 30 to 43. Extra finest taels 45.

KIUKIANG.—Black Teas: Nearly 7,000 packages had arrived during the fortnight, but no settlements had taken place, and all but 900 packages had been shipped to Shanghai. Green Teas: Arrivals had continued to a very considerable extent, but many of the teas merely passed through the port, not being offered for sale or even shown. In all, 10 chops had found buyers, medium to fine Moyunes at from 27 to 33 tls. per picul; holders being at the close very firm for fine to finest teas, but ready to accept a decline in medium kinds.

CANTON.—A steady business has been transacted at the reduced rates noticed in our last; buyers have bought leisurely and thus prices given have ruled very regularly. Country Congous: Two more chops have arrived, one of which is packed in half chests; one chop. or part of a chop, has found a buyer at 20 taels; little or no demand exists; stock is 5 chops or 3,040 packages, of which two chops are packed in half chests. Country Greens: There is nothing new to remark about these kinds; old stock remaining as last advised, 800 packages. Canton-made Teas: The decline noticed in our last has continued, and a moderate business has resulted. Stocks of both kinds of Scented Teas are small, about 10,000 boxes of each sort, and although freights are higher, tael prices compare favourably with those ruling at same date last year, while Canton statistics do not present an unhealthy appearance. Quotations:—Country Congous, tls. 20; Scented Orange Pekoes, tls. 17½ to 34; Scented Capers, tls. 12½ to 29; Gunpowder, tls. 20 to 24; Imperial, tls. 21.

SILK.

YOKOHAMA.—We were able to report a slight indication of weakness in this market at the close of last mail's business. A few foreigners having, however, been steadily buying, and arrivals having been to some extent checked by the rains, there is no further tendency downwards. We make no change whatever in quotations. As before, the bulk of the business has been done in Best and Good Medium hank sorts, Oshus and Koshus. The first Achezan silk has appeared, and a few bales of superlative quality have been bought for America at the high price of $737 50. A slight advance is demanded for what remains. Total settlements we estimate at 450 piculs, and the unsold stock at 825. The weather having changed for the better, with every prospect of continuing fair, we anticipate free arrivals. The reports of a larger crop than last year's are confirmed.

SHANGHAI.—Early in the mail but little business was transacted, with the exception of about 150 to 200 bales, supposed to have been bought for the Bombay market, foreigners steadily holding off for a material concession in rates, which the natives were unwilling to submit to. Subsequently, however, observing the determination on the part of intending purchasers not to operate unless prices were much lower, the Chinese reduced their quotations, and in consequence a fair business has resulted, the settlements being estimated at 1,500 bales. Prices paid show a reduction of,—10 to 20 taels for chop tsatlees; 20 to 30 taels for market and common tsatlees; 10 to 20 taels for Karshing taysaams; 10 to 15 taels for Hainings and Yuenfas, and the market closes weak. The advance in prices paid last mail for good silks has induced large arrivals, and consequently the unsold stock has increased to 5,000 bales.

CANTON.—This market continues very firm. The more discouraging home advices appear the firmer silkmen seem to be, while on account of the season getting so far advanced (most of the fifth crop being now at market), with only a small sixth crop to look forward to, the various district markets seem actuated by the same strong desire to hold back for still more absurd rates. Hence the very limited business that has been transacted during the fortnight. Stocks, however, are decidedly heavy (with the exception of Loong-kongs), and it remains yet to be seen how far native holders will give way to meet intending purchasers' ideas.

ARRIVALS.

At YOKOHAMA.—From London, Sept. 27, Fontenaye, Swanley.

At SHANGHAI.—From London, Sept. 30, Cora Linn; Oct. 2, Tamerlane; from Cardiff, Sept. 30, John C. Munro, Island Queen: Oct. 2, Ensign; from London, previous to Nov. 5, Dilpussund (reported by telegram).

At HONG KONG.—From Plymouth (via Cape, &c.), Oct. 3, H.M.S. Rodney; from Cardiff, 10, Bourse d'Anvers: from Hamburg, 12, Merida, from New York, Sept. 21, Golden State; Oct. 10, Game Cock.

At MANILA.—None.

At SINGAPORE.—From London, Oct. 21, Osaca; 22, Florence Nightingale; from Liverpool, 4, Coila; from Swansea, Allegonda Jacoba; from Cardiff, Rotterdam; 10, Willem Kroon Prins der Nederlanden, Luctor et Emergo; 11, Aria and Betsy; 11, Joachim; from Shields, 9, Whampoa, Pauline; from Rotterdam, Julia; from New York, 8, New York (st.).

At PENANG.—From Hamburg, Oct. 5, Emma.

DEPARTURES.

From YOKOHAMA.—For London, Sept. 22. Conrad.

From SHANGHAI.—For London, Oct. 4, Albuera; 5, Allendale.

From FOOCHOW.—For London, Oct. 3, Canadian; 5, Naomi, Ettie.

From HONG KONG and CANTON.—For London, Oct. 3, Achilles. (steamer); for Liverpool 10, Veronica; for Havana, Oct. 3, Clarie; 5, Samatave; for New York, 9, Ethel.

FROM MANILA.—For Havre, Sept. 30, Ille and Vilaine; for New York, Oct. 4, Norval.

FROM SINGAPORE.—For London, 12th Oct., Achilles (st.),; 14, Sebastian Cabot, for Channel for orders; 12, Carl Wilhelm, for Bordeaux; 7, Java; 17, Imperatrice Eugenie, for New York; 3, Kalahome; 10, U.S.St. Wachusett, U.S.St. Wyoming, Benvoirlich (*via* Padang).

FROM PENANG.—For London, Oct. 15, Achilles (St.).

VESSELS LOADING.

At YOKOHAMA.—For United States, Pauline, Caractacus.

At SHANGHAI.—For London, Douglas Castle, Weymouth, Elmstone Dartmouth, Ethiopian, John Lidgett, Zodiac; for New York, Amicus, Onsuri, Resolute, Burnside, Caller Ou, Fairleader, Silome, Wild Gazelle, Madura.

At FOOCHOW.—For London, Cleveland, Belle, Laurel, Finzel.

At AMOY.—For New York, Stanley expected, N. B. Palmer, Golden State, Joachim, Christian.

At HONG KONG and CANTON.—For London, Kelso, Chetah, Corea; for New York, Magnet.

At MANILA.—For London, Fortuna; for Cork, Doriga, Ercilla; for Hamburg, Voladora; for Cadiz, Concepcion; for Boston, Herald, Sooloo; for New York, Asa Eldridge, Ashburton.

At SINGAPORE.—For London, Unrivalled, Flora, Napoleon; for Liverpool, Eastern Chief, Panic; for Bordeaux, St. Vincent de Paul; for Boston, Bessie Stanton.

At PENANG.—None.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: cotton and tea, £3 to £3 10s. per ton; silk, £4 to £4 10s. of 50 cubic feet. To San Francisco, per steamer, $45 per sailing vessel £3 5s. to £3 10s. per ton of 40 cubic feet.

At SHANGHAI.—The rate to London remains at £3, but vessels are filling up slowly. Several charters have taken place for New York at £3 per ton of 40 cubic feet. To the Northern ports there exists a better inquiry.

At FOOCHOW.—To London: £3 10s. to £4.

At HONG KONG and CANTON, for London direct there is no business to report. The Chetah and Corea are expected to take the berth at Whampoa at £2 15s. per ton.

From the Philippine Islands (Zebu) to United Kingdom, the Noranside and the Craigie-lea found employment at about £3 10s., and for medium-sized vessels similar charter are still offering.

For New York via Amoy and Foochow three charters have been effected at £3 and £3 2s. 6d. respectively, and the Adelia Carlton and the Lizzie have taken the berth at Whampoa for the same port at £2 15s. per ton of 40 feet.

For coasting purposes there is but little inquiry. There are, according to the circular of George Holmes, 24 disengaged vessels in harbour (exclusive of Siamese), representing 16,124 tons.

MANILA.—The only settlement is the Spanish barque Doriga, 554 ton dry sugar, to Cork for orders, at £3 10s. if to discharge at Liverpool, Bristol, or Glasgow, and £3 12s. 6d. if discharged in London.

AT SINGAPORE the Unrivalled and the Flora are on the berth for London, and the Panic for Liverpool at £3 per ton for dead weight and light freight; the steamer Achilles from Hong Kong to London found some cargo at £3 15s. for tin, and £5 for light freight. The following charters have been made:—Bessie Stanton (Brit.) 356 tons, to load for Boston for £1,650 in full, 25 lay days; screw steamer Far East (Brit.), 1,062 tons, to load at Penang and Singapore to Hong Kong for $13,200 15 lay days.

CASUALTIES.

The Philomela, Yokohama to Foochow, has been lost on the Formosa coast (reported by telegram).

The schooner Restless, Foochow to Sydney, was picked up about 60 miles to the southward of Swatow dismasted, and towed into Hong Kong by the steamer Cadiz.

Maggie Leslie, from Foochow, reported lost in Gaspar Straits, has arrived at Batavia, towed in by the Fusiyama, from Shanghai to London.

HONG KONG.

The British ship Polmaise reports having left Shanghai on the 14th Sept., bound to London, and that on the 22nd, when off S. end of Formosa, encountered a heavy typhoon, in which she lost boats, sails bulwarks, and sustained other damage; put into Hong Kong for repairs and to overhaul the cargo to see if it is damaged.

The steamer Achilles, from Shanghai, reports that after clearing the mouth of the Yang-tsze on the 25th of Sept., she fell in with a heavy typhoon from the N.E. with a terrific sea, the vessel steaming dead slow all the time. On the 29th, at 4.30 P.M., when about thirty-five miles off Hong Kong, fell in with the British ship Eastward Ho, on fire and partially dismasted. Took her in tow and brought her into port.

The British ship Eastward Ho! reports having left Sydney Aug. 1, bound for Shanghai. Experienced a favourable time until the 10th Sept. in lat. 30 deg. N., lon. 140 deg. E., when fire was observed issuing from the forehatch. The force-pump was immediately set to work, all ventilation stopped, holes cut in the deck and water poured down, and every effort made to subdue the fire, but without effect. It gradually increased. Kept before the wind to confine the conflagration to the fore part of the vessel. From that time until the 23rd experienced moderate east-north-easterly winds and fine weather, when the south end of Formosa was sighted. Next day the breeze increased, with heavy squalls, and the sea began to rise. Hove the ship to at three P.M., and at five noticed the foremast settling down through the deck and the rigging slackening up, the mast surging about from side to side. It still continued to settle down, and preparations were made to cut it away. At 6 P.M. cut the rigging, and the mast went over the side, having been completely burnt through below the deck, carrying with it the main and mizzen top gallant masts and main topmast head; the main stays being all adrift by the fall of the foremast, and the ship rolling heavily, the main-topmast soon followed, taking the mainmast head. The fire increasing all this time and all hands continually employed in trying to keep it under, but it became so hot as to burn through the port side of the vessel just above the water's edge. On the 27th managed to rig a jury-foremast so as to get the vessel under command, and having a fine E.N.E. breeze, sighted Hong Kong on the 28th of September, and arrived at 4 A.M. next morning in tow of the ocean steamer Achilles.

The French schooner Mouette, Captain Catherineau, arrived in Amoy October 4, reports that on September 22, in lat. 19.50 N., lon. from Paris 117.18 E., she spoke the American barque Penang, of Bath, apparently deeply laden, with boats, masts, and part of bulwarks carried away. She was from Ningpo bound to Hong Kong. Captain Catherineau offered assistance, but was told that none was required, as jurymasts could be rigged, and the vessel by that means be enabled to reach Hong Kong. The Mouette experienced a severe typhoon on the 21st of September, in lat. 19 N., lon. from Paris 117.40 E.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

The Stock Exchange Committee have granted the Hong Kong and Shanghai Banking Corporation a quotation for both their old and new shares on the official list.

The limited amount of bar silver brought by the West India packet has been disposed of at 60½d. per ounce, showing a fractional advance on the previous rate.

The loss of the steamer *Thunder*, from Hong Kong to Calcutta, is now considered as certain.

ARRIVALS NOT IN THE TABLES.—Nov. 24, at Liverpool, from Singapore, Twilight; 21, off Falmouth, from Rangoon, Dovercourt; 9, at New York, from Manila, Wild Rover; 12, off the Eddystone, from Colombo, Ravensbourne; 25, at Falmouth, from Akyab, Ravensbourne; 25, at Scilly, from Batavia, Copernicus; 26, from Ceylon, Cape City.

DEPARTURES.—Nov. 23, from Penarth Dock, for Galle, Solid; 24, from Sunderland, for Singapore, Queen's Own.

LAID ON.—At Liverpool, for Singapore, Twilight and Moss-trooper.

FREIGHTS AND CHARTERS.—The Admiralty have invited tenders for the conveyance of 14 tons naval masts and spars, 35 tons naval timber, 97 tons weight, and 95 tons measurement naval common, 16 tons naval bricks, 3 tons naval iron cables, and 60 tons naval cordage from the Thames to Hong Kong.

SPOKEN.—Abenanillo (?), Singapore to Liverpool, 80 days out, Sept. 29, 20 S., 8 W.; Cairo (?) (barq.), Colombo to London, Nov. 12, 49 N., 12 W.; Cornelia, Batavia to Amsterdam, Oct. 13, 5 N., 18 W.; Almelo, Amsterdam to Samarang, Oct. 8, 11 N., 27 W.; Barien, Amsterdam to Batavia, Oct. 8, 11 N., 27 W.; Lennox Castle, Shanghai to London, Aug. 19, lat. —, lon. 108 E.

LEGAL.

—o—

BANKRUPTCY COURT.

IN RE THE BANK OF HINDUSTAN, CHINA, AND JAPAN.—This was a motion for an order to dissolve an injunction granted in the vacation by Vice-Chancellor Sir R. Malins, to restrain the issuing of certain executions for costs. The facts were shortly these. The official liquidator of the company had sued several of its debtors at law, and had failed in the actions. Judgments had therefore been entered up in favour of the defendant-at-law, and executions issued for the costs. The company was being wound up voluntarily, under the supervision of the Court; and the right to have the injunction dissolved depended on the construction of the Companies' Act, 1862, sects. 87 and 163, relating to the issuing of processes against a company, after the commencement of proceedings to wind it up. Mr. Dickenson, Q.C., and Mr. Eddis supported the motion; Mr. Greene, Q.C., and Mr. J. N. Higgins supposed it. The Vice-Chancellor dissolved the injunction, with costs.

ADMIRALTY COURT.

THE "NINA." — In this case the *Nina*, a Portuguese ship, was arrested at Cardiff at the suit of Charles La Blache, for wages and disbursements, and the Court was moved to order a release of the vessel with costs and damages against the plaintiff. The plaintiff's case was that he was at Havannah in March this year, and was engaged to navigate the *Nina* from that port to Glasgow, thence to Hong Kong and Macao, and from Macao back to Havannah with a cargo of coolies. That his wages were to be £18 per month, and an allowance of 10s. for every coolie landed at Havannah. That, in consequence of being a British subject, he could not by the commercial law of Portugal command the ship; therefore it was arranged between him and the nominal captain, F. D. P. Almeida, the plaintiff, should sign articles as "piloto" or mate; but that he, in reality, was to command the ship, and that he had the entire control of her during the voyage from Havannah to Greenock. At Greenock disputes arose between Almeida and the plaintiff, who left the ship and sent in a claim for the sum of £324 for wages, and £285 bonus upon the 570 coolies, it was proposed to take from Macao to Havannah. This claim being disputed, the vessel was arrested by process issued in Scotland, but the vessel was afterwards released with costs against the plaintiff, who, when the vessel arrived at Cardiff, again arrested her upon a warrant from this Court. The defendant denied that the plaintiff was engaged to navigate the ship, or that he ever acted in any other capacity than as second mate, and put in evidence a copy of the "matricule" or "roll," which had been duly executed by the plaintiff and others, in the presence of the Portuguese Consul at Havannah, before the commencement of the voyage, by which the plaintiff bound himself to submit to the provisions of the Portuguese Commercial Code, by the 1,489th article of which he bound himself not to commence proceedings against the *Nina* or her master (before the termination of the voyage), and in case of any dispute between him and the master it must be settled by the nearest Portuguese Consul who should have exclusive jurisdiction to try and determine any dispute according to the laws of Portugal. The plaintiff left the ship at Greenock of his own accord, and had not made any attempt to have the question in dispute settled by the arbitration of any Portuguese Consul.—Mr. V. Lushington, for the plaintiff, contended that the Court had jurisdiction in this suit, and that the 10th section of the Admiralty Court Act, 1861, took away the discretionary power which the Court had before the passing of the Act, and gave absolute jurisdiction. Sir R. J. Phillimore: I am of opinion that it is still competent for the Court to exercise now the same discretion with reference to suits for wages by foreign seamen that it did before the passing of the Admiralty Court Act, 1861. It is expedient, upon considerations of national comity, that the Court should not as a universal rule interfere so as to disregard the law of foreign countries in disputes between foreign seamen. The Court does not hold that it will not interfere in such cases, but it will exercise a discretion according to the circumstances of each case. In the present instance this is a suit against a Portuguese ship by a foreigner, who has undertaken to be bound by the decision of the Portuguese Consul, who is willing to adjudicate upon the matter. I therefore decree a release of the ship, and, under all the circumstances, and especially as the plaintiff has previously arrested the vessel in another court for the same object, I accompany the decree with costs and damages.

PARLIAMENT.

—o—

THE MAIL CONTRACT.

In the House of Lords, Lord STANLEY of ALDERLEY asked a question with reference to the contracts between the Post-office and the Peninsular and Oriental Steam Company. He feared the Government had not given sufficient time to allow tenders to be sent in, and objected to the twelve years' duration of the contract as too long, and to the absence of preparations for conducting the service by Brindisi.—The Duke of MONTROSE said that no objection to the short time allowed for tenders had been made by any companies likely to perform the service. He gave an account of the negotiations of the Government with the Peninsular and Oriental Company. They offered to undertake the service for twelve years for £400,000, instead of the £500,000 per annum, which they required if the contract was to last only six years. The company had opened their books to inspection, and showed that they could not continue the service at the old rate. Lord Stanley of Alderley had said that by the Brindisi route a saving of thirty-six hours would be effected; but the railway was a single line, which could not be worked with punctuality, and by the arrangement now proposed, that vessels should not call at Malta, but go direct *via* Messina, a saving of twenty-four hours would be effected. Besides, there was a clause in the contract that if the Government thought it desirable before the expiry of the twelve years to change the Marseilles for the Brindisi route, the matter should be referred to arbitration.

In the House of Commons, Sir H. RAWLINSON asked the Secretary to the Treasury whether, in the event of the new proposed contract with the Peninsular and Oriental Company for the mail service in the East being approved of by the Legislature, it was the intention of Her Majesty's Government to increase the rates of postage on overland letters between England and India.—Mr. HUNT said the same question was put to him last session, and he then intimated that it was the intention of the Government, when the new service commenced, to increase the rate of postage to 1s. 3d. per half-ounce, and that intention still continued.

*** We have authority to state that it is not intended to disturb the present rates of postage on correspondence for China.

THE NEW MAIL SERVICE.—The *Malta Times* protests against the new plan, by which the Marseilles steamers proceed direct to Alexandria without touching at that island. "After all," says the *Malta Times*, "this is a mail for the benefit of British colonies, for which a heavy subsidy is being paid, and we can hardly suppose that a hypothetical saving of five or even double that number of hours in the several weeks required for the transmission of mails to and from India is a justifiable reason to put aside such an important British possession and naval and military station as Malta, especially when the most pressing political, commercial, and social wants concerning India can be made known by the rapid means of communication afforded by the telegraph. We are glad to hear the matter has been taken up by the Chamber of Commerce; but it must not be lost sight of that this is a question not only affecting local interests but imperial interests also, and should be maturely considered before it is definitely settled."

POSTAGE ON LETTERS FOR OFFICERS OF THE ARMY SERVING IN THE COLONIES.—On the 1st January next, and thenceforward, prepaid letters, posted in the United Kingdom, addressed to officers of the army serving in a British colony, and conveyed direct, without passing through a foreign country, will be chargeable with a postage of sixpence only per half ounce, although the postage of ordinary letters sent to such colony may be higher than sixpence. When the letters pass through a foreign country they will be liable, in addition to the British rate of 6d., to the same transit rate as other letters. Thus, officers' letters addressed to Penang, Singapore, Hong-Kong, Labuan, the Cape of Good Hope, or Natal, when sent *via* Marseilles, will be chargeable with a total rate of 10d. per ½ oz. Officers' letters addressed to British Columbia, Vancouver's Island, or Honduras, being sent through the United States, will be chargeable with a total rate of 8d. per ½ oz.; and officers' letters for Bermuda will be liable to the same rate of 8d. per ½ oz. when sent *via* New York. The superscription of each letter must specify the rank and regiment, corps, or detachment in which the officer to whom the letter is addressed is serving, or the department to which he belongs.

CHINA GRASS.—Those who have been looking forward to the time when this article would rank amongst the staples exported from China will be disappointed to learn that the demand for it has nearly ceased. So long as high prices were maintained for cotton, wool, and silk, it was taken for mixing with these fibres, and prices reached £85 to £90 per ton for best white, and £70 to £75 per ton for best green, which we believe to be about its cost laid down in England; but since the fall in the value of the above-named fibres our manufacturers do not appear to have found any fabric in which they can satisfactorily introduce it. Although the stocks are now very low, as probably in Liverpool and London not more than 250 to 300 tons of white and green inclusive can be found, we hear that China Grass is offering at £50 per ton for fair white, and £35 per ton for common green, without inducing business. The transactions of the past eighteen months seems to have been confined to little odd lots sold at about present quotations, to close shipments.

THE LABUAN COAL COMPANY.—The case of this company came before the Master of the Rolls again on the 25th, when an order was made to set aside a sum to meet the claims arising in respect of the steamer *Mona*. We understand it was also arranged that the business of the company should be carried on for a stated period, to afford opportunity for a sale of the property, or for some new arrangement to be entered into by the shareholders.

EXPORT OF TREASURE FROM SAN FRANCISCO TO CHINA AND JAPAN.—The following statement has been published of the quantity of bullion exported from San Francisco to China and Japan during the first ten months of 1867:—In January, 827,761 dols.; in February, 386,206 do.; in March, 112,881 do.; in April, 1,081,513 do.; in May, 762,872 do.; in June, 698,933 do.; in July, 1,747,178 do.; in August, 385,540 do.; in September, 1,190,308 do.; in October, 1,000,000. Total, 8,193,196 dollars.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 23.

The general discussions about the Budget have been brought to an end in two sittings; they were very short, but, nevertheless, very acute, and the opposition is nearly general with regard to the behaviour of the Ministers of the financial department, that of foreign affairs, and last, not least, the colonial department. The debate about the Budget of Mr. Van Zuylen has now begun, and it was so smart, so severe, and the Minister has answered in such a manner that I think it impossible that it wil pass. Perhaps the fate of it will be decided on Monday next. The position of the cabinet is, in the meanwhile, critical in the highest degree.

A general bitterness prevails amongst the Catholics, in consequence of the behaviour of the Liberal papers when speaking of the Pope. I have already told you that a great many young men started and still start to Rome, with the purpose of being enrolled amongst the Papal zouaves. The papers now are warning them that by doing so they lose their rights as Dutchmen. This offends the Catholics, and they are now organising demonstrations against the non-Catholic papers—the more so because they speak about the Roman affairs in a manner which they do not like. That the excitement is general may be proved by the fact that in a few days 80,000f. was subscribed by the Catholics, through an appeal made by the Tyd, on behalf of the Pope.

Several traders connected with Japan commerce have addressed themselves again to the Second Chamber of the States General, claiming that they should be indemnified for the losses they sustained by the late war.

The rumour that our actual Minister for Foreign Affairs should be appointed Ambassador at the Court of St. James's is contradicted.

It causes generally a good deal of satisfaction that the condition of our East Indian colonies becomes more and more known abroad. Without any doubt, the translation of the May Havelaar in the *Revue Moderne* will tend to increase this knowledge; indeed, Mr. Nieuwenhuis deserves thanks for his translation.

COMMERCIAL.

COFFEE.—The market is very firm, in consequence of the favourable result of the auction, which was held on the 20th by the Dutch Trading Company, and at which 110,487 b. were offered. The total quantity was sold, almost above the valuations. Preanger Yellow was paid with 47 to 54½c.; Padang, 43½ to 45½; Java, yellowish to white, 41 to 45½; Tjilatjap, 41½ to 45¾; White, 39 to 41; Kadac, 39 to 39¼; Preanger, greenish, 38¼ to 39¾; West India sorts, 39 to 41¾; Malang, 36½ to 39¼; Macassar, 33 to 39¼. There is now a good demand for good ord. quality at 38c., but there is a want of this sort. Of course the private transactions were of but little importance, and they only included 1,800 b. Java, ex President van Ryckevorsel, at 43½ to 37½c.; 1,560 b. Java, W. I. quality, at 42¼c., and 800 b. ord. to good ord. at 35 to 38c., and 1,300 b. Coro, ex Santa Rosa.

SUGAR (RAW).—The valuation of the 28,180 b. Java, which will be offered for sale on the 26th inst., is for No. 12, 32½f., being 1¼f. above the September sale; for No. 13, 33½f.; No. 14, 34¼f.; No. 15, 33¾f.; and No. 16, 34¼f. The market is very firm, but the transactions are unimportant, in anticipation of the sale. For 860 b. Passaroeang, ex Carolina, No. 18, very firm steam sugar, 35½f. was paid; for 366 b. Java, floating per Henrietta Maria, No. 13¼, ord. to good quality, 32¾f.; and 1,179 b. Java, at prices that did not transpire.

RICE and SPICES quiet, but firm. In auction were sold 41 cases nutmegs, and 10 chests mace.

Of TEA 1,965 ¼-chests, and 112 ½-chests Java, of the Plantation Bagelen, were sold as follows:—Boei, 61c. to 63c.; Congo, 70c. to 71c.; Souchon, 82c. to 122c.; Pecco Souchon, 196c. to 197c.; Pecco, 300c. to 325c.; and Souchon, 101c. to 132c.

TOBACCO.—Imported, per Corsock and Amazone, 4,361 b., and sold for private account 169 b. Java Tandem, and 55 b. A. M. Of the 3,435 b. Taul in auction, 1,214 b. were sold from 29c. to 152c., and 221 b. bought in from 25½c. to 150c. At the several auctions which were held during the last days there was much demand, and high prices were paid for good quality, whilst for the trade mark M rather exorbitant prices were paid. After the sales 1,117 b. Soekowono, and 514 b. f. v.d. P., bought in at the sales, were sold at private terms, likewise 1,283 b. S. R., and 212 b. Djarit, ex Corsock. 40 b. Manilla, offered in auction, were partially sold at 67½c. to 168c. Holders of the very unimportant stock, however, decline to operate at these prices.

INDIGO.—Fine quality Java with a good demand at firm prices; ordinary quiet; only 50 ch. were sold.

SAPANWOOD.—6,000 kilo Bimas brought firm prices.

COTTON.—Market very dull; 400 b. were sold at lower prices.

MANUFACTURES.—Quiet; 6-4ths Madapollams and Calicots 4.30f. to 4.40f.; No. 28 Warps 12¼d.; No. 30 Cops 10¾d.

TIN.—The market is very firm; 4,300 slabs Banca brought 53¼f., 300 slabs ditto 53¾f.; nothing can be bought now under 54f.; 400 slabs Billiton from 52¼f. to 52½f.

HIDES.—450 p. Batavia Buffalo 11 to 11½ kilo, per Cortgene, were sold at firm prices, and by inscription 2,593 p. Padang Rinder and 1,579 p. Buffalo imported per Gerredina Wilhelmina, and 769 p. Sourabaya Rinder ex Yokohama.

MISCELLANEOUS.—Rattans 76 pic. ex Betsy, and 129 pic. ex Jupiter, were sold. Camphor firm, and held a little higher. Cassia Vera, fine Padang sort to be obtainable at 45c. in bond. Cubebs dull. Gum Benzoe, 45 ch. were sold per Gerredina Wilhelmina. Gum Damar scarce. India-rubber unaltered. Of Gutta-percha the imported lots will soon be brought into the market.

MONEY AND STOCKS.—The Bank rate of discount remained unaltered, and there was a steady demand; in the open market the supply of capital is rather diminishing. The principal business in the market for public securities is in foreign bonds, which in most cases continue to show more strength. The tendency of the Bourse is favourable. The home funds remain unaltered. Dutch Two-and-a-Half per Cents., 53; Three per Cents., 62¾; Four per Cents., 84; Trading Company, 137; Netherlands Bank, 248; Neth. India Trading Bank, 73; Rotterdam Bank, 99½, ¾.

EXCHANGE.—London, 3 mo., f.11.85; 2 mo., f.11.86½; short, f.11.92½. Paris, 3 mo., f.47.12½; 2 mo., f.47.17½; short, f.47.50. Hamburg, 3 mo., f.35; 2 mo., f.35.05; short, f.35.20.

SHIPPING.

ARRIVALS.—Nov. 17, at Flushing, from Batavia, Dordrecht; Nov. 20, at Brouwershaven, from Batavia; Hendrika, Gerradina, Susanna.

DEPARTURES.—Nov. 18, from Brouwershaven for Batavia, Patriarch, Samhiri, Bezoekie. The Trading Company chartered the Juno, Mathilde, and the Mina, to convey produce from India to Holland.

PASSENGERS OUTWARD.—For Java, per Koning Willem III.: Mr. P. Van Leeuwen and family, Mrs. Van Thalbitsen, Mrs. Geus, Messrs. De Lange. Per Bezoekie: Mrs. J. C. Eweg and four children, Misses M. H. Van Gennep and C. Char, Messrs. J. B. De Graaf and family, J. De Graaf and family, A. J. Fleury and family, J. C. Bouman, J. H. Schmidt Weymans, Van Vlaanderen, Bletterman. Per Patriarch Samhiri: Mrs. Van Dommelen, Mr. Muysenberg.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Nov. 23.

A learned Theban—by name Franz Maurer—has just published a pamphlet at Berlin recommending Prussia to take and colonise the Nicobar Islands, as a central pivot for the further extension of German territory in the Far East. It is true that the group in question are only inhabited by savages, but experience shows they are of a very warlike character, and it would cost a deal of money and trouble to subdue them. Besides, they produce nothing but cocoanuts, a few cargoes of which are annually fetched from Penang and Singapore; and as the islands are totally clothed with impenetrable jungle, it is impossible to say if the soil is adapted for cultivation by colonists, especially by raw Germans without any colonial experience of a tropical climate. At the end of the last century the Danish Government took possession of the group, and sent out a dozen Moravian missionaries; but partly from the unhealthiness of the situation they selected, and partly from the hostility of the natives, they all came to grief, and only two returned to tell the sad tale of their misfortunes. After this disaster the group was formally abandoned, the Danish flag being hauled down by the commander of the corvette sent out from Europe for that purpose. After the return or the Novara expedition it was under the consideration of the Austrian Government to take possession of those islands, but they appear to have thought better of it—certain it is that if the plan was ever seriously entertained it was never executed. Thornton's Gazetteer says that the Nicobar Islands are comprised in the territory belonging to the English East India Company, and which has now reverted to the Crown; the natives hoist the Union Jack, and have placed themselves under British protection.

When the late Colonel von Siebold died in October last year he had just concluded an agreement with the Bavarian Government for the purchase of the valuable museum of Japanese works of art and other curiosities that he had spent a great part of his life in collecting, for the sum of 60,000 florins under the condition that it should bear his name, but he died before the transfer was completed. Nevertheless, the collection was handed over to the Government of Bavaria, and by them removed from Wurtzburg, where the colonel resided during the latter period of his life, to Munich, and placed in one of the galleries surrounding the Hofgarten. In consequence of the depressed state of the Bavarian finances that occurred subsequently—the war indemnity to Prussia alone was 30 millions of florins, or £2,500,000—the Finance Minister would not take upon himself the responsibility of placing such a large sum as 60,000 florins on the estimates, however desirable the acquisition of the collection might be for a capital where so much is done for the cultivation of the arts and liberal sciences; and negotiations were opened with the heirs of the deceased colonel, which have just terminated in a fresh arrangement by which the Government retain possession of the Siebold Museum and agree to pay the original price though not in one sum, but in yearly instalments of 5,000 florins each year with interest till the debt is totally liquidated.

The collection consists of eight divisions, containing collectively more than three thousand different objects, viz.: 1. Numerous articles illustrative of the Japanese religious worship, such as pictures and statues of their deities, partly of bronze, but for the greater part carved in wood and gilt, sacrificial altars, vases, candalabras, bells, praying desks, sacerdotal robes, prayer-books, &c. 2. A collection of Japanese coins, above 1,200 in number, in bronze, copper, silver, and gold, arranged chronologically and extending over the period of more than two thousand years—from B.C. 221 to A.D. 1862. 3. Books, paintings, works of art, and maps, giving a good idea of the present state of civilisation in Japan. 4. Lacquer-ware on wood and copper, manufacturers of straw, ivory, tortoise-shell, silk, ornamental garments, &c. 5. Weapons, armour, and horse-furniture. 6. Miscellaneous objects and curiosities. 7. Different sorts of paper and articles made of that material. 8. Raw produce. Col. von Siebold collected these valuable curiosities during his last residence in Jeddo (1859 and 1860), and it was only in consequence of his intimate relations with the Shiogoon and his status as political agent of the King of the Netherlands that he was enabled to export them, especially those articles relating to religious observances, which are strictly prohibited from being sent out of the country

COMMERCIAL.

In the produce market great calmness prevails, but the prices of most articles are firm. The transactions in rice were confined to small purchases of cleaned grain to the trade. none having been made for shipment. Cassia lignea continues in much request at rising prices; 500 chests of the cargo lately arrived from China by the Peru have been sold by private contract at 12½ Sch. Bco. Pepper firm, with but limited sale. In Spelter no alteration to report. Discount 2½ per cent.

SHIPPING.

SAILED.—Wanja, to Hong Kong.

READY TO SAIL.—Friesland, for Batavia; Amaranth, for Hong Kong; Schwan, for Singapore.

THE MAIL CONTRACT.

THE terms of the new contract entered into by Her MAJESTY'S Government with the P. and O. Company (particulars of the future working of which we gave in our last issue) have now been laid before Parliament; the matter, however, has not yet been discussed in the House of Commons. The Parliamentary paper contains also the negotiations which led to the conclusion of this contract, the terms of which may be briefly summed up as follows:—The Peninsular and Oriental Company engage to convey the mails to and from India and China, including a weekly mail to Bombay, and a fortnightly one to China and Japan, for a subsidy of £400,000 per annum during a period of twelve years. Should the dividend of the company in any year exceed 8 per cent., it is stipulated that one-fourth of the excess shall be credited to the Treasury; and in case of the dividend falling below 6 per cent. from "causes not within the company's control," the subsidy will be increased by the amount of the deficiency.

The series of papers commences with a memorial from the directors of the company to the Treasury, setting forth their "surprise and alarm" at the overtures said to have been made to the French Company, and pointing out the injustice of placing them in competition with what, in fact, is an organised branch of the French navy. Mr. HUNT, on behalf of the Treasury, states in reply to this that "H.M.'s Government "felt it their duty to open the service to public competition "without reference to nationality," thus evading the charge of having made direct overtures to the Messageries Imperiales. But Mr. HOWELL (Secretary to the P. and O. Company), would not allow the matter to be set aside so easily, and wrote again, pointedly taxing the Government with "having made "a special communication through the British Minister in Paris, "inviting the French company to execute a postal service with "China and Japan once every four weeks." This remained unanswered; the Treasury being unable to deny an act they were apparently ashamed of, took refuge in an undignified silence.

To this episode succeeded some comparatively uninteresting correspondence between the POSTMASTER-GENERAL and the Treasury, terminating in the announcement that but one tender had been received by the former for the proposed contract—namely, that of the P. and O. Company, which offered to perform a complete service for six years, for the round sum of half a million sterling per annum. This sum—a very round sum indeed it appeared at first, when compared with the former subsidy of £230,000—was demurred to. On the part of the Government it was contended that the original terms of the service had not been insufficient. As the Peninsular and Oriental Company had been dividing up to the year 1866 a *minimum* of 7 per cent. profit, they could not have been doing a bad business, and as the Post-office actually lost by its bargain, or, in other words, as the amount received for postage did not cover the cost of carrying the letters, it was obvious to infer that the terms could not prudently be raised. But the company showed cause against these arguments. Its business had recently declined, and its dividend had failed. The competition of the French line had carried away a share of the traffic (which of itself was falling off), and the expenses of the service, especially in the cost of fuel, had greatly increased. Under these circumstances, the directors thought that a payment at the rate of 10s. per mile was necessary for a remunerative performance of the service in future. This was admitted to be a large advance upon the terms previously subsisting, but the directors expressed their confidence by offering to open their books and estimates without reserve to the Post-office authorities. The offer was accepted, and Mr. SCUDAMORE, one of the assistant secretaries of the department, was deputed to conduct the inquiry and report his conclusions. After a careful examination of the company's books Mr. SCUDAMORE found the calculations on which their offer was based to be just; but found them willing to abate one-fifth of their demand, if the duration of the contract were extended from six years to twelve. Eventually the conditions above specified were agreed to, Mr. SCUDAMORE expressing his satisfaction with them in these terms:—"The question "cannot be dealt with on commercial principles, because the "conditions of the postal service compel the contractors to "disregard commercial principles. If they were guided solely "by commercial principles, the Peninsular and Oriental Com-"pany would not sail as many ships in the dull as in the brisk "season; would not sail on fixed days, when by sailing a little "sooner or later they could secure a good freight; would not "go at full speed when half speed would serve their turn; and "would build no bigger and no better ships than their trade "absolutely required. For the sake of keeping up such a com-"munication with the East as the nation requires, they must "set commercial principles at defiance, and, cost what it may, "the nation must either pay them what they lose thereby, or "forego the communication."

While these negotiations were pending, the company, with a praiseworthy determination not to be bullied, forwarded a "memorandum" to the CHANCELLOR of the EXCHEQUER, stating that the directors felt they had reason to complain of the manner in which their first offer had been dealt with, it having been denounced in the House of Commons, and consequently to the world at large, as "exorbitant and inadmissible," but without any explanation of the facts by which it was justified. In this memorandum the Secretary points out—

"That the cost of the company's navigation is nearly 40s. per mile leaving after deduction of even the 10s. (considered exorbitant), three-fourths of that cost to be obtained from freight and passage money, sources now being much reduced by the competition of the French Company.

"That the 10s. per mile is scarcely more than half the rate of subsidy paid by the French Government to that company with which the Peninsular and Oriental Company have to compete, and that is only 6d. per mile above that paid by the British Government to the West India Mail Company, namely 9s. 6d. per mile for a service in which the cost of fuel and other items of expense are very considerably less than those required for the performance of the India and China service.

"That the annual income required to enable the Peninsular and Oriental Company to cover its expenditure, and to yield a moderate dividend to its shareholders, is about two millions and a half sterling, and that therefore the amount they receive for the postal service is but a small proportion of this sum."

with other statements equally cogent and indisputable; to which no reply or justification seems to have been attempted. Clearly, in all cases where Mr. HOWELL and the Government have come into collision, "My Lords" have had the worst of it.

The arrangement by which the company is guaranteed a minimum dividend of 6 per cent., while one-fourth of any excess over 8 per cent. is claimed by the Post-office, virtually establishes a partnership between that Department and the company, and appears to us the undesirable result of a very undignified process of bargaining. It is clearly beneficial to the company, for its shareholders are assured of a permanently remunerative dividend, while they cannot be called on to relinquish even 1 per cent. of their profits until the surplus reaches 12 per cent. Instead of giving the company an advantage in this way, it appears to us that a more straightforward and dignified course would have been to increase the subsidy say to £450,000; even at the expense of having a larger figure to put in the estimates. Mr. SCUDAMORE, however, seems to think this clause will be a profitable one to the Post-office, for he says—

"I believe that if the arrangement which I have sketched out be adopted, it will be fair to the Post-office and to the company. I think that the maximum payment to the company will be £400,000, for I do not believe that their dividend fund will ever fail to produce 6 per cent. But, as no more than £26,000 are needed to produce £1 per cent. of dividend, it will follow that if the dividend fund would only yield 5 per cent., we should have to pay £426,000, and that if it would only yield 4 per cent. we should have to pay £452,000. We should not have to pay £500,000, the sum which they asked at first, unless their dividend fund would only yield £2 per cent. I believe, however, that, as a rule, we should share profit

Digitized by Google

with them, and that our share would range from £12,000 to £25,000 per annum. If my view be correct, our payment to them would not be £400,000 per annum, but from £388,000 to £375 000 per annum."

The papers before us include an interesting statement in a tabular form (prepared by the Secretary to the Post-office) of the estimated expense of the new service, and the apportionment of the deficiency. To the £400,000 payable under the contract is added a sum of £20,645 for "incidental expenses;" so that after deducting £50,633 as chargeable to the Australian service, £370,012 is left as the total cost of the India, China, and Japan services. [By the way, this is without any provision for a possible contribution to make up a deficient dividend.] Omitting the figures relating to India and the Mauritius, we find that the share of Ceylon is estimated at £8,385, of which only £2,383 is recovered in postage, leaving a deficit of 6,002, "which may be met either by raising the postage or requiring a "payment in aid from the Ceylon Government." The China and Japan mails are charged with a total of £55,278, which, after deducting the postage received—£22,065—leaves a loss of £33,213; regarding which, the SECRETARY says, "The "postage could not be raised to meet this loss. There are no "means at present of separating Hong Kong correspondence "from the mass, so that no idea can be formed of the sum "which that colony should contribute; but the sum would "assuredly be small." Then follows a suggestion that £10,000 each should be levied on Ceylon and Hong Kong—a proposition that will not find much favour in either of those colonies.

A proposal on the part of the Government to abolish the lines between Bombay and Galle, and Galle, Madras, and Calcutta, was rejected by the company on the ground of the necessity of making use of the company's extensive repairing establishment at Calcutta and Bombay to keep their vessels in efficient order. A few other facts will complete our explanation, which we have endeavoured to render as concise as possible. The Australian mails will start once every four weeks, not fortnightly, as we inadvertently stated in our last issue. The steamers will not call at Penang, as it is anticipated that in future there will be a local service between that port and Singapore; and they will remain only twelve hours at the latter port. And finally, the time-tables will be based on an average speed of ten knots an hour on this side of Alexandria, and nine and a-half knots on all lines eastward of Suez.

THE ANGLO-INDIAN TELEGRAPH.

IN our issue of the 8th July last we published the prospectus of this company, which was started for the purpose of establishing a direct and independent line of telegraph to India, *via* Egypt, on a plan based on the recommendations of the Select Committee which last year sat, under the presidency of Mr. CRAWFORD, to inquire into the questions of postal and telegraphic communication with India. On the 13th of August we again referred to this subject, and, comparing the merits of various rival schemes, pointed to the Anglo-Indian Company as the one most likely to achieve success. Since then however the undertaking has languished, not from any inherent weakness or demerit of its own, but owing to the distrustful and apathetic condition of the public mind, which has rendered it most difficult to procure support for any new enterprise, however legitimate or promising. To overcome this difficulty, the projectors wisely resolved to endeavour to obtain a guarantee from Government, which it was felt could not fail to remove all obstacles in the way of raising the necessary capital. A memorial has accordingly been addressed to Sir STAFFORD NORTHCOTE, the Secretary of State for India, asking Her MAJESTY'S Government "to support the undertaking by a guarantee of "interest at the rate of five per cent. per annum on a capital of "one million sterling, to be applied to the special purpose of "establishing the proposed line, upon the understanding that the "company shall lease the Persian Gulf line from the Indian "Government, at a rental of 5 per cent. per annum on the cost "of its construction, and adopt as between itself and Her "MAJESTY'S Government the liability of relieving the exchequer "of the burden of the Red Sea annuities, amounting to £36,000 "per annum, the company accepting the same as a first charge "upon the net profits from the working of the lines."

It is satisfactory to find that the cause of the company is warmly supported by a large number of influential merchants in the India and China trade, who have themselves addressed a letter to Sir STAFFORD NORTHCOTE pointing out the advantages of the proposed line, and strongly urging the Government to accede to the very moderate request of the memorial above quoted. The letter concludes thus:—"Considering the magnitude of the political, social, and other interests than those of "commerce, which are bound up in the maintenance of the "existing relations between this country and India, we humbly "submit that the policy of establishing a complete and effective "system of telegraphic communication, such as that suggested, "may be advocated upon grave and important grounds of an "Imperial character, and we pray, therefore, that the proposal "may receive the earnest and favourable consideration of Her "MAJESTY'S Government." Among the signatures to this letter we observe, besides the names of ROTHSCHILD and SONS, CRAWFORD, COLVIN and Co., &c., the following firms more specially connected with China:—MATHESON and Co., F. HUTH, ASHTON and Co., T. A. GIBB and Co., BROWN, SHIPLEY and Co., GREGSON and Co., HARVEY, BRAND, and Co., J. W. CATER, SONS, and Co., H. W. EATON and SONS, and GLEDSTANE'S and Co., as well as the P. and O. Company, and the following banks:—Oriental, Chartered Mercantile, Chartered of India, and Comptoir d'Escompte. The question, we understand, will be submitted to Parliament before any definite reply is given to the memorial; and there are few of our readers, we believe, who will not join with us in hoping for a speedy and favourable decision.

THE NEW CHINESE UNIVERSITY.

OUR readers, or at least a considerable number of them, will probably be surprised by the title which we have affixed to this article. Truth, however, is often stranger than fiction, and as if in illustration of the old adage, the Chinese Government has entered upon a course which the most sanguine believers in the destiny of nations could not have anticipated, and which must for ever close the mouths of those who love to assert the incapacity of the Chinese race for beneficial change and advance. Under the influence of the present Inspector General of Customs many important improvements have from time to time been introduced into the administration of foreign affairs, the old barriers to progress have been gradually removed, and the minds of the members of the Regency have been accustomed to foreign modes of thought and foreign principles of action. The diplomatic representatives at the Court of Peking have sedulously fostered every tendency to advance as it was manifested, and well-meant aid, honestly tendered and faithfully supplied, has proved that our designs upon China are not such as were originally supposed, but that we desire to raise her to an equality with ourselves, and make her worthy of a more equal alliance than she now enjoys. Up-hill work it doubtless was, and often must those most interested in the emancipation of the empire from the trammels of prejudice have despaired of ever reaching the wished-for object. Some hope was excited when a solitary native here and there repaired to Europe or America to study Western law, and bring his experience to bear upon his countrymen. But anticipations based upon these unfrequent occurrences were doomed to disappointment. Young men educated in European colleges were simply denationalised, and, without becoming good Europeans, were transformed into bad Chinese. Their ignorance of the literature of their own country exposed them to contempt, while their affectation of superiority laid them open to suspicion. Incapable of competing for the degrees, through which only is admission to be gained to the offices of the State, they were excluded from every position wherein their newly-acquired information could be put to practical use. So far, then, it was evident that to encourage the education of Chinese in Western schools was but to cast another stumbling block in the road along which we were endeavouring to urge the nation. To Mr. HART it at once suggested itself—Why not educate Chinese in China, combine native with foreign learning, and endeavour to turn out men versed in modern science, but also fitted by literary attainments to fill magisterial offices, to become provincial governors, and perhaps eventually presidents of boards? The conception was admirable, but the difficulties to be surmounted before it could be carried into effect seemed positively hopeless. Gradually but surely they were smoothed away, and now the Imperial University stands an accomplished fact. The doors of the Peking College are already open and the courses of instruction have actually commenced. It is well worth remarking that at the *first* matriculation examination, held on the 21st June, before any judgment other than one *à priori* could have been formed regarding the merits of the scheme, thirty candidates were admitted, some of whom were *Chin shi*, some *Chii jen*, and some *Hsiu tsai*. That literary graduates of the third, second, and first grades should voluntarily submit to instruction at the hands of European professors proves conclusively not only that

Digitized by Google

the old established prejudices are fast disappearing, but that a conviction has obtained ground that the road to public distinction lies through the college. The scheme bears the most minute examination. In it a just place is given to native learning, the studies are persecuted under the superintendence of a Minister of State, to whose history we shall presently refer, and the centre of instruction is at Peking, removed from all exclusively foreign influences, and subject to the direct supervision of those most interested in maintaining the integrity of the institutions of the empire. The Provost is SEU KE-YU, who was formerly governor of Fuhkien, and who was degraded some twenty years ago for compiling a little work on geography. He is now an octogenarian, but the interest he once took in Western affairs has grown with his years, while his influence is very great among the Liberal party.

As to the curriculum of study, about which our academic readers will naturally be curious, we have little to say. Indeed, it speaks for itself, and recommends itself by its comprehensiveness, and especially by its subordination to practical uses. The students will learn English or French, and in both these languages lectures will be delivered upon the several branches taken up. The classes will therefore be double—on one side English or American professors directing the studies, upon the other Frenchmen or Germans. After a thorough acquaintance with either English or French shall have been acquired, the students will come under the charge of the Professors of the Experimental, Mathematical, and Political Sciences. Having passed through an extensive course in each of these subjects the general education of the students will be considered as completed, and special subjects will then be introduced. These latter will include Civil Engineering, Surgery, Astronomy, International Law, and others, according to the taste of each student. It is difficult to conceive a scheme more elaborately finished in its details, more general in its scope. The whole civilised world has a stake in its success, and we are, in truth, much mistaken if every support be not given to it by the Governments of European States. Diplomatic difficulties, as the expression is understood in China, will disappear as the parties to a negotiation learn to refer their principles to a common standard of right and justice, compulsion will cease, for it will no longer be necessary, and although misunderstandings must from time to time inevitably arise, and war may again cloud the scene of Eastern relations, this at least is certain, that these calamities are rendered less likely to occur as the *morale* of the Chinese nation is raised nearer and nearer to a level with our own. It is hardly presumptuous to risk a glance into the future, and contemplate the condition of China twenty years hence, when the College at Peking shall have given to the public service some hundreds of perfectly educated men with their native sympathies unimpaired but infinitely refined. In the provinces we shall then find nuclei of civilisation—in every large city a preparatory school—in every district a body of enquiring men. Moral training does not always march hand-in-hand with intellectual culture, but we may hope much from the all-pervading influence of intelligent public opinion. We find it hard to avoid conjuring up what to some may appear too flattering and highly coloured a picture, yet if the scheme be carried out to the extent evidently designed by its projector there is no necessary limit to the good it may accomplish. Of course difficulties will be encountered; but difficulties are made to be overcome. We cannot reasonably expect that a change so radical, albeit so salutary—a revolution so much more thorough than any mere political convulsion could bring about—is to be effected by mere contriving and talking. There must be clever heads, honest hearts, and ready hands to meet—nay, more, to anticipate—obstacles, and make of them stepping stones to further and higher aims. The sketch that we have given above implies the highest eulogium which we can pass upon the exertions of Mr. HART.

PROGRESS IN CEYLON.

JUDGING from the address delivered by Sir HERCULES ROBINSON at the opening of the Legislative Council, the colony of Ceylon appears to be steadily advancing towards a prosperous future. When we take into consideration the universal depression in commercial affairs, both at home and abroad, throughout the whole of last year, and the consequent low quotations ruling during that period for colonial produce, it is a matter for surprise that Ceylon has been enabled to produce so favourable a balance-sheet. In the first place, the colony must be congratulated upon the possession of a railway, which by rendering the means of communication more certain and effective, cannot fail to add greatly to the advancement of both commercial and agricultural interests. The estimated cost of this undertaking, however, reaching the large sum of £23,300 per mile, appears to us enormously heavy; in fact, we cannot call to mind any instance where a colonial railway has required so large an expenditure of capital for its construction. We should have imagined that £4,000 per mile would be the utmost limit of the cost, even had the line been carried out in the costly way in which railways are usually constructed in this country, where two-thirds of the capital is expended merely to secure the command of the remainder. We also perceive that it is in contemplation to entrust the extension of the line to Grampola to the Public Works Department, a course of procedure which we strongly deprecate. Estimates for works of this description can never be made, even by an engineer, with absolute certainty as to the ultimate cost, and we are of opinion that a much safer course would be to invite contracts for the necessary works in the customary manner. If the Government persists in its endeavours to carry out the undertaking, the expense will in all probability far exceed the original estimate, and there will then remain but the choice of two evils; either the entire abandonment of the scheme, or the issue of debentures to an extent far beyond the limits which prudence would dictate. We perceive that the Crown Agents for the Colonies have already invited tenders for £100,000 six per cent. debentures, redeemable at par in sixteen years, which is stated to be the final instalment of £700,000 issued for the construction of the original line from Kandy to Colombo. The policy of imposing an additional burden upon the revenue by a further issue of debentures to cover the cost of the new branch is, in our opinion, an extremely doubtful one. There is another subject to which there is no allusion made in the address of his EXCELLENCY, but which is, notwithstanding, one of the leading topics of interest in Ceylon affairs; we refer to the pressure of the present system of taxation upon the agricultural classes. Complaints have from time to time reached this country of the excessive duties levied upon imported grain, and it is high time that some remedial measure was brought forward. Agriculture in the colony, so far as the cultivation of grain is concerned, has been the reverse of progressive, and the quantities produced are every year becoming less and still less. Into the circumstances which have brought about this result it is not our present intention to enter, but it is sufficiently obvious that a different system of taxation must be adopted without delay; or if this cannot be done a scheme of retrenchment will have to be brought forward and carried out. Railways which entail the expenditure of a million and a half sterling must cease to appear among the items of expenditure, and the estimates for public buildings must be cut down with unsparing economy. The progressive sentiments contained in the closing sentences of the address are admirably expressed, but the Government must increase the revenues of the colony by legitimate means, and cease in its endeavours to secure advancement by the imposition of an unpopular and oppressive system of taxation.

THE CHARTERED MERCANTILE BANK.

The half-yearly meeting of the Chartered Mercantile Bank was held on the 19th inst., when the accounts and report, noticed in a previous issue, were read by the secretary, Mr. Ormiston. The chairman, Mr. G. G. Nicol, remarked that although no formal resolutions would have to be submitted, he was glad to lay before the shareholders some information as to the position of the bank. He regretted that the estimate of the losses made at the end of last year had proved insufficient, and that this year's profits would, to a large extent, be absorbed in squaring them off. It would serve no good purpose to name the houses by whom the losses had been chiefly made, as they were well known. He considered that satisfactory as their business had been this year, it had been much curtailed by the four months' usance for bills in India and China, and he estimated the difference had been quite £30,000. He still considered the four months' term safer, and their bank would always give a preference to it in negotiating bills. Considering that nineteen Indian banks had succumbed, he thought they had not done badly; and with regard to the present managers, they were all highly satisfactory, and not to be blamed for the losses of the firms in India and China. In reply to a shareholder, he stated that all the losses would certainly be provided for in this year without touching the reserve

Digitized by Google

fund, and that a dividend would be declared for the 1st January next. The amount of Royal Bank credits held was only £13,000 and of cotton bills £100,000, but all were drawn by undoubted houses. Their loss by Balfour and Co., Calcutta, and Small and Co., London, had been already provided for. With respect to the reports circulated, the bank was too strong to notice or care for them. They might have heard it reported that this bank was indebted to the London Joint-Stock Bank £300,000; but so far from that being the case they had the return week by week, and up to last night this bank was £330,000 to the good, so that would show what these reports were worth. (Cheers.) He had also heard reports that the directors had jobbed in the shares to keep them up, but there was not the slightest foundation in the report, for since the bank was transferred from Bombay to London not a single share had been purchased by the directors, directly or indirectly, to influence the market one way or other. The shares found their proper legitimate value, and there they remained. On the motion of Mr. Balfour, a vote of thanks was passed to the chairman and directors, and the proceedings terminated. The report and balance-sheet will be found in another column.

The meeting of the shareholders in the Chartered Mercantile Bank draws attention to the insolvent estates now current. The chairman, in reference to Messrs. Robert Smith and Co., and Messrs. Finlay, Campbell and Co., said :—

"The shareholders would remember that at the last meeting he stated that a house in China had failed, by which the bank had incurred probably considerable loss. That actually did take place, as the securities which the directors at the time estimated were good for the amount had realised less. The shareholders would also remember that he had stated that the directors had also over-estimated the bad debts in Bombay by £20,000. That, he was sorry to say, had proved fallacious. The principal loss arose from a firm which he need not name, as it was known, no doubt, to all the gentlemen present. At the last meeting he (the chairman) was asked whether the directors had provided for everything, and he replied that they had, and at the time he was perfectly justified in saying so, for arrangements had been made by the House in Bombay to which he had referred to carry on for two years, assigning to the creditors the profits for the two years. But since then the arrangements had fallen through, and an amount would have to be written off on account of that loss, but what the amount would be he could not at present say. The directors were watching it narrowly, and, as one of the directors was also a trustee of the estate, they might depend upon every attention being given to the subject."

THE LABUAN COMPANY, LIMITED.

ONE of the provisions of the Limited Liability Act takes the form of a gross injustice to the directors and shareholders in the "China Steam Ship and Labuan Coal "Company." This company, it appears, with a view to reduce the amount of the shares from £20 to £15, and to alter its title, placed its affairs in liquidation under the voluntary supervision of the Court of Chancery, the latter being simply a nominal matter, in order to comply with legal forms. The directors have now found, however, that this process has deprived them of all power, and opened the door to discontented shareholders to upset the whole affair and inflict ruin on the company, which has made a vast outlay during the past ten years in bringing the mines to proper working order. The mal-contents in this case are not of the class usually denominated "wreckers," who make as much plunder out of the funerals of companies as the birth, but are men of first-rate position, the Messrs. LAIRD, shipbuilders, of Birkenhead, who hold some 150 shares, on which the calls are, however, not paid, besides some debentures obtained (we believe) in satisfaction of their claims for the steamers which they built. Now, considering that these gentlemen were the first to benefit by the old company, we think it most unreasonable conduct on their part to take the proceedings they have, and in consequence of which Lord ROMILLY has refused his sanction to the proposed reconstruction of the company, and insists that it should be absolutely wound up by the realisation of all its property. This is nothing short of a scandal on the working of the law, and one of the greatest pieces of injustice ever inflicted on shareholders. How the Messrs. LAIRD can have lent themselves to such a transaction is certainly an enigma, and it appears to us that some motive must exist in the nature of a grievance which the public are not aware of, and it would be certainly more satisfactory if the facts were made known.

"Sir,—It is not generally known that the British colony of Labuan was established in December, 1846, in order to become a coal depot for steam navigation, a harbour of refuge for ships disabled in the China seas, and as being in a commanding position in the event of a naval war.

"The island lies on the north-east coast of Borneo, 700 miles from Singapore and 1,000 from Hong Kong, and is the only other British port of refuge within the wide limits of the China seas.

"Its name, derived from the Malay 'Laboo,' or Anchor, describes how well it is adapted to be a place of resort for shipping either to or from China; and as, in place of its being merely a coal depot, it has proved to be one great coalfield, the island may well be deemed an important addition to the British Empire.

"The Colonial Government, however, has taken no other steps to develop the valuable resources of the island than that of granting leases to companies, which have thereby been successively encouraged to expend upwards of £300,000 in securing to the country, with the hope of a fair profit to themselves, the advantage inestimable in these days of steam-propelled shipping, of an inexhaustible supply of first-rate steam coal at the spot where it was most needed.

"After struggling with many difficulties, the company has now completed works which admit of a daily supply of from 200 to 300 tons of valuable steam coal. The company, in order to legalise a proposed reduction of capital from £20 to £15 per share, now no longer possible, was placed last year in 'liquidation,' and in consequence of some small shareholders objecting to pay calls, 'under supervision of the Court.' The company has consequently been obliged to ask the Court's permission to send out its own funds to continue operations. This consent on the part of the Court has been refused, and the question remains whether the entire property of the company is therefore to be sacrificed.

"Should this country again be involved in war with a naval Power, the value of the Labuan coal-fields as now developed cannot be over estimated, coal being contraband of war, and its supply for naval purposes from this country liable to dangerous interruptions.

"During peace a sum equivalent to the entire cost of the Labuan Government establishment would be saved if 5,000 tons a year only were taken of Labuan coal by the navy at the island at 20s. per ton, the stipulated rate.

"Is it then fair that shareholders holding 150 out of more than 18,000 shares should by their opposition in court have the power to extinguish the interest of their fellow-shareholders in a property on which they have expended so much, and a return for which appears at length to be within their grasp?

"I have the honour to be, Sir, your obedient servant,

"FIAT JUSTITIA."

VISIT OF THE SHIOGOON'S BROTHER TO MALTA.

FROM Malta we have some account of a recent visit to that island by Prince MIMBOU-TOYOU, brother of the SHIOGOON of Japan. The PRINCE had previously made a short stay in Italy, and was brought from Leghorn to Malta by H.M.S. *Endymion*. On his arrival Rear-Admiral KELLETT waited on him, and he shortly after left the ship under a Royal salute from the *Endymion* and, disembarking at the Custom-house, proceeded to visit his Excellency Sir PATRICK GRANT, at the palace. He was received with regal honours by the GOVERNOR, and dined at the palace with all his suite, and in the afternoon witnessed some target practice from Forts Ricasoli and St. Angelo. On the following day he paid a return visit to Admiral KELLETT, who showed him over the naval arsenal, and the new naval dock in course of construction. A brilliant reception was held by Lady GRANT in the beautiful hall of St. Michael and St. George in the palace, which was splendidly fitted up for the occasion, followed by a grand banquet given in the spacious saloon containing the ancient armoury of the Knights, and other objects of historical interest. At the ranges at Pembroke Camp the PRINCE tried his skill as a rifleman, and proved himself by no means an indifferent shot. He is said to be very intelligent, and, like most of his countrymen, to take a special interest in guns and gunnery. His visit to Malta was at the special invitation of Her Majesty the QUEEN, and instructions were given that he should be received with all the honours due to a Royal personage, which instructions have been fully carried out, and it is understood that he expressed himself highly pleased with the attention he had met with. The young PRINCE took his departure in the *Endymion* on the 17th for Marseilles, *en route* to Paris and London.

THE SUEZ CANAL.

A CORRESPONDENT who has just completed an examination of the works in progress between Ismailia and Suez sends us the following as the result of his observations:—"The ship canal is so far finished to Ismailia (Lac Timsah) as to admit vessels drawing not more than eight feet. A small steamer intended for the transport service between Suez and Zoola came through on the 17th inst. She unshipped her screw in navigating the shoals near El Guisr, but the work of deepening this part of the canal is progressing rapidly, and there will be no difficulty in navigating the canal with this class of vessels in a few months. From Ismailia to Suez the work is progressing favourably. The heavy blasting and cutting at Serapeum (the heaviest section on the whole work) being pushed with a force of about 7,000 men and heavy machinery. M. LESSEPS, who is expected from Paris shortly, and the resident engineers express their determination and ability to complete the junction between the two seas by June, 1869. Passengers are now carried through

Digitized by Google

the canal by steam from Port Said to Ismailia in eight hours, and thence by dahbiak to Suez in ten to twelve more. In my opinion there are no difficulties to be encountered greater than have been already overcome, certainly none but what time and money will easily remove. Suez I found quite busy; Alexandria unusually dull."

THE CASE OF MACKELLAR AND CO.

MUCH surprise has been expressed here at the extraordinary nature of the decision given by Mr. GIBSON in the bankruptcy case of MACKELLAR and Co., of Hankow (published at length in our last issue). Not only is it conveyed in language that reads more like a literal translation from some Chinese document than ordinary "Queen's English," but the judgment itself is unsound and unpractical in the extreme. An award of one-half of the "profits, salary, emoluments, or "properties hereafter to be acquired by the bankrupts" during a term of four years, exclusive of their family expenses, cannot, we should think, be very satisfactory to the creditors, more especially when there seems to be no precise limit fixed to the said "family expenses." Indeed, should it so please them, the partners in any firm thus dealt with may contentedly settle down for four years to some occupation such as will just pay their expenses, and in the meanwhile gather fresh strength and lay new plans to embark on another career similar to that which Messrs. MACKELLAR and Co. have just brought to such a brilliant close; while the creditors will be no better off than they are now. To us it seems that the old-fashioned measure—a simple suspension of certificate—would have been the best after all. It is strange, by the way, that the decision (as published) only bears the signature of Mr. GIBSON, as "Judge of the "Court," although he had three assessors, Messrs. PRICE, WOOD, and RINGER. Did they agree with the decision?

THE DUTCH MARINE INSURANCE COMPANIES.

WE have received the following letters regarding some observations made by our Rotterdam correspondent on the heavy losses experienced last year by certain Dutch insurance companies. We gladly give insertion to these explanations, but at the same time would remind those interested in them that our correspondent distinctly stated in his letter that the statements in question were derived from the local (Dutch) newspapers. Those journals, therefore, are responsible for the inaccuracies complained of:—

(To the Editor of the *London and China Telegraph.*)

SIR,—Having read in your paper of the 10th August last, under the head of "Holland," an article concerning the company we are representing, we beg to furnish you with some further particulars concerning this company, which will certainly modify in some way the tenor of the above-mentioned article, and of which please take due note. The Java Sea and Fire Insurance Company's capital amounts to 3,000,000f., of which 10 per cent. or 300,000f. have been furnished. The shareholders are not only liable for the paid-up capital, but for the full amount of 3,000,000f. When shares are transferred the credit of buyers is duly considered, in order to avoid involving the company into difficulties from that quarter.—We are, Sir, The Java Sea and Fire Insurance Company,

Batavia, Sept. 27, 1867. W. SUERMOND.

(To the Editor of the *London and China Telegraph.*)

SIR,—We beg to inform you that in the *London and China Express* of the 10th August last, we find under the head of "Holland" a statement of several Dutch insurance companies, amongst which we also observe the Batavia Sea and Fire Insurance Company This company lost, according to the above-mentioned statement, 50,000f. of its capital of 180,000f. This is not correct. The capital of the company amounts to 3,000,000f., of which 10 per cent. or 300,000f. have been paid. Besides this, there is a reserve fund of 180.000f., of which indeed 50f. per cent. were lost, whilst the paid-up capital remained intact.

We therefore kindly request you to redress the mistake of your "special correspondent for Holland" in the first number of your journal to be published after receipt of the present.

As your paper is much read abroad, especially in British India and China, where we have established numerous agencies, you would much oblige us by stating the above-mentioned corrected facts in a rather ostensible way, so as to attract the attention of the readers of your esteemed journal.

We trust that you will readily comply with our request, the more so as there can be no doubt about the article having injured the credit of the company we are representing.

We still wish to state that the shareholders are liable for the full amount of the company's capital, and that by the transfer of shares due attention is paid to the credit of the buyers, so as not to expose the company to any loss from that quarter.—We remain, Sir,

The Batavia Sea and Fire Insurance Company,

Batavia, Sept. 27, 1867. L. W. GRIBLING.

"THE EFFECTS OF USURY ON TRADE."

(To the Editor of the *London and China Telegraph.*)

SIR,—Your paper of the 16th contains an article with the above heading, in which you review my pamphlet on the subject, and you state that according to the theory there laid down, all depositors or shareholders in *whatever* undertaking must be regarded as usurers—even shareholders in such undertakings as our noble mail steam companies. Allow me to point out to you that there is nothing in the theory which leads to that conclusion. So far as a bank is concerned, the depositing upon interest is usury, and holding a share in a bank which lends on interest is as much usury as holding a share in a gambling table would be gambling. But holding a share in a railway, a trading company, a steam packet company, a water works, or any honourable association, is in no way usury, but is as different from holding a debenture as marriage is different from adultery.—I remain, your obedient servant, W. C. SILLAR.

62, Cornhill, Nov. 18th.

A RUMOUR has been current during the past week that the CHANCELLOR of the EXCHEQUER would increase the duty on tea from 6d. to 1s., as a partial means of covering the outlay incurred for the Abyssinian expedition. Several dealers have cleared from bond in anticipation, but there is no foundation whatever for the supposition. Mr. DISRAELI knows better than to commit such a mistake. The income-tax is now the recognised medium for increasing taxation for war purposes.

A DEPUTATION from the Manchester and Liverpool Chambers of Commerce has waited upon Sir STAFFORD NORTHCOTE to press the importance of completing the survey of the route from Rangoon to South-western China. The right hon. baronet said a war which is now going on in Burmah placed difficulties in the way of an early resumption of the survey, but "when it should be deemed advisable" to prosecute the undertaking, the Government would do its utmost to carry out the wishes of the deputation.

WE understand that the representations made to Lord STANLEY on the subject of the appointment of a Consul at Saigon have produced a promise that the appointment will be provided for in the next year's Civil Service Estimates.

Naval and Military.

According to advices received by the Briton, the Cape had recovered its equanimity after the excitement of the Royal visit. The Duke of Edinburgh left Simon's Bay in the Galatea on the 2nd of October. His lengthened stay seemed to have passed off as agreeably to himself as it evidently did to the Cape people. The Prince during his stay mingled freely among all classes, and paid private as well as public visits to institutions. He also made a careful inspection of the Breakwater works, and finally acknowledged the hospitality he had received by giving a return ball at Simonstown prior to his departure. This ball was in every way a princely return of those given to the Duke by the Governor, colonists, and military, and passed off with brilliant *eclat*. The Duke left Capetown finally on September 28.

The *Army and Navy Gazette* refers to the fact that a good deal of gossip has reached this country from the Cape of Good Hope in reference to his Royal Highness the Duke of Edinburgh flying the standard of England on the occasion of his entering Simon's Bay, in the presence of his senior officer, and thus expecting from the latter a salute, which, in fact, was due from the former. An explanation, it is said, ensued, which led to the ordinary compliment being paid to Captain R. Purves from the guns of the Galatea, and so the matter was settled; but, doubtless, the attention of the Admiralty has been called to the subject, as, although the Duke is entitled to and will receive all the honours which are consistently due to a prince of the blood, it must be remembered that he is a captain in the Royal navy, and, as he is in command of one of her Majesty's ships, it is expected that he will comply with the rules of the service.

The Crocodile, iron screw troop-ship, Captain George W. Watson, arrived in Portsmouth harbour on the 21st from Alexandria, with a battalion of Rifle Brigade, and the 7th Dragoon Guards, military invalids, and time-expired men.

The Serapis, iron screw troop-ship, Captain John C. Soady, arrived at Spithead on the 21st from Alexandria, with military invalids and time-expired men. She came into Portsmouth harbour at noon, and discharged her invalids to Netley Hospital.

The Royal Oak and Prince Consort, when off Lisbon, and not more than fifty miles from the port, were ordered by signals to "proceed to Gibraltar, complete coals, give leave, and rejoin the Admiral at Lisbon without unnecessary delay." There was a head wind at the time, and the Royal Oak had to use five out of her six boilers and then could only make six knots. At one time she was burning five tons of coal an hour and scarcely making three knots. In order to reach Gibraltar to obtain 300 tons of coals the Royal Oak expended 250 tons in addition, and the Prince Consort 185. No less than £587. 5s. was the cost of that little amusement, or adding the cost of the voyage back, £776. 5s.

A gun has burst in one of the turrets of Her Majesty's ship Wivern, at Birkenhead. It was a 10 in. 12½-ton smooth-bore. Practice was being made with spherical shot and 30 lb. powder charges at a target 1,500 yards distant, when the breech of the left-hand gun in the after turret was blown clean away from the tube, struck the buffer on the side of the turret, and fell on the floor between the rears of the two guns. The breech just grazed the legs of the man acting as captain of the turret at the time, but no one was really hurt, the explosion, although happening at the wrong end of the gun, occurring above the level of the men's heads in the turret, with the exception of the "captain." The Lords have taken fright at the accident, and given orders that no more firing shall be made at present from the Wivern's smooth-bores. The Dutch are exhibiting to us in the Channel a turret-ship perfectly armed with rifled 12½-ton guns, mounted

Digitized by Google

on magnificent iron carriages and slides. We have spent thousands upon thousands of pounds sterling on "committees" and their interminable experiments, but the British navy has no turret-ship with an armament equal to that of the Prins Hendrik, nor her equal in turret equipment, from the carriages and slides down to the minutest portion of the gear and fittings. The "battle of the guns," about which so much has been written, has been of no advantage as yet to the few turret-ships of our navy.

On the 23rd, while some men were engaged in breaking up a number of condemned live shells at the back of the shell foundry in Woolwich Arsenal, an explosion of powder caused very considerable alarm and misgivings throughout the arsenal, and people gathered to the spot from every direction, making numberless inquiries. It was elicited that one of the old conical shells had partly undergone the operation of breaking up, when it was discovered that some of the contents, constituting the "live shell," had been overlooked, and that some 1¼lb. or 2lb. of powder still remained in the shell. This was disposed of by casting a red-hot cinder into its midst, and the consequence above stated naturally followed, fortunately without injury. This was in the very centre of the manufacturing department, and occasioned manifest alarm and confusion.

The following notice was posted at the entrance gates of Chatham Dockyard on the 23rd:—"The following officer and men, invalided from Her Majesty's ship Doris, were lost in the mail steamer Rhone:—Dr. Henry Arnot, surg.; Isaac German, leading seaman; Charles Plet, A.B.; and Benjamin Hough, 88th company Woolwich Division Royal Marine Light Infantry."

The pontoon raft provided for the Indian troopship Serapis, and fitted out under the supervision of Capt. W. R. Menda, C.B., Director of Transports, was submitted to the necessary test in the river off Woolwich Arsenal, preparatory to its being despatched for shipment. The raft was hauled up to the landing stage at the boathouse, where a subdivision of the D battery B brigade Royal Horse Artillery, in command of Lieut. Rothe, was drawn up for embarkation. By some mishap, probably owing to the slippery state of the stage, from which the tide was fast receding, one of the limbers got over the side, and caused some delay. The subdivision afterwards went on board, consisting of 80 men, 20 horses, 1 gun and waggon weighing four tons, and 12 dockyard men, the whole amounting to from 18 to 20 tons. The raft is composed of four cylindrical floats, each weighing 1½ ton, and about 30ft. long, with a platform 26ft. by 30ft., and is easily disconnected and carried with safety. The total weight of the raft is about 18 tons, and it drew when thus loaded 1ft. 11in. of water. After a careful survey, in which Lieut. Blood, R.E., who attended on duty from Chatham, took part, it was suggested that the buoyancy of the raft should be reduced by removing one of the pontoon floats, which would increase the steadiness of the raft, and add to its advantage. This was subsequently adopted.

Monetary and Commercial.

No dividend has yet been declared on the estate of Messrs. Robert Smith and Co., or Finlay, Campbell, and Co., and the current opinion is that 2s. 6d. will be realised on the former and 7s. 6d. on the latter. Some opposing creditors in the latter case have accepted that as a compromise. In the estate of Messrs. Lindsay and Co. the final guaranteed dividend of 2s. 6d., completing 7s. 6d., will be paid by the guarantors in February next. There is no probability of the creditors getting any further sum, and we believe the estate will leave a heavy loss to the guarantors. In Buchanan, Hamilton, and Co.'s, Glasgow, and Jarvie, Thorburn, and Co.'s, Shanghai, estates, the dividend paid has been 8s. 6d., and another 1s. is expected. In Hamilton, Gray, and Co., of Singapore, and Buchanan, Hamilton, and Co., the dividend will be 12s. 8d., of which 10s. 8d. is paid. In Fletcher and Co.'s estate there are two classes of creditors, who will receive 9s. 6d. and 13s. 6d. on the old firm. Creditors on Duncan Fletcher's estate 7s. 6d., and on the new firm 6s. About 2s. is now ready to be distributed, pending a reference to China. In the estate of Dow and Co. 2s. 6d. has been paid, and on Scott, Bell, and Co., 5s. Claimants who rank on the two estates will receive about 15s.

With regard to the new Bank of Bombay, it is stated that Sir Stafford Northcote has come to the conclusion that the Government should not take shares in the new bank. He is, however, anxious to afford it such support as he can give consistently with this decision, and is in communication with the Governments of India and Bombay as to a plan of audit or inspection on the part of the Government, which, if accepted by the shareholders, would justify the Government in keeping its account at the bank.

A recent telegram to Messrs. Matheson and Co. from their Calcutta correspondents requests a contradiction to be given to a statement current that the Bank of Bengal objects to do business with the new Bombay Bank if constituted. No regular branch of the Bank of Bengal has been opened in Bombay, only an agency.

The biddings for bills on India took place on the 20th, at the Bank of England. The amounts allotted were:—To Calcutta, £82,500; and to Madras, £17,500. The minimum price was fixed, as before, at 1s. 11¼d. on Calcutta and Madras. Tenders on these presidencies at the minimum will receive about 49 per cent.; those above will be allotted in full. No tenders were invited on Bombay. The result shows a diminution in the demand for remittance to the East.

The Silver market has become somewhat firmer this week from the downward tendency of the exchanges, as the Continent is the only place where the metal is now shipped to there being no demand for the East. Bars are firm at 5s. 0⅜d. per ounce standard, and Mexican dollars at 4s. 10⅞d. to 4s. 11d. per ounce.

The Crown Agents for the Colonies have invited tenders for £100,000 Ceylon Government Six per Cent. Debentures, redeemable at par in sixteen years. This is the final portion of an authorised issue of £700,000 for the construction of the railway from Colombo to Kandy. The security offered consists of the general revenue of the colony, with a special hypothecation of the export duty on coffee (amounting to about £50,000 a year), and the net earnings of the railway. The tenders are to be sent in before the 30th inst.

Mr. Leopold de Rothschild, third son of Baron Lionel de Rothschild, the head of the London firm of Rothschild, was admitted into that house on the 21st inst.

The failure has been announced of Messrs. Yates and Corkling, of Manchester, commission merchants, with liabilities estimated at about £40,000. The extent of business and credit of the firm was moderate.

The decision of the Court in reference to the call of £10 on the shareholders of the Commercial Bank has been again postponed, until the 7th of December. We understand that the opposing shareholders rely on their right to oppose, on the clause in their charter that they are only liable for double the amount of capital, £25, when the assets are insufficient for the payment of debts, and that a call should not be made until the assets are all realised. This would compel the liquidator to realise at once, at a great sacrifice. The first call of £10 should realise £400,000, but we doubt if it will be worth more than half in these times, especially as a large number of shareholders are natives of Bombay. The creditors have only received 10s. at present, and the other 10s. appears very doubtful.

The amount of bullion by the P. and O. Company's steamer Pera, from Southampton on the 20th inst., was, in gold, to Alexandria, £40,300; in silver, to Hong Kong, £24,557, on Government account; to Shanghai, £6,250; total, in gold, £40,300; in silver, £30,807.

The annexed explanation refers to the recent bankruptcy case of Mr. Lewis Balfour, junior:—

Sir,—With reference to a report of the proceedings in the Court of Bankruptcy, of Nov. 13th, in Re Lewis Balfour, jun., stating that the Comptoir d'Escompte de Paris are creditors of Messrs. Balfour and Company at Calcutta for £23,713, I take the liberty to say that the drafts drawn by the said firm on Messrs. Small and Co., of London, and held by the Comptoir, were not only fully secured by shipping documents of produce, but that the sale of these securities realised a surplus, which was handed over to Messrs. Small and Co., and that consequently the Comptoir d'Escompte de Paris does not rank on the estate of Messrs. Balfour and Co.—I am, &c.,

G. Pietsch, Agent Comptoir d'Escompte de Paris.

The following, on the cotton crop, is from the Circular of Messrs. Neill Bros.:—

The crop accounts continue generally favourable. In some sections there have been rain storms which will do harm, but perfect weather was not to be expected, and, on the whole, it has been unusually good. There is, as yet, no appearance of frost, so that the crop has continued making except in certain districts, where all chance of a "top-crop" was spoiled by the drought of August. In those districts the crop is made already, and in great part gathered. We still hear complaints, from sections where the crop is large, of deficiency in the supply of labour. But it is much more agreeable to hear of there being more cotton than labour than it would be to hear of more labour than cotton. It has long been a favourite Southern theory that the negroes are dying out, and we have heard estimates of a reduction of a million in their numbers since 1860. We have always contended against such ideas, and we are glad to have to-day from Washington the testimony on this point of General Howard, long chief of the Freedmen's Bureau, and the highest authority on the subject. He says, commenting on the large negro vote polled in the recent elections:—"Carefully compiled statistics warrant the conclusion that the aggregate negro population of the United States has increased from 1860 to the present date. The decrease heretofore alleged was based, in part, on my report of December 21, 1866, which was estimated from very meagre statistics. It was more accurate in regard to the rural districts, and the lessened number of coloured persons found in those districts led to the inference that the whole number had decreased, without properly estimating constant change of location, large numbers having flocked to the cities north and south. The apparently diminished rate of increase of that population in the entire south is accounted for by emigration to all the Northern States. From this district alone more than 10,000 have gone north, and obtained homes and employment." On the basis of the increase of negro population, from 1850 to 1860, General Howard estimates that at the close of the rebellion they numbered nearly

Digitized by Google

four millions and a-half. He adds:—"The negro population of the South, excepting a number of about 250,000 enrolled in the army of the Union, was but little exposed to the hazards and vicissitudes of war, and to a great extent preserved their organisation as labourers throughout the struggle." We have not the least doubt that the picking power of the South is larger than ever before, although perhaps not so well distributed. The women and children did not fight; the percentage of negro men killed was very small; and there is more white labour in the field than of old. The small returns left to planters by the present low scale of prices, after paying the revenue-tax and other heavy expenses, are bitterly complained of, and form a more real grievance. A more economical system of cultivation must be adopted, and the tax reduced or abolished. Otherwise the production may fall off instead of increasing in future seasons.

The London Chartered Bank of Australia have forwarded their abstract of profit and loss account for the 30th June. The balance of profit and loss in London and the colonies for the half-year is £46,767 10s. 3d., which, with £10,570 15s. 10d. balance carried forward, makes a total of £57,338 6s. 1d. The dividend proposed to be paid, viz, 4 per cent. on capital for the half-year, free of income tax, is £40,000, the amount to be carried to the reserve fund is £5,000, and to the colonial building fund £2,000, leaving a balance for the next half-year of £10,338 6s. 1d. A meeting for the 3rd proximo has been convened.

A prospectus has been issued of the Anglo-Argentine Company, with a capital of £50,000, in shares of £1, to complete the development of the silver deposits in the province of San Juan, in the Argentine Republic. It appears that extensive smelting and reduction works have been established and brought into operation, at a cost of £45,000, and that the present company is to be constituted to carry on the management and to supply the current funds required for buying with ready money the ores extracted by the native miners, and to meet the general working expenses for stores, &c. No payment is exacted either for the works or plant, or for the various mines acquired, the stipulation of the proprietors simply being that they shall receive the amount in shares after the company shall have earned a dividend of 20 per cent.

The liquidators of the Imperial Mercantile Credit Association (Limited) have sent a circular to the shareholders, in which they state that, with very few exceptions, they have succeeded in obtaining the assent of the creditors to the arrangement proposed in their report of the 14th of June last, subject to a few modifications which have been submitted to and approved by the committee. Under this arrangement the balance of the claims of the creditors is payable by six equal half-yearly instalments, the first of which will fall due on the 30th of December next, and the rate of interest on their respective debts is reduced from 11 per cent. per annum to 5 throughout the liquidation, thus saving about £77,000. It is added that, in the absence of any proposal from the shareholders by the 1st of December for the payment of overdue calls, application will be made to the Court of Chancery for power to enforce the same without further delay.

An ordinary meeting of the Anglo-Egyptian Banking Company is convened for the 29th inst.

Application has been made to wind up the following companies:—The Nicaragua Railway Company (Limited), the International Hotel Company (Limited), and the Oriental Inland Steam Company (Limited).

BANK AND MISCELLANEOUS SHARES.

Shares.	Joint-Stock Banks.	Paid.	Prices Nov. 26.

EXPORTS TO THE FAR EAST.

The monthly tables issued by Mr. Sam Mendel contain the following details of the Cotton Goods shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Batavia, Manila, Singapore, and Ceylon.

To HONG KONG AND WHAMPOA.—For the month ended 16th Nov. 1867: Plain Cottons, 7,716,165; Coloured Cottons, 359,865; Printed Cottons, 57,500 yards; Cotton Yarn, 965,120 lbs.; total value of Cotton Goods, £201,619. For the eleven months ended 16th Nov., 1867: Plain Cottons, 45,298,711; Coloured Cottons, 2,205,061; Printed Cottons, 713,061 yards; Cotton Yarn, 6,261,914 lbs.; total value of Cotton Goods, £1,487,219. Increase in value for 1867 against 1866, £118,346. For the eleven months ended 16th Nov., 1866: Plain Cottons, 36,057,484; Coloured Cottons, 3,671,009; Printed Cottons, 796,640 yards; Cotton Yarn, 4,405,988 lbs.; total value of Cotton Goods, £1,368,873. For the eleven months ended 16th Nov., 1865: Plain Cottons, 29,889,694; Coloured Cottons, 2,752,995; Printed Cottons 376,696 yards; Cotton Yarn, 1,137,600 lbs.; total value of Cotton Goods, £826,305.

To SHANGHAI.—For the month ended 16th Nov., 1867: Plain Cottons, 22,334,468; Coloured Cottons, 1,707,310; Printed Cottons, 839,400 yards; Cotton Yarn, 12,000 lbs.; total value of Cotton Goods, £401,084. For the eleven months ended 16th Nov., 1867: Plain Cottons, 118,811,072; Coloured Cottons, 9,808,038; Printed Cottons, 5,095,736 yds.; Cotton Yarn, 441,232 lbs.; total value of Cotton Goods, £2,551,287. Decrease in value for 1867 against 1866, £410,331. For the eleven months ended 16th Nov., 1866: Plain Cottons, 111,113,147; Coloured Cottons, 10,901,907; Printed Cottons, 5,539,770 yards; Cotton Yarn, 68,800 lbs.; total value of Cotton Goods, £2,961,618. For the eleven months ended 16th Nov., 1865: Plain Cottons, 67,874,707; Coloured Cottons, 4,622,708; Printed Cottons, 2,246,183 yards; Cotton Yarn, 96,000 lbs.; total value of Cotton Goods, £1,641,533.

To JAPAN.—For the month ended 16th November, 1867: Plain Cottons, 2,303,014; Coloured Cottons, 53,375; Printed Cottons, 102,516 yards; Cotton Yarn, 532,070 lbs.; total value of Cotton Goods, £70,709. For the eleven months ended 16th November, 1867: Plain Cottons, 19,088,504; Coloured Cottons, 3,146,706; Printed Cottons, 788,418 yards; Cotton Yarn, 2,996,149 lbs.; total value of Cotton Goods, £685,589. Decrease in value for 1867 against 1866, £121,606. For the eleven months ended 16th November, 1866: Plain Cottons, 22,393,803; Coloured Cottons, 2,537,614; Printed Cottons, 2,292,921 yards; Cotton Yarn, 1,397,730 lbs.; total value of Cotton Goods, £807,195. For the eleven months ended 16th November, 1865: Plain Cottons, 13,516,644; Coloured Cottons, 1,052,978; Printed Cottons, 1,354,364 yards; Cotton Yarn, 292,700 lbs.; total value of Cotton Goods, £385,090.

To SINGAPORE AND PENANG.—For the month ended 16th Nov., 1867: Plain Cottons, 6,240,158; Coloured Cottons, 669,783; Printed Cottons, 511,153 yards; Cotton Yarn, 398,346 lbs.; total value of Cotton Goods, £152,436. For the eleven months ended 16th Nov., 1867: Plain Cottons, 57,971,515; Coloured Cottons, 8,308,809; Printed Cottons, 4,209,452 yards; Cotton Yarn, 2,670,639 lbs.; total value of Cotton Goods, £1,587,052. Increase in value for 1867 against 1866, £172,011. For the eleven months ended 16th Nov., 1866: Plain Cottons, 42,841,766; Coloured Cottons, 7,316,373; Printed Cottons, 4,022,284 yards; Cotton Yarn, 1,572,877 lbs.; total value of Cotton Goods, £1,415,041. For the eleven months ended 16th Nov., 1865; Plain Cottons, 30,947,318; Coloured Cottons, 5,212,951; Printed Cottons, 1,745,396 yards; Cotton Yarn, 1,110,485 lbs.; total value of Cotton Goods, £894,143.

To BATAVIA.—For the month ended 16th November, 1867: Plain Cottons. 2,262,517; Coloured Cottons, 946,203; Printed Cottons, 793,328 yards; Cotton Yarn, 130,590 lbs.; total value of Cotton Goods, £89,165. For the eleven months ended 16th November, 1867: Plain Cottons, 17,330,196; Coloured Cottons, 12,262,487; Printed Cottons, 12,764,488 yards; Cotton Yarn, 628,155 lbs.; total value of Cotton Goods, £1,005,236. Decrease in value for 1867 against 1866, £325,943. For the eleven months ended 16th November, 1866: Plain Cottons, 33,538,654; Coloured Cottons, 11,470,621; Printed Cottons, 10,101,429 yards; Cotton Yarn, 671,766 lbs.; total value of Cotton Goods, £1,351,179. For the eleven months ended 16th November, 1865: Plain Cottons, 13,721,877; Coloured Cottons, 5,041,199; Printed Cottons, 6,779,247 yards; Cotton Yarn, 494,310 lbs.; total value of Cotton Goods, £624,850.

To MANILA.—For the month ended 16th November, 1867: Plain Cottons, 582,155; Coloured Cottons, 976,172; Printed Cottons, 73,603 yards; Cotton Yarn, 19,400 lbs.; total value of Cotton Goods, £39,165. For the eleven months ended 16th November, 1867: Plain Cottons, 16,054,803; Coloured Cottons, 14,580,986; Printed Cottons, 842,027 yards; Cotton Yarn, 182,826 lbs.; total value of Cotton Goods, £758,443. Increase in value for 1867 against 1866, £142,772. For the eleven months ended 16th November, 1866: Plain Cottons, 10,284,085; Coloured Cottons, 12,301,701; Printed Cottons, 552,915 yards; Cotton Yarn, 78,318 lbs.; total value of Cotton Goods, £615,671. For the eleven months ended 16th November, 1865: Plain Cottons, 12,502,123; Coloured Cottons, 12,392,900; Printed Cottons, 1,069,065 yards; Cotton Yarn, 96,052 lbs.; total value of Cotton Goods, £622,727.

To CEYLON.—For the month ended 16th November, 1867: Plain Cottons, 2,304,470; Coloured Cottons, 128,616; Printed Cottons, 4,178 yards; Cotton Yarn, 109,000 lbs.; total value of Cotton Goods, £51,411 For the eleven months ended 16th November, 1867: Plain Cottons, 16,352,329; Coloured Cottons, 1,213,324; Printed Cottons, 1,992,300 yards; Cotton Yarn, 324,235 lbs.; total value of Cotton Goods, £444,983. Decrease in value for 1867 against 1866, £225,003. For the eleven months ended 16th November, 1866: Plain Cottons, 17,375,236; Coloured Cottons, 1,450,451; Printed Cottons, 4,064,862 yards; Cotton Yarn, 796,422 lbs.; total value of Cotton Goods, £669,986. For the eleven months ended 16th November, 1865: Plain Cottons, 9,775,748; Coloured Cottons, ,191,015; Printed Cott ons, 1,647,054 yards; Cotton Yarn, 280,390 lbs.; 1otal value of Cotton Goods, £344,085.

t

ARTICLES OF IMPORT.

TEA.—The clearances from 1st to 21st inst. (the latest period of customs returns) amount to 6,598,000 lbs., or an increase of about 2,000,000 lbs. This increase is owing to a rumour current in Mincing-lane that the Chancellor of the Exchequer would increase the duty from 6d. to 1s., in order to assist in covering the cost of the Abyssinian expedition. This has checked purchases to some extent, and the teas bought by Mackellar and Co., and re-sold at Shanghai, have been on the market, and sold without reserve. Congous: There has been rather more inquiry for siftings, and prices, both of the Kaisow and Moning sorts may be called ½d. per lb. higher. Broken-leaf kinds remain firm. Fair to good common show no change. Some sales of fair flavory kinds, of old import, have been made from 1s. to 1s. 1d. per lb. Those of this season remain very difficult of sale at the low range of prices established. Good to fine Kaisows have sold to a fair

Digitized by Google

extent, but in some instances at rather lower prices. Finest have met with only a moderate demand. In Fak Lings there is no alteration to notice. Common to fair black-leaf kinds have been sold to some extent, but prices have declined about ½d. per lb. In good kinds there is no alteration. In new Monings there has been a fair business done in the fair to good qualities at the decline last quoted. Fine to finest have not commanded such high rates with the exception of any really superior chops, which are taken for export. Fair to good Oolongs remain difficult of sale, but fine to finest are in fair demand. Further supplies of good to fine Souchongs have come to hand, and sales have been made at rather lower prices for the good qualities. Scented Capers have been taken to some extent at a shade under previous prices for fair qualities; fine have also sold rather lower. Canton Scented Orange Pekoes, of fair to good kind, still remain difficult to move; fine to finest have been better supported. Foochow kinds have been in demand, and prices show no alteration. In Uncoloured Japans there has not been much doing. Green Teas: In these business has been limited, but the samples, per Agamemnon, have been placed on the market, and have met with a steady demand from the trade at very full prices for all the finer kinds of Ping Suey. Canton Gunpowder show no alteration. The sales of China Tea on the 19th instant consisted of 9,263 packages, of which 8,084 packages were sold, the whole being without reserve. The following, on the duty question, is from the *Produce Market Review*:—Tea dealers, in common with those engaged in other trades, are fully alive to the fact that the Abyssinian expedition requires the indispensable assistance of money, the sinew of all wars; but, whether it will be obtained by retaxing tea with the 1s. duty, or how it will be raised, is, of course, still uncertain, and the recent meeting of Parliament has not yet removed the uncertainty. The unusually large duty-payments that have been made this week could be attributed to no other cause than that there is a very general impression amongst the trade that the tea duty will be raised; and it is argued by many as being more probable on account of its having been so recently reduced; an argument which, in our opinion, ought to tell the other way. The greater portion of the purchases made by the grocers this week have not been for use, but for immediate duty-payment, in anticipation of a higher tax, but a large proportion of the trade have merely cleared the stock they had remaining in bond, and wait the result of the Chancellor of the Exchequer's plan for raising money, before purchasing further. An additional duty of 6d. per lb., calculating the deliveries for home consumption at last year's total of 105,000,000 lbs., would be equal to an addition of £2,625,000 to the revenue for a year; but speculations or surmises regarding the tea-duty are, in our opinion, not only premature, but useless.

SILK.—The change for the better so long hoped for in the Silk market has at length taken place, and within the last ten days we have had an extensive business, with an improvement in prices of 1s. and 1s. 6d. in some cases. In Chinas the demand has been principally for Tsatlees, the low quotations now ruling having brought some large Continental buyers into the market. Chop Silks are scarcer than ever, and firm at 28s. for No. 3, while all other descriptions must be quoted 6d. to 1s. per lb. dearer, Red Peacocks having been sold at 24s. 6d. Japan Silk has shared to some extent in the general activity, but fine Mibash, which is most wanted, scarcely exists, and fetches comparatively high rates, an exceptionally good parcel having recently been placed at 33s. Deliveries from the 1st to 23rd inclusive—China, 2,132 bales; Japan 467 bales; total, 2,599 bales.

COTTON.—The cotton market has been quiet, though the demand has been general, it has been confined chiefly to supplying the immediate wants of the trade, while comparatively little has been done for export. Prices generally close rather below the quotations given in our last issue. American has been irregular, the newly-landed cotton is pressed for sale, and quotations are reduced about ¼d. per lb. New York advices to the 21st inst. quote middling American 18c., costing to sell in Liverpool 8d. per sailing vessel and 8⅛d. per steamer. In East India the business has been rather limited, and with a large quantity offering prices have further declined, and are generally ¼d. per lb. lower. Quotations are 7d. to 9¾d. for American, 5d. to 7¼d. for Surat, 6d. for Madras, and 4½d. to 6¼d. for Bengal, Scinde, &c. There have been no transactions in China or Japan.

COFFEE.—The anticipated favourable result of the last Dutch sale of the year has influenced the market to some extent, and with a light quantity of Plantation Ceylon offering, business has been done at full prices; for Native there has been decidedly more demand, and privately several parcels have changed hands at an advance of 6d. to 1s. per cwt. The public sales of Plantation have been very small, amounting to only 297 casks, 27 barrels, 651 bags, and contained only a small quantity of desirable quality, which was mostly bought in. About two-thirds were disposed of, garblings and triage 13s. to 57s., good ordinary small to fine ordinary 65s. to 72s., fine fine ordinary to middling 73s. 6d. to 77s. 6d., peaberry 85s. to 92s. Native has continued in steady demand at fully 1s. above the recent lowest point for good ordinary, and at a greater advance for superior kinds; by private contract about 1,000 bags have sold at 53s. 6d. to 55s., also 150 casks at 53s. to 54s.; and in auction of 169 casks 19 barrels the greater part was bought in at 53s., a few lots 51s. and 771 bags chiefly sold, good ordinary to real good ordinary 54s. to 55s., ordinary and small 48s. 6d. to 52s. The sale of 110,500 bags by the Dutch Trading Company on the 20th instant (the last this year) passed off satisfactorily, the whole quantity brought forward finding buyers at prices on the average ½ to 1 cent. above those of the October auction; good ordinary Java at 38 to 38½ cents.

COIR YARN.—Of 40 tons Ceylon brought forward at the auctions, only a small portion sold, realising £45 10s. to £52 for fine, and £33 for good middling, the remainder being bought in at £26 to £31 per ton.

CUTCH.—The market continues firm at the previous quotation of 45s. for fine Pegu.

CAMPHOR.—There is scarcely any business doing, the stock being firmly held for the former rates of £6 10s. to £6 15s. per cwt. for China, and £6 12s. 6d. to £6 15s. for Japan, buyers only offering a reduction upon those terms.

COCOA-NUT OIL.—The market is still extremely quiet. Offers of Ceylon are made at £51 10s. to £52 per ton which meet with but little response.

INDIA-RUBBER.—At the public sales 12 baskets Borneo sold at 1s. 3½d., and of 30 baskets Singapore one-third only realised 1s. 9d. per lb.

LEAD remains steady at previous quotations.

GALLS.—Of China 30 cases were bought in at 58s. per cwt., and of Japan 100 cases at 55s.

JAPAN WAX.—We are still without offers. There is a good demand and for a few boxes good saucers £5 7s. 6d. per cwt. has been realised.

MANILA HEMP.—The market is extremely quiet, and only limited business has been done on the spot at about former terms. For arrival 720 bales per Monarch have been sold at £47 per ton.

PEPPER.—Black: A fair inquiry has prevailed, and about 3,000 bags have been taken privately, Singapore at 8⅝d. to 8¾d., Penang at 3d. to 3⅛d. 1254 bags Singapore and 2197 bags Penang at public sale, were held firmly and nearly all bought in, 1,000 bags of the latter having since been sold, greyish Acheen 3d. to 1-16d. White: 1,280 bags Singapore were about half disposed of at easy prices, middling to fair 5d. to 5⅛d., and 200 bags Penang privately at 4⅞d. to 5d.

PLUMBAGO.—The market is steady, and of 587 barrels Ceylon offered at the auctions 357 barrels were held for high rates and bought in good middling lump at 32s.; middling at 28s.; dust at 10s. 6d. to 12s.; the remainder realising 15s. to 24s. 6d. for lump, and 10s. to 10s. 3d. for dust.

RICE.—A better demand has prevailed with limited business at a little under the previous highest prices, and in soft grain at not more than 3d. to 6d. under. The sales of soft grain reach about 2,500 tons on the spot and arrived, Necransie 12s. to 12s. 1½d., Bassein 12s. to 12s. 6d., landed, and Rangoon 11s. 6d. to 12s. ex ship. Also for spring shipment a cargo of 1,000 tons, of Rangoon 11s. 3d., Bassein 11s., Necransie 10s. 9d. In auction the following quantities of soft grain were sold on cheaper terms; 7,104 bags Necransie of indirect import, ordinary heated to good 10s. 6d. to 11s. 6d., a few lots 12s., prompt six weeks; 948 bags broken Bassein 10s. 6d. full prompt.

SUGAR.—The market since our last report has been extremely dull, and the business done very trifling. There have been no transactions in East India descriptions the only parcel of Manila brought forward, consisting of 2,730 bags clayed, being withdrawn.

SPICES.—Cloves: One case ordinary Penang sold at 9½d. per lb. Mace: At auction 8 cases Penang realised 2s. 6d. to 2s. 7d. for low middling red, and 2s. 2d. for ordinary. Nutmegs: At public sale 50 cases Penang, of fresh import, sold readily at steady prices; fine bold, 68 to 67 nuts to the lb., at 3s. 11d. to 4s.; good 72's, at 3s. 4d.; middling 78's, at 2s. 1d.; 79's, at 2s.; 84's, at 1s. 10d.; 92's, at 1s. 6d. to 1s. 7d.; 95's, at 1s. 5d. to 1s. 6d.; small 116's at 1s. 3d. to 4s. 4d.

TERRA JAPONICA.—In the market for Gambier a disposition to meet the offers has been shown, and prices are lower. The sales privately amount to 2,500 bales, good dry at 16s., common 15s. 6d. In auction 930 bales partly heated were bought in at 16s.; 15 tons badly sea-damaged sold without reserve at 11s. to 12s. 6d.

TIN.—The market for Straits has shared in the depression common to the metal trade generally, and, consequently, the business has been limited. There have been buyers of Straits throughout the week at £89 10s. cash, and sellers at £90, and about 100 tons have changed hands at these prices.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 to £7 15s.; hoops, £8 7s. 6d. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 5s. 0d. to £7 15s.; rails, £5 10s. to £6.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £80 to £82 per ton; yellow metal, 7d. per lb.

LEAD, &c.—English pig, W.B., £21 10s.; shot, patent, £22 10s., sheet, £20 10s.; spelter, £21 10s.; zinc, English sheet, £28; quicksilver, £6 17s., in bottles of 75 lbs. each.

In the Metal Market, although prices of almost all articles are relatively moderate, the tone of the market does not improve, and sales are not readily effected at previous quotations.

TIN PLATES are dull of sale and prices rather easier.

SPELTER is held less firmly, and common plates on the spot might be bought at £21 12s. 6d., 25 tons WH. plates have been sold for the spring at £21 10s.

COPPER.—The only business of importance has been in Chili. Sales of bars in Liverpool and Swansea are reported at £69, and Ore and Regulus 14s. 3d. per unit. English tough is dull at £75 to £76. Nothing reported in foreign. Burra £83, Wallaroo £81 nominally.

IRON.—Increased dulness in this trade is reported from Staffordshire and Wales, and purchases are effected on easier terms. Scotch Pig also is ower at 53s. 9d. cash.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports remain unaltered. Tonnage is somewhat scarce. In coal freights from the Northern outports previous quotations are fully maintained.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £47. For Singapore: £32. For Shanghai: £56. For Saigon: £50. For Yokohama: £52 10s. For Batavia: £27. For Colombo, £30. For Galle, £33. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 5s. For Singapore: £1 10s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. For Chefoo, £2 15s. For Trincomalee, £1 17s. For Galle, £1 11s. For Colombo, £1 9s. For Manila, £1 5s. For Batavia, £1 10s.

The Admiralty have invited tenders for the conveyance of 20 tons (weight) small arms ammunition from the Thames to Colombo.

CASUALTIES.

The Jacoba Cornelia, Dutch barque, from Batavia to Amsterdam, put in at Mauritius, 26th Sept., for repairs, having met with very bad weather on the 5th in lat. 9 S. lon. 102 E, in which she sprung a leak, subsequently making 10 inches of water per hour; she was being discharged.

The Bengale (Fr. ship), Dubois, from Saigon, which arrived at Mauritius Sept. 15, had been hauled upon the patent slip to stop a leak.

The Maggie Leslie, of Newcastle, Stephen, from Foochow to London, which was reported as totally lost in Gaspar Straits, had been taken to Batavia by the mate of the Fuse Yama; ship and cargo apparently in good order.

The Shun Lee, from China, put in at Table Bay, Sept. 23, for repairs, with loss of sails, &c.

The Hamilla Mitchell, Branscombe, from Manila for Liverpool, arrived at Table Bay, Sept. 24, with cabin furniture, master's effects, chronometers, &c., washed overboard, and other damage, having met with a very severe gale Sept. 14, in 34 S., 32 E., during which she was thrown nearly on her beam-ends; after repairing she sailed for her destination on the 8th of October, and arrived off Ascension Oct. 28.

The Catharine (barque), of Melbourne, Noble, from Singapore to Boston, put in at Capetown, Sept. 29, leaky and for repairs. She had discharged a large portion of her cargo, and would very probably go on the patent slip.

MISCELLANEOUS.

Off Ascension.—Oct. 8, Admiral de Winter, from Singapore, for London; 21, S. Van Heel, from Batavia, for Amsterdam; 22, Benvenue, from Penang, for London; 27, Ardencraig, from Colombo; 28, Hamilla Mitchell, from Manila, for Liverpool; 29, Monarch, from Manila, for London.

At St. Helena.—Oct. 2, Cornelia Adolphina, Roever, from Batavia, and sailed for Amsterdam; 3, Daniel Marcy, Ross, from Manila, and sailed 4, for New York; 4, President Peate, Julius, from Batavia; Cornelia, Croese, from Batavia, and both sailed 5 for Amsterdam; 6, Shun Lee, Milbank, from Foochow, and sailed 7 for London; Dordrecht, Verhoeven, from Batavia, and sailed 7 for Amsterdam; 8, Guurtje and Marie, Flens, from Batavia; Boni, Rotgans, from Tjilatjap, and both sailed 9 for Amsterdam; 9, Lady Agnes Duff, Nowell, from Manila, and sailed 10 for London; 10, Elena, Vaca, from Manila, and sailed 12 for Cadiz; 14, Ary Scheffer, Kunst, from Batavia, and sailed for Dordt; 20, Hoek v. Holland, Bakka, from Batavia, and sailed 22 for Rotterdam; Jeanne Meyer, Loesewitz, from Singapore, and sailed 23 for London.

Off St. Helena, Oct. 1, Lanercost, from Singapore, for London.

At Table Bay, Sept. 23, Goeland, Risiers, sailed for China; 26, Princess of Wales, Shepherd, from Newport, to repair cutwater, &c., and sailed Oct. 9, for Shanghai; 4, Vulcan (s.), Voss, from Cardiff, and left 18, for Japan.

At Simon's Bay, Sept. 24, Oneida, Creighton, sailed for Hong Kong; 30, Lina, sailed for Hong Kong.

At Algoa Bay, Oct. 10, Priam, Henderson, from Batavia, put in for medical aid for master and crew.

The Havelock, from Yokohama, did not arrive off New York, Oct. 26, as reported.

At Bahia, Oct. 18, Kalahome (s.s.), Embleton, from Liverpool, left for Bankok.

At Callao, Oct. 7, Rocco Pratolongo, Leciry, from China, &c.

At Mauritius, Oct. 4, Jamaica, Galt, sailed for Batavia, after repairing; Sept. 19, Seringapatam, Wyeth, sailed for Batavia; Oct. 2, Lynet, Aaroe, sailed for Batavia; Sept. 19, Himalaya (s.), from Capetown, and left, 24, for Singapore; 23, New York (s.s.), Lane, from Capetown, and left, 24, for Singapore; Oct. 16, Niagara, Merie, from Saigon.

MANAGING AGENTS IN CHINA.
Messrs. Augustine Heard and Co., Merchants, Hong Kong. (With about Eighty Agencies at Up-Country Stations in India and Ceylon.)

RAPID PROGRESS OF THE INDIAN BRANCH.

In proof of this it may be mentioned that the Indian Branch of this Office alone, without any claim whatever to the support of the public beyond that arising from a simple statement of facts, has, in about twelve years, issued Policies assuring Rs 5,98,45,364, or nearly SIX MILLIONS sterling. This is ample evidence that the public have pronounced in favour of the low Premiums and general liberality of the terms INTRODUCED by this Company for India. It is estimated that the local New Business of the ALBERT annually exceeds that of all the other European Offices in India put together.

The Company transacts the business of the following Indian Banks:—Delhi and London, Simla, Punjab, United, Uncovenanted Service, Agra Savings, Mussoorie Savings, Oude and United Service, Oude and Allahabad Banks.

Rates of Premium for India, with Forms of Proposal, may be obtained from the Secretary, at the head Offices as above, or at any of the Branches or Agencies in this Country or in India.

7, Waterloo-place, London, S.W.,

Krusemann, Santeralla, Gracia, Alriol, De Econdrillas, De Calva, Bignerio, Mero, Ruiz, Ocampo, Rinaldez, Hutchison, Mr. and Mrs. Everas and two children, M. De la Canal and family, Capt. Juneviez and 21 soldiers.

PASSENGERS OUTWARD.

Per P. and O. steamer Nyanza, from Southampton, Dec. 4.—To Ceylon: Mr. and Mrs. W. Thompson, Mr. Hoyes, Dr. Assistant Commissary-General Randall, Mrs. Randall and child, Mr. Chas. Mackwood. To Singapore: Rev. B. and Mrs. Morrell, Mrs. Willans and two children, Miss Willans, Mr. Theodore Kranse, Captain Massey, R.E. To Hong Kong: Mr N. J. Hannen, Mr. and Mrs. Duggan, Miss Duggan.

From Marseilles, Dec. 12.—To Yokohoma: Mr. R. E. Price, Mr. King, Mr. Vernede, Mr. Mottn, Mr. Jacquenot. To Shanghai: Rev. F. King, Mr. F. King. To Hong Kong: Mr. H. Smith, Mr. and Mrs. G. N. Minto. To Singapore: Mr. A. McColl. To Ceylon: Miss G. F. Bell.

Per P. and O. steamer Ripon, from Southampton, Dec. 20.—To Hong Kong: Mr. H. Foss. To Singapore: Mr. and Mrs. W. Hargreaves. To Ceylon: Mr. R. E. Crickett, Mrs. F. B. Templer, Miss Templer, Mr. F. Templer, Mrs. Mackenzie, Miss Saunders Miss Lloyd.

From Marseilles, Dec. 28.—To Ceylon: Mr. W. T. Sendall, Mr. J. S. Findlay.

Per P. and O. steamer, from Southampton, Jan. 4.—To Shanghai: Mr. Gore Booth, Mr. F. C. Adams. To Singapore: Mr. James Miller, Rev. G. F. and Mrs. Hose.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The dates by this opportunity are to the 25th Oct. The P. and O. steamer *Malacca* was to be despatched to Suez as an extra vessel with silk, &c., to correspond with the Bombay mail which arrived at Marseilles yesterday, the 4th. She has on board 349 bales of silk and 1,033 cases silkworms' eggs.

The items of news are scanty. The *Japan Herald* publishes the following :—

We have received three official communications, emanating from the very highest authorities, each of which contradicts the report of the Shiogoon Stotsbashi's abdication ; and one further adds that the officer placed by the report at the head of the *soi disant* administration was assassinated a month since. We quote :—"The latest advices received from Kioto are dated five days ago, and at that date all was perfectly quiet."

The settlement was startled out of its usual quiet state by the report of a fatal affray having taken place at No. 145. The report proved too true, and we learn that the victim was James Micklejohn, who was stabbed to the heart during a quarrel by a Dutchman named Surie, who is in the Consular jail.

A new paper, called the *Japan Gazette*, has been published, and supposed to be edited by Mr. Black. The *Gazette* says :—

"Nothing new has transpired as to the finding of the assassins of the two English sailors at Nagasaki. In one respect, however, the action taken by Sir Harry Parkes in a recent visit to Osaka has been successful, viz.—in obtaining the removal of the Governor of Nagasaki, under whose rule the outrages upon foreigners have been so frequent, without any of the delinquents being discovered. The new Governor, Wadzu Idzu no Kami, has arrived in the Shiogoon's steamer *Dumbarton*, accompanied by an escort of 300 soldiers. When governors of settlements adjoining those of foreigners see that incapacity is punished so promptly, it is likely that a good deal more alacrity will be shown in guarding against outrages, and greater zeal manifested in finding and handing over the criminal to justice.

"It is not generally known that a residence has been prepared at Osaka for the British Minister, who will occupy it for the first few months after the opening of the ports."

NAGASAKI.

Dates from this port are to the 19th of October, and report all quiet. The U.S.S. *Hartford* arrived there on the 18th.

CHINA.

TIENTSIN.

A letter from this port, dated Oct. 10, says :—The bands of mounted robbers who have been infesting the routes from this to Shanse, and have been plundering travellers and traders, have gone southwards and westwards, and it is now possible for the inland traders to bring treasure here from Shanse and other inland marts, and take merchandise to Shanse, without running the danger of being plundered by the marauders of the rebel forces or the Imperialists. The result has been that a demand has lately sprung up for several kinds of imports, and some sales have been daily effected at advancing rates. The total amount of business transacted by the inland traders has, however, as yet been very limited, in comparison with former years at this part of the season. It is, however, consolatory to us to know now that there is a possibility of doing some business, for the last few months have been frightfully stagnant for the foreign import trade. Grey goods are chiefly asked for, and can find buyers freely at about the following rates :—Grey Shirtings, 7 lbs., taels 2.25.28 ; 8½ lbs., taels 2.48.55 ; 8½ lbs. taels 2.58.60. T-Cloths, 7 lbs., taels 2.2. American Drills, 40 yards, taels, 4.20.50. English Drills, 40

Digitized by Google

yards, taels 3.60.70. Figured Orleans, taels, 4.40; Plain Orleans, taels 4.20. Other British imports also find buyers readily, such as Lead, taels 5.50.60; Steel per picul, taels 5.20.30; Tin Plates, taels 7.00.30; Window Glass, taels 2.60 to taels 3.40, Sapan-wood taels 2.10.70.

The opium market is again quiet, and rates during the last four days have receded. To-day the quotations are—Malwa, taels 560 for ready money, taels 565 for payment in two weeks. Patna, taels 470 to 480. Both kinds of drug, from now on, however, are certain to advance in price, as in a couple of weeks at furthest the traders will begin to buy freely for the interior markets. Gold is going down slowly, and to-day it is quoted tls. 15.40.50. Cotton keeps slowly falling, and yesterday's quotations were taels 14.20.50, but before foreigners can touch it for the Hong Kong market it must go considerably lower. Japanese produce is in good demand. The quotations to-day for long seaweed are taels 3.90 to 4.40, and rising, Passiet seaweed taels 2.20.30, also rising. Cut seaweed, taels 5 to 5.50; isinglass, taels 40 to 44.

The long-expected vessel from England, *Our Queen*, with direct shipments, has not yet appeared at Takoo. She is expected with much anxiety by all parties, as her cargo, it is hoped, will make a revolution in the Tientsin trade, so far as foreigners established here are concerned. A second vessel is expected next March, to supply the spring demand.

The French bank, Comptoir d'Escompte de Paris, has just established an agent at this port, so it would appear that the banks are directing their attention to this large market as a field in which business can be profitably done. It must be borne in mind that we shall not have a famine every year in the north of China, and that we are certain to see years in which a large amount of business will be done in British and American grey goods.

The usual Chinese products, such as red and black dates, fruits, medicines from Shanse and the other parts of the north of China, are daily making their appearance at Tientsin, to be exchanged for silver and imports.

The local authorities, in connection with the opulent classes of Tientsin, have established what we call "soup kitchens," at which a bowl of congee daily is served out to each poor person, and by which means it is expected the recipients will be kept alive, till next year shall find them employment and food. I understand that this system has been already adopted over all the north of China. The want of the millet stalks used by the inhabitants for firing, generally, will be severely felt this winter. The millet stalks are used both for heating the people's houses and cooking their food. It is to be hoped Providence will favour us with a mild and short winter.

The American merchant steamer *Manchu*, on her last trip, when returning to Shanghai, had a fight with the southern junks at Kokoo, when firearms were used. It was generally expected that things would come to this pass, in consequence of the lawless manner in which these junk people had been acting towards the foreign craft passing through the Kokoo anchorage.

Admiral Keppel is not expected back from Peking till about the 20th.

Since the British men-of-war *Salamis*, *Manila*, and *Dove* have been lying off the British settlement cricket has been much in vogue; and at a match held on the 8th, between the navy men and the resident foreigners, the civilians got terribly beaten.

The training for the autumn races, which will come off on the 24th, 25th, and 26th, is being proceeded with every morning early. At present Black Diamond and Black Pearl are the favourites for the Challenge Cup, and it is a matter of grave importance to this small world that they should win it, as the cup will then remain certain with us for another twelve months. Money, either in the shape of sycee shoes or in the form of Mexican dollars is not an over abundant article in this region, in this autumn of 1867, and should the winner of the Challenge Cup at the last meeting again win it at this meeting, it is extremely doubtful if the community will be in a hurry to subscribe for another piece of plate for a Challenge Cup. Hence it is generally hoped that fortune will favour either Black Diamond or Black Pearl, and thus keep the present Cup to be run for again till better times smile on the port of Tientsin.

SHANGHAI.

The dates are down to the 23rd Oct. The P. and O. mail of 26th August arrived out on the 13th Oct. The telegrams from London via Kiachta are to the 24th Sept., received on 19th Oct., and *via* Galle and Hong Kong to the 23rd Sept., received on 20th Oct.

The following summary of news is from the *North China Herald* of the 19th of October:—

A meeting of the North China Insurance Company has been held, at which several matters of much interest were discussed. The propriety of establishing an independent office in London and of insuring hulls of vessels were chiefly discuss.

The American mail steamer *Costa Rica* left on the 17th of October to join the *Great Republic* at Yokohama. An American paper, called the *Shanghai News Letter*, was got up for despatch by her. The editors put on record at the outset that their "intention is that, while the utterances of the paper will be plainly and distinctively American, they will breathe only good-will towards their fellow sojourners" in China. Accordingly the summary of news given refers almost solely to matters affecting American interests.

The P. and O. Company have despatched an extra steamer, the *Malacc*, from Yokohama direct to Suez with silk; the *Aden* left Shanghai to meet her at Hong Kong.

A cricket match between elevens of the Fives' Court and the Cricket Club has been commenced; play has already extended over two days. The scores made were 136 by Fives Court, and 96 by Cricket Club.

The rules lately drawn up by the Chinese Government, regulating the ownership by their subjects of foreign vessels, contain the following clause, which has been much criticised, as arrogating a power they could not claim:—

"Should the vessel have left port before the above report is made, the vessel will be confiscated when arrested. The Chinese charterer will be dealt with by Chinese law, and the foreigners on board will be handed to their Consul for punishment."

It is satisfactory to find from the following extract from a letter by Sir Rutherford Alcock to Mr. Winchester that he shares this view:—

"These regulations have never been communicated to the Foreign Representatives, and the Chinese authorities must, I think, have been perfectly aware that they would not agree to such a clause [viz., the last]. Be this as it may, I have simply to instruct you to acquaint the Taotai and Commissioner of Customs, officially, that any action on their part under this article would be a violation of Treaty, and will certainly not be permitted to take effect, wherever British vessels are concerned."

The committee for the assessment of Chinese houses have completed their labours. The result shows a slight increase in value over the previous schedule. They have assessed 12,000 houses in the English and Hongque settlements.

The want of a gaol has long been much felt in Shanghai. We are glad to learn that plans for one have been drawn up and sent home for the approval of the Foreign-office, and there is every likelihood of their assent being soon received. Accommodation is contemplated for fifty prisoners; and the building will contain an infirmary, chapel, and workshops, as well as commodious apartments for the necessary staff and guardrooms for the police.

One of the cargo boat robberies that so frequently occur in this port was cleverly detected by the police a few days ago. A cargo boat which had been partially laden with coal from the naval store during the day was left at night lying off the jetty. The police had an inkling that an attempt would be made to carry off some of it during the night, and kept watch. A cargo boat soon dropped down with the tide and moored alongside, remained there some time, and again floated away. The police at once followed and captured it, with a quantity of stolen coal on board. The head man of the thieves has been sentenced by he Mixed Court to eighty blows with the bamboo, one month's cangue, and subsequent deportation. We may add, as the last sentence sounds rather vague in reference to Chinamen, that it is considered effectual. The police seldom, if ever, see a man who has been deported again in the settlement.

We are glad to learn that a dispensary for the benefit of the Chinese has been opened at the house in Hong-que known as Dr. Boone's office, in connection with the Protestant Episcopal Mission. Dr. Macgowan kindly gives his services as consulting surgeon, and a Chinese assistant is in regular attendance. The house is provided by the mission, but the medicines depend upon charitable contributions from natives and foreigners, which we have no doubt will be forthcoming. It is now generally understood that medical aid affords the best opening for missionary work in China, as it enables the natives to form an opinion of foreigners and foreign skill, tending to overthrow the "barbarian" theory, and to facilitate the work of introducing Western civilisation. Many will gladly contribute towards the

Digitized by Google

maintenance of hospitals who do not believe much in the present efficacy of missionary labour for converting the Chinese to a more enlightened faith.

Amongst the shipping arrivals has been the Japanese steamer *Cosmopolite*, under the command of Japanese captains, of whom there appear to be two, with a crew of 24 officers, 60 seamen, and 22 stokers. She appears to be in good order and cleanly, and is said to have come over for repair.

The wreckers have been making a fine harvest out of the wreck of the *Vesta Vizie*. They have secured a large proportion of the coal, and are distributing it as rapidly as possible. It is however satisfactory to know that energetic measures will be promptly taken to recover the same, and to prevent further pilfering. The steamer *Hyson* will shortly proceed to the scene of the disaster and will doubtless enforce restoration of the stolen cargo.

A Ningpo correspondent writes :—"Under instructions from the Chief Judge, H.B.M.'s Consul has returned Mr. Wadman the amount in which he had mulcted him for his imaginary offence against the dignity of the Queen ; so the publicity given to the correspondence has brought this matter to a satisfactory termination, and saved all the trouble and expense of an appeal. Notwithstanding its absurdity the affair will do good, as showing that the intention of both the public and the authorities can, on an emergency, be directed even to Ningpo.'

The winter season of 1867, lacks the cheerful presage of its predecessors. The weather is unusually gloomy. The thermometer, instead of being 67 deg., as it is usually during this month, stands while we are writing at 79 deg. Illness is very prevalent. We have had more than one sad reminder of the unhealthiness of the place and of the time, and we cannot resist the depressing influence. Strangely enough, too, the sickness is not restricted to this portion of China. We hear very bad accounts from the North. The fame of Peking and Tientsin for healthiness of climate, which has been so long established, seems at the present moment to be challenged. Deaths and illnesses amongst the foreign community seem on the increase. Even at Chefoo, the most favoured of the northern ports, there has been a prolonged and unusually trying summer, and visitors have, in many cases, returned from health-giving Yen-tai without receiving marked benefit from their change. Now, the conclusion forced upon us by these experiences is, that it is very nearly as difficult to predicate what weather we shall have at a particular month in China as it is to make a similar prophecy in England. The idea that in the Middle Kingdom there is a dry season and a wet season, a hot season and a cold season, each with definite limits, is a delusion. It is true of India; it is not true of China. Therefore, we should do well to act accordingly, and make our plans accordingly. It is no longer safe to look forward to a spell of cool dry weather at a particular time.

The wreck of the *Tientsin* has been entirely removed.

Mr. Hunt, the Inspector-General of Customs, has published a sheet containing the names and occupations of persons in the service of the Chinese Customs. This list appears in the *Friend of China* in full.

List of Silk Shippers from Shanghai, June 1, to October 14, 1867.

HONG KONG.

Advices from this port extend to the 28th October.

The banks have agreed, in consequence of the Stamp Act fee of $1.50 on each set of exchange, to make an equivalent charge to the buyers on all their bills under £1,000.

In the Supreme Court of Bankruptcy, before Mr. Masson, the official assignee, G. Reimann, merchant, passed his preliminary examination. A claim was handed in, but not proved, by Messrs. Pustau, on behalf of Mr. Franke, Hamburg, amounting to over $12,000; and another claim was put in by Mr. Eimbke for $5,000 on behalf of Messrs. Brodermann, of Hamburg. H. Corran, bankrupt, likewise passed his first examination.

The Spanish mail steamer *Malespina* has not been heard of. Mr. Lane, of the Agra Bank, was in her.

A. E. Vaucher and George Blakeway, merchants, trading hitherto under the name of Vaucher and Co., now bankrupts, appeared to pass their first examination. Mr. Weller (partner of Messrs. Aug. Heard and Co.) proved one debt of $400 ; and put in a claim for another of $601.25 on behalf of Mr. Perez, Manila. Mr. J. S. Lapraik (of Messrs. Douglas, Lapraik, and Co.) proved a debt of $1,168 ; and a Chinese creditor proved for a sum of $1,480 for silk piece goods. After some conversation, Mr. Sharp informed the Court that it had been agreed by the creditors to allow Mr. Vaucher $300 a month, and Mr. Blakway $150, until such time as the final examination should take place—such moneys to be taken from the available funds of the estate.

The P.M.S.S. Co. steamer *Great Republic* sailed on the 15th Oct. for Yokohama and San Francisco. This magnificent vessel carried about 1,700 tons of cargo, and the company's agent was compelled to refuse a portion of heavy freight. In addition to the European passengers, she took 200 Chinese passengers, some of whom are intended as labourers on the Pacific Railroad. The main features of her cargo are—500 tons tea, 50 packages silk piece goods, 200 tons rice, 150 tons sugar, 200 boxes opium, and 800 tons sundries, for San Francisco ; together with 260 tons of sundries for Yokohama. Captain Phelps, the respected agent for China and Japan, together with the president, Mr. Allan M'Lane, go up to Yokohama and Shanghai to superintend the perfecting of the arrangements of the company at those ports—the former remaining as agent at Yokohama, the head-quarters of the company, and the latter returning by the *China* next month. The passengers include Lady MacDonnell.

At a meeting of the Union Insurance Company the following board of directors was elected :—Mr. Woldemar Nissen, chairman, and Messrs. Duncanson, Ryrie, Keswick, Sassoon, Hitchcock, and Lemann. Applications had been made for a large number of the shares, and the committee wished that it should be understood that it would be in the power of the new board about to be elected to strike out such as in their opinion had not contributed such business to the society as to entitle them to shares, in preference to those who had contributed largely, and it should also be understood that any part such applicants might take in the present meeting would not entitle them in future to claim shares in the allotment. Agreeable to a resolution at the last meeting, lists had been prepared of the names and the amount of premia contributed by shareholders, and would be circulated through the meeting.

In reference to the dock at Kowloon, the directors of the Hong Kong and Whampoa Dock Company have issued the following :—

Your directors have had no other course open to them than to dispense with the services of the present architects, and appoint Captain Sands to superintend the work, subject only to instructions from the board while they are glad to inform you that they have also secured the services of a thoroughly practical man to guide them in any emergency that may present itself. Your directors, therefore, congratulate you that the difficulty is now so far solved, and they hope to be able to report to you the dock ready to receive the first vessel within eight months from the present date.

H.M.'s gunboats *Grasshopper* and *Janus* had returned from a successful cruise in search of pirates. The *China Mail* gives the following report of their proceedings :—

"The two vessels left Hong Kong on the 27th Sept., and made the best of their way to Nimsham, a town or village lying at the head of Bias Bay. The approach was difficult, as no reliable surveys of the approach exist. On the morning of the 29th the *Grasshopper* and *Janus* got within a practicable distance of the town, and the commander of the latter (who was furnished with a boat's crew and the marines of the *Grasshopper*) was instructed to communicate with the native authorities and obtain from them information of the precise locality of the town of which they were in quest—a place called Shek-tow-ling, where a large amount of property stolen from a trading junk had been carried and concealed. This place turned out to be some two miles distant from Nimshan, and was given a bad character, as the resort of piratical cut-throats. The *Janus* was ac-

Digitized by Google

cordingly directed to push her way up a narrow creek leading to the town and anchor in a position to cover the landing of a force from the vessels. Upon searching the town the goods were found to have been removed, and a large portion of the inhabitants, wisely judging that the visit foreboded them no good, had also levanted. Two or three Chinese identified as pirates were, however, captured, not without vigorous protest and energetic resistance. One man, a fellow of herculean strength, was shot in the struggle which ensued between him and his capturers. It being found impossible to recover any of the property stolen, the landing party were turned to march down to the boats, but were immediately met by a body of armed Chinese, who evidently meant to show fight. The marines opened fire, and they retreated, several of the Chinese being wounded. The party then returned to the *Janus* with the two men captured, one of whom was the man shot in his endeavour to escape. Efforts were then made to get the *Grasshopper* close up, but she unfortunately grounded and remained on the mud for 24 hours in spite of every effort to get her off. At 11.45 P.M. of the 30th, she was so far got off that her stern was in deep water, and about this time the typhoon (experienced here) commenced. Despite this, the the falling tide rendered it necessary to leave her in that position until 10 P.M. of the 1st October. Scarcely however had she, by the aid of steam and sail, escaped from her former position than the violence of the wind drove her on to the opposite bank, where she remained immovable. The townspeople, however, by this time seemed disposed to come to terms, and (considering that the *Grasshopper* was immovable until the tide rose), they were given till the following day to make the reparation demanded. A deputation from a neighbouring town visited the ship to beg for easy terms for their offending countrymen, and an intimation was given that the property stolen must be returned by 10 A.M. of the next day (4th October), or the town would be bombarded. The Chinese however seemed to have repented of their intention to come to terms, and the specified time having elapsed the commander of the *Grasshopper*, with the approval of the Mandarin on board, decided to carry out his threat. Fire was accordingly opened with shot, shell, and rockets, the practice being very accurate, and by sunset a considerable portion of the town had been destroyed. On the following morning the effect of these salutary proceedings became evident. The chief men of the town came on board and handed over all the missing property they could collect, with the stipulated compensation for whatever was short. This being accomplished the *Janus* was withdrawn from her position, and efforts were made to lighten the *Grasshopper* by discharging some of her shot, shell, &c., into the *Janus*. These efforts were not crowned with success until the 12th inst., when she fortunately got off the bank and was enabled to leave her dangerous position. We understand that the officers and crews of both vessels acquitted themselves most creditably, and we believe that the efforts of Mr. Packer, navigating sub-lieutenant, to obtain the necessary surveys, has been specially noticed. Altogether we can congratulate Lieuts.-Commander Patterson and Lloyd upon the success which has attended their cruise.

"A curious incident occurred during the bombardment. The *Grasshopper* was firing percussion shell, which do not explode until they strike, and to outward appearance it very much resembles solid shot. It appears that some of the villagers picked up one of these shells still unexploded, and were hammering away at the percussion spot for the purpose of opening it to see what it was made of, when, to their consternation, it suddenly exploded, killing eight men who were around it. The villagers were so horrified at this that, after the firing was over, happening to find a solid shot, they mistook it for another explosive devil, and took it on board the *Grasshopper* carefully wrapped up in cloth and matting, and begged the commander to take it away for fear it should go off as the other had done."

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, Oct. 27.

The event of the period is undoubtedly the "Memorial" of which that very lethargic body, the "Chamber of Commerce of Hong Kong," has at length disburdened itself, on the subject of the approaching revision of the treaty between Great Britain and China. It is now several months since Sir Rutherford Alcock, Her Majesty's Minister at Peking, made the tour of the Treaty Ports, and received addresses at the principal places from the British mercantile communities; but his Excellency, although approaching Hong Kong within eighteen hours' steam on his visit to Swatow, completely avoided the colony, and neglected to visit the important settlement at Canton (which can only be reached by passing through Hong Kong); in consequence, most probably, of his recent disagreements with Sir Richard MacDonnell. Sir Richard, however, "longing to be at 'em," and by no means loth to have a finger in the diplomatic pie, took the bold step of calling on the local Chamber of Commerce to lay before him their views on the points necessary to be borne in mind at the revision of the treaty, in order that he might forward their memorial to the Home Government. For his own ends Sir Richard undoubtedly made a clever move; but whether the opinions of merchants in Hong Kong on the treaty relations with China are worth having at the present time is another question. A meeting of this august body took place on the 19th inst. to discuss and adopt the memorial prepared in the name of the Chamber by a committee appointed for the purpose, when, among the subjects most prominently discussed was the omission from the memorial of all mention of British nationality. The German gentlemen who condescend to carry on their trade at Hong Kong and on the coast of China under the ægis of the British flag protested warmly against identifying the Chamber of Commerce of the British colony of Hong Kong with British interests; and succeeded in causing the words "foreign trade" to be substituted wherever the memorial had contained the word "British" originally. The charming innocence of these demands, made to and assented by a meeting called for the purpose of memorialising the British Government to obtain fresh privileges in addition to those conferred by a treaty which was obtained by British arms and presumably on behalf of British subjects needs no comment.

As for the memorial itself, the document is well drawn up, and touches on a variety of important points, such as the internal restrictions on trade, the opposition to railways and telegraphs, the difficulty of compelling the local Chinese authorities to fulfil treaty stipulations in the way of arresting debtors and criminals, &c., &c.; but it is to be regretted that a strong paragraph drawing the attention of H.M.'s Government to the monstrous evils arising from the Portuguese slave-trading settlement at Macao should have been struck out at the instance of the German section of the Chamber—who are notoriously mixed up with the coolie trade in many ways. The Hon. Francis Parry (of the firm of Birley and Co., and a member of the Legislative Council) is a well-known opponent of this infamous traffic, and was the author of the clause in question; but, notwithstanding his efforts, it was not allowed to remain in the body of the memorial. The document is to be forwarded by the Governor to the Secretary of State for the Colonies by the mail of the 1st prox.

It is reported that the U.S. Consul at Amoy, a "General" Legendre, has obtained from the Chinese authorities a detachment of native troops, and has started for Formosa, with the intention of performing desperate deeds of valour against the savage tribes at the south end of the island by whom the crew of the U.S. vessel *Rover* were murdered. People who are acquainted with the condition of affairs among the native tribes of Formosa regret that a "fussy" act of this kind should be undertaken, as it is by no means improbable to lead to fresh disasters; whereas a movement properly concerted at Peking, having in view a permanent military settlement of Chinese troops at the south end of Formosa would, by compelling the savages to retire to the mountains, there to await the salutary process of extermination, be a lasting benefit. The number of the *China Express* for September 10, just received here, contains an extract from a more than usually ludicrous article in the brilliant *Daily Telegraph*, the writer of which is in delirious ecstasies at the exploits of the landing party from the U.S. ship-of-war *Hartford*, who were in reality driven back to their boats by the savages with disastrous loss. The "young lion," however, who has penned the exuberant article referred to, appears to have known as little of the results of the expedition as he did of the nature of the savages, whom he terms "pig-tailed pirates," thus evidently labouring under the impression that they are ordinary Chinese, instead of savages equally intractable (and less accessible) with those natives of the Andamans who have inflicted so many cruelties on shipwrecked crews, and whom the Indian Government has hesitated so long about chastising. The sneer of the *Daily Telegraph* at the "British gunboats," which are supposed to be "too busy" to attend to cases of piracy, is worthy of its prototype, the *New York Herald;* but it is melancholy to think that a leading article in a London journal can be suffered to put forth insinuations which the record of events by every homeward mail from China disproves. The incessant exertions of the British gunboats, four of which are in commission here, and two or three others scattered along the coast, are all that protect the commerce of the world in the Chinese seas; not a week passes but their officers and men are risking their lives in some hazardous operation or other of which one might have thought a faint rumour might have reached the ears of even the *Daily Telegraph* writer. As regards the suggestion that some adventurous spirit should fit out a yacht with Armstrong guns and petroleum for a campaign on his own hook against the "pigtailed" gentlemen of Formosa, it would be well, before the advice is taken, for the adventurous spirit to take advice from the "Cabinet Lawyer" respecting the penalties attached to piracy, whether "pigtailed" or otherwise!

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Dates are down to the 3rd November. The outward mail of the 26th September arrived on the 30th October per *Emeu*.

The following items are from the *Straits Times* of 2nd November:—

Digitized by Google

We believe it has been resolved to hold a public meeting with the least possible delay, to protest to the Secretary of State against the Bill for the reconstitution of the Supreme Court now before the Council.

Report of proceedings of the Legislative Council held on the 30th October, 1867.

Present:—His Excellency the Governor, his Honour the Acting Chief Justice, the Hon. Colonel Cooke, the Hon. the Colonial Secretary, the Hon. the Attorney-General, the Hon. the Colonial Engineer, the Hon. the Treasurer, the Hon. the Auditor-General, the Hon. T. Scott, the Hon. R. Little, M.D., the Hon. C. H. H. Wilsone.

The minutes of the last meeting were read and confirmed. His Excellency the Governor laid before the Council two petitions from certain persons in Singapore on the subject of the provisions of the Bill at present before the Council for the admission of legal practitioners in the Supreme Court—which were referred to the Select Committee upon the Bill. On the motion of the Attorney-General, that the Supreme Court Bill be read a second time, and committed, the following protest was handed in.

We, the unofficial members of this Council, beg leave to protest against the abolishment of the Royal Letters Patent for constituting the Court of Judicature as it at present exists until the necessity for such has been more fully considered and approved of by the Chief Justice of the Settlements, whose extensive experience as a judge of this Court for the last ten years fully justifies us waiting his return for his opinion on the constitution, practice, proceeding, and duties of the present Court of Judicature.

We further beg that this our protest may be duly recorded, and transmitted with the "Bill for Constituting a Supreme Court of Judicature" to the Right Hon. the Secretary of State for the Colonies.

PROCEEDINGS ON THE 2ND NOVEMBER, 1867.

The minutes of the last meeting were read and confirmed. The committee upon the Supreme Court Bill resumed at Sec. 9. The committee reported progress at Sec. 27. Adjourned to the 8th inst. Order of the day—Supreme Court Bill.

The steamer *Peiho*, which is announced to leave this for Malacca and Penang, will, after her arrival at Penang, we believe, convey Colonel Man on a political mission to some of the neighbouring States.

THE HONG KONG STAMP ACT.

THE Stamp Act has, notwithstanding the promises held out to the contrary, been put into force. With the measure itself we have already expressed our approval, as one calculated to bear as lightly as possible on the community. That it will be troublesome and tedious until men of business get accustomed to it there is no doubt; but considering that at the time it was framed it was absolutely necessary to increase the revenue of the colony, we think the adoption of a Stamp Act was judicious, provided that the scale of fees was of a moderate nature. We have now the schedule before us, and regret to see that in some cases the rates are excessive. We take especial exception to the rate levied on the issue of bank-notes, as not in the province of a Stamp Act; without precedent, and fraught with inconvenience to the trading community; as we cannot doubt that, if persisted in, it will be the means of driving the banks to withdraw their circulation. We can hardly expect that it can be worth their while to pay a tax of one per cent. per annum on the average circulation. The Hong Kong and Shanghai Bank, which has a circulation of about seven lacs of dollars, will be liable to an annual payment of $7,000. This is a most arbitrary interference with a banker's legitimate profits, derived from a circulation which is always a source of great anxiety and doubtful profit, as it sometimes involves, in times of panic, the melting of securities at a heavy discount. The circulation of notes in Hong Kong is contracted to such small limits that it is necessary for bankers to maintain a larger reserve than is required in this country or even in India. We think this imposition must have escaped the notice of the Home Government, or they would never have sanctioned its retention under the provisions of a Stamp Act. The next item which appears to us as excessive is the imposition of $1.50 on a set of bills of exchange, no matter of what value. This should have been fixed on the *ad valorem* principle, and we cannot understand what the framer of the schedule could have been thinking of to depart from such an equitable and sensible principle. Again, the rate is excessive on letters of hypothecation, 25 cents on every $100 value up to $1,000, and $2 for every $1,000 or part of thousands after the first. So that the expense of negotiating a bill on London, drawn against shipping documents, for say £1,000 or $4,500, is as follows:—Stamps on bills of exchange $1.50, on bills of lading 30 cents, on letters of hypothecation of shipping documents $10.50, total $12.30 on a shipment of £1,000. On shipments of £20,000 to £50,000, which are common to many houses in China, these fees will be a serious item, and will necessitate their giving orders to their branch houses at other ports to negotiate drafts on the spot and not forward them to go through the Hong Kong stamp squeeze. This will be a cut against the prosperity of the colony which the framers have perhaps overlooked.

Since the above was in type we have received the mail correspondence, and find that the Governor has reduced the tax on letters of hypothecation *for the first six months* to $2 for every $5,000 up to $60,000, and a fee of $24 for all sums above that.

MEMORIAL OF THE BANKERS.

The bankers have addressed the following letter to the Governor:—

His Excellency Sir RICHARD G. MACDONNELL, C.B.,
Governor of Hong Kong.

HONG KONG, 15th October, 1867.

Sir,—We beg respectfully to address your Excellency on the subject of the Stamp Ordinance, and particularly with reference to what we consider the unequal tax which is laid on certain classes of transactions, in the hope that your Excellency may be pleased to reconsider what is complained of, and grant such relief as you may see proper.

The most serious item in the schedule of duties which we feel compelled to notice is the duty under head 16, on Letters of Hypothecation. This is a duty which will not fall to be paid by us as bankers, but by the person or firm executing the letter of hypothecation. We are not, therefore, seeking relief under this head for the corporations we represent, but for those traders who, without unlimited credit, are yet conducting a legitimate class of business in the colony, and who may occasionally require banking assistance by temporary advances on goods, as is done in every centre of commerce in the world.

To tax temporary loans on goods (often for periods of 8, 15, or 30 days) with the same duty as a mortgage on real property, appears to be unjust, and not in accordance with the spirit of Stamp Acts either in England or elsewhere. In England the stamp on such a transaction is the stamp for agreement. In India there is no duty; and in Singapore there is a duty of one rupee only on short loans, irrespective of amount.

In the case of letters of hypothecation of documents attached to bills of exchange the burden is equally great. The bills of exchange are stamped and the bills of lading are stamped, as is done in other places, but we believe in no other place throughout the British dominions are letters of hypothecation accompanying such documents stamped. The act of hypothecating documents of shipments to England is, perhaps, as sure a safeguard against undue speculation as any other, and should not, we think, therefore be discouraged by a stamp duty which unquestionably is heavy and, as we view it, inequitable. Traders of moderate means will, we apprehend, not be able to compete on equal grounds with more wealthy rivals, for it is only those merchants who have credit on London and who can sell their bills clear, with no other duty on the transaction than the stamp on the bills of exchange, who can dispense with attaching shipping documents to their drafts.

In reducing the case to figures, the wealthy merchant sells £50,000 on London in large round amounts, say 10 bills; he contributes to the revenue only $15. A merchant of smaller standing who draws against his invoices will, for a similar amount, draw on an average 20 bills, thus making his contribution to the revenue as follows:—

Duty on 20 bills of exchange at $1.50	$30
Duty on 20 letters of hypothecation at $22.50	450
Duty on 20 duplicate do. at $3	60
	$540

On these grounds we would beg a reconsideration of the schedule as it affects the transactions referred to.

As regards the duties which as bankers we will ourselves have to bear, we venture to bring under the notice of your Excellency the heaviness of the duty on bank notes for local circulation. There appears to be an impression that the banks who issue notes make a large profit from the issue. Such is not the fact. Our currency being so bulky it is as much a question of convenience, both with ourselves and the public, the issuing of notes in the colony. We confidently assert that for the past year and a-half the note circulation has not been a source of profit to any one of us, but merely a matter of convenience, as we invariably have had a dollar in our treasuries for every dollar in circulation. This, of course, is for our own protection; but if we cannot safely employ the funds so raised we submit that we cannot afford to pay a duty on the amount. The Chinese do not keep banking accounts, and prefer now to pay and receive in bank notes—hence the circulation is unduly inflated. But the moment a panic comes, and, as we have seen in more cases than one, the circulation is reduced nearly to zero within a week, with no Bank of England to appeal to for assistance, each of us must always be prepared to retire our whole issues; and we respectfully submit that the service we render the public by relieving them from a cumbersome currency ought to be put against the small profit we may at long intervals make on a portion of our note issue.

We consider that the banks will pay a large share of the Stamp Revenue. A merchant pays nothing on his transactions *inwards;* but what may be called a bank's transactions inward, viz., the receiving of bills drawn

Digitized by Google

against imports from Shanghai and the coast ports, and especially from England and India, will be a heavy loss on the banks, as every bill must be stamped in the same way as bills drawn or negotiated in the colony, against exports.

The Ordinance does not operate in the same way on merchants. We do not wish, however, to open up this point, but we trust your Excellency will see fit to amend the clauses noticed in this communication, and give the relief sought for.—We have the honour to be, Sir, your most obedient servants.

SIGNED BY ALL THE BANKS.

BIRTHS, MARRIAGES, AND DEATHS.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DENNIS—On the 26th Nov., at Hill Side, Streatham, the wife of John Dennis, Esq., of a son.

PRESTAGE—On the 19th October, at Hong Kong, Mrs. Ward Prestage, of a son.

FROMMURZE—On the 29th Oct., at Parsee Lodge, Singapore, the wife of Cursetjee Frommurze, of a daughter.

SKINNER—On the 31st Oct., at Singapore, the widow of Mr. Archibald Skinner, of a daughter.

TURNER On the 2nd Dec., at Thames Ditton, the wife of Henry Turner, Esq., late of Yokohama and Shanghai, of a son.

WHITE—On the 17th Oct., at Macao, the wife of Mr. J. R. White, of a son.

MARRIAGES.

DAVIS—ROCKE.—On the 26th Nov., at Exmouth, South Devon, by the Rev. George Lowe, uncle of the bride, Sir John Francis Davis, Bart., K.C.B., of Hollywood, Gloucestershire, to Lucy Ellen, eldest daughter of the Rev. T. J. Rocke, vicar of Exmouth, and granddaughter of the late Very Rev. Dr. Lowe, Dean of Exeter.

FOBES—VEAZIE—On the 16th Oct., at the residence of Mr. Blethen, Shanghai, by the Rev. M. T. Yates, in the presence of the U.S. Consul General, Willie P. Mangum, Esq., Amasa S. Fobes to Vesta, daughter of Captain William G. Veazie, of Belfast, Maine, U.S.A.

HOLCOMB—WAINWRIGHT.—On the 15th Oct., at Shanghai, at the residence of J. M Batchelor, Esq., by the Rev. M. T. Yates, H. A. Holcomb, of Branford, Connecticut, to Miss Mary P. Wainwright, of San Francisco, California.

MILLAR—LARDNER—On the 17th Oct., at the Union Chapel, Hong Kong, by the Rev. D. B. Morris, Mr. Andrew Millar, plumber, to Miss Margaret Lardner, daughter of William Lardner, Esq., East Binnie, Linlithgowshire, Scotland.

SMITH—BELL.—On the 12th October, at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, Acting Colonial Chaplain, Thomas James Smith, Esq., of London, to Miss Sarah Bell, youngest daughter of Walter Bell, Esq., of Carlisle.

DEATHS.

CHAPMAN—On the 27th Nov., at Brighton, after a short illness, aged 33, Arthur George Chapman, son of David Barclay Chapman, Esq., of Rochampton and Brighton.

HINSCH—On the 18th Oct., at the General Hospital, of dysentery, Mr. Edward Hinsch, a native of Hamburg, aged 27 years.

POWLES—On the 10th Oct., at Tientsin, the wife of Dr. Powles, H.B.M.'s Legation, Peking.

SYER—On the 27th Aug., at Hong Kong, Richard Sikes Syer, in the 25th year of his age, second and beloved son of the Rev. W. H. Syer, of Kedington Rectory, Suffolk.

Commercial Report.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Since the departure of the steamer Sunda with the mails on the 1st October, the import market has remained in rather an inactive state. Grey Shirtings are slightly easier. Cotton Yarn, 28 to 32, in active request; for other counts the demand not so active. Taffachelas and Chintzes somewhat recovered after a long depression, and Black Velvets in fair demand. Dyed Brocades and Spots and good assorted Camlets still saleable.

SHANGHAI.—Accounts from the North having been more favourable an active business has been done in some classes of goods, especially in Grey Shirtings, of which some 60,000 to 70,000 pieces have changed hands at a slight advance on last rates, and parcels of Eagle chops 8lb., four have been sold to arrive at 2.60 taels. The transactions have been chiefly for prompt clearance. White Shirtings again lower in value, some good 64-66 reed having been placed at 2 50 taels per piece. T-Cloths without change. Woollens are quite neglected, and Camlets appear to have become quite a dead letter. Metals: The stocks of most kinds being small, there is a good current demand. Lead and Tin share the activity. Iron: Nail Rod may be quoted 2 80 to 2.90 taels. Flat, Round, and Hoop, no change.

HONG KONG.—The demand for Raw Cotton has continued moderate, and we note a further decline of about $1 per picul in values of Indian staple, though more firmness has been latterly shown by holders, owing to slightly improved inquiry. Yarn has been almost entirely neglected, but as quite large parcels are in course of shipment to Yokohama, we may see a change for the better ere long. Piece Goods: Stocks have been increased by the arrival of the Red Deer from London, and sales of portions of her cargo have been made, on rather easier terms for Grey Shirtings, and fully former rates for T-Cloths. Other descriptions are not inquired for. Woollens: Small transactions are reported at slightly better rates. Metals: Nail-iron Iron is in request at last quotations. Large purchases of Tin have been made for shipment to America at $21.50 to 22, the sellers being agents of the Japanese Government, which, some time back, purchased large quantities of this article. Lead and Quicksilver are firm. Coal is unchanged.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—After the arrival of the French mail the demand became more general, and the reports of an improved New York market having been confirmed by the Great Republic, business probably would have been larger, were it not that holders advanced rates, showing a loss on latest quotations. Settlements since the 9th of September, however, reach about 5,000 piculs, and in some instances an advance on last month's prices have been paid. Supplies have come to hand but sparingly owing to unfavourable weather. The latest quotations were:—Good common, $20 to 23; Medium, $24 to 26; Good Medium, $27 to 29; Fine $30 to 35.

SHANGHAI.—Black Teas: The market for these has been taken possession of by one house, which by raising prices 1½ to 2 taels has kept out all competitors. Its transactions consist of about 3 000 chests, all Ningchows, at taels 20½ to 22½ (1s. 2½d to 1s. 4½d.); the only outside purchase being one chop Hohow at 16½ (1s. 0d.) The stock is reduced to 26,000 chests. The market remains firm. Green Teas: The first shipment of these overland to New York; the Costa Rica has taken nearly 3.000 packages. Business has been active, and prices have continuously advanced, the settlements comprising 12,000 half-chests Moyune at taels 36 to 42, 5,000 half-chests Fychow at taels 27 to 36, 6.000 half-chests Teenkai at taels 39½ to 42, and 1,200 half-chests Pingsuey at taels 32 and 32½. The stock contains 25,000 packages. The Ensign and Etha Rickmers have been chartered for New York. The market closes very firm.

FOOCHOW.—Only a moderate business has been done in Congous since despatch of the mail, but prices have been fully up to those of last settlements. Most of the buyers for England are awaiting the arrival of the London mail of August 26th, with telegraphic advices respecting prices obtained for first arrivals. About 4,000 more packages of Oolongs have been taken for America. No change in prices can yet be quoted, but as the excitement attending the opening of the market has subsided, a downward tendency is manifest. Stock amounts to about 15,000 half-chests. Scented teas have been neglected. The Warren Hastings, for New York, gets £3 per ton 40 cubic feet. The Finzel (engaged full) and Laurel are loading for London at £3 10s. per ton of 50 cubic feet.

AMOY.—Of Oolong about 9,000 half-chests have arrived, and 6,500 have found buyers, at, on the whole, somewhat easier prices. The stock of about 3.500 half-chests consists mainly of indifferent qualities. In Congous a small business has taken place at previous prices, about 1,100 half-chests having been settled.

CANTON.—Very little business has been transacted on this market. The only noticeable feature has been the arrival of six more chops or part-chops of Country Congous, making stock 9 chops. One small chop has been taken during the interval at 21 taels for the Bombay market. Country Greens: There is no change to report. Canton-made Teas: In Canton district Congous we have no settlements to report. About 4,000 boxes Scented Orange Pekoe have been taken at from 21½ to 33½ taels, and 3.500 boxes Scented Capers at from 12½ to 25 taels. These purchases are chiefly of the finest to choice parcels, and are well made and scented.

SILK.

YOKOHAMA.—Raw Silk has been in moderate but steady demand since the despatch of last mail, and with a continued low rate of exchange, prices have been well supported. An upward tendency even was becoming manifest, but on the arrival of the French mail, with unfavourable advices from home markets, this was checked. Settlements have been about 450 bales, and stock is estimated at about 1,000 piculs—principally Hank Silks

SHANGHAI.—During the early portion of the interval elapsed since the departure of the last English mail the Silk market are very quiet, buyers being unwilling to continue purchasing at previous rates, while holders were not disposed to make any material reductions. Subsequently however the latter have given way, and the decline has been established of, in some instances, as much as taels 30 to 40 per picul. The arrivals have not been large and the stock is estimated at 3,500 to 4,000 bales; the proportion of the better classes of Silk coming forward is small and prices for these descriptions are in consequence better maintained. Settlements amount to 2,300 bales, of which 500 bales are Japans. We quote No. 3 Tsatlees, taels 470 to 515. No. 1 Taysaams, taels 420 to 450.

CANTON.—The market continues remarkably quiet, very little desire being shown by purchasers to operate unless at materially reduced prices. Silkmen are anxious to place their stocks, but decline to meet the views of buyers. One settlement of 70 bales Tsatlees has been made by an American house at $535 to 580. This lot we understand is made up of two or three parcels, and cannot all be considered of best quality. Nothing has been done in rereeled Cumchook, and prices may be quoted down $5, say for strictly No. 1, $575 to 590. Small purchases of Loong Kongs and Kow Kongs have been made at about previous quotations for Bombay.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports remain firm at previous quotations and tonnage continues scarce. Coal freights from the Northern outports are well supported at, in some instances, enhanced rates.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £47. For Singapore: £34. For Shanghai: £56. For Saigon: £50. For Yokohama: £54. For Batavia: £32. For Colombo, £30. For Galle, £34. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 5s. For Singapore: £1 12s. 6d. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 12s. 6d. For Chefoo, £2 15s. For Trincomalee, £1 17s. For Galle, £1 12s. For Colombo, £1 9s. For Manila, £1 15s. For Batavia, £1 10s.

The Admiralty have invited tenders for the conveyance of 20 tons (meast.) hospital bedding from the Thames to Colombo.

CASUALTIES.

The Cape City, Bowden, from Colombo for London, arrived at Scilly Nov. 25, with loss of jibboom, fore topgallant mast and other damage, having been in collision on the night of the 16th.

Accounts from Batavia dated Oct. 14 state that the Quintet, Slyboom, bound to Amsterdam, would be discharged and condemned.

The Johanna (Dutch brig), Ouwehand, from Amsterdam to Macassar, put in at Lisbon, Nov. 30, with damage to hull and spars, having been in collision with a steamer, the vessel now placed in quarantine.

COMMERCIAL POSTSCRIPT.

A meeting of the shareholders of the China Steam Ship and Labuan Coal Company has been held this day, for the purpose of making arrangements for the purchase of the company's property ordered to be sold by the court. The result arrived at has not been made public up to the time of our going to press.

ARRIVALS NOT IN THE TABLES.—Nov. 22, at New York, from Yokohama, Havelock; Dec. 4, at Queenstown, from Rangoon, City of Richmond.

DEPARTURES.—Dec. 2, from Penarth Dock, for Singapore, Erasmus.

LAID-ON.—At Glasgow, for Singapore and Penang, Albion.

SPOKEN.—Robert, Liverpool to Galle, Sept. 19, 27 S., 27 W.; Canton, Cardiff to Hong Kong, Nov. 6, 19 N., 25 W.; Macassar, Liverpool to Batavia, Nov. 1, 8 N., 25 W.

CASUALTIES.—The Queen's Own, from Shields to Singapore, arrived at St. Helens, Dec. 2, with loss of maintopsailyard. The Karel August (brig), from Rotterdam to Padang, has been towed into the Helvoet Canal, having slipped from her anchors in the roads.

The Spirit of the Age, arrived in the Downs from Colombo, has been supplied with two anchors and chains in lieu of others lost.

MISCELLANEOUS.—The following vessels from China are now overdue:—Mary Whitridge, Amadine, Silver Eagle, Niphon, Peter Denny, Sovereign of India, Caldew, Hoang Ho, Alma, Star of China, and Coulnakyle.

ARRIVAL OF THE BROTHER OF THE SHIOGOON.—The Japanese Prince Mimboutayou and suite left Calais on the 2nd inst., and after a rough passage across the Channel arrived at Dover. He was received on landing by Major-General Ellice, C.B.; Captain Clayton, Aide-de-Camp; Colonel Cox, C.B., Adjutant-General; Mr. J. G. Churchward, the Mayor of Dover; and Mr. J. P. Knight, superintendent of the South-Eastern Railway, after which the Prince and guests landed and proceeded in carriages to the Lord Warden, where an address from the mayor and corporation of Dover was presented and read by the town clerk, in the presence of the members of the corporation, General Ellice, and the military authorities, and several ladies and gentlemen. A guard of honour of the 51st regiment, in command of Captain Chatfield, was drawn up at the railway station, and under the arrangements of Mr. Knight, the party proceeded in the royal carriages to London, the guard presenting arms, and the band playing the National Anthem. The Prince's suite consists of Moukoyama Haiato-no-Kami, Minister Plenipotentiary of the Shiogoon, and of other Japanese officers of high rank. He is accompanied by M. von Siebold, one of the interpreters of Her Majesty's mission in Japan, and Major Edwards, of the Royal Engineers, has been appointed to attend on his Royal Highness, and to make arrangements for his movements. On the evening of the 3rd inst. the Prince visited both Houses of Parliament. In the Lords he occupied a seat in the side gallery, and in the Commons the place of honour in the Diplomatic gallery. He appears quite a youth, is of low stature and spare frame, has a long oval face, the forehead made as high as possible by the curtailment of his hair nearly up to the crown of his head, and about the temples. He wore what may be presumed to be the national costume, which was rather sombre than gay. He was attended by eight Japanese, armed in the manner of their country, and three European gentlemen, one of whom acted as interpreter in an interview between his Highness and Lord Stanley in the Commons gallery, in the course of which elaborate courtesies appeared to be exchanged. On the afternoon of the 4th inst. Prince Mimboutayou visited Her Majesty the Queen, at Windsor Castle. His Highness, attended by Moukoyama, Harato-no-Kami, Minister Plenipotentiary of the Shiogoon, and other Japanese officers, Major Edwards, &c., drove to the Paddington Station of the Great Western Railway, whence they proceeded in a saloon attached to the fast train for Slough. Mr. Alfred Higgins, divisional superintendent, was in attendance. Lord Stanley accompanied the Prince from London, and upon the arrival of the train at Windsor, his Highness was received by a guard of honour consisting of 100 men of the 1st Battalion Grenadier Guards, with the drums and fifes and Queen's colours, commanded by Colonel Clive; Captain W. H. P. Carrington and Lieutenant Thornton being present on duty. Two of the Queen's carriages sent from the Royal mews, and drawn by four bays, with an outrider, were in readiness at the station, and as the Prince arrived the guard presented arms, the band playing. Colonel Du Plat, Equerry to the Queen, in his official uniform, received the Prince, and, with Lord Stanley, accompanied him to the Castle. Her Majesty and the Royal Family, surrounded by the ladies and gentlemen of the Court, received Prince Mimboutayou in the White Drawing-room of the Palace, and after an audience of some duration the Prince retired and drove back to the station, where a large number of spectators had assembled, attracted by the presence of the guard of honour. In the meantime preparations had been made for the departure of the Prince, under the supervision of Mr. A. Higgins, aided by Mr. H. Simmons, the station agent. A space in front of the Queen's waiting room was railed off, and the platform carpeted, while four tall guardsmen were placed opposite the entrance. His Highness and suite were in rich Japanese costume, and carried the now well-known swords. The Prince was received by the same guard of honour, the troops once more presenting arms as the train took its departure from the Great Western Station at 3.50 P.M. *en route* for Paddington.

LONDON: THURSDAY, DEC. 5, 1867.

THE NEW POSTAL CONTRACT.

THE debate in the House of Commons on the 29th ult. on the subject of the new contract just concluded with the P. and O. Company, reported in another column, has elicited a general condemnation of the terms, in so far as the stipulations by which the Government is liable—in the event of the company not making a return equal to a six per cent. dividend to its shareholders—to supplement their contract price of £400,000 per annum with the deficit, such sum however not in any case to exceed £100,000, or say £500,000 in all. This expression of opinion was first made—at least in print—by ourselves, and the very emphatic confirmation by the members of the House, who styled it a partnership, is satisfactory. The truth is that Mr. SCUDAMORE thought he had accomplished a clever compromise between £400,000 and £500,000; but, as already stated, we entirely dissent from that view. We should like however to have seen Mr. CRAWFORD and Mr. WHITE and others who have the best knowledge of the subject taking part in the debate, for among the speakers none were really masters of the subject. Another point which speakers agreed to condemn was the contract rate of speed, viz., 10 knots on this side of Suez and 9½ on the other; but on this head they were evidently all at sea, for an increased speed had the most careful attention at the hands of the Government, and they soon found that it involved a further serious outlay, which they could not entertain. The statement that the company would find it to their interest to incur the penalty of £50, for every twelve hours overdue in order to save coal, may be dismissed without much discussion, as all practical persons who have travelled in the company's vessels are aware of the fallacy of such a proceeding. We have known cases where the best vessels of the company have had a difficulty in consuming the contract time but that they wilfully delayed their vessels beyond the contract time, is fully denied in the schedule which has been kept by the Post-office of the working of the service. It is also on record that the company have as a rule treated all suggestions from the Post-office with a liberal spirit, and we quite expect that in this new service they will make every effort to anticipate their due dates, more especially as they now see that the public are dissatisfied with the Government for contracting at the very moderate speed of 10 and 9½ knots. We quite agree with Mr. AYRTON that it is impossible for Mr. SCUDAMORE, or any other person not in the company's service, to form a competent opinion as to its real position in regard to profits or dividends earned, and the settlement arrived at will lead to very unsatisfactory disputes, which must sooner or later end in a compromise by which the Government will be relieved from its present anomalous position. The concluding part of Mr. HUNT'S speech is certainly unique: "He hoped that the House would not think "that the Government had shown in this matter such dense "stupidity as had been attributed to them." We must notice the remarks of Mr. CAVE on the prospects of the American route *via* New York and Panama, reducing the time to China to some seven days less than by our overland route through Egypt, as such is entirely fallacious. When the railway, to which he alluded, is completed between New York and San Francisco the journey will stand thus—

	Days.
London to New York via Liverpool	10
Transfer at New York	1
New York to San Francisco by rail and transfer to steamer	10
San Francisco to Yokohama	18
Coaling, &c., at do.	1
Yokohama to Hong Kong	6
	46

while the time occupied by the P. and O. Company to Hong Kong is from 40 to 45 days, according to the monsoon in the China Sea. As we have already indicated, honourable members picked up some information on the matter, but its utility may be compared to a look without the key.

IN consequence of the increase in the subsidy paid to the P. and O. Company, the postage to China and all parts east of Ceylon will remain at the present rate of 1s. per half ounce *via* Southampton, and 1s. 4d. *via* Marseilles. Our readers will remember that this rate was established in 1862, when the Government contemplated a withdrawal of one of the semi-monthly mail services. The China merchants who formed the deputation to Mr. GLADSTONE, then Chancellor of the Exchequer, agreed to the increase of 6d. as a compromise, but it was considered to be only a temporary measure, and that on the conclusion of the current contract the rate would again fall to the level of the Indian scale. Having taken an active part in the affair, we have called the attention of the Postal authorities to it, and have received a reply that no alteration can be made in the rate.

THE alteration in the P. and O. Company's service, which commences in February next, from the 10th and 26th of the month to every alternate Friday, has, we understand, given a fresh impetus to the negotiations between the Messageries Impériales and the French Government in reference to the extension of their service to India and China from once to twice per month. Should such an arrangement be arrived at, we understand the service will be arranged so as to fall between the despatches of the P. and O. Company.

THE assurance we lately gave our readers that the reports current relative to a proposed increased duty on tea were without foundation has been amply verified. Mr. DISRAELI is too good a financier to allow the fiscal arrangements of the country to be interfered with by the Abyssinian expedition, and the cost will, as we anticipated, be defrayed by an addition to the existing income-tax of one penny.

THE P. AND O. COMPANY'S REPORT.

The directors now consist of—Arthur Anderson, Esq., chairman, Patrick Douglas Hadow, Esq., deputy chairman, James Allan, Esq., Henry Bayley, Esq., William Fane de Salis, Esq., Joseph C. Ewart, Esq., Rear-Admiral Sir W. H. Hall, K.C.B., George Carleton L'Estrange, Esq., Edward Thornton, Esq., C.B., T. M. Weguelin, Esq., M.P. The Count de Torre Diaz has resigned owing to his frequent absence from this country. The 27th annual report, to be presented to the shareholders at the meeting on the 6th instant, is the most important issue the directors have ever made. In addition to the details connected with the past year, ending 30th September, which explain how the operations of the company have left a loss of £177,047 without providing any dividend, the directors have issued an appendix to the report showing the negotiations between the company and the Government for the conclusion of the new contract, to commence on the 1st February, and which has been fully described in our last two issues. The whole of this negotiation is creditable to the directors and officers of the company, and we are at a loss to account for the grumbling of some shareholders who express themselves dissatisfied with the management of the company's affairs. If these gentlemen could only change places, perhaps they would be better satisfied, but all experience goes to show that a dissatisfied shareholder when put in office invariably produces a much worse result. That mistakes have been made in some of the company's contracts for steamers we are quite aware, but they were made in good faith, with a view to economise fuel; and no concern is conducted without similar errors. The general management of the company for working the mail contracts, in having on nearly every occasion of mishap, a vessel to take the place of the broken-down steamer, is a most essential point, and a very difficult one to accomplish without actually incurring the expense of idle steamers at different ports.

The only useful addition we have to make in reference to the new service is the following, showing at a glance the various routes:—

No. 1.—*Once a Week.*

From Southampton to Alexandria, calling at Gibraltar and Malta, and back from Alexandria to Southampton, calling at Malta and Gibraltar.

Distance 2,951 miles. The service to be performed once each way in every week in 295 hours, exclusive of stoppages, the duration of which will be fixed by the Postmaster-General.

No. 2.—*Once a Week.*

From Marseilles to Alexandria, *via* Messina, and back from Alexandria to Marseilles.

Distance 1,410 miles. The service to be performed once each way in every week in 141 hours.

Digitized by Google

No. 3.—*Once a Week.*

From Suez to Bombay, and back from Bombay to Suez, calling on both voyages at Aden.

Distance 2,972 miles. The service to be performed once each way in every week in 313 hours, exclusive of the stoppage at Aden, the duration of which will be fixed by the Postmaster-General.

No. 4.—*Once every Two Weeks.*

From Suez to Calcutta, calling at Aden, Point de Galle, and Madras, and back from Calcutta to Suez, calling at Madras, Point de Galle, and Aden.

Distance 4,757 miles. The service to be performed once each way in every alternate week in 501 hours, exclusive of stoppages, the duration of which will be fixed by the Postmaster-General.

No. 5.—*Once in every Two Weeks.*

From Bombay to Hong Kong, calling at Point de Galle and Singapore, and back from Hong Kong to Bombay, calling at Singapore and Point de Galle.

Distance 3,852 miles. The service to be performed once each way in every alternate week in 406 hours, exclusive of stoppages, the duration of which will be fixed by the Postmaster-General.

No. 6.—*Once in every Two Weeks.*

From Hong Kong to Shanghai, and back from Shanghai to Hong Kong.

Distance 870 miles. The service to be performed once each way in every alternate week in 92 hours.

No. 7.—*Once in every Two Weeks.*

From Shanghai to Yokohama, and back from Yokohama to Shanghai, calling on both voyages at Nagasaki.

Distance 1,120 miles. The service to be performed once each way in every alternate week in 118 hours, exclusive of the stoppage at Nagasaki, the duration of which will be fixed by the Postmaster-General.

Note.—During the prevalence of the south-west monsoon, 96 hours additional will be allowed for the voyages from Bombay to Suez, from Calcutta to Suez, and from Hong Kong to Bombay, and during the prevalence of the north-east monsoon, 96 hours additional will be allowed for the voyage from Bombay to Hong Kong.

THE DIRECTORS' REPORT.

The report of the directors to the annual meeting on the 6th instant has been issued. The company's fleet consists of 49 steamers, 9 tugs, and 12 storeships. The capital account shows that the company stood possessed on the 30th September last of stock in ships, after the deduction of the amount for depreciation, £3,001,149 17s. 2d.; also of freehold and leasehold property in England, and docks and premises at Calcutta, Bombay, Hong Kong, Singapore, and other stations, £319,440 16s. 4d.; and stock of coals, naval and victualling stores, amounting to £515,491 3s. 9d.; also cash at bankers, bills receivable, balances in agents' hands, and debts due to the company, £406,662 15s. 1d.; making the total assets £4,242,744 12s. 4d.; that the capital received from the proprietors at that date amounted to £2,579,835; and that there had been received on debentures £726,600; making the total capital £3,306,435; that the liabilities of the company, in bills payable and otherwise, amounted to £646,110 10s. 9d.; making the total capital and liabilities, £3,952,455 10s. 9d.; and showing a surplus of £290,199 1s. 7d. This surplus is represented by the balance at the credit of the general reserve fund. The revenue account shows that the expenditure and charges on revenue, including interest on debentures, the reserves for insurance and depreciation, and the outlay for wear and tear, and renewal of ships for the same period, amounted to £2,261,440 16s. 4d.; that the gross revenue or income of the company, from freight, passage money, postal service contracts, and other sources (including balance of profits undivided last year, £4,083 2s. 6d.), amounted, for the twelve months ending 30th September last, to £2,084,393 14s.; leaving a deficiency of £177,047 2s. 4d. The proprietors' underwriting account shows that the annual premium of 5 per cent. on the estimated value of the floating property of the company, covering ordinary sea risks, and credited to this account, for the year ending 30th September, 1867, is £115 000; deduct value of steam ship *Singapore*, wrecked near Hakodadi, 20th August, 1867 (less depreciation), £34,300; also damage to the steam ship *Surat*, grounded in the Red Sea, estimated at £20,000 (together £54,300); leaving to be carried to the general reserve fund, £60,700. The general reserve fund.—In the last annual account this fund amounted to £459,014 12s. 10d.; and balance of underwriting account, £60,700; making, £519,714 12s. 10d. Deduct.—Deficiency on the revenue account for the past year, £177,047 2s. 4d.; also balance at the cost of the following ships sold—viz., Nemesis, £41,500; Nepaul, £8,799 3s. 6d.; Pekin, £2,169 5s. 5d. (£52,468. 8s. 11d.); and there remains, £290,199 1s. 7d.

Since the date of the half-yearly report, the *Mooltan*, *China*, and *Columbian* have been despatched to the East, to reinforce the company's fleet in that quarter. The *Mooltan* was ordered direct from Southampton to Suez, for the purpose of conveying, as an extra ship, to Galle and Calcutta, a portion of the large number of passengers proceeding to India and China, in the middle of October. By this arrangement the company secured 147 first, and 38 second-class passengers, in addition to the full complement by the ordinary steamers. The new ship *Sumatra* has performed her first voyage in the Mediterranean service with great success; and the *Poonah* having received her new engines and boilers, as referred to in the last report, left Southampton for her first trip to Alexandria on the 12th November.

Two vessels have disappeared from the list, the *Nepaul*, which has been sold in Japan, and the *Singapore*, wrecked in the Japanese waters. The loss of the *Singapore* appears, from the information at present in the hands of the board, to be one of those misfortunes to which vessels employed in the navigation of imperfectly surveyed seas must be considered liable. The *Surat*, which left Suez with the passengers, mails, and cargo, on 4th September, run upon a reef in the Gulf of Suez, at about 1.30 on the following morning. The passengers, mails, and a part of the cargo were transferred to another of the company's steamers, the *Nubia*, as soon as practicable; but the attempts to float the *Surat* were not successful until the 14th, and the weather having been very rough at intervals, the ship was subjected to an amount of striking on the rocks, which none but a vessel of the soundest and most faithful construction could have withstood. The details of these two unfortunate events fully prove that the safety of every life in the *Singapore* was due to the number and high efficiency of her boats, and that the rescue of the *Surat* must be attributed to the great strength of the ship, and the abundance and power of the appliances at command, in pumps and otherwise, to meet an emergency. The proprietors will bear in mind that these results can only be attained at considerable expenditure, and that such expenditure is true economy in the end. The China mail just delivered has brought reports relative to the typhoon which raged in the neighbourhood of Hong Kong on the 1st of October. Two of the company's ships, the *Cadiz* and the *Niphon*, were exposed to it, and for some hours were in great peril, but escaped with the loss of some boats, sails, anchors, and chains.

As soon as the Government had decided on despatching a body of troops to Abyssinia, application was made to the directors relative to supplies of coals from the company's depots to the ships employed in that service, and at the present time they are under engagement to furnish upwards of 70,000 tons of coal, at Bombay, Aden, Suez, and Alexandria. The possession of stocks at these places enabled the company's agents to commence the delivery of coals to the Government transports before the period at which special shipments from this country could possibly have reached the ports at which the fuel was required; and this, and the other facilities afforded—especially at the company's establishment at Aden, whence large supplies of water, produced by their powerful condenser, have been drawn—will add another case to those already on record, in which the means at the command of the company have proved of great national value in times of emergency. Six of the company's steam ships and one steam tug, have also been chartered by the Indian Government for the purposes of this expedition. The quantity of coals mentioned above is additional to that which the directors have undertaken to supply to the large Government transports now engaged in the conveyance of troops to and from India *via* Egypt.

The directors had the satisfaction to announce, on the 14th ult., "That the terms of a contract for a lengthened period for the new and increased mail services to and from India, China, and Japan, had been agreed upon with the Government, and that the contract would be submitted to Parliament for approval during the present special session." The directors look with confidence for the approval by the proprietors of the course they have adopted in consenting to a form of contract which, although involving a reduction of the sum first required, almost guarantees a moderate dividend for a number of years. The last six months has been to them a period of unprecedented labour and anxiety, and for a time the aspect of affairs was anything but promising, as those who watched the proceedings in Parliament must have observed. There is one feature of the new arrangement which will probably be regarded as satisfactory, namely, the supervision of the company's books and accounts by a Government officer.

The proprietors' underwriting account was at the close of the financial year in a position which requires some explanation. The shareholders generally need not be reminded that the company does not insure its ships, and that consequently when a loss occurs that loss falls upon its funds, and not upon assurance offices or underwriters. An account under the above title has, however, been kept, in which the proprietors have been dealt with as underwriters, and from which they have in prosperous years received a payment. This payment must, however, depend on two things—first, the absence of important casualties; and secondly, a sufficiency of revenue from the ordinary business of the company to bear the deduction of the sum charged for insurance, and afterwards carried to the credit of the underwriting account.

The revenue for the last year is insufficient to support the charge of insurance, namely, £115,000; it has, nevertheless, been necessary for the uniform keeping of the company's accounts to charge it as usual, and to carry it to the credit of the proprietors' underwriting account, which, after deducting the value of the *Singapore* (£34,300), and the estimated cost of the repairs of the *Surat* (£20,000), exhibits a balance of £60,700. This amount has been carried to the credit of the general reserve fund, and diminishes by so much the drain on that fund which the unfavourable operations of the year have created.

Although the considerations which caused the directors to apply for a supplemental charter towards the close of the Parliamentary session of 1866, and to issue the new shares created under its authority as soon as it was granted, were fully set forth in the last two reports, it may be well to repeat that both measures were of vital importance. The tender for the new mail services could not have been made, and the new contract could not have been entered into without the command of the additional capital so secured. The total amount of capital paid at the end of the financial year was £2,579,835, and the amount borrowed on debentures was £726,600. Since that date the balance of the debentures—namely, £73,400, has been issued.

The operations of the past financial year have, unfortunately, produced a result which not only precludes the directors from recommending any dividend, but shows a considerable loss. This loss, however, arises mainly on the business of the first six months of the year, and this fact, apart from the altered prospects of the company under the new contract, is so far satisfactory. The total loss for the year, after charging insurance and depreciation, is £177,047 2s. 4d., so that the adverse movement has been to a great degree arrested since the last meeting. The increase in the price of labour, the advance in the cost of coals and stores of all kinds, and the onerous effect of the mail contract, brought about a very large increase of expenditure; while the "stagnation of trade with the East," the active competition of the French and other companies, and the cessation of the export of specie, had simultaneously caused an important decrease of receipts. The directors believe that few among the proprietors will be found ready to cast blame upon them for a state of affairs induced by events over which they had no control, and for which they were entirely irresponsible. The board can only assure the whole body of proprietors that no effort on their part was wanting to mitigate the severity of the crisis through which the company has passed.

The approaching termination of the contracts, which although taken in 1853 and 1854 for seven years, have endured, with modifications and extensions, for fourteen, suggests some explanations which are specially called for by the events of the last year of their existence. Shortly after the execution of those agreements the outbreak of the Crimean war, and

Digitized by Google

other events of a public character, created an increase in the cost of coals, and of expenses generally, which compelled the company to appeal to the Government for relief. No dividend could be paid for the first half-year of 1854, and there was every prospect of an abandonment of the contracts by the company, but about this time a most valuable source of revenue sprang up, which not only counteracted the unexpected increase of expense in working the contracts, but which from that time to the autumn of 1866, enabled the directors to continue them. That source of revenue was the export of specie, the freight on which averaged above £220,000 per annum for many years. Had it ceased during any one of those years, as it has ceased during 1866-7, the result would have been the same; there would have been no dividend. But were the directors wrong to carry on the contracts while it lasted, or could they foresee the cessation of this source of revenue? Could they have appealed to the Government so long as the company's business yielded a profit and the proprietors received a fair dividend, although that profit and dividend were traceable to a particular source? In conclusion, the directors will only express a hope that the anticipation contained in the report of Mr. Scudamore, that under the new contract the Government "will, as a rule, share profit with the company," may be realised. In that case the proprietors will have abundant reason for satisfaction, and the public will feel that a most important service has been secured to them on favourable terms.

PARLIAMENT.

—o—

HOUSE OF COMMONS.

INDIA, CHINA, AND JAPAN MAIL SERVICE.

(Nov. 29th.) Mr. HUNT (Secretary to Treasury), in moving that the contract entered into for the conveyance of mails to India, China and Japan with the Peninsular and Oriental Steam Navigation Company be approved, said the last time this question was before the House it was suggested by his hon. friend the member for the Tower Hamlets that it would be undesirable that the new contract should commence before the House had an opportunity of expressing an opinion upon it. And that opinion being shared by a great many members, he undertook on the part of the Government to make some temporary arrangements which would obviate the necessity for a new contract commencing before the House had expressed its opinion. Within a very short time, however, after the prorogation Her Majesty's Government determined that it would be right to call Parliament together late in the autumn, or at the beginning of winter, and in consequence of that determination it became no longer necessary for the Government to make such provisional arrangements for the service as had been contemplated. When the tenders advertised for were sent to the Post-office we found that practically we had only one offer. It will be remembered that the service was advertised for in separate sections. It was proposed that companies or individuals might offer for different lines of service, and might offer for one service one week and for another another week, but it turned out that, with one very small exception, the only tender made was by the Peninsular and Oriental route. An Italian company offered to perform the service from Brindisi to Alexandria; but there was no offer from anybody else to perform the rest of the service, even if that proposal were accepted. The Government asked for that tender as an alternative arrangement, from Marseilles, thinking it quite possible by the time that the tenders came in that they might avail themselves of the Brindisi route; and Her Majesty's Government were advised that before the completion of the term for which they had entered into arrangements with the Peninsular and Oriental Company the Brindisi route might become available. And therefore in the articles of agreement which had been entered into it was stipulated that the Government should have the option of changing the route from Marseilles to Brindisi, the difference in the terms payable to the company under the altered circumstances being referable to arbitration. The terms asked by the Peninsular and Oriental Company for performing the service were £500,000, and the term named was six years. It was thought, however, that the company might be willing to abate a portion of their demand provided the Government entered into an agreement with them for a longer term. As detailed in the Parliamentary papers, the arrangement with the company was conducted on the part of the Post-office by Mr. Scudamore; the company submitted their books to him, and he made a report which the House, no doubt, would recognise as a very able document. (Hear, hear.) After this examination the company expressed themselves willing to reduce their terms from £500,000 to £400,000, provided the period was extended from six to twelve years; but they accompanied the abatement with a proviso that their shareholders should be guaranteed a dividend of six per cent. upon a certain stated capital. On the other hand, they expressed their readiness to allow the Government to share to the extent of one-fourth in all the profits beyond 8 per cent., which might become divisible. After a great deal of consideration given to these further terms the Government adopted them, with this condition, to which the company assented, that the guarantee of 6 per cent. should in no case render the Government liable to pay a greater sum than £500,000, the original amount asked. The company also agreed to a condition desired by the Admiralty, that the Government should have power to buy or charter their vessels in cases of exigency for the public service. Mr. Scudamore's calculations were given in the documents which had been published, and, taking into account the history of this company, he thought it much more likely that the Government would be invited to share in profits than to contribute to make good a loss. The Government in the course which they had taken had not been instituting comparisons between different tenders. They had only to make a comparison between alternative propositions of the same company, and they were of opinion that the reduction of the terms from £500,000 to £400,000, even though the reduction might be attended with the contingent liability of a 6 per cent. guarantee, was well purchased by the addition of six years to the term. (Hear.) Of course, the sum now asked was very considerably in advance of what the Government were paying under the contract approaching its termination. The Government were now paying £230,000, whereas hereafter they would have to pay £400,000, with a possibility of that amount being increased to £500,000. But then it must be remembered that the services of the company, and facilities for postal communication with the East, would be very greatly increased. (Hear, hear.) A table included in the correspondence showed the improvement which would be effected in this respect. Calcutta, which now had in the year 24 mails of 34 days and 24 mails of 29 days, would have 52 mails of 29 days; Madras, which now had 48 mails of 30 days, would have 52 mails of 30 days; while Bombay, which now had 24 mails of 24 days, would have 52 mails of 24 days. A comparison of the time to be taken in the voyages was also greatly in favour of the new arrangement. The company further asked that the contract should include not only those services which were advertised for—namely, from this country to Bombay, and by Galle to China and Japan—but also services between Bombay and Galle, and Bombay and Calcutta. These, however, were services which the Government did not think were required for the public service, and accordingly objected to them. The company, however, replied that if these services were struck out of the bargain they should still require the same subsidy without as with them. And under these circumstances the Government thought it better that they should be included, seeing that they entailed no extra payment on the country. The Imperial Government was to pay the company a sum of £181,470, including additional expenses. The receipts from sea postage were £85,815, so that the loss would be about £96,000, the loss being at present £41,000. The Indian Government would pay £117,000, and receive £62,000 for sea postage, making a loss of £54,000. Calculations had been gone into as to what portion of the loss should be borne by Ceylon and what portion by the Mauritius, but the correspondence on this point had not yet been closed. The Post-office suggested that either contributions should be made by those place or the rate of postage be increased. Considering the increased price of coal, the small profit obtained by the company from the contract for some time, and the improved service which would be secured under the new contract, the Government thought the terms they had made were not unreasonable; and he, therefore, hoped that the House would be unanimous in approving the contract. The hon. gentleman concluded by moving that the contract for the conveyance of mails between this country, India, China, and Japan with the Peninsular and Oriental Steam Navigation Company be approved.

Mr. AYRTON objected very much to the House being called on to consider this contract, the general understanding being that Parliament had been called together at this Session for one object only. In 1865 he first gave notice of a motion for a Select Committee to consider the subject of communication between England and Her Majesty's Eastern dominions and China. In 1866 a committee presided over by his hon. friend the member for London, of whose great commercial experience he had been glad to avail himself, sat and took very important evidence. That committee recommended that there should be a direct service between England and Bombay, and that the speed in the Mediterranean should not be less than 11 miles an hour, and that between Suez and Bombay not less than 10. The committee further recommended that there should be a direct service between England and China once a fortnight. It likewise intimated that the contract should be for a considerable number of years, and terminal at two years' notice. The consideration of that report fell into the hands of Her Majesty's present advisers, and to the course taken by them was to be attributed the unfortunate position in which the country now found itself with respect to the postal service. Great changes were being effected in the means of connexion between England and the East. The railway through the Brenner Pass had been opened, and a railway had been completed across Mont Cenis, so that there was a prospect of Brindisi being, at no distant day, made the port of departure for packets carrying English mails to Alexandria. The railway system in India was being developed so as to improve communication between Calcutta, Bombay and Madras. These works were in progress when he took the matter up. He did so because he thought it was time to direct the attention of the Post-office to the necessity of reorganising their system. He did not think they were beginning too soon in considering the question at the period to which he referred; but from what occurred since it appeared that they might as well have begun too late for no benefit had been devived from the labours of the committee. What had brought them into their present pitiable condition? On the 1st of February, 1867, the Government gave notice to the Peninsular and Oriental Company to terminate the contract in twelve months. Now, in business matters commercial men generally matured their plans and completed their arrangements for a new contract before they took steps to put an end to an old one, if a contract was necessary at all. But the Government seemed to have acted on a contrary principle. They had not only given notice to terminate the contract, but to terminate it on the shortest possible notice. At least, they might have given them a longer notice, leaving it to the company to put them into the embarrassing position they now occupied, should the company think fit to adopt that course. It was not for the Government to take steps which would leave the Post office without a mail service if the terms of the company were not accepted. In March the Government settled the form of the new tender, but some difficulty arising on the subject it was not until June that the final notice was published. It was addressed to the shipbuilders and men of business, inviting them to send in by the 16th of September tenders for undertaking this gigantic service by the 1st of February following. Now, he would ask the House whether that was a really practical notice to issue? Was it likely that anyone could supply ships in the Mediterranean, in the Red Sea, and in China, and complete all the consequential arrangements at so early a date? (Hear, hear.) It was absolutely impossible to do so, especially when the state of the money market was taken into consideration. The result was that on the 1st of February no tenders had been sent in, while the Peninsular and Oriental Company were in a position to say to the Government, "You have wantonly put an end to our contract, and we will not enter into another except upon our own terms." In order to extricate themselves from the difficulty in which they were placed, the Government sent Mr. Scudamore, a gentlemen of intelligence connected with the Post-office, to ascertain how much the Government should pay if a contract were made on the conditions which the company might find it convenient to suggest. Mr. Scudamore certainly displayed great ingenuity in discovering reasons why the Government should accede to everything the company proposed, but no fault could be found with him on that account, as he was in a most embarrassing posi-

Digitized by Google

tion, and no doubt acted in accordance with his instructions. He found great fault, however, with the contract which was entered into under these deplorable circumstances. In the first place the rate of speed laid down was not what might fairly be expected, considering the progress made of late years in shipbuilding and steam navigation. The whole service from London to Bombay was to occupy 27 days. The arrangement for the line of the Mediterranean—a distance of 1,410 miles—was that 141 hours should be allowed, being at the rate of ten miles an hour. For the Red Sea section, comprising a d istance of 2.972 miles, 313 hours were allowed, being at the rate of 9½ miles an hour. But, then, the House ought to know that the company were to be allowed the addition of 24 hours to any voyage without incurring any penalty. If any further delay took place, they were liable to pay at the rate of £50 for every 24 hours: but, on the other hand, if the mails were accelerated they were to receive a premium of £25. Thus, it would be seen that the company could retard the mails for 24 hours on payment of £50. Now the company always alleged that the great obstacle in the way of attaining high speed was the enormous consumption of coal required for that purpose, and consequently if the coal cost £3 per ton, as was stated, it would obviously be a pecuniary gain to the company to retard the mails. (Hear.)

Mr. WEGUELIN suggested that the company would have to bear the expense of feeding the passengers during the extra time.

Mr. ARYTON said that might perhaps be so, but there was nothing about that in the contract. At all events, he maintained that the penalty was small as compared with the cost of coal, and that the company would be absolute gainers on the balance of the account. Then, the rates of speed prescribed were not in harmony with the development of steam navigation. His hon. friend the member for Tavistock was examined before the committee to which he had referred, and stated that high speed could not be attained between Bombay and Suez unless a class of vessels were employed of at least 2,500 tons burden; but the Government had done nothing whatever to bring this service up to the present standard. One very serious practical consideration involved was that the acceleration of speed might have rendered it possible to obtain an answer from Bombay within three weeks, whereas the chance of receiving a reply by the fourth mail was left hanging upon three days. It was the more extraordinary that the Government should stipulate for this miserably slow speed of 9½ knots nominally and nine knots really, while they were making great experiments on the Red Sea with transports capable, it was said, of making 14 knots, and before they had ascertained what were the economical results of this speed. The mode of payment proposed was that if the profit exceed eight per cent. on a stipulated capital the company should give the Government one-fourth of the excess, but if they were less than six per cent. the Government should make up the whole difference. Thus the Government would get a small share of a high profit and pay all loss below a considerable dividend. The terms were four to one in favour of the company, which ought, in principle, to have been subject to risks and responsibilities, but which might reduce dividends by extravagance and waste, and that without the Government having any check upon its expenditure. The contract ought to have been a plain one, without such contingencies. Such a contract made the Treasury partners with the company, and he should like to know whether the law advisers of the Crown had been consulted, and whether a recent Act would exempt the Treasury from the consequences of such partnership. The main objection to the contract was the period for which it was to run. If we had attained a high standard of efficiency it might have been wise to bind the company for a term; but when we were told that coal was unprecedentedly high and likely to fall in value, and while the railways in India were undeveloped, to say nothing of Alpine lines and an Italian port, it amounted to a gross dereliction of duty on the part of Government not to have reserved to itself a right to terminate the contract in less than twelve years. It might even prove to be advantageous to pay a heavy penalty for rescinding the contract in the course of a few years, and at least it would have been wise to have reserved the option of doing so. He might have criticised the contract in many minor points of detail, but those he had mentioned were quite sufficient to make the House regret that the Government had agreed to such a deplorable contract.

Mr. NORWOOD had no objection to the Peninsular and Oriental Company being paid a liberal sum for their services, and had no fault to find with the officers of the company for making the best bargain they could, while he deemed it the duty of the Government to protect the taxpayers. The mail service between this country and its Eastern dependencies consisted of three branches—to India, to China, and to Australia. The two first were terminable at twelve months, the last at two years. We had now given the Peninsular and Oriental Company entire command of the two most important services, and it would be impossible in the course of another year for any other company to enter into a fair competition with them for the performance of the third service. The period of the commercial depression last year was a most unfortunate one in which to ask for any competition in this matter, The prudent thing to have done would have been so to arrange that the contracts for the three services should terminate at the same time; but if this contract were entered into, the Peninsular and Oriental Company would acquire such a hold upon the carrying trade of the East that it would be impossible that any new company should compete for the Australian service. (Hear, hear.) With regard to the term proposed, 12 years was much too long. The attention now paid to the economical consumption of fuel justified the belief that an important saving would before long be effected in that respect; and it was preposterous to imagine that for so long a term they would not be able to maintain at less cost than at present an increased rate of speed. A speed of 10 or 11 knots an hour was perfectly inadequate to the requirements of such a service as this. (Hear, hear.) Then as to the terms of payment, it was to be remembered that the £400,000 a year *minimum* was not for the entire service; it was only for the services to India and China; so that in the course of another year another sum would be wanted for the Australian service. He objected to the partnership arrangement proposed between the Government and the company. The profits of steamships arose as much from economy and good management as from high rates of freight; and it was known to every mercantile man that the effect of the long enjoyment by this company of a monopoly had shown itself in a less rigid economy than would have been maintained in their service had they been dependent on ordinary mercantile business. Look at the one-sidedness of the arrangement. This country might be called upon to pay 3½ per cent., to be divided among the shareholders. On the other hand, if the speculation were an extremely good one, and the company divided nine per cent., the country would only receive £6,000 a year as their share of profits, and £12,000 if the company paid ten per cent. He objected to the partnership altogether. As between individual partners there might be sufficient supervision and control; but what control was to be exercised on the part of the State in this case? The cleverest accountant might have access to every book and every document belonging to a steam packet company, but it would be impossible for him to give an opinion that would be worth having upon the economy of management, unless he went to the outports and examined details there. On the whole, as a business man, he thought the contract injudicious and unbusiness-like, and he would support any resolution which condemned it. (Hear, hear.)

Mr. SAMUDA said that there were two conditions in this contract which he would like to see altered. He should like it to have been free from the partnership clause, which, in his opinion, would not work well (hear, hear); and provision should have been made for an increase of speed ultimately, if not immediately. (Hear, hear.) The rate of speed for which the contract provided was a low one. He still held strongly to the opinion he had expressed before the committee, that there would be no difficulty in increasing the rate of speed on these lines from ten knots an hour upon the European side and 9½ on the Indian side by at least a knot, and possibly a knot and a half an hour. In so important a contract as this it would clearly have been wise to introduce a condition giving the public the advantage of an increased speed. But he begged to remind his hon. friend and the House that one effect of such regulations would be a very large additional outlay on the part of the company. He pointed out in his evidence before the committee that the increase of speed to 12 knots on the Mediterranean and 11 knots on the Indian side would involve in the item of coal alone an additional expenditure of £40,000, that vessels generally of 2,500 tons burden would have to be provided if that increase of speed were at once demanded, and that the disbursement of capital for vessels which the company did not now possess would be represented by a sum of between £500,000 and £600,000. (Hear, hear.) But a totally different state of things existed now from what they all believed to exist when he gave his evidence before the committee. At that time, he believed, and he was quite certain the Peninsular and Oriental Company believed, that they were in a flourishing condition and capable of paying a large dividend. It was only then beginning to experience the effects of French competition, and it took him greatly by surprise to hear of the altered position of the company. There was, therefore, this mitigating circumstance, which should not be overlooked, that though the Government were driven into a corner by having no one except the Peninsular and Oriental Company to deal with, they knew the position of the company to have been such that with their present amount of subsidy they would not be able to get a return for their capital. There was in this fact, therefore, a fair starting point for a new arrangement. It had been mentioned in the contract, and he had seen it stated in the public press, that it was proposed to give the Peninsular and Oriental Company a subsidy of £400,000 in lieu of £230,000. But it was a mistake to suppose that the increased subsidy was given for the same service. The £400 000 was given for a much larger amount of service, and the extra mileage alone would be represented by a sum of £80,000, so that the difference would really amount to only about £90,000. There was another point also to which he wished to call attention. During the discussion last year, when reference was made to the financial state of the company, it appeared that after paying the working expenses there was nothing left in the shape of dividend. But that did not represent the real state to which the company had been reduced, because with a laudable desire to make their position as little damaging as they could, in the hope that future years would retrieve it, and because they had an opportunity of very effectually repairing their stock, he was informed that no charge whatever was made for depreciation of stock, which would have been represented by a sum of £75,000 if it had found its way into the account. Therefore, if the same state of things existed next year which did exist in this, out of the £400,000 the company would have had only £15,000 for dividend for their shareholders. He did not think, then, that either the Government could be said to have been careless in what they had done, or the company to have taken an unfair advantage. Now, £400,000 was by no means an excessive subsidy for the work that was to be done. It was not excessive whether if looked at from the point of view of the probable amount above expenditure, or if considered with reference to mileage. It would represent only about 6s. 1d. per mile that was run, which was a low rate compared with what was paid to other companies. He quite agreed with those who held that the partnership clause was open to objection. and wherever he had seen it tried it turned out ill. It was tried in the West India Docks, and there it was found that because the directors were not allowed to increase their dividend beyond a certain amount they were always incurring some unnecessary expenditure. But more than that, it had this great disadvantage, that it prevented the Government from acquiring useful information which at the end of twelve years might be rendered available with regard to any future contract. There was one suggestion which he wished to throw out. The public in his opinion would have a right to obtain from the company, not immediately, but at some future time, an increase of speed, and the Government might very well before closing the contract insert a provision that whenever they considered the period had arrived for increasing the speed by one knot or a knot and a-half an hour they should have the right to demand such increase upon paying the company a sum which might be agreed upon by all parties. He would merely add that the rules of speed which he had recommended, and which could only be obtained at greatly increased cost, were exactly those which were suggested by the committee, and were about what the companies who were at present most highly subsidised were in the habit of going. (Hear, hear.)

Mr. T. CAVE thought there was no fault whatever to be found with the Government for the amount of subsidy agreed upon. The hurricane at St. Thomas was so fresh in the memory of all that they could not overlook the fact that those companies were exposed to great losses. (Hear, hear.) In concluding the contract for twelve years the Government seemed to have forgotten, and no hon. gentleman had brought it under the notice

Digitized by Google

of the House, that the American Government had very largely subsidised a system of railways which would bring China and Japan very much nearer England than at present. Duing the recess he had himself travelled upwards of 500 miles over that line of railway, and thousands of men were now engaged in its completion. The result would be that sooner or later our mails would have to be carried by that route. (Hear, hear.) The saving of seven days in time and all the risks of the sea would weigh with the hon. gentleman opposite who had charge of the contract. On the ground he had stated he regretted that the contract had been concluded. With regard to that contract the company were allowed to deduct 5 per cent. for depreciation of ships and 5 per cent for insurance. The insurance fund often yielded a large profit, but if it continued to do so that profit, as he interpreted the contract, would be pocketed by the company, whereas the Government had omitted to provide that if it showed a loss no claim should be made on them. This he regarded as an important omission, for if the company's losses exceeded 5 per cent. the Government would be called on to make it up.

Mr. CHILDERS, while disapproving the terms of the contract in some particulars, admitted that the resolution could not but be adopted by the House. In the absence from indisposition of the hon. member for the City (Mr. Crawford), he wished to offer a few remarks on the subject, it having been his duty to examine the witnesses who gave evidence before the committee of 1865, and to assist the hon. member in the preparation of the report. That committee comprised not only representatives of the Government, who were naturally anxious for economical arrangements, but representatives of the company which was now about getting a fresh contract, and considerable weight attached, therefore, to the recommendations which they unanimously adopted. After a careful recital of the facts, the committee thus summed up their recommendations:—

"That, while it has not been expedient hitherto to add to the expense of the postal communication with India by establishing a more frequent service to Bombay in addition to the existing services to Madras and Calcutta, yet, having regard to the facilities already afforded by the railways under construction in India and to the prospect of the early completion of the main lines of communication connecting the port of Bombay with the Presidencies of Calcutta and Madras, the North-West Provinces, and the Punjab, the time has arrived when tenders should be invited for a weekly service to Bombay alone, and the separate postal service between this country and Madras and Calcutta should be discontinued."

Then came recommendations as to the speed of future steamers, which he would not repeat. The sixth recommendation was as follows:—

"That Her Majesty's Government should take into their early consideration the arrangements to be made, in consequence of the proposed separation of the Indian service, for maintaining a fortnightly or half-monthly service to China, and a monthly or four-weekly service to Australia, having regard to any facilities which may be afforded by the monthly service to China now performed by the Messageries Imperiales from Marseilles."

What was the meaning of this? That the railways being nearly finished which connected Bombay with Madras and Calcutta, it was desirable to contemplate the relinquishment of the line of steam communication by Galle, and to retain only the line with Bombay, and thence across the peninsula by railway to Calcutta and Madras. The questions he put to Mr. F. Hill, the witness examined on the part of the Post-office, tended to show the necessity of establishing this contract on the footing of the completion of the Indian railways. He asked Mr. Hill:—

"Would it not be prudent to postpone any definite contract between the Indian Government and with the Peninsular and Oriental Company for the service to Bombay until they were assured as to the probable passenger service between Bombay and Calcutta?—I think it would be prudent to defer entering into any permanent contract—that is to say, for a long series of years; but if the contract were terminable, as our Australian contract is, upon a notice of two years, I do not think that there would be any necessity for delay.—When you use the word 'permanent,' would it not be prudent to delay any permanent arrangement for the service between England and Bombay with the Peninsular and Oriental Company, or with any steamboat company, until there were the means of testing what would be the facilities for passenger traffic from Bombay to Calcutta?—Certainly. And if those facilities should be greater, do not you think that the Peninsular and Oriental, or any other steamboat company, would be able to tender for much less than what they said some years ago they would tender for for the additional service to Bombay?—No doubt that would be so."

The chairman told Mr. Hill the committee had it in evidence that the line of communication between Bombay and Calcutta and also between Bombay and Madras would be completed within a reasonably short time, and he (Mr. Childers) thereupon asked Mr. Hill whether, this being so, it would not be well—

"Not to contract for a fixed sum for a long period until that question is tested?—Not for a long period; but if the contract were terminable upon a couple of years' notice that might be done."

The committee thus had the opinion of Mr. Hill, who represented the Post-office, and himself, as representing the Treasury, that no permanent contract ought to be made over a number of years certain until there had been an opportunity of ascertaining the facilities of passenger communication offered by the completion of the railways between Bombay and Calcutta and Madras. Unfortunately, instead of postponing the contract with this view, his hon. friend had, in the teeth of the recommendations of the committee, called for a tender on the terms of a permanent service to Bombay and Calcutta, without waiting to see whether passengers would take that route or the old route by Galle. A subsidy of 3s. or 10s. would not pay a steamboat company unless they got the passenger traffic as well. It was, therefore, no use calling for tenders when there was a company in the field in possession of the passenger service which could do what it liked. The Government had entered into a contract, not on the basis of a weekly service to Bombay alone, as the committee recommended, but a contract for 12 years, with a weekly service to Bombay, and a service also to Madras and Calcutta by Galle. Thus the whole policy recommended by the committee was passed by in the arrangement made by his hon. friend. Last Session he called the attention of his hon. friend to the fact that it was not advisable to give the Peninsular and Oriental Company this early and premature notice, but to give a notice under which all the contracts with steamboat companies might be determined about the same time. Some of these contracts could only be determined after one year's notice, while others required two years, and, considering that the Indian railways were not finished, it was desirable to give a notice not earlier than two years, so that the railways might have some little additional time to complete their communication. The result of the policy of his hon. friend had been that there had been no tender except from the Peninsular and Oriental Company, and that, being based on the existing state of things, instead of the completion of the Indian railways in course of construction, was very much more expensive than the committee expected. His hon. friend was asked once or twice about the French service. Early in the Session he said that he had not made any overtures to the French Government, but that it was proposed to call upon the Messageries Impériales to tender for the service to China. That was, he thought, very injudicious, for it was impossible for a service which was sometimes half military in its character to be satisfactorily performed by a foreign company. It was, however, he admitted, the view of the Post-office that this should be done. Mr. F. Hill thought it desirable. His hon. friend accordingly officially invited them to tender, and this was Mr. Hill's recommendation. He, Mr. Childers, asked Mr. Hill:—

"You consider that 'the last course to take would be to give the Messageries an opportunity of tendering for the alternate service?—Yes. You would not exclude, of course, the answer of the French Government, if they would agree to a rate upon letters for the alternative service?—There is no occasion to put that question, because we have it in the convention that we are both bound to carry letters for each other. For the alternate service once in four weeks instead of once a month?—No. Probably it would be prudent to ask that question before anything was definitively done?—Yes; I think it would."

He would put it to the House whether it would not have been better, before anything was done in the China service, to ask the French Government to make arrangements for alternating a weekly service with ours, as was at present satisfactorily done in the alternative fortnightly service to Brazil and the River Plate. But, although Mr. Hill thought it desirable to make an arrangement with the French Government, Her Majesty's Government made no arrangement with that Government. His hon. friend relied, instead, upon the broken reed of asking the Messageries Imperiales to tender, and then, having failed, the present contract was agreed to, instead of that shadowed out and recommended by the committee. The Government had, he thought, committed an error of judgment in not adopting the recommendations of the committee, and the result was that there was no alternative but to adopt the proposal of the Peninsular and Oriental Company, large as was their claim, and connected as it was with the payment of a certain dividend. There was no doubt a precedent for this in the case of the Dublin mail, but that was an experiment on a small scale, and carried on daily under the eye of the Government. The present agreement stood on a very different footing, and if it were to be made a general rule that the Government were to enter into such speculations of possible loss and profit, the Government would, he feared, make all the loss, and the companies reap all the profit. (Hear, hear.) On those grounds, and on those grounds only, he felt bound to acquiesce in the course taken by his hon. friend. He thought it was much to be regretted that his hon. friend did take that course, but he felt it only right to say, after reading carefully the whole of Mr. Scudamore's report—and he wished to speak as highly as any one could of the merits of that officer, not merely in connection with postal affairs, but in other matters which came before the House, in which his ability and foresight had certainly been of great public advantage—after carefully reading Mr. Scudamore's report he did not see that it would have been possible to make an arrangement upon better terms than those now made. At the same time, a contract for twelve years, coupled with that condition as to the possibility of some profit coming to the Government, and also of some loss coming to them, was not such an arrangement as he thought the Treasury ought to have made; and, therefore, in assenting to their arrangement, he did so with considerable regret. (Hear, hear.)

Mr. M'LAREN said that the Peninsular and Oriental Company asked £500,000 a year for a contract of six years, and that sum was professedly reduced to £400,000 for a contract extending over 12 years. But if it could be shown, as it easily could be, that the Government would really have to pay £500,000 for the contract extending over 12 years, it was manifest that, instead of having obtained an advantage by the professedly lower rate, which was in reality no lower rate at all, the alleged concession to the public was an injury instead of a benefit. The hon. member for Tavistock, the only gentleman who had defended the contract with the company, said their financial condition was such that he should not be surprised if it were found that their available dividend would be reduced to £15,000 a year, even after they got the £400,000 from the public. Unless their dividend exceeded £60,000 a year the public would have £100,000 more to pay. If the dividend were £60,000 a year that would yield 2½ per cent., and £100,000, making up the dividend to £160,000, would yield 6 per cent. If the hon. member for Tavistock were to prove that, instead of £15,000—the dividend he anticipated under certain circumstances—their dividend should even be £60,000, then it followed that the public would have to pay them, besides the £400,000 agreed upon, £100,000 over and above that amount. Therefore, after all the circumlocution and mystification in which the matter was enveloped, the public had to pay the £500,000; and yet they were told that they were to have an advantage from extending the contract to 12 years! Any one who read the papers all through would easily see that the company, and not the public, would be really benefited by that prolonged term. He thought it would be better for the Treasury to accept the first offer of the company for the £500,000, and to have no partnership with them, with its illusory chance of a profit. They were going into partnership with the company under the idea of probably gaining £6,675 a year; and the *quid pro quo* they were to give for that mere ideal and unsubstantial advantage was that they were to come under a real obligation to pay £100,000. A more objectionable and improvident arrangement he could not imagine, and he must strongly protest against it. The great argument of the Peninsular and Oriental Company against the small sum they were previously allowed was that the French company were enabled to undersell them. But the effect of the new arrangement with the Peninsular and Oriental Company would be, by doubling their subvention, to enable that company

Digitized by Google

itself to undersell all the rest of our shipping interest. In palliation of that improvident arrangement, by which the company were to receive £500,000 instead of their former £230,000, the hon. member for Tavistock said they were to sail, at a probable cost of £80,000, 300,000 miles more than they did before, and that they would also have to incur an additional cost of £40,000 for the extra price of coal. But the Government did not want them to run the 300.000 miles more; and even if they did so, in place of giving them £120,000 for these possible increased charges, the Government were giving them £270,000. Nobody could allege a reason for giving away the other £150,000, except that the Government had got into such a fix as to be perfectly helpless, and the company was able to dictate terms to them. On these grounds he could not agree to the vote.

Mr. HUNT believed that any stranger who had listened to the numerous criticisms passed that evening on that contract must at first have imagined that all the gentlemen who had strongly protested against it were largely engaged in the Indian trade, and were naturally indignant that the arrangements made by the Government for the conveyance of their commercial correspondence would not answer their purpose. But if such a stranger were told that with, as he believed, but one exception, all those who had found fault with the Government did not belong to the great mercantile community in this country which was connected with the Indian trade, he would surely ask where were those members who were really connected with that trade. The fact was that the hon. gentlemen most interested in that subject were perfectly content with the arrangement made by the Government; they acquiesced in it, and, instead of coming there to protest, they had gone quietly away to their domestic or other occupations. He regretted that his hon. friend the member for the City, who was chairman of the committee on that question, was prevented by the state of his health from giving his opinion on the arrangement made by the Government, but he believed that hon. member would have expressed himself entirely satisfied with it. He did not find fault with the hon. member for the Tower Hamlets, the universal critic of the House, for exercising his talents on these occasions, and certainly his remarks that night had been distinguished by his usual acumen. Neither did he complain that the hon. gentleman opposite (Mr. Childers) should have criticised as severely as he could any arrangement made by the Government which succeeded the one to which he had personally belonged, because that was only the legitimate province of the Opposition, and when he himself changed sides in that House with the hon. gentleman no doubt he would do the same. But the hon. member for the Tower Hamlets had opened a very long bill of indictment against the Government. He thought that nearly all the objections which were to be urged against the course taken by the Government had been disposed of in the discussion which had taken place last Session; but, as many of them had again been advanced he felt it to be his duty once more to reply to them. He would, in the first place, then, observe that he looked upon it as being a great disadvantage to the Government that in the original contract—with which they had nothing to do—the period of one year was fixed as that at which notice of its termination should be given. It was, however, contended that private notice should have been given beforehand that it was the opinion of the Government that the contract ought to be terminated, and that it was likely they would in due course act upon that opinion. Now, that was exactly the course which had been taken. As he had stated in the House last Session, he invited before giving notice the chairman of of the committee to call upon him at the Treasury, where the question was discussed between them as to when notice should be given. His hon. friend on that occasion expressed it to be his opinion that notice ought to be given. That being so, he thought he had disposed of the charge that the Government had not acted in accordance with the views of the committee, because if its chairman was not to be regarded as an adequate exponent of those views, he did not know who was. Besides, as his hon. friend opposite must see, the Government had no choice in the matter, because, after acting on their own responsibility—for he had no wish to throw the slightest responsibility in the matter on the chairman of the committee—they had given private notice to the company that they were likely before long to give formal notice that they would terminate the contract. The representatives of the company informed them that they could not go on losing money as they were doing, and that if the Government did not give them notice they must give notice to the Government. His hon. friend, he might add, had read certain extracts from the Blue-book expressing the views of the committee, but there were other paragraphs of the report which would, he thought, be found to place the question in a different light. After the paragraph in their report which his hon. friend had first quoted, the committee went on to say:—

"Yet, having regard to the facilities already afforded by the railways under construction in India, and to the prospect of the early completion of the main lines of communication connecting the port of Bombay with the Presidencies of Calcutta and Madras, the North-West Provinces and the Punjab, the time has arrived when a tender should be invited for a weekly service to Bombay alone."

That paragraph pointed to the time when the railway should be completed, so that the very words of the report concurred with the views of the chairman that notice should be given. [Mr. Childers: The report says, "Tenders should be invited."] Yes, but how he should like to know could tenders be invited before notice had been given? (Hear, hear.) There was, he might add, a marked distinction drawn between the giving of notice for the termination of the contract for the India and China and that for the Australian mail. With reference to the former, the words used in the report were that "the time had arrived when tenders should be invited;" while in the course of the latter the recommendation was "that Her Majesty's Government should take into their early consideration the arrangements to be made!" In acting as they had done, therefore, the Government, he must again repeat, proceeded entirely in accordance with the views of the committee. It appeared, however, that his hon. friend opposite differed from the chairman of the committee, and that being so, he ought, he thought, to have protested against the words used in the report. [Mr. CHILDERS: My hon. friend gave me a very different impression of the statement which he made from that conveyed by the hon. gentlemen opposite.] He did not, as he had said before, seek to throw the slightest responsibility in the matter on the hon. member for the city of London; indeed, his right hon. friend the Chancellor of the Exchequer had last Session expressly stated that the Government had no intention of the kind, and he was sure if his hon. friend were present he would confirm the accuracy of the statement which he had made. Such then, as he had described, was the state of the case, so far as giving notice was concerned. But his hon. friend opposite further contended that the Government ought to have carried out the views of Mr. Frederick Hill. [Mr. CHILDERS: I said they were the views of the Post-office.] The hon. member for the city of London, however, last Session protested against the Government being influenced by the views of Mr. Hill, for he declared it to be his opinion that if they were to conduct the postal arrangements of the country under his advice they would be sure to do wrong. ("Hear, hear," and a laugh.) Again, it was made an accusation against the Government that they had placed themselves altogether in the hands of the Peninsular and Oriental Company, and that they must pay whatever sum that company might demand. Was that the tone of the discussion which took place last Session? If he were not mistaken, he then heard a great deal about the poor trodden-down Peninsular and Oriental Company, and of the necessity which there was that the Government should come to its rescue, and to preserve it from ruin. (Hear.) What was the result? Why, that the company naturally looked upon it as quite clear that the House of Commons was of opinion that they ought to be more liberally remunerated, and that they were entitled to ask for very handsome terms. (Hear, hear.) Now, all he could say with regard to the matter was that it was, in his opinion, the duty of the Government to make the best terms they could, while he, at the same time, most readily bore testimony to the great services which the company in question had rendered to the country during the many years in which they had been engaged in conducting our postal communication with the East. That duty they had discharged in a manner which was highly creditable to them, and he should be sorry to see the company break up by reason of the Government not being able to enter into satisfactory arrangements with them. (Hear, hear.) As to the negotiation with the Messageries Imperiales, since they had made no tender and the matter had fallen through, he should merely say that while his hon. friend opposite seemed to think that the 6th paragraph in the report contemplated a service in substitution of ours, the hon. member for the city of London construed it as meaning a service in addition. But then it was said that the Government had acted foolishly in entering into arrangements for the service to Bombay before the railways were completed. On that point he would read a note appended to the memorandum sent by the Post-office to the Treasury:—

"The superiority of Bombay as a point of arrival and departure for Indian mails, even before the completion of the railways between Bombay and Calcutta and Bombay and Madras, has been pointed out by the Select Committee on East India communications (pages v. and vi. of their report), by Lord Canning, by the Director-General of the Post-office of India in the years 1860-61 (*vide* pages 231 to 234, 241 to 244), and by the Director-General of the Post-office of India in 1865 (*vide* pages 280 to 282 of the appendix to the report of that committee)."

He was told that even now, with a journey of 200 miles, the mail service by way of Bombay was far superior to that by Calcutta. His hon. friend had said that it was impossible for any one to tender for the service to Bombay until those lines were open. As the lines were expected to be open in a short time, any enterprising company might, he thought, make a tender, although the lines were not open. All this part of the case, however, turned on the question, respecting which contradictory testimony was given before the committee—namely, whether the Great Indian Peninsular Railway could carry all the passenger traffic, or whether the Peninsular and Oriental Company's steamers would carry any of it; and the officers of the latter company maintained that when the railway was finished, there would still be a great passenger traffic to Calcutta. That was a question which time would determine, but at all events there was a public advantage in the existence of two routes, as competition tended to keep down the rate of fares. With respect to what had been called the partnership question, he confessed that at first sight a partnership arrangement did not seem desirable, but the alternative was the payment of £500,000. This was not an unlimited partnership, for there was a certain amount beyond which the Government could not be called on to contribute; and as his hon. friend was obliged to admit, this was not the first occasion when such a partnership was made. There was a partnership of a somewhat similar character in the case of the Holyhead and Kingstown contract. In reply to the objection that there was no security that the Peninsular and Oriental Company would care to raise the dividend above six per cent., he could only observe that the shareholders of the company were a very numerous body, and having been accustomed to divide ten per cent. they were not likely to sit down perfectly satisfied with a dividend of six per cent. Then again it was said that this service was obsolete, and that it was too slow and behind the age. Now he believed that in the discussions which had taken place in that House those most interested in the question said that they looked to regularity of service more than to greater speed, and that the telegraph wire would to a great extent displace the Post-office in cases where great despatch was desirable. Nevertheless the increase of the rate of speed, if it should be deemed desirable, depended solely on a question of money. After what he had stated, he trusted that the House would not think that the Government had shown in this matter such dense stupidity as had been attributed to them, and he hoped that they would be able to come to a unanimous vote on the present occasion. (Hear.)

Mr. GRAHAM said that as the Secretary to the Treasury had observed that no one connected with the mercantile interests of India had objected to the contract, he, as a person deeply interested in Indian trade, wished to state that the hon. gentleman was in that respect under a false impression. He, for one, greatly objected to the contract and to the slowness of the proposed rate of speed. He also objected to an arrangement which made the Government a partner in a mercantile company. He regretted that the contract was made for so long a period as twelve years, and he should have preferred to pay the company at a higher rate for a shorter period.

Mr. J. B. SMITH also objected to the length of the contract. He hoped the Government would still endeavour to reduce the term to six years, paying a larger sum to the company. Unless he got a pledge to that effect he should divide the House.

The House divided, when the numbers were:—Ayes, 55; Noes, 13. Majority, 42.—The motion was then agreed to.

PORT OF AMOY, CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facilities for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring espatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers &c.

Billiter-square, November, 1867.

PERRY and CO.'s PATENT

ESSENCE OF INK

The CHEAPEST INK.
The BEST INK.
The PERMANENT INK.
The 1d. Packet equal to a 6d. Bottle.
The 1s. Bottle makes Two Quarts.

PERRY and CO.'s PATENT ESSENCE OF INK.

This preparation produces Extemporaneous Ink of the finest quality in one minute with cold water, and instantly with hot water, by simple solution as salt or sugar. Sold in packets 1d. each, and in glass bottles 1s. each. Sample free, per post, for two stamps. Sold by all Stationers, Wholesale, 37, Red Lion-square, and 3, Cheapside, London.

PERRY and CO.'s PATENT BOSTONITE GOODS.

PERRY and Co. have much pleasure in introducing their new patent BOSTONITE to the Public, and they do so with the full conviction that it will supply a want long felt, viz.: perfect Lead or Coloured Pencil Tablets Slates, &c.

"The slate, as our readers may suppose, is made of the same material, and we are sure would be found very useful to all housekeepers, nearly as much so as the diary, which we would advise our readers to purchase. The price is very low, and there are four or five sizes."—From THE QUEEN, April 6.

PERRY and CO.'s PATENT BOSTONITE PLAYING CARDS, 2s. 6d. per pack
Bostonite Slates from 6d. each.
Bostonite Book Slates, 6d., 1s., and 1s. 6d. each.
Bostonite Memoranda Tablets, 6d., 1s., and 1s. 6d. each
Bostonite Diaries, 1s., 1s. 6d., and 2s. 6d. each.
Bostonite Music Slates, 6d. each.
Bostonite Purses, from 1s. 6d. each.
Bostonite Multiplication Tablets, 6d. each.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil; Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist's Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

HOLLOWAY'S OINTMENT.—Turn which way you will, go where you please, persons will be found who have a ready word of praise for this Ointment. For chaps, chafes, scalds, bruises, and sprains it is an invaluable remedy; for bad legs caused by accident or cold it may be confidently relied upon for effecting a sound and permanent cure. In cases of swelled ankles, erys pelas, gout, and rheumatism, Holloway's Ointment gives the greatest comfort by reducing the inflammation, cooling the blood, soothing the nerves, adjusting the circulation, and expelling the impurities. This Ointment should have a place in every nursery. It will cure the long list of skin affections, which originate in childhood, and gain strength with the child's growth.

Per P. and O. steamer, from Southampton, Jan. 4.—To Yokohama: Mr. Vernedi. To Shanghai: Mr. Gore Booth, Mr. F. C. Adams. To Singapore: Mr. James Miller, Rev G. F. and Mrs. Hose.

From Marseilles, Jan. 12.—To Shanghai: Mr. Ellis Elias.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have advices to the 21st October. There is little reliable news of any importance.

We are again puzzled by contradictory accounts of the political situation. The *Japan Times* asserts, "on the best authority," that Stotsbashi has finally resigned the Shiogoonate, and that the Prince of Owari has been nominated to that dignity by the Mikado. According to the *Herald's* account Stotsbashi is not understood to be disgraced, but to have voluntarily refused longer to occupy the seat of the rightful heir. "Having taken office, on the death of the last Shiogoon, for the sole purpose of finishing the Chiosiu war and giving peace to his country, and having succeeded in accomplishing this end and obtaining the Mikado's consent to favourable terms for the rebellious Daimio, he has now had afforded to him an admirable opportunity of displaying the purity of his motives and claiming the reward of true patriotism—the respect of his countrymen." The whole of this story, however, is positively denied by the *Japan Herald*—also "on the best authority," and private advices being equally conflicting, it is difficult to know what to believe.

An interesting letter from Mr. Benjamin Seare, the Japanese Special Commissioner at Osaka, has been published in the *Japan Times*. Mr. Seare reached Hiogo on the 16th Sept, after a pleasant passage by a Japanese steamer, and afterwards proceeded to Osaka. His description of the site for the foreign settlement at this city is not very promising; he says:—

"On various parts of this concession is some very fine timber, all of which I understood the officers to say the Ministers had agreed should not be disturbed. Now taking away the space required for the bonded warehouses, which here must become an institution, there will be 12,000 tsubos left; that is equal to 12 lots of bluff land lately sold at Yokohama. From this arithmetic you will, and so will the merchants of Yokohama, at once see that spacious houses, godowns, tea-firing plants, and racing-stables will be here utterly out of the question. The location is as nearly as possible about the size of old Canton, and if accommodation is to be found for all comers they must be as thickly and closely resident as they were at the late Canton factories. Now I doubt not this report will be disappointing to many, but Ministers have without question selected the only and best place; it is isolated, surrounded by water, and therefore, though accessible to the cargo boats, less liable to conflagration, and I suppose in winter time fires are very prevalent here."

Sir Harry and Lady Parkes, with a small party of friends, have just returned from a trip to Fusiyama. Lady Parkes is the only Englishwoman who has ever been upon the summit of this "monarch of mountains" in Japan.

We have to report the departure of H.M.S. *Rinaldo* and the arrival of the *Pearl*. General Guy has completed his inspection of the garrison, and returned to Hong Kong.

A verdict of wilful murder was returned against Surie, the Dutchman who lately stabbed an Englishman in an affray. An engineer officer of H.M.S. *Basilisk*, named M'Gehan, had committed suicide by shooting himself with a pistol.

The *Gazette* says:—"It is not generally known that a residence has been prepared at Osaka for the British Minister, and that he will occupy it for the first few months after the opening of the port. The hotel in preparation for foreigners at Yedo will soon be finished." The *Gazette* adds that some foreign gentlemen who recently visited Yedo were pelted by the natives, and had to beat a retreat; which does not look promising for our future position there.

At the date of the last accounts the court-martial on Captain Hodson, R.A., was still unfinished.

The *Japan Gazette* says: "It is stated that Satsuma, Tosa, Choshiu (of Simonoski notoriety), Canga, and others are so opposed to the go-ahead policy of Stotsbashi, and intrigue has so effectually done its work at the Court of the Mikado, that to prevent civil war much of that policy has to be reversed, and that Stotsbashi, refusing to eat his words and retract his promises, has resigned his office, and this has been conferred upon the young son of Prince Owari, a lad of thirteen years of age, in whose name the policy will be altered. This has reached us from several sources simultaneously, and in a manner that we find it very difficult to doubt. Yet we confess that we earnestly hope it is false."

NAGASAKI.

From this port we have no news of importance. An attack by natives on two foreigners is reported, but does not appear to have been of a serious character. Large reinforcements of Japanese troops are said to have been ordered to Nagasaki, but for what purpose is unknown.

CHINA.

TIENTSIN.

A correspondent, writing from this port on the 12th inst., says:—On the 10th instant I advised an improvement in the piece goods market, and in British and American imports generally. The subsequent importation, however, of some 20,000 pieces Grey Shirtings has weakened rates, and prices are to-day looking down. This fact alone shows clearly that the demand at present existing is very inconsiderable; as in former years at this season, such a small importation of Grey Shirtings would never have affected rates. Last evening's quotation for best mark 8¼ lbs. Grey Shirtings was only tls. 2.52. Owing to rain and stormy weather to-day the traders are kept at home, and I am not aware of any change having taken place in the rates of other kinds of imports since writing to you two days back. There are a fair number of Shanse traders at present at Tientsin, and if they would only take it into their heads to operate, if only to a very small extent in comparison with former years at this time, they would easily clear off the whole of the stocks of British and American imports now in Tientsin. Even the *Our Queen's* cargo should be consumed in their operations, without their being considered to have done anything like an average business. The Peking courier brings no news of importance from that quarter beyond the report of much sickness existing amongst the foreign community. Mrs. Powles, wife of Dr. Powles, of H.B.M. Legation, has lately died at this place. This is the second death we have had this autumn; and in a small community like ours the death of one of its members is felt personally by every one. I imagine we have now seen the last of the hot weather, which I may state has departed this season ten to fifteen days earlier than I remember it to have done in former years.

CHEFOO.

A correspondent of the *North China Daily News* writes:—"The rebels are said to be on the banks of the Grand Canal; but at what precise locality is not stated. The distress amongst the northern population continues to inspire great alarm for the tranquillity of the country during next winter. Yet with all these difficulties on their hands, the Peking authorities keep up the old spirit of opposition to foreigners. There may be some exceptions; but there is abundant evidence that the rulers of the State are not sincere in their professions of liberality towards Europeans. An instance of bad faith and stupid opposition to the introduction of better ideas has lately come to light, which establishes beyond doubt the ascendancy of perverse opinions amongst the influential statesmen of China. The affair to which I allude will be made public in good time. Meanwhile it is a warning not to be too sanguine as to the speedy conversion of mandarins to sane principles."

HANKOW.

The flood at Hankow has begun to subside. The water had fallen eight feet on the 18th inst. The *Hankow Times* mentions the conclusion of the literary examinations in Wuchang. About a score of persons died during their progress. A rumour has reached our contemporary of a revolt in the prefecture of Paoting, in the Pe-che-li province. Official notice has been given by H.B.M. Consul that a discharge has been granted Mackellar, Gordon, and Co., the appellant creditors having failed to deposit the costs and security required by the Court within the time allotted. The appellants, with singular carelessness, delayed lodging the security till so near the time fixed that, while they declare they were in Court a few minutes before noon, the Consular authorities declare it was a few minutes after and consequently too late. Some further question, however, may possibly arise on this point, as the creditors dispute the justice of the Consular decision.

The following extraordinary document has been published, written by Mr. Gibson, lately Acting-Consul at Hankow, in the absence of Mr. Medhurst. This gentleman's proceedings are so very unlike a Consul's, that it is to be hoped his senior will soon be back to his post. The Foreign-office, we fancy, can hold Mr. Gibson responsible if Sir R. Alcock cannot, and the sooner Lord Stanley sees the following the better for our national credit:—

HANKOW, Sept. 10th, 1867.

My dear Mr. GIBSON,—I take the liberty of asking whether I am right in thinking that the Court was adjourned only for the purpose of enabling Mr. Gordon to examine Mr. Crawford in reference to the books and to make such explanations as he may see fit.

It will put me to inconceivable inconvenience to remain, but I shall have to remain unless I am satisfied that beyond Mr. Crawford's examination and Mr. Gordon's statement nothing will be done.—Believe me, yours very truly, PHILLIP A. MYBURGH.

J. GIBSON, Esq., H.B.M. Consul.

Sept. 11th, 1867.

Last night I received a note from Mr. Myburgh (note read by Mr. Myburgh himself). From what he says in that note, and from what he said in his speech to the Court yesterday, it is vain to conceal from myself that rumour has poured into Mr. Myburgh's ears expressions entirely untrue and falsehoods utterly base.

From what persons those untrue expressions, those utterly base falsehoods came, I shall not stop to inquire; I not only sit here—on this seat—as a member of a profession which Mr. Myburgh has selected as his own, but I sit as a Consular Judge to defend British law, equity, honour, honesty and fair transaction, though buffeted by falsehoods and even by senior brother's suspicions and prejudgments. I sit in this seat responsible to no individual; I am not responsible to Mr. Myburgh; I am not responsible to Sir Edmund Hornby, the Chief Judge at Shanghai; I am not responsible even to the British Minister at Peking, Sir Rutherford Alcock, for my conduct, acts, and my decisions; but to my God alone.

May that Almighty Being, whose very essence is just, endue me with His spirit; and I call upon my country's character for intelligence, common sense, sagacity, and moral integrity, to abide with me, so that my judgment may be in accordance with strict justice and impartiality.

NANKING.

The examinations which have just been brought to a close at Nanking have attracted more than usual interest among the Chinese, and have also been of an unusually important character. No less than two thousand students were present, and there were double the usual number of successful candidates for *Ku-Jiu* or "M.A." degree. This was in virtue of an Imperial decree, issued in consequence of the shortcomings of the past years, brought about by the rebel disorders. 248 students passed. While the examinations were proceeding as many as 75 competitors either died naturally or committed suicide in the hall. Cases of this kind are of ordinary occurrence, but this year the number was surprisingly great. The Chinese method of accounting for these misfortunes is highly characteristic. The victims are held to have been guilty of various improprieties, such as to disqualify them for advancement in military honours. They are, therefore, pursued by evil genii even to the Examination Hall, where vengeance overtakes them by fatal sickness or the determination to commit suicide. No pity is felt for the unhappy men. Their bodies are removed by an underground way, as it is thought the sacredness of the main doors will be outraged by their being carried through them. It is strange to find the most respectable institution of China not free from those superstitions, which seem to become mixed up with everything else; and some of the reputation of these celebrated examinations must vanish when such fables are known to be believed. We hear also upon good authority that the idea of its being perfectly impossible for there to be any false play is not founded upon fact; and that notwithstanding all precautions, it still

Digitized by Google

happens at times that a shuffling of themes is effected, and a clever, but poor scholar agrees to be "plucked" for a few taels, in favour of a less erudite but more opulent competitor.

SHANGHAI.

Advices hence extend to the 26th October. The mail of 10th Sept. had not arrived, but telegrams to Sept. 24 had been received *via* Kiachta.

The following items are from the *North China Herald*:—

A new sample of coal has been offered for sale—from Saghalien; but it appeared to be of inferior quality, and was knocked down at 5.50 taels. Probably, however, it is merely superficial coal, and no true sample of the quality which the pits will yield.

We understand that the committee for the assessment of Chinese houses have completed their labours, and that the result shows a slight increase in value over the previous schedule. They have assessed twelve thousand houses in the English and Hongque settlements.

We are glad to learn that a dispensary for the benefit of the Chinese has been opened, at the house in Hongque known as Dr. Boone's office, in connection with the Protestant Episcopal Mission. Dr. Macgowan kindly gives his services as consulting surgeon, and a Chinese assistant is in regular attendance. The house is provided by the mission, but the medicines depend upon charitable contributions from natives and foreigners, which we have no doubt will be forthcoming.

With reference to the discharge granted to Mackellar and Co., the *Recorder* says:—

Our readers have doubtless been somewhat astonished at a notification issued by Mr. Consul Medhurst to the effect that the discharge of the partners in Messrs. Mackellar and Co.'s has been finally granted. This, we are informed upon good authority, has been done under such peculiar circumstances that it is not likely the proceedings will be allowed to drop. The Chinese creditors were granted leave to appeal on condition of their paying certain fees before noon on the 18th inst., and it appears they came a few minutes late, and found that the Consul had gone to breakfast. They waited patiently, and on his return was informed that the appeal would not go forward to the Supreme Court, and that a discharge would be granted to the bankrupts. We need scarcely say this unpleasant matter will be referred to the Supreme Court.

Mr. William Chisholm and Mr. Frederick Dallas Barnes have been appointed joint agents of the P. and O. Company.

The arrangements for carrying on the Shanghai Club have been completed. A secretary has been appointed, and a contract concluded for supplying the cuisine department. Some complaints have been made concerning a tendency to the same indiscriminate black-balling which was so detrimental to the former club, but we trust this defect will be speedily remedied.

The Supreme Court held a criminal session on the 7th Oct., specially to settle the fate of Drummond, *alias* Woodward, brought from Kinkiang by the *Plymouth Rock* under a warrant for his apprehension on a charge of swindling by obtaining goods on false pretences. A jury was sworn, and the court opened under the presidency of Acting Judge Goodwyn. But the prisoner gave little trouble. He at once pleaded guilty to the indictment on Messrs. Watson and Co.'s information, and was as promptly sentenced to three years' penal servitude at Hong Kong. It would seem that Drummond anticipated a sentence of less severity than this, and begged hard that the sixteen days he had already been in custody might be allowed to count in. This the Court said would be irregular.

A specimen of the depreciated value of land at Hankow was given a few days ago in the sale here of a 99 years' lease of a plot of land on the concession, together with the dwelling-house, godown, stables, outhouses, &c., for Tls. 5,500. The *Hankow Times* gives interesting particulars regarding the high floods which have again this season partially submerged the settlement. Great damage appears to have been done higher up the country.

Sir Edmund Hornby has returned from Yokohama, so the Supreme Court vacation may, we presume, be now considered at an end. Several interesting cases await his decision.

The following items are from the *Recorder*:—

It is with deep regret that we have to announce the death, after an illness of about nine days' duration, of Mrs. Winchester, wife of C. A. Winchester, Esq., H.B.M. Consul at this port. Though only a short time amongst us, Mrs. Winchester, by her courtesy and amiability, had attracted to herself the affectionate regard of all in Shanghai, and her sudden death has cast a gloom over the settlement. On the 11th Oct. her remains were deposited in the old cemetery, when a very large number of residents paid a last sorrowful respect to one whose memory will be long cherished by all who were so happy as to enjoy her acquaintance.

An incident illustrative of the progress Japanese are making in European science occurred on the 15th Oct., in the arrival of the steamer *Cosmopolite*, from Yokohama, entirely officered by Japanese. The number of the crew is, however, somewhat large, there being no less than two captains, Ozagema and Ozagaro, twenty-four officers, sixty sailors, and twenty-two stokers, making a total of 108 men all told, to work a ship a little over 600 tons.

We are informed that the British flag has, by direction of the Supreme Court, been hoisted on the derelict barque *Siam*; any interference with it on behalf of the Bremen authorities will therefore become an international question.

The launch of the str. *Jessie*, built by Mr. Lambert at Pootung, took place on Oct. 16th. The *Jessie* is 75 feet long, 14 feet beam, and of 20-horse power. She draws but a small draught of water, some two or three feet, and is expected to steam 8 to 9 knots per hour.

Charles A. Winchester, Esq., H.B.M. Consul, has issued a circular convening a meeting of British subjects, to be held at the Consulate on the 26th October, to receive the report of the Church Committee.

A Passiett correspondent says that rich gold mines have been discovered in the neighbourhood of that port. The Russians have stopped the works until the field shall have been properly surveyed. The Governor has come down in person to inspect the mines, and is said to purpose letting them out. At present they are jealously guarded, artillery having been brought down to keep off intruders.

FORMOSA.

A letter from Takao, dated 19th Oct., noticing the loss of the *Philomela*, says:—"She encountered a severe typhoon on the 20th September, and was driven on shore at Lokong, west coast of Formosa, to the north of this. Hundreds of Chinese boarded the vessel, plundering her, and destroying everything within their reach. The crew were left almost naked; even their hats and shoes were taken away. The mandarin of the place gave each of the crew (21 in number) a dollar, and gave them a passage in a junk, which arrived here on the 17th inst., having called at one of the Pescadores for repairing the junk. The men proceed to Amoy immediately, in H.M.'s gunboat *Banterer*, which arrived this morning from the Bashees, having landed safely at one of those islands the eight men wrecked some time ago at the south-end of Formosa."

HONG KONG

From this port our advices are to the 1st of November, four days later. The outward French mail of September 17 was delivered on October 31, conveying also telegrams from London to October 5.

Amongst the passengers who arrived by the last English mail (says the *Mail*) was the Right Rev. Dr. Alford, Bishop of Victoria, accompanied by Mrs. Alford and family. In welcoming his lordship to this colony we express the views of a large number of our readers to whom the appointment of Dr. Alford has given unmixed satisfaction. In so small a place as Hong Kong sectarian feeling has but little play, and is, we conscientiously believe, never offensively exhibited. His lordship's duties as regards church matters are likely to be light, but a vast field for the exercise of a wise and temperate advocacy of a truly Christian policy, both in and out of the colony, and of that nameless influence which ability and straightforwardness ever command, will be afforded him in his new sphere of labour. Immediately upon his arrival his lordship proceeded to St. Paul's College, where several of the clergy were waiting to meet him. The Rev. C. F. Warren then read an address of welcome, to which his lordship replied in a few words, warmly acknowledging the address, and thanking his clergy for the kind reception he had met with. On Sunday, Oct. 27, at St. John's Cathedral, the right rev. gentleman was installed into office as Lord Bishop of Victoria. The attendance of the congregation was exceedingly good. The service was unattended by any pomp or parade, but was eminently befitting the occasion, and calculated to give a favourable impression of the quiet and unassuming character of the new bishop. Several of the clergy of the diocese were present and took part in the proceedings.

Digitized by Google

As a further illustration of the unwarrantable manner in which merchant vessels are interfered with by naval officers (as exemplified in the detention of two mail steamers, recently referred to our columns) the *China Mail* relates the following incident :—"The *Erl King*, on her last passage down from Shanghai, was induced by the firing of three rockets and the display of two blue lights, to return several miles on her course, in the belief that her aid was required in relief of a ship in distress. Much to the captain's disgust he found that he had been signalled by a British man-of-war under the belief that he was going northward ; and that was all the explanation offered."

We have to note the departure by the outgoing mail of a gentleman who has for some considerable time represented the leading German firm in China—Mr. Woldemar Nissen, of Messrs. Siemssen and Co. Mr. Nissen, during his residence in China, has done much to engender not only a feeling of respect for his German countrymen among all nationalities in this part of the world, but has contributed greatly to the mutual regard between Germans and Englishmen, and his loss as a generous friend and honourable merchant will be much felt in the foreign community.

We understand that Mr. Porter, late of Amoy, who had been appointed Commissioner of Customs for the Northern ports of Formosa, has resigned his appointment. Mr. Kopsch, Interpreter at Shanghai, has been appointed Acting Commissioner for the same ports.

By the last mail arrived a gentleman sent out to superintend the removal and re-erection of the Cathedral organ, which is to be placed on the north side of the chancel, instead of in the organ loft as hitherto. When re-erected the instrument, which is a very fine one, will be considerably improved, as in addition to new finger boards one or two new stops will be fitted and all existing defects remedied.

The sum of $4,000 was recently awarded by H.M.'s Acting Consul at Swatow, to the P. and O. steamer *Cadiz*, for having picked up the British schooner *Restless*, from Foochow bound to Sydney with a cargo of tea, twenty-five miles to the southward of Swatow, with lower and topmasts gone, and having towed that vessel to Hong Kong.

In a notice that appeared in our last issue in reference to the docks at Kowloon, the name of the company should have been the "Union," not the "Hong Kong and Whampoa," Dock Company.

SIAM.

BANGKOK.

We hear that the King of Siam has conferred upon Sir John Bowring the title of "Phraya Siamitre Maha Yesa," for services rendered to the Siamese. This is the highest dignity that can be bestowed on a foreigner.

The *Lammermuir*, Captain Bell, a large vessel carrying some 1,500 tons, has been fixed to land a general cargo outside the bar for England.

STRAITS SETTLEMENTS.

SINGAPORE.

The news from this port is to the 8th November, five days later. Very little had transpired in the interval. The protest of the non-official members of the Legislative Council against the Supreme Court Bill is warmly supported by public opinion. The *Straits Times* says :—"Considerable doubt has for a long time prevailed as to how the military defence for the colony, for which it pays the good round sum of £59,000, is to be constituted. It was said that we were to have a wing of a European regiment, as well as two batteries of artillery and a company of Ceylon Rifles ; but up to the present time no measures have been adopted to carry out this intention. There is no feeling of uneasiness whatsoever as to the strength of our military protection, but in face of the remonstrance of our neighbours of Hong Kong to their paltry contribution of £20,000 to the enormously superior garrison which is maintained there, we may be excused the expression of some curiosity as to the nature of the force for which we are to pay three times the Hong Kong contribution."

H.M.'s ironclad steamer *Ocean* arrived in this harbour on the 23rd Oct., and for some days formed a considerable attraction to visitors. She appears to have encountered some heavy weather on the voyage out, but not to have suffered from it to such an extent as to cause any fear for our ironclad squadron on ocean voyages. However, ability to resist storms at sea is not the only qualification necessary for vessels destined for service in this part of the world, as was apparent to most persons who visited the *Ocean* while here. Whether from the amount of iron by which she was encased, or the narrow slits of port-holes on the gun-deck, the heat was intense ; and to cramp up seven hundred to eight hundred men in such a ship, in such a harbour as this, is at least positive cruelty, if not slow murder—and in most of the China ports during the summer months the heat is equally great. The *Ocean* has been the greater part of the voyage from Rio under canvas, having sailed 7,000 and steamed 2,740 miles. Her average rate of speed under sail has been 10, and under steam 13 knots.

The Marine Court of Inquiry held at the marine magistrate's office respecting the stranding of the British barque *Maggie Leslie*, on the Alceste Reef, in Gaspar Straits, resulted in the cancellation of the master's certificate for carelessness. At the time of the inquiry the fate of the vessel was unknown in Singapore.

The banks, with the exception of the Oriental, have all reverted to the six months' usance for bills on England ; a measure which meets with general approval.

We understand that Dr. Randall, R.A., has been appointed Colonial Surgeon of the Straits Settlements *vice* Dr. Rose who declined the appointment. The Colonial Assistant Surgeoncy at Singapore has been offered to Dr. Anderson of Penang, and that at Penang to Dr. King, at present holding the acting appointment.

JAVA.

The *Maggie Leslie*, of Newcastle, Stephen, from Foochow to London, which was brought into Batavia derelict, Oct. 21, had been recommended by surveyors to discharge her cargo.

HONG KONG STAMP DUTIES.

SCHEDULE.

1. Agreement, or any minute or memorandum of an agreement not being under seal, or of the nature of an obligation for the payment of money, and not specially charged with duty under this schedule, whether the same be only evidence of a contract or obligatory upon the parties—50 cents.

Note.—If two or more letters are offered in evidence to prove an agreement between the parties who shall have written such letters, it will be sufficient if any one of such letters be stamped as an agreement.

EXEMPTION.

Label, slip, or memorandum containing the heads of any fire or marine insurance to be effected.

Memorandum, letter, or agreement made for or relating to the sale of any goods, wares, or merchandise, or to the sale of any shares in any public company.

Memorandum or agreement made between the master and mariners of any ship for wages.

2. Bank-notes or other obligations for the payment of money issued by any banker or banking company in the colony for local circulation and payable to bearer on demand—A stamp duty of half per cent. per $100 of the average value of such notes in circulation to be calculated by the value of such notes in circulation on the last Saturday of each month during such half-year, from a statement thereof to be furnished by each banker or banking company to the collector of stamp revenue, and verified on oath by the banker or the manager or agent and accountant of such banking company.
3. Bills of exchange, promissory notes, or other obligations, for the payment of money not included in the last preceding article, and not being cheques or orders for the payment of money at sight or on demand, if drawn singly—$1.

   If drawn in sets—50 cents on each part of the set.
4. Bill of lading or acknowledgment of or for any goods or effects to be exported, for each part of every set—10 cents.
5. Bond or other obligation concerning respondentia and bottomry—When the sum secured does not exceed $10,000, $10 ; when above $10,000, $20.
6. Charter party or any agreement or contract for the charter or hiring of any sea-going ship or vessel—$5.
7. Transfer of shares or stock in any public company—See Article 13.
8. Power of attorney—$2.
9. Note of protest by any commander or master of a vessel—25 cents.
10. Any notarial act whatsoever, not otherwise charged in this schedule—$1.
11. Receipt or discharge given for the payment of money or in acquittal of a debt paid in money or otherwise, when the sum received, discharged, or acquitted exceeds $10—3 cents.

EXEMPTIONS.

Letter sent by post, acknowledging the arrival of a currency, or promissory note, bill of exchange, or any security for money.

Receipt or discharge written upon or contained in any bill of exchange, promissory note, bond, or other instrument charged with duty under this schedule and duly stamped.

12. Probates and letters of administration, with or without the will annexed—The ad valorem duty is on a conveyance to be calculated upon the value of the estate and effects for or in respect of which such probate or letters of administration shall be granted exclusive of what the deceased shall have been possessed of or entitled to as a trustee for any other person or persons, and not beneficially.

Digitized by Google

13. Conveyance, assignment or instrument of any kind or description whatsoever not specially charged with duty under this schedule executed for the transfer for valuable consideration either by way of mortgage or otherwise of any property, moveable or immoveable, or of any right, title, claim or interest in, to, or upon the same—25 cents for every $100 or part of $100 of the consideration money or amount secured up to $1,000, and $2 for every $1,000 or part of $1,000 after the first $1,000.

Where in a mortgage the sum secured is unlimited—$25.

Deed or other instrument of gift, or of exchange or settlement where no money consideration or a merely nominal money consideration passes—$25.

EXEMPTION.

Transfer by mere endorsement of a duly stamped bill of exchange, promissory note or other negotiable instrument, or of a bill of lading, and transfer by assignment of a policy of insurance.

14. Mortgage—See Article 13.

15. Reassignment of any mortgaged property—The same as on the assignment.

16. Letter or other instrument of hypothecation accompanying deposit of documents of title to any property—same as a mortgage.

17. Duplicate or counterpart of any deed, instrument, or writing of any description whatever chargeable with duty under this ordinance—The same duty as the original when such duty does not exceed 50 cents.

If the duty chargeable on the original exceeds 50 cents, but does not exceed $10—$1.

If the duty chargeable on the original exceeds $10 but does not exceed $20—$2.

If the duty on the original exceeds $20—$3.

Provided that such duplicate or counterpart stamp shall be affixed upon the production of the original deed, instrument, or writing bearing its proper stamp, and not otherwise.

18. Lease or agreement for a lease made for a term of years, or for a period determinable with one or more life or lives or otherwise contingent, in consideration of a sum of money paid in the way of premium, fine, or the like, if without rent—The same ad valorem stamp as on a conveyance. See Article 13.

19. Lease or agreement for a lease of any land, house, building, or tenement, at a rent without any payment of any sum of money by way of fine or premium:—

	When the Lease is for a period not exceeding one year.	When the Lease is for a period exceeding one year.
When the rent calculated for a whole year shall not exceed in value ...	$100	$0.50	$1.00
Above $100 but not exceeding	250	1,00	2.00
" 250 "	500	2.00	4.00
" 500 "	1,000	4.00	8.00
" 1,000 "	2,500	10.00	20.00
" 2,500 "	5,000	20.00	40.00
and for every additional 1,000 or any part thereof		5.00	10.00

20. Lease or agreement for a lease of any land, house, building, or tenement, stipulating for a rent granted in consideration of a fine or premium—A stamp of value equal to the joint value of the stamps for conveyance in consideration of the fine and a lease for the rent.

Note.—A lease, executed in pursuance of a duly stamped agreement for the same, shall require a stamp of one dollar only, to be affixed on production of such agreement.

21. Every instrument in writing under seal not otherwise specially charged with duty under this schedule—$10.

GENERAL EXEMPTIONS.

Any deed, instrument, or writing of any kind whatsoever, made or executed by or on behalf of Her Majesty, or of any department of Her Majesty's service, or whereby any property or interest is transferred to or any contract of any kind whatsoever is made with Her Majesty or any person for or on behalf of Her Majesty or any such department as aforesaid.

Note.—The foregoing exemption does not extend to any deed, instrument, or writing, executed by the Registrar of the Supreme Court as official administrator, or by a receiver appointed by any court; neither does it extend to a sale made for the recovery of an arrear of revenue or rent or in satisfaction of a decree or order of Court, in any of which cases the purchaser shall be required to pay in addition to the purchase money the amount of the requisite stamp.

When of several deeds, instruments, or writings, a doubt shall arise which is the principal, it shall be lawful for the parties to determine for themselves which shall be so deemed.

In any case, however, where there are more deeds than one, every other deed than the principal requires a stamp of two dollars, and every such collateral deed shall specify by its contents which other is the principal deed.

Any deed, instrument, or writing required by the foregoing schedule to be stamped may be written on one or more stamps if the value of the stamps used amount to the value required by the schedule.

*** *An appendix to the schedule states that for the first six months the duty on bank-notes shall be two-thirds of one per cent. per annum, and 75c. on three months' bills of exchange, and the maximum on mortgages, &c., $25, to cover any value.*

SHANGHAI MERCHANT STEAM MARINE.

(Shanghai News Letter.)

The following list gives the names of all the steamers running to and from this port, with their signal numbers prefixed, as indicated upon arrival by Marryatt's Code of Signals from the mast heads of the opium receiving ships. The different steam companies are also indicated, together with the tonnage of their vessels, names of commanders, and the usual days of despatch hence to their several ports of destination:—

Pacific Mail Steamship Company.

No. 15, Costa Rica, 2,200 tons, Capt. W. G. Furber, leaves Shanghai on or about the 15th of each month for Yokohama, *via* Nagasaki and the Inland Sea, there to connect with the company's steamers Colorado, 3,357 tons, Capt. Smith; Great Republic, 4,000 tons, Capt. Doane; China, 4,000 tons, Capt. Bradbury; for San Francisco, and New York *via* Panama by company's steamers.

Peninsular and Oriental S.N. Company.

No. 32, Ganges, 742 tons, Capt. Bernard.
No. 35, Cadiz, 481 tons, Capt. Edmond.
No. 37, Aden, 507 tons, Capt. Andrews.
No. 39, Malacca, 1,683 tons, Capt. Tomlin.
No. 40, Sunda, 1,260 tons, Capt. Soames.

Despatch hence about the 7th and 24th of every month, carrying the English mail, *via* Suez.

Messageries Imperiales.

Dupleix, 871 tons, Capt. Noel.
Phase, 850 tons, Capt. Hinstin.

Despatched about the 20th of each month with the French mail *via* Suez.

Holt's Line.

Agamemnon, 1,587 tons, Capt. Middleton.
Achilles, 1,550 tons, Capt. Russell.
Ajax, 1,500 tons, Capt. Kidd.

Leaving Shanghai every other month for London *via* Cape of Good Hope, calling at Hong Kong, Singapore, Penang and Mauritius.

Shanghai Steam Navigation Company.

No. 1, Fire Queen, 1,500 tons, Capt. Horatio N. Gray.
No. 2, Plymouth Rock, 1,721 tons, Capt. Chas. E. Simmons.
No. 3, Hirado, 1,200 tons, Capt. Robert McQueen.
No. 4, Fusi Yoma, 1,209 tons, Capt. James Hardy.
No. 5, Kiangloong, 1,100 tons, Capt. W. West.
No. 6, Moyune, 1,233 tons, Capt. Geo. C. Johnson.
No. 7, Tahwah, 590 tons, Capt. G. W. Andrews.

Despatched from this in their turn every Tuesday, Thursday, and Saturday evenings for Chinkiang, Kiukiang, and Hankow, stopping at intermediate ports for Chinese passengers, and connecting with the Tientsin and Hong Kong lines.

No. 8, Lamont, 780 tons, Capt. Oliver C. Spencer.
No. 9, Shanse, 1,100 tons, Capt. A. F. Friend.
No. 10, Szechuen, 1,200 tons, Capt. A. M. Bisbee.

Leaving this on or about Wednesday and Sunday mornings for Chefoo and Tientsin.

No. 13, Kiangse, 1,086 tons, Capt. W. C. Law.

Leaving on Monday, Wednesdays, and Fridays at 4 P.M. for Ningpo.

Messrs. Russell and Co.'s Steamers.

No. 14, Yunghaian, 547 tons, Capt. H. Morrison, leaving for Hong Kong fortnightly.

No. 12, Manchu, 895 tons, Capt. A. H. Clark, running to Chefoo and Tientsin, completing the semi-weekly line in connection with the S.S.N. Company's three steamers above-mentioned.

Messrs. A. Heard and Co.'s Steamers.

No. 21, Suwonada, 1,200 tons, Capt. Jayne.
No. 45, Erl King (chartered), 1,044 tons, Capt. J. Pinel.
No. 47, Fung Shuey, 987 tons, Capt. J. S. Watson.

Leaving here about twice a month for Hong Kong direct.

Union Steam Navigation Company.

No. 18, Rona, 784 tons, Capt. Hutchinson.
No. 28, Tunsin, 610 tons, Capt. Hewlett.

Leaving every Thursday at daylight for Chinkiang, Kiukiang, and Hankow, calling at Nanking, Ngankin, and Tatung, and connecting upon return trips with steamers at Shanghai for the northern and southern ports and Japan.

Messrs. Glover and Co's. Steamers.

No. 31, Fusi Yama, 710 tons, Capt. Callaghan.
No. 43, United Service, 750 tons, Capt. W. Stocks.
Kiushiu, 786 tons, Capt. R. Hoole.

Running between Shanghai, Hong Kong, and Calcutta.

No. 16, Miaca (chartered), 306 tons, Capt. Sutherland.
No. 24, Nanzing, 419 tons, Capt. A. Tulloh.
No. 25, Yingtsefee, 319 tons, Capt. L. B. Drage.

Despatched hence for Chefoo and Tientsin Twice a Month.

Prince Kung, 135 tons, Capt. Wm. Brown.

In the Foochow Trade.

No. 17, Glengyle, 1,265 tons, Capt. T. B. Hooper, running between this and Hong Kong and Canton. Messrs. Jardine, Matheson, and Co., agents.

No. 25, Express, 290 tons, Capt. Whitelaw, despatched every Tuesday, Thursday, and Saturday for Ningpo. Messrs. D. Sassoon, Son, and Co., agents.

Thales, 774 tons, Capt. R. Bramwell.
Lightning, 316 tons, Capt. D. Rodger.

In the Japan Trade. Messrs. Gibb, Livingstone, and Co., Agents.

No. 46, Osaca, 417 tons, Capt. Burdis.
No. 30, Feloong, 260 tons, Capt. Pritchard.

Running Weekly to Nagasaki.

No. 27, China, 184 tons, Capt. Muller, running from this to Hong Kong. Messrs. Siemssen and Co., agents.

Tug Boats.

Bunker Hill, 63 tons, Murray; Primrose and Co.
Fohkelin, 70 tons, Koford; D. Patridge.
Samson, 81 tons, Ryder; McKenziege.
Maggie Lauder, 180 tons; McKenziege.
Titan, 90 tons, Loberge; S. Kenned.

LATEST TELEGRAMS.

(Received via Galle, Dec. 6.)

CHINA.

Hong Kong, Nov. 15.

Grey shirtings, 6¼ catty, $3.25. Water twist, 16-24, $165.

Tea, firmer, and moderate demand. Total export, 87,500,000lb.

Exchange on London, six months' bank bills, 4s. 4d.

Shanghai, Nov. 9.

Grey shirtings, 6½ catty, 2.6.0 taels.

Tea—Congou, large speculative sales.

Silk higher—No. 3 Tsatlees, 520 taels; settlements in fortnight, 3,500 bales; export to date, 33,000 bales.

Exchange on London, six months' bank bills, 6s. 1d. The return to the six months' usance by the banks has caused a heavy fall on the exchanges.

The Spanish Government has issued a decree, dated Madrid December 11, abolishing the duty on the importation into the Philippine Islands and Porto Rico of cattle, flour, grain, oil, machinery, and some other articles.

We understand that the proposal for the formation of a special corps for Hong Kong for which the necessary sum was voted during last session, and appears in the estimates for the year, has been abandoned by the Government. A regiment from Bombay will shortly be removed to Hong Kong, and the Ceylon Rifles at present on duty there will then be ordered to Singapore.

BIRTHS, MARRIAGES, AND DEATHS.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Barnes—On the 9th Oct., at Shanghai, the wife of F. D. Barnes, Esq., of a son.

Bowra—On the 3rd Dec., at 15, Longton-grove, Sydenham, the wife of Frederick William Bowra, of a son.

Bush—On the 1st Sept., at Newchwang, North China, the wife of Henry Edward Bush, of a daughter.

Frommurze—On the 29th Oct., at Singapore, the wife of Cursetjee Frommurze, of a daughter.

Morice—On the 1st Dec., at No. 8, Inverness terrace, Hyde-park, the wife of John Warden Morice, Esq., of a son

Skinner—On the 31st Oct., at Singapore, the widow of Mr. Archibald Skinner, of a daughter.

Smith—On the 20th Sept., at the Wesleyan Mission, the wife of Dr. F. Porter Smith, of a son.

Trautman—On the 4th Dec., at Carlsruhe, Baden, the wife of J. F. H. Trautmann, Esq., of London and Shanghai, of a daughter.

MARRIAGES.

Brown—Wright.—On the 12th Dec., at Kilnford, Dundonald, Ayrshire, by the Rev. John Sime, Matthew Brown, Esq., merchant, Glasgow, to Mary, eldest daughter of James Wright, Esq., Kilnford.

Carter—Norton.—On the 5th Dec., at St. Peter's, Bayswater, by the Rev. John Robbins, M.A., Charles Edward Carter, Esq., of Shanghai, China, to Annie, eldest daughter of the late George Norton, Esq., of Leeds.

Wood—Kinder.—On the 17th October, at the Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, Thomas Wood, Lieutenant Royal Artillery, third son of Thomas Wood, Esq., Coxhoe Hall, county of Durham, to Alice Mary, eldest daughter of T. W. Kinder, Esq., Captain 3rd West York Militia, Master of the Royal Mint, Hong Kong.

DEATHS.

Carlyon—On the 11th Oct., at Shanghai, of dysentery, Reginald F. Carlyon, Esq., Master H.M.S. Rattler.

David—On the 18th Oct., at Hong Kong, after a severe illness, Mons. C. Vergiere David, aged 29 years.

Evans—On the 25th Oct., at Portland-place, Hongque, Shanghai, of typhoid fever and pleurisy, Henry, only son of Henry Evans, Esq., proprietor of the Empire Brewery and Union Bakery, aged 21 years.

Gallaghan—On the 10th Oct., at Shanghai, Capt. John Gallaghan, barque Salacia, of Melbourne, formerly commander of the Isabella Brown, aged 43.

Gibson—On the 23rd Oct., at Shanghai, Emily, the wife of John Gibson, Esq., barrister-at-law, Interpreter H.M.'s Consulate, Hankow.

Jones—On the 28th Nov., at Grange House, Bromley, Kent, Grace Trevor, the beloved wife of Alfred Orlando Jones, M.D.

Leisk—On the 27th Nov., at Southampton, Thomas Drever Leisk, Peninsular and Oriental Service, aged 26.

Prichard—On the 7th Oct., at Shanghai, of dysentery, Henry J. Prichard, Esq., R.N. H.M.S. Cockchafer.

Winchester—On the 11th Oct., at Shanghai, Jane Blake, the wife of C. A. Winchester, Esq., H.B.M.'s Consul.

Commercial Report.

CHINA AND JAPAN IMPORTS.

Yokohama.—Yarns 28 to 32's have more than maintained their position, having been worth $74 to $75 during the fortnight; they have since receded, but at the close were firm at last mail's rates. Stocks are now very small. There is a tendency to weakness in Grey Shirtings, but not fall has been established. Black Velvets continue in strong demand, but we cannot raise our quotation, and the demand for Taffachelass has continued, some 12,000 pieces having been sold at the prices we give, which are unchanged from those of last mail. All other cottons are quiet and prices nominal. Woollens are slightly more depressed than before, the demand for SS Camlets being less brisk, and very little is doing in any other description of goods. Black and Scarlet Long Ells are almost the only exception to this remark; they have slightly improved. Quotations are:—Cotton Yarn, No. 16 to 24, $68 to 69; 28 to 32, $72 to 74; 38 to 42, $74 to 75. Grey Shirtings, 7.0 lbs. catty, $3.20 to 3.30; 8.4 catty, $3.60 to 3.70; 8.6 to 8.8 lbs., $3.70 to 3.75.

Shanghai.—Soft Goods: A fair business has been maintained, Grey Shirtings the chief article dealt in, 8 lb. 4 oz. having the call, the lighter weights in less demand. White Shirtings: Small inquiry, and prices drooping. T-Cloths are still neglected. Woollens seem to have gone out of demand, sales being made with difficulty at unremunerative rates. Metals: There is no change to report, a current business doing at former quotations, with no increase to stocks since our last. Iron Nail Rod still commands 280 to 290 tls. Coals: The Lota from Sydney, arriving on the 20th October, increased the supply of Australian, and prices for this, Japan, and Formosa Coal, rule lower. The Russian Coal ex Hanover has been offered for public competition and knocked down at 5.5 tls. per ton. It appears to rank with Japan and Formosa yields. The quotations are:—G. E. Grey Shirtings, 7 lbs. at 2.2.5 to 2.3.5 tls.; 8¼ to 8½ lbs. at 2.5.5. to 2.6.2; 9 to 9½ lbs. 2.7.5 to 3.3.5. G. E. White Shirtings, 56 reed, 2.2.5 to 2.3 tls.; 60 reed, 2.3.5 to 2.4; 64 reed, 2.4 to 2.4.5; 66 reed, 2.5 to 2.8. American drills, 40 yards, 15 lbs., 4.1 to to 4.2.5 tls. American jeans, 30 yards, 10½ lbs., 3)7.5 to 3.8 tls. American sheetings, 40 yards, 15 lbs., 4.2 to 4.3 tls. English drills, 40 yards, 12 to 15 lbs., 3.7 to 4 tls. T-Cloths, 6 to 7 lbs., 32 inches, 1.5.5 to 2.3 tls.; 8 to 8½ lbs., 36 inches, 2.5 to 2.7 tls.

Hankow.—Since the 3rd October the business of this port has continued in an unsatisfactory state. The demand has been chiefly local, and tightness of money in the city, and the reported weak state of many of the native banks, have interfered considerably with credit.

Canton.—Very little has transpired in the import market during the fortnight. Rates for Cotton have ruled much as last advised, and Lead shows an upward tendency.

Hong Kong.—Very large auction sales of sea-damaged Yarn have taken place, and sound goods of that sort have therefore been thrown somewhat in the shade; the biddings at the more recent auctions have shown a better demand, notwithstanding the large quantity sold. Settlements of about 100 bales of sound goods are also reported. Quotations last mail were almost nominal, and they cannot be advanced, although the market is certainly firmer; this may have been caused in some measure by a demand which has ruled for the higher numbers of Yarn for shipment to Japan, about 800 bales of Nos. 28/32 and 38/42 having been shipped off during the month. An improvement in the demand for Grey Shirtings has also taken place, although no advance in rates can be reported. A fair business has, however, been transacted, chiefly in 8¼ lbs. goods, at former currencies, and holders have been glad to meet the market. T-Cloths are likewise in a better position, being very scarce with an increased demand; $2.80 to 2.85 is readily obtainable for 7 lbs. goods, both on the spot and to arrive, although, in view of the large sendings, the dealers will make no offers for shipments not yet due. $3 has been paid for some 7 lbs. T-Cloths of superfine quality. White Shirtings remain a "dead letter" as before, and Fancy Cottons are also unchanged with little or no demand. Raw Cotton: The market has continued very much as before; arrivals have been moderate, stock very large. Sales on about the same scale as last, and prices weak, though no material decline is noticeable. This does not, however, apply to the finest parcels of Indian staple, for which the dealers pay fully $½ to 1 over the rate current for common qualities. There is a rumour that a rather serious combination is on foot among the cotton dealers; it is said to emanate from the Cotton Guild in Canton, and designs in a great measure to deprive Hong Kong of its character as a mart for the staple, by binding the dealers to purchase no more cotton at Hong Kong, but only to treat for it in Canton after shipment thence. It remains to be seen what will be the effect of this attempt to resuscitate the trade of that port at the expense of this colony. Woollens: No improvement in the demand for Woollens can yet be announced; the market remains very flat, and although clearances considerably exceed last fortnight's, this has been effected chiefly by forcing off goods at a reduction in price. Metals: 10,000 bundles Nail Rod Iron have been settled (including 4,000 "to arrive") at former rates. Lead continues firm with a good demand in Canton. Coals: English Coals has been sold ex Godown, at $14 per ton, and three cargoes of Welsh and English "to arrive" at $15 per ton. This indicates a firmer feeling in the market. Quotations are:—Cotton Yarn per picul, No. 16 to 24, $165 to 175; No. 28 to 32, 180 to 190; No. 38 to 42, 185 to 195. Shirtings, grey, 7 lbs. piece, $2.50 to 2.65; 8.4 lbs., 3.10 to 3.25; 9.10 to 12 lbs., 4.40 to 5. Shirtings, white, 52 to 56 reed, $2.30 to 2.50; 64 to 66 reed, 3.10 to 3.55; 68 to 72 reed, 3.60 to 3.75. T-Cloths, 6 to 6.12 lbs., 32 inches, $2.25 to 2.35; 7 lbs., 2.70 to 3; 8 lbs., 36 inches, 3.45 to 3.60. Shirtings, white spotted, $3.45 to 3.55. Shirtings, Dyed, $4.20 to 4.25. Turkey Red Shirtings, 3 lbs., $3.10 to 3.50.

CHINA AND JAPAN EXPORTS.

TEA.

Yokohama.—We have no later market advices than those brought by the French mail.

Shanghai.—Black Teas: For some days after the departure of the last mail the market remained quiet, with a weaker tendency; later on, business was resumed at higher prices, and since then the market has again assumed a quiet appearance, and rates are rather easier. The better descriptions of Tea have been bought at an advance of from 1 to 2 taels per picul; inferior kinds have risen in value about 1 tael. The market is now several taels higher than it was two months since. The stock on offer is generally undesirable. The settlements for the fortnight have been 9,600 chests at 11¾d. per lb. for common Hohow, 1s. to 1s. 1d. for common to fair Oonam, 1s. 1¼d. to 1s. 4d. for common to fair Ningchow, and 1s. 2½d. to 1s. 4¾d. for common to fair Oopacks. Green Teas: An extensive business has been transacted, almost entirely on New York account, at advanced rates. Finest Moyunes and Teenkais have been taken up to 44 taels per picul, and show a further advance of from 1 to 2 taels. Fychows have been bought at 28.2.5 to 36 taels, and Pingsueys for shipment to England at 29.2.5 to 32.5.0 taels. Pingsuey Teas have rather yielded in value. Common Fychows drooped slightly, but have since recovered their former level. The stock is again increased, notwithstanding the large nature of the purchases. The settlements for the fortnight have been 56,000 half-chests.

Hankow.—Business has been restricted only by the firmness of holders and the undesirable nature of the stock on offer, for a good demand has existed throughout the past fortnight. Prices of all kinds must be considered one tael higher. Quotations were—Oopacks, common to fair, 13.5 to 17.1 taels; Oonams, common to fair, 11.2.5 to 14.5 taels.

Foochow.—Congou: Settlements have been continued on a more moderate scale at very irregular prices. The inferior quality of the teas causes purchases generally to show worse value than before. Souchong: Nearly 5,000 chests have been taken at advancing rates, the larger proportion

Digitized by Google

being of common quality for shipment to America. Oolongs: About 18,000 packages have found buyers at prices which show no material alteration on the opening rates for America, advised in the last report. Flowery Pekoe: There has been some inquiry, and settlements amount to about 400 chests. Scented Teas: The unsold stock is now reduced to a little over 2,000 boxes, including dust. It is improbable that much more will come forward during the remainder of the season.

KIUKIANG.—Black Teas: Between 5,000 and 6,000 packages had arrived from the country during the fortnight, nearly the whole of which had been sent on to Shanghai, no settlements being reported, and only 1,200 packages remaining in stock. Green Teas: Arrivals had been very heavy, amounting in all to 37,000 packages, some 11,000 of which had been bought on the spot at the equivalent of Shanghai taels 27 to 41 for common Tuckhings to fine Moyunes. The reduction last quoted in medium kinds had been recovered, and an advance of fully one to two taels paid for fine Moyunes. The stock comprised only 4,700 packages.

CANTON.—Six chops of Country Congou have arrived at market since our last advices; one, a common mixed Oonam, has been taken for India at 21 taels. The stock consists of nine chops and a half, besides a chop of Canton-packed Congou, making an aggregate of 5,500 packages. In Country Greens there is no change to note. Canton-made Teas: A moderate business in Scented Teas has continued, and prices remain unchanged, and at a reasonable range, but the stock of leaf is much less plentiful. The Scenting Flower continues cheap; all reported settlements of Scenteds are intended for the London market. Quotations:—Country Congous, 21 taels; Canton Congou, 21 to 25 taels; Scented Orange Pekoes, 21 to 33½ taels; Scented Capers, 12 to 25 taels; Gunpowder, 15 to 25 taels.

SILK.

SHANGHAI.—During the fortnight only a moderate business has been transacted in the Silk market, owing to the unfavourable telegraphic advices received from home within the past two weeks. Prices have again declined fully taels 15 to 20 for Market and lower Tsatlees, taels 10 to 20 for Karshing Taysaams, taels 5 to 10 for "Chin Cum" do., taels 15 to 20 for Hainings and Yuenfas, taels 10 to 20 for Hangchow Tsatlees, taels 10 to 15 Sewhings, taels 20 to 25 for Laeyongs—and at these reductions the market appears weak, the dealers evincing great anxiety to realise before the arrival of further advices from England. The settlements are estimated at 3,000 bales. Of the transactions, a portion went forward on joint account with the natives, and a smaller proportion has been bartered against imports, so the actual purchases do not exceed 1,200 to 1,500 bales, and consist chiefly of the lower numbers of Tsatlees and Taysaams. The arrivals from the interior for the fortnight are estimated at barely 1,000 bales, and from Hankow and Ningpo about 180 bales have been received; the unsold stock, consequently, is reduced to about 4,000 bales, the greater proportion of which consists of the lower descriptions of Tsatlees, Taysaams, and Hainings, amongst which are many parcels much mixed with second crop and inferior silk.

EXCHANGES ON LONDON.

[For dates, see first page.]

At	Bank. 4 months' sight.	Bank. 6 months' sight.	Private. 4 months' sight.	Private. 6 months' sight.
Yokohama	4s. 4¾d.	4s. 5¼d.	4s. 5¼d.	4s. 6¼d.
Shanghai	6s. 1d.	6s. 1¼d.	6s 1¼d to 6s 2¼d.	6s. 2¼d to 6s. 3d.
Canton, Hong Kong, Macao	4s. 4¾d.	4s. 4¾d.	4s 5d to 4s 5¼d	4s 5¼d to 4s 6d.
Singapore	4s. 4¼d.	4s. 5d.	—	4s 5¼d to 4s 5½d.
Manila	—	4s. 3d.	—	4s. 4d.

At Shanghai, bills on India, Rs. 302 to 303 per 100 taels. At Hong Kong, Rs. 218 per $100. Bar Silver at Shanghai, taels 111.4.0; at Hong Kong, 11¼ per cent. premium. Mexican dollars at Shanghai, tls. 72.2.0 per 100; and exchange on Hong Kong, 29 discount. Bous at Yokohama, 321 to 322 per $100. Hong Kong and Shanghai Bank shares, new, 1½ dis.; Gas Company, par; Hong Kong and Whampoa Dock, 10 to 16 per cent., prem.; Union Dock Company, 35 per cent. dis.; China Traders' Insurance, $250 per share premium.

The following is from Messrs. Sharp and Co.'s Circular:—

Exchange.—A more active business has been done in exchange during the past fortnight, at slightly advanced rates. The demand for Bank Bills has, however, been very small, and buyers of sterling have for the most part availed themselves of six months' credit bills. Private paper at four months' sight has not been obtainable as usual, and the banks therefore, whose self-imposed restrictions preclude them from buying six months' paper, have been unable to operate in exchange. It is quite evident that unless the allied banks desire to abandon all interest in the exchange business of Hong Kong they must revert to the six months' usance. The experiment of the past year has proved a costly one, and in their own interests it is to be hoped that so clearly an error in judgment will be repaired before the commencement of another year. The estimated amount of business by the present opportunity amounts to about £470,000—say £150,000 Bank paper, and £320,000 private bills.

Bullion.—Since the departure of last mail, Bar Silver to the value of $300,000, has been received from San Francisco, the greater part of which has found buyers at 11¼ per cent. premium. There is now but little left in the market, which is also quite bare of Sycee, and only a nominal quotation of 9 per cent. premium can be given.

Shares.—The business of the fortnight in all descriptions of stocks has been on rather a limited scale. Old Bank, which were last quoted at 1½ per cent. discount, have gradually improved with only a few transactions, and are to-day in good demand at ½ per cent. premium, with no sellers. New Bank are wanted in large quantities at 2 per cent. discount, several large lots, however, have been settled during the fortnight at 1½ per cent. discount, and there are now buyers at this rate. Old and new Whampoa Dock are in demand at quotations, but there are no sellers. There are buyers of Union Dock at 37½ per cent. discount, and one lot of five shares is reported during the fortnight at 40 per cent. discount. The report of the referees in regard to work on the dock of Kowloon has been published, and the former engineers discharged on the strength of that report. The shares however do not appear to have been influenced by this, and are firm to-day. There have been no transactions in steamboat shares. There are large buyers of Hotel shares at 70 per cent. discount, but no transactions are reported for the fortnight. Holders are very firm in expectation of an improvement, since there is every prospect of the building being opened by the beginning of the year.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—None.

At HONG KONG and CANTON.—None.

At MANILA.—From Newcastle, Oct. 17, Cassiterides.

At SINGAPORE.—From Liverpool, Oct. 28, Dunmore; from Cardiff, Nov. 4, Gertrude; from Newport, Oct. 27, Isabella; from Sunderland, Nov. 4, Ann Adamson; from Freemantle, Oct. 28 Sea Ripple.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—For New York, Oct. 9, Pauline.

From SHANGHAI.—For London, Oct. 25, Dartmouth; for New York, Oct. 7, Onsuri; 11, Amicus; 17, Costa Rica (str.)

From FOOCHOW.—For London, Oct. 21, Cleveland, Belle; for Bristol Channel, Oscar Vidal; for New York, 22, Warren Hastings; 23, Samuel Russell, Caller Ou; for Boston, 23, Thomas Brown.

From AMOY.—For New York, Oct. 3, Meta; 6, Arctic; 15, Stanley; 23, Joachim Christian; 23, N. B. Palmer.

From HONG KONG and CANTON.—For Falmouth, Oct. 24, Ellida; for Suez, Malacca (str.); for New York, 26, Magnet.

From MANILA.—For New York, Oct. 14, Asa Eldridge; for Boston, 19, Sooloo.

From SINGAPORE.—For London, Nov. 5, Unrivalled, Flora; for Liverpool, Oct. 23, Eastern Chief; for Boston, 26, Bessie Stanton.

At PENANG.—None.

VESSELS LOADING.

At YOKOHAMA.—For New York, Swanley.

Digitized by Google

At SHANGHAI.—For London, Elmstone, Ethiopian, John Lidgett, Zodiac, Emperor, Minnie, Tamerlane, Tyburnia, Vigil; for New York, Resolute, Burnside, Fairleader, Silome, Wild Gazelle (all full), Ensign, Etha, Rickmers, Madura, Royal Berkshire, Yeavering Belle.

At FOOCHOW.—For London, Finzel (full), Laurel, Cora Linn, Hotspur; for New York, Meteor, Ocean Chief.

At HONG KONG and CANTON.—For London, Chetah (full), Corea, Auburn; for New York, Nellie Chapin, Lizzie, Adelia Carlton.

At MANILA.—For London, Elentheria, Fortuna; for Cork, Doriga, Ercilla; for Copenhagen, Havfruen; for Hamburg, Voladoro; for Cadiz, Concepcion; for New York, Ashburton; for Boston, Herald.

At SINGAPORE.—For London, Ann Adamson; for Glasgow and Liverpool, Bothwell Castle; for New York, Dunmore.

At PENANG.—For Bordeaux, Imperatrice Eugene; for Boston (via Padang), Rainbow.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London there is no vessel on the berth. To New York, per sailing vessel, the rate is quite nominal. Per steamer $45 per ton.

At SHANGHAI.—Vessels on the berth are loading for London at £3 per ton of 50 cubic feet; for New York, £3 per ton of 40 cubic feet. There is less inquiry for tonnage to the northern ports.

At FOOCHOW.—To London, £3 10s. per ton, of 50 cubic feet. To New York, £3 10s. per ton, of 40 cubic feet.

At HONG KONG and CANTON.—In consequence of scarcity of tonnage freights have somewhat improved, and diengaged vessels on arrival speedily find employment. For London, the Auburn is loading at Whampoa, at £3 10s., and the Chetah and Corea are engaged full at £2 15. The circular of Geo. Holmes, quotes: several charters to load for the U.K. from Manila, at £3 5s. to £3 12s. 6d., dry sugar or hemp, if from Zebu, £3 17s. 6d. For Bangkok and back the rates are 47½ to 52½ cents per picul.

At MANILA.—The only settlement to report is the Elentheria, having engaged 900 tons wet and dry sugar, at £3 10s. per 20 cwt. for London.

At SINGAPORE.—There is a good demand for tonnage both for home and coasting. The Bothwell Castle is on the berth for Liverpool at £3 all round, and £3 5s. for Glasgow; the Ann Adamson has obtained an advance on last rates, and has engaged a full cargo for London at £3 5s. per ton. The following charters have been made:—Lammermuir (Brit.) 1,050 tons, to load rice at Bangkok for London, at £3 12s. 6d. per ton. Dunmore (Brit.) 439 tons, to load hence to New York, at £3 5s. for dead weight, and £3 10s. per ton for light freight.

At PENANG.—There is no inquiry for tonnage.

COMMERCIAL POSTSCRIPT.

The steamship *Achilles* arrived in the river yesterday with a large cargo of teas, having completed the voyage from Hong Kong in seventy days including stoppages. The teas from this vessel have not yet been placed on the market, but a portion will be offered on the 16th inst.

ARRIVALS NOT IN THE TABLES.—Dec. 7, off Dungeness, from Batavia, Stad Dokkum; 6, at Hamburg, from Foochow, Chusan; 10, at Falmouth, from Rangoon, Jorgen Bruhn, Antipodes; at Liverpool, from Singapore, Huntly Castle; 8, at Texel, from Batavia, Elizabeth and Jacoba; from Samarang, Stad Leyden; at Brouwershaven, from Batavia, William Poelman, Medea; 10, at Falmouth, from Akyab, Andreas; from Rangoon, D'Elmina; 11, from Akyab, Rutlandshire; at Liverpool, from Singapore, Edinburgh Castle; at Falmouth, from Moulmein, Persian; 12, at London, from Shanghai, Silver Eagle; 10, Off Dungeness, from Batavia, Cornelia Adolfina; 11, at Liverpool, from Rangoon, British Sovereign; 10, at Havre, from Rangoon, Minerva; 13, at London, from Shanghai, &c., Achilles (s.s.); from Rangoon, Seringapatam; at Deal, from Penang, Benvenue; 10, at Brouwershaven, from Batavia, Ida Elisabeth; 14, at London, from China, Hoang Ho; 13, at Falmouth, from Rangoon, Tarquin.

DEPARTURES.—Dec. 9, from London, for Penang, Ceylon; 7, from Liverpool, for Singapore, Panuco; 8, for Hong Kong, Everest; from Rotterdam, for Batavia, Nederland and Oranje; Dec. 9, from Cardiff, for Shanghai, Tony; 11, from London, for Newport and Singapore, Moneka; 9, from Swansea, for Hong Kong, Eleanor; 6, from Liverpool, for Yokohama, Westminster; 8, for Hong Kong, Mataura; from Cronstadt, for River Amoor, Sago; from Rotterdam, for Padang, Karel August; 9, from Newport, for Singapore, Cyclone; from Hamburg, for Singapore, Ravel (?); 10, from Shields, for Ceylon, Hollinside: 7, for Batavia, Anna; 12, from Newport, for Singapore, Eudora; 12, from Shields, for Galle, Collingwood.

LAID ON.—At Glasgow, for Samarang and Sourabaya, Glenclune; for Batavia and Sourabaya, City of Perth; at Liveroool, for Hong Kong (via) Newport, Young England.

SPOKEN.—Recife, Liverpool to Japan, Oct. 27, 2 N., 24 W.; Edinburgh Castle, Singapore to Liverpool, Nov. 17, 39 N., 34 W.; Silver Eagle, Shanghai to London, Nov. 13, 36 N., 35 W.; Lord Macaulay, Cardiff to Shanghai, Dec. 3; Guurtje en Maria, Batavia to Amsterdam, Nov. 9, 22 N., 34 W.; Gaspee (Amer. ship), Cardiff to Shanghai, Oct. 10, 25 S., 27 W.; Spindrift, London to Shanghai, Oct. 16, 19 S., 28 W.; Stephen Lurman, Hamburg to Hong Kong, Sept. 12, 39 S., 27 E.; Alexandra, Cardiff to Japan, Sept. 12, 39 S., 27 E.; Rocket, Boston to Batavia, Oct. 15, 23 N., 34 W.; Miranda, for Galle, Oct. 22, 4 S., 29 W.; Anna and Sophia, for Sourabaya, Oct. 15, 22 S., 31 W.; Pudsey Dawson, Liverpool to Galle, Oct. 28, 7 N., 29 W.; Zwaan, Batavia to Amsterdam, 98 days out, lat. 42, long. 36; Jacoba, South Shields to Batavia, Oct. 6, 2 S., 19 W.; Mount Stuart Elphinstone, London to Galle, Oct. 13, 35 N., 19 W.; Emerald, Manila to Queenstown, Aug. 23, 1 S., 129 E.; Capillina (Capiolani?), Hong Kong to Liverpool, 60 days out, 9 S., 124 E.; Harriet Maria, Batavia to Amsterdam, Sept, 22, 35 S., 18 E.; Seven Brothers, Plymouth to Hong Kong, Oct. 24, 6 N. 25 W.; Plumagana (?), Amsterdam to Batavia, Nov. 10, 12 N., 25 W.; Indian Empire, Liverpool to Singapore, Oct. 15, 2 N., 30 W.; Trelick (?), Batavia to Antwerp, Nov. 4, 15 N., 30 W.; Avon, London to Hong Kong, Oct. 25, 5 N., 22 W.

CASUALTIES.—The Cape City, Bowden, which arrived at Scilly, Nov. 25, from Colombo, with damage, having been in collision, sailed for London, Dec. 5, in tow. The Patriot Queen, from Liverpool to Singapore, has arrived off Queenstown with cargo shifted. The Panuco, which sailed from Liverpool, Dec. 7, for Singapore, grounded on the bar of Victoria Channel, but proceeded.

The Johanna, Ouwehand, from Amsterdam to Macassar, which put in at Lisbon Nov. 30, had lost bulwarks, stanchions, head, cutwater, bowsprit topmasts, &c., and sustained other damage; she was in collision on Nov. 17, in lat. 26 N., lon. 19 W., with the Ranger (barque), of Dundee, and not with a steamer as before reported.

The Philip van Marnix (Dutch ship), from Batavia to Rotterdam, ad put into Mauritius leaky, and would probably have to discharge.

Advices from Batavia state that the Quintet (Dutch ship), for Amsterdam, had been condemned, and was to be sold Nov. 18, her cargo would be transhipped to the Waterloo.

The Miranda, Moller, for Hong Hong and Shanghai, put back to Cuxhaven, Dec. 7, with loss of two anchors.

MISCELLANEOUS.—The following vessels from China are overdue:—Mary Whitridge, Silver Eagle, Niphon, Sovereign of India, Caldew Hoang Ho, Alma, and Star of China.

The Maggie Lealie, Stephen, from Foochow to London, with tea, which was taken into Batavia Oct. 21, derelict, had been recommended by surveyors to discharge her cargo.

At Fayal, November 24, Elena, Vaca, from Manila, and sailed 26, for Cadiz.

The Amazon, from Sourabaya, which put into Falmouth, Oct. 27, with damage, having been in collision, has arrived at Rotterdam, and sailed for Gothenburg; the master, mate, and one seaman, arrived off Santa Cruz de la Palma on the 15th Nov. in the Tamanlipas, Martin, from Havre, the vessel with which the Amazon had been in collision.

RE THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED)—EX PARTE J. M. SMITH.—This was an appeal from an order made by Vice-Chancellor Stuart on the 7th of November last. The above company in November, 1866, resolved on a voluntary winding-up, and this winding-up was subsequently brought under the supervision of the Court. In February, 1867, the liquidator brought an action against Mr. Smith upon a guarantee given to the company. This action was tried at the last Spring Assizes, and a verdict was found for the defendant, and a rule *nisi* obtained by the liquidator to set aside the verdict was, on the 31st May last, discharged. The costs of the action having been taxed, Mr. Smith, on the 23rd July last, signed judgment for the amount of taxed costs. A writ of *fi. fa.* was afterwards issued, under which the sheriff proceeded to take the property of the company in execution. An arrangement was then made that the liquidator should set apart a sum to answer Mr. Smith's demand. The case was afterwards argued before Vice-Chancellor Stuart, when it appeared that the company claimed a set-off against Mr. Smith in respect of some unpaid calls due from him, and they relied upon this as a defence against his demand. They also alleged that execution against a company in liquidation was altogether void under the Companies Act, 1862, sec. 163. On the other hand, as Mr. Smith's solicitor claims a lien for his cost of the action upon the sum found due for costs, it was contended that there could be no set-off. The Vice-Chancellor held that the set off must prevail, and from this decision Mr. Smith appealed. —Mr. Dickinson and Mr. Eddis appeared for the appellant; Mr. Greene and Mr. Lindley for the respondent.—Lord Justice Lord Cairns said that two questions of considerable importance had been raised. (1) It was said that, under sec. 163 of the Act any execution against the company was void to all intents and purposes, and that, therefore, neither Mr. Smith nor his solicitor could substantiate any claim; (2) that the solicitor's right must be measured by that of his client, and that the company were entitled to set-off the cost against Mr. Smith's unpaid calls. With respect to the second point, independently of the 163rd section, it was clear that in the view of a court of law there could be no set-off of a sum of money alleged to be due, but which had not in any action been determined to be due, and that, notwithstanding such claim, the defendant in the action would have been entitled to recover his costs by execution, and the Court of common law would recognise the lien of the solicitor on the sum so recovered. In that state of things his lordship thought that Mr. Smith's solicitor was entitled to come to this court just as he might have gone to the court of law, and say that he was entitled to a lien on the sum which had been set apart to answer the demand. Then it was said that the 163rd

Digitized by Google

section made the execution altogether void. His lordship would be sorry to decide that without greater consideration, as it was a question of very great importance. If it were so, then, after a winding up had commenced, the liquidator might bring any number of actions against any number of persons, and if he failed, his suit being quite groundless, the defendants must still be told that the judgment in their favour was useless, and that they must go in and prove for their costs against the company's estate. It was not, however, necessary to decide this question. Even assuming that the 163rd section applied to an aggressive proceeding on the part of the liquidator, his lordship thought that it would still be open to the defendant at law to come to this court and ask to have his costs paid to him out of the assets of the company; and, if so, his solicitor was equally entitled to ask this Court to put himself and his client in the position in which they would have been if the execution were not technically void at law. There must, therefore, be an order for payment of the amount of taxed costs of Mr. Smith's solicitor out of the fund set apart by the liquidator, and he must have his costs in the Court below out of the same fund, but there would be no costs of the appeal.

THE JAPANESE PRINCE.—The Japanese Prince, Tokugawa Mimbut you has made a long inspection of the ships of war in the harbour and dockyard of Portsmouth. The Prince, accompanied by Major Edwards, R.E., and M. von Siebold, interpreter, and suites, was received by Admirals Sir Thomas Pasley and G. G. Wellesley, C.B., Flag-Captain Hon. F. B. Seymour, C.B., Flag-Lieutenant Roger, and other officers, the Japanese standard being at the same time run up at the main royal masthead of the Port Admiral's flagship, under Royal salutes from the guns of Her Majesty's ships Victory, Duke of Wellington, and St. Vincent. The Serapis screw Indian troopship, was the first object selelected in the yard for the Prince's inspection. The magnificent proportions of this noble troop transport and the luxurious completeness of all her fittings were highly appreciated. On leaving the Serapis the Prince was conveyed on board the Royal Sovereign turret-ship, at her moorings up the harbour. Some time was spent on board this vessel in exhibiting to the Prince the mode of working the guns and turrets in action. The third turret was manned and revolved to different angles of fire with bulwarks down, the loading motions (in blank of course) and all parts of the drill being gone through. On leaving the Royal Sovereign the Prince was conveyed on board the gunnery ships Excellent and Calcutta, Captain A. Hood, C.B., and here a stay was made of considerably upwards of an hour, the Prince exhibiting much interest as the various descriptions of ship's ordnance, from the 12-ton rifle on its costly iron carriage and slide, down to the latest converted "Palliser," were explained to him by the officers of the gunnery establishment. Some very effective shell firing was made from the port broadside of the Excellent at 1,200 yards range, in independent firing and in volleys. On leaving the Excellent the Prince proceeded to the Admiralty-house, the official residence of Admiral Sir Thomas Pasley, where he took luncheon. After luncheon the Prince, accompanied by the same officials made a tonr of the dockyard, and went ou board the armour-plated hydraulic propelled gun vessel Waterwitch, the armour-plated turret-ship Scorpion, and other vessels; afterwards visiting the woodmills, where Brunel's wonderful block-making machinery was seen at work in all its marvellous efficiency and accuracy of motion. The steam factory with its noble collection of machinery was visited, and thence to the armour-plate workshop was but a natural sequence. The last part of the dockyard visited by the Prince was the great iron foundry, and there he stayed sufficiently long to see several lots of molten iron drawn off from the cupola furnaces and poured into a row of large moulds, which stood in readiness for the operation. On leaving the Serapis and the Excellent, and on several occasions through the day, the Prince expressed, through M. von Siebold, his gratification at the courtesy and attention shown to him. It may also be observed here that every official who came in personal contact with the young Prince on board any of the ships or in the workshops of the yard was much impressed by his evident keen intelligence, and the shrewdness and pertinence of the many inquiries made by him through his interpreter.

ROYAL GEOGRAPHICAL SOCIETY.—In addition to the letters respecting Dr. Livingstone read at the last meeting of the society, an interesting and important memoir "On a Journey through Central China, from Canton to Hankow," by Mr. A. S. Bickmore, was read and discussed. The author left Canton on the 7th of August, 1866, with the intention of following a route proposed for a future railway to Hankow, via Quei-lin and the banks of the Siang affluent of the Yang-tze. Travelling up the Si-kiang to Wu-chan, he ascended the Cassia river to Hingnan, and near that place found that this northern affluent of the Canton river was connected by an artificial canal with the great Siang river, flowing northward into the Yang-tze. It being autumn, and the season unusually dry, the upper courses of both the Cassia and the Siang were encumbered by rapids; at other times he believed it would be possible to travel from Canton through the interior of China to Shanghai in the same boat. Near the populous city of Quei-lin Mr. Bickmore narrowly escaped massacre at the hands of the unruly populace, notwithstanding the protection afforded him by the Mandarins. The whole country had been in a state of anarchy since the Taiping rebellion, and even boats belonging to the Imperial Government, with Mandarins on board, were frequently plundered by hordes of ruffians on the banks of the river. Thenceforward his Chinese guides kept him closely confined in his boat, that he might escape observation and reach the Yang-tze in safety. The canal connecting the Yang-tze basin with that of the Si-kiang can only be used by boats drawing 2ft. of water. The water is kept in by dams built across wherever a rapid would occur; and allowing an escape only through a small gap deep enough for a single boat to pass. At Sichang, on the Siang river, are situated the principal coal mines of the region, and some 50 boats were seen loading. The mines are nothing more than deep pits in the sides of the hills, and consequently only surface coal is obtained. It is to be expected that better coal would occur below the water level, but as soon as the miners come to water they are obliged to abandon the mines for want of proper pumping apparatus. From Sichang to Monkden, north of Peking, there is a continued series of coal mines on the flank of the elevations that form the western border of the great plain. A striking spectacle was presented, on arriving at the Tung-ting lake, at the junction of the Siang with the Yang-tze. A heavy northerly wind had been blowing for six or seven days, and few or no boats had been able to proceed; a southerly breeze then set in, and all the boats that had been harbouring in many creeks and bays came out, and at sunrise such a sight was obtained as could only be seen in a land where the population is numbered by the hundred million. As far as the eye could reach the surface of the lake was thickly feathered with white sails, some in sunshine, some in shadow, and some in the dim distance apparently gliding on a thin film of air above the water. 440 boats were counted in sight at one time. The Poyang lake, lower down the river, is of the same character. It has been noticed that these great lakes have near them a group of high mountains; this is only another way of stating that where there has been an unusual elevation there has been a corresponding depression. The president explained that Mr. Bickmore was a young American traveller of high promise, who had been occupied during three years in exploring the islands of the Malay Archipelago, and had finished his travels by passing through this unfrequented part of China,—unvisited by Europeans since the days of the old Jesuits,—and traversing Mongolia and Siberia from Peking to St. Petersburg.

POSTAL SERVICE TO CHINA VIA TRIESTE.—By a Treasury warrant in the *Gazette* it is directed that on every letter not exceeding half an ounce in weight transmitted between the ports of Trieste and Alexandria by Austrian packet boat, and further transmitted between Suez and any port in the East Indies, China, Australia, or New Zealand by British packet boat, and on every letter not exceeding half an ounce in weight posted at the Austrian post-office in Alexandria, addressed to any place in the East Indies, China, Australia, or New Zealand, there shall be on every letter exceeding half an ounce in weight two rates of postage, and on every letter exceeding one ounce, and not exceeding one ounce and the half of another ounce, three rates of postage; and on every letter, if exceeding one ounce and the half of another ounce, and not exceeding two ounces, four rates of postage; and for every additional half of an ounce in weight of any letter above the weight of two onnces there shall be charged one additional rate of postage, and every fractional part of such additional half of an ounce in weight shall be charged as an additional half of an ounce in weight.

CHINA GRASS.—The Duke of Devonshire has addressed the following letter to the *Times* on this subject:—"Sir,—More than a month since a letter appeared in the *Times*, signed 'J. Westmoreland,' asking any of the 9,000 who had tried the Chinese grass seed to give their experience on the subject. I think it, therefore, only due to the much-maligned Mr. Hallett to send you mine. I wrote for a 1s. parket of seeds, which unfortunately were not planted for more than three weeks after the time mentioned in the instructions. However, they quickly 'entered an appearance,' grew, and flourished, without any further care or attention; and at the end of last month the canes (of which there are from three to six on each plant) were nine feet high, with large heads of seed on them, which I fear will not thoroughly ripen owing to the late planting. Had they done so I should say some of the heads would have borne as many as 5,000 seeds. I think very few of Mr. Hallett's adversaries would care to face him armed with one of the canes, which are large in proportion to their height."

MR. WHALLEY AND OUR REPRESENTATIVE IN CHINA.—Mr. Lowe, a short time since, made a speech in which he held up to ridicule the ignorance which prevails in reference to geography—and especially that of our own colonies and possessions—amongst the public generally and members of Parliament particularly. Mr. Whalley has just proved that the charge (as far as regards honourable members) was not unfounded, for, in the debate on the Abyssinian expedition, he expressed a hope that our forces would take permanent possession of some island on the coast, in order to secure a safe residence for our national representative "as we had already done in China." It would seem, therefore, that Peterborough's zealous member is under the impression that Sir Rutherford Alcock resides at Hong Kong, and also that his ideas as to the ownership of the islands in the Red Sea are still somewhat obscure.

APPOINTMENTS.—The Queen has been pleased to appoint Edward Barnett Anderson Taylor, Esq., to be a member of the Executive Council of the Bahama Islands; Phineas Ryrie, Esq., to be a member of the Legislative Council of the colony of Hong Kong; Charles Packer, Esq., to be a member of the Council of the island of Barbadoes; and Claude Augustus Champion de Crespigny, Esq., to be a member of the Legislative Council of the island of Labuan; Edward Thornton, Esq., C.B., now Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Portugal, to be Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the United States of America; John M'Kinnon, Peter Smyth, William O. Heffernan, Samuel Creelman, Daniel M'Niel Parker, and James Frayer, Esqs., to be members of the Legislative Council of the province of Nova Scotia, in the dominion of Canada.

RELIGION FOR THE CHINESE.—A new religion was recently inaugurated at a meeting held near Lincoln's Inn Fields, the fundamental rule of which was declared to be the cultivation of filial piety and brotherly love, without at the same time requiring of the members any particular unity as to matters of doctrine or faith. Various resolutions were discussed and passed, and finally it was agreed upon that a new church should be erected for the cultivation of the above form of religion. This is certainly coming very near the Chinese view of religion, and it might be predicted that missionaries sent by this body to China would meet with much greater success than have those who have hitherto been sent. On the other hand, it would not be unreasonable to look forward to the arrival at no distant date of some bouzes as a "deputation" to this new body of co-religionists. At all events, Chinese classics and ethics will now rank high with at least one portion of the Christian world.

MACHINERY FOR JAPAN.—The Marquis d'Estel, formerly an officer of the French navy, director of the arsenal which is being founded at Yokohama by the Japanese Government, arrived at Havre a few days since to superintend the loading of a French vessel, the *Fabius*. Her cargo will consist of numerous machines for working metals, an apparatus for masting vessels, and some improved cannons, with their supplies of cylindrical and conical shot. The vessel in question will very speedily leave for Yokohama.

THE *Stonewall*, ironclad steam ram, transferred by the U.S. Government to Japan, has reached Monte Video on her outward voyage. Letters received thence state that she is a failure as a sea-going vessel, and that her commander despairs of getting her safely to Japan.

BANKRUPTCY COURT.—IN RE EDWARD TIERNAN.—The bankrupt, who was a tea broker of Great Tower-street, applied at a former sitting for an order of discharge. His Honour, having taken time to consider, now gave judgment. The petition in this matter was filed so long since as November, 1866, and a great deal of evidence had been taken; but having given his very best attention to the facts, he was of opinion that the opposition had not been brought within the 159th section of the Bankruptcy Act, 1861. The Court must be careful in the application of that section, and to say that the present case was within the statute would be to decide contrary to every rule of construction. What was the evidence? The bankrupt had large loan transactions with Agra and Masterman's Bank; he applied for cash advances, and, as security for them, he deposited warrants, which were kept in a strong box, to which he, as well as the bank, had access. It was alleged by the bank that the bankrupt had abstracted from the box warrants of the value of between £10,000 and £12,000, and if he did so unknown to the bank that would be a very gross and wicked act, for which, possibly, he might have been indicted. But that was not the question for his determination; the sole point was whether the bankrupt had brought himself within the 159th section of the Act. In opposition it was contended that the bankrupt had contracted the debt due to Agra and Masterman's Bank at a period when he could have had no reasonable expectation of making payment; but his Honour could not follow that argument, and although there was a great deal to be regretted, and which bore adversely to the bankrupt, there was nothing to bring him within the statute. The order of discharge would, therefore, be granted.

THE SUEZ CANAL.—The Government tug *Prompt*, recently despatched from England to assist in the embarkation of the Indian troops at Suez, was conveyed through the new Suez Canal to the Red Sea. After having been lightened as much as possible, even to the removal of the paddle-wheels, a number of empty casks were placed under her, and in this manner she reached Suez.

THE MAIL SUBSIDIES.

(TIMES.)

The contract recently made by the Government with the Peninsular and Oriental Company for the conveyance of the Eastern Mails was on 29th ult. approved by the House of Commons. It was, however, severely criticised, and the motion of approval was not passed without a division. It is undoubtedly true that the terms of the contract could not be justified on strict commercial principles, but, as we recently explained, the answer is that, having regard to the nature of the service, and, moreover, to the competition fostered by foreign Governments, it is impossible to be guided by purely commercial principles. The question happens to be further illustrated at the same moment by the case of another great company, which has hitherto been responsible for the conveyance of the mails to the opposite quarter of the globe. For the last 28 years the Cunard Company have maintained the mail service between Liverpool and New York, and have conducted it in a manner as honourable to the country as to themselves. According to notice, this contract would terminate at the close of the present year, and the Government have been endeavouring, as in the case of the Eastern Mails, to obtain some advantages to the public by offering the service to general competition. Very similar difficulties have arisen, and here also the Government have found it necessary to retain the services of the old company. The new arrangement, however, is as yet only made for a short time; and the terms are much more favourable to the public than in the former instance. The nature of the negotiations has been briefly stated in the House of Commons; but the subject is of sufficient interest to justify some further explanation.

Anticipating the close of the Cunard contract, the Government, as we have stated, invited tenders, but they proposed that the remuneration for the service should be on a totally different system from the present. As matters now stand, the Government pay a fixed subsidy to the Cunard Company for the performance of the service, and charge their own rates of postage. For the future they proposed that there should be no regular system of subsidies; but that shipowners should make tenders to convey the mails on particular days of the week, receiving the sea postage. Any arrangement of this sort would only concern the mails from this country, and the United States would be left to make similar arrangements for themselves on the other side of the Atlantic. The answers received to this proposal were as disappointing as in the case of the Eastern mails. In point of fact, there is one important condition of the service, for which not a single offer would have provided. The greater part of the correspondence of this country with the United States is habitually posted on the Saturday, and leaves Queenstown on the Sunday. But of the various competitors the North German Lloyd's Company offered for Tuesday, the Messrs. Inman for Thursday, the National Steamship Company for Friday, and an offer from the Hamburg-American Company was equally defective. The proposed new system, therefore, was for the moment impracticable, and the Post-office had to face the prospect that at the end of the year the commercial community might suddenly find they were unable to despatch their letters in the same way as before.

The Cunard Company had not sent in any tender under the scheme of the Government, being satisfied that when reduced to the test of practice it would not work, and they had actually begun to dispose of their fleet. The Government had, however, left an opening for offers varying from their own proposal, and the company expressed their willingness to propose a contract of the same character as the present one, but on lower terms. As their own plan had failed, the Post-office had practically no alternative but to consider this offer. The company then proposed a contract for a fixed sum, to last eleven years. Here, however, a new difficulty arose. The Government had been carrying on negotiations with the United States, and it appears that they were, for the moment, committed to a postal convention founded on that principle of sea postages, instead of a subsidy, which had just broken down. It was, therefore, impossible for them to enter upon any such lengthened contract. In this emergency they availed themselves again of the services of Mr. Scudamore, who had just rendered so much assistance in the arrangement with the Peninsular and Oriental Company. This gentleman was associated, on the part of the Cunard Company, with Mr. Burns, to whom Mr. Hunt paid the compliment of saying that he had met the Government "in what might be described as a public spirit." We are happy to say that between these two gentlemen an arrangement has been made which will serve at least to tide over the immediate difficulty. The company have agreed to continue the service for one year, for the sum of £80,000. This is considerably less than their present subsidy, and they also engage for a weekly, in place of a fortnightly, service to New York. Some details of the arrangement remain to be completed; but these are its most important particulars, and the matter is practically concluded.

It will be seen that, under the circumstances, the Government had hardly any choice but to come to some agreement with the Cunard Company; but apart from this, the arrangement cannot, we think, be received otherwise than with satisfaction. In the manner in which the mails are now carried to North America the public enjoy, at all events, one great advantage. The Cunard Company performs the service with the most admirable efficiency and liberality. Complaints were made of the indifferent rate of speed which the Peninsular Company offer to maintain in their service to India, and of the opportunity afforded by the contract for unpunctuality. No similar complaints can be made against the Cunard Company if, as we believe, they engage to maintain the service with the same efficiency as before. It is a boast of which they may justly be proud that in the course of the twenty-eight years during which their contract has lasted they have never failed to start their vessels at the appointed time, unless detained by the Government, and have never lost a passenger or a letter. They provide, in fact, the finest packet service in the world, and it is a fair ground for congratulation that an enterprise in which all Englishmen ought to feel a pride is sustained by the present arrangement for at least a short time longer. It would be melancholy to hear, as it seems we were nearly doing, of the dispersion of this noble line of steamers. For this fine service, however, the country must expect to pay. No company, looking to purely commercial objects, would start ships in all weathers, steam at full speed in all seas, especially across the Atlantic, and despatch ships in equal numbers all the year round. It is but reasonable that a company should have some compensation for such a disregard of the ordinary rules of commercial economy. Yet it is certainly of the utmost importance that our communications with North America should be as regular and frequent as possible. Independently of the demands of commerce our relations with the United States' Government may at any time need the greatest speed and security in the transmission of despatches to our Minister at Washington; nor should it be forgotten that we have an important naval station in North America, and, except by contract, no steamer could be expected to go regularly to Halifax. Both the French and the German Governments are doing everything in their power to encourage and maintain transatlantic postal services, and the French Government in particular has contracted for a postal service to New York for a period of upwards of 20 years, at the rate of nearly double the subsidy which is paid to the Cunard Company, even under their present contract, besides advancing 10 millions of francs, to be returned in 20 years, without interest. We are, however, in possession of the Atlantic; and all must be glad to learn that, even with a reduced subsidy, the Cunard Company are prepared to hold their own. The Government have another year in which to review their engagement with the United States and to reconsider the question. But if at the end of the year they are led to make a further contract with the Cunard Company, we shall rejoice for the maintenance of an enterprise which at once confers a great benefit on the public service and maintains the position of the country in a field peculiarly its own.

Naval and Military.

The Cracker, 2, twin-screw composite-built gun vessel, 464 tons, has been launched from Portsmouth dockyard, in the presence of Admiral Sir Thomas S. Pasley, Rear-Admiral G. G. Wellesley, C.B., the chief officials of the yard, and a number of visitors. The vessel was named by Miss E. Murray, the youngest daughter of Mr. Andrew Murray, the engineer in chief of the dockyard and steam factory at Portsmouth. The Cracker has joined the flotilla of gun vessels now completing their outfit for foreign service. These latter comprise the twin-screw Ringdove (of the Plover class), 3 guns, 666 tons, 160-horse power; the Avon (of the Cracker class), 2, twin screw, composite built, 464 tons, 120-horse power, and the Pandora, 5, screw, 426 tons, 80-horse power. Her Majesty's composite 2, gunboat Dwarf, designed by Mr. W. Ladd, master shipwright of Woolwich dockyard, has been launched successfully from her building slip. Colonel Suther, Colonel Second Commandant of the Royal Marines, is appointed to succeed Colonel Connelly as Commandant of the Woolwich Division of Royal Marines.

According to the *Army and Navy Gazette*, the health of Admiral Sir Charles H. Freemantle is in such a precarious state that the Lords of the Admiralty have arrived at a decision, as he can never again serve afloat, to remove him to the Retired List. This step on the part of their Lordships, is deserving of commendation, as officers in the junior grades will now be satisfied that even-handed justice will be meted out to all classes, as hitherto there has been a feeling prevalent that there was one law at Whitehall for the admiral and another for those below him in rank. The removal of Sir Charles will promote Vice-Admiral the Earl of Lauderdale to be an admiral, Rear-Admiral Kellett, C.B., to be a vice-admiral, and Captain John W. Tarleton, C.B., to be a rear-admiral. In consequence of these changes, Mr. Corry will have in his gift the appointment of admiral-superintendent at Malta Dockyard, the post of comptroller-general of the Coast-guard, and the distinguished situation of a naval aide-de-camp to Her Majesty the Queen.

The bursting of the 12½-ton smooth-bore gun on board the Wivern is thought to be an encouraging and comforting accident. What reliance are we to place in these built-up 12-ton guns? No one will say the Wivern would be very effective without any guns at all, and such burstings, though "there's nobody hurt," are not much more exhilarating than the development of an enemy's shell. Let us remember that the cast iron American guns—not the Parrotts, or the rifled guns—do not burst. They are certainly gaining character in face of much opposition and prejudice, although they may not be all the Americans say they are.

Intelligence has been received at the Admiralty of the safe arrival of Her Majesty's ironclad ship Ocean at Batavia on the 15th ultimo, all well.

Her Majesty's screw troopship Serapis, Capt. Soady, according to existing arrangements, will sail from Portsmouth for Alexandria with troops

Digitized by Google

for India as follows:—Four batteries of the 8th Brigade, Royal Artillery, and detachments from various regiments.

Her Majesty has been graciously pleased to approve the 70th (Surrey) Regiment of Foot being permitted to bear on the colours the word "Guadaloupe," in consideration of the distinguished part taken by the flank companies in the recapture of that island in 1810.

Even the Swedes, who are not likely to have much to say to Abyssinia, even if another Charles XII. come to vex the Scandinavian soul with thirst of glory, have got leave to send out three officers with the Abyssinian expedition. The Prussian has already taken the field, we believe, and the head-quarters of Sir R. Napier promise to be Bableish. They will not be very far from Babelmandeb at all events. The numerous amateurs who are going out for sporting purposes will be very much disappointed if they think they will be let go out shooting on the skirts of an army in the field.

Staff-Commander Henry A. Moriarty, C.B., commanding the screw store frigate Fox, who rendered such important services in the laying of the Atlantic Cable, has, we understand, been appointed by the Admiralty Second Master Attendant of Portsmouth dockyard, vice Sturdee, retired.

The finding and sentence of the general court-martial which assembled at Chatham, under the presidency of Col. C. Louis, for the trial of Capt. Charles Loftus Tottenham Usher, of the Chatham division of Royal Marines, was promulgated on the 7th instant. The prisoner was tried for being drunk at the Royal Marine Barracks, Chatham, on the afternoon of the 20th ult., he being at the time in uniform. The Court found the prisoner "Guilty," but in consideration of his lengthened service, and also the high character given him by the numerous officers called for the defence, including several members of the Court, on the occasion of his trial, he was only sentenced to be placed at the bottom of the list of captains of the Royal Marines Light Infantry.

The iron armour-plated screw steamship Agincourt, 26, having undergone sundry minor alterations, was removed to the Steam Reserve in Hamoaze, where she will remain until opportunity offers for reducing her masts from five to three.

The following is a report on the competitive firing of the Chassepot and the Carter and Edwards' rifles at Hythe:—"The first trial was at 200 yards, quick firing. The result was in favour of the Chassepot as regards accuracy, and of the Carter and Edwards for celerity of firing. Taking the merits of the two weapons together, there cannot be a doubt of the advantage of the Carter and Edwards over the Chassepot. The latter, after the 13th round, became fouled, and had to be cleaned out, while the Carter and Edwards fired 50 cartridges without being cleaned. After the quick firing the trial was resumed at 400 yards. The Chassepot was cleaned out and put in perfect order by the armourer at the range, and at the end of the seventh round it showed signs of fouling in the breech arrangements sufficient to cause some difficulty in working it, and at the end of the 13th round it was so fouled as not to explode the cartridge, and therefore became useless. The Carter and Edwards rifle had a cartridge burst in the breech, and on examination of the breech the cap was thrown out and no ill effects were produced. The rifle appeared as ready for further use as at the commencement, a single wipe of tow having been sufficient to clean the fouling from the barrel. The Carter-Edwards rifle was sent down to Hythe in a rough and unfinished state, not browned, and with the sighting 'all astray,' and was fired at the 200 yards range with 100 yards sighting. It has proved itself a thoroughly good weapon, under all circumstances, no matter how rough the manufacture. The small screw in front of the face of the bolt, however, in the present weapon showed a decided tendency to unscrew and cause the arm to miss fire. This, it is suggested, might be removed from the front to the rear of the bolt, which would prevent the risk alluded to. It is also suggested that, before issuing the rifle for general use, it should be provided with a chamber, the expanding part of which should be slightly larger than the cartridge, so as to admit of a more easy mode of extraction, as the cartridges at Woolwich are now made with a little overlap. The system of 'grooving,' used by Mr. Ashton, the armourer at Hythe, which has a special degree of advantage in not fouling readily, and which is one of the greatest defects in smallbores, is recommended to be adapted for the rifle, and a slight alteration to render the 'grip' more firm."

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, December 7.

The general Budget of the North German Confederation for 1868 has just been published in the *Bundes-Gesetzblatt*, or Federal Gazette. The revenue and expenditure are made to balance with the sum of 72,158,243 dols., but as the estimated receipts fall short of the requirements by nearly twenty millions of dollars, the deficiency is to be made up by payments from all the States composing the Confederation, in the ratio of the number of their population. Under the head of Federal Consulates the sum of 77,000 dols. is put down for salaries, 25,000 dols. for official expenses, and 50,000 dols. for the dotation of Consulates to be created, making together 152,000 dols. These are to be annual, and in addition there is a charge "for once only" of 35,000 dols. for the erection of a new building for the Consulate-General at Alexandria, and 20,000 dols. for the purchase, alteration, and suitable fitting up of premises for the Consulate-General in Japan. Hamburg has some reason to grumble at the demands made on her finances by this Federal Budget, in which she figures as having to pay 710,160 dols. as *aversum* or contribution in lieu of Zollverein duties, 607,500 dols. as her share of the military expenses of the Bund in time of peace, and 195,925 dols. as her quota of the deficit, making together 1,513,583 dols.; whilst all that she gets credited for is 27,620 dols., her share of the estimated surplus of the Federal Post-office, though as the reduction of the rates to one uniform penny postage comes into operation on the 1st of January next, it appears a great question whether there will be any surplus at all to divide in the first year. At all events the loss of revenue derived from the Hamburg Post-office becomes a serious event, as it has hitherto brought in a clear profit of about 150,000 dols., which she in future will have to share with the other States. For several years past the finances of Hamburg have been in a very prosperous condition, leaving a clear surplus of about a million of dollars; but in the Budget for 1868, just laid before the Bürgerschaft, the items for Federal purposes are of such formidable magnitude that the account closes with a deficiency of a million and a-half of marks currency.

Mr. James Murray Forbes has been appointed Consul at Canton, under the Consulate-General at Shanghai, for his Majesty the King of Sweden and Norway.

COMMERCIAL.

A decidedly better feeling prevails in the produce markets generally, consequent on the increased prospects for the preservation of peace. Rice continues in favour, and the transactions of the week have been so numerous and extensive that the diminution of the stock is beginning to be seriously felt, so that many orders could not be executed. Cassia Lignea is again higher, the last parcel in the hands of importers—700 chests ex *Peru*, from Canton—having been taken at 13 sch. Banco per lb. Cassia Flores in good demand, and rather higher prices paid. Pepper sells easily at firm rates. Spelter alone is neglected, and no sales have been effected; purchases might probably be effected at lower figures than hitherto paid. Discount 2¾ to 3 per cent.

SHIPPING.

SAILED.—Friesland, to Batavia; Amaranth, to Hong Kong; Miranda, to Hong Kong and Shanghai; and Herman and Emma, to Hong Kong.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Dec. 7.

My supposition that the Second Chamber of the States General would not approve of the Budget for the Department of Foreign Affairs has been realised. After a very sharp debate, in which strong objections were made to the diplomatic behaviour of Mr van Zuylen, the Budget was rejected by 38 ayes against 36 noes. Immediately after the Budget was outvoted the Minister for the Home Department declared, in a special Council, which lasted but a few moments, that it was resolved that the whole Cabinet should tender its resignation, considering the vote which had taken place, in conjunction with the debates which preceded it, as a vote of want of confidence. I need not say that this resolution caused a great deal of astonishment, because only the policy of the Minister of Foreign Affairs was criticised, and not that of the whole Cabinet. Remembering what occurred last year, of course the general opinion prevails that the King will not accept the resignation, but that the Chamber again will be dissolved. This supposition is the more founded now that the King has declared that he will not take any decision before the credit laws shall have passed, by which the money will be granted to the ministers necessary for the State's service. In the meantime the Conservatives are very busy creating an agitation throughout the country, and appeals are made to the people on behalf of petitioning the King to reject the tendered resignation, but till now only two addresses have been forwarded from Rotterdam and one from Maastricht, provided only with a few signatures.

The Second Chamber is now occupied in discussing the credit laws; but it was duly resolved—contrary to the wishes of the Cabinet—that no important political matters should be discussed. Nothing is known officially at present if our Government has accepted or rejected the invitation of the French Government to attend a congress for the settlement of the Roman question. Our King has, however, in his quality of Grand Duke of Luxemburg, accepted that invitation without the least reserve.

The Great Amsterdam Canal Company and the Company for the Exploitation of the State railways are *en deconfiture;* meetings are held to find the proper measures to redress the monetary difficulties.

H. M. has approved of the statutes of the society for the benefit of the Javanese. Some officers of the Dutch army will take part in the Abyssinian expedition.

The costs of the single telegrams of twenty words will be fixed on the 1st of January at 30 cents, being a decrease of 20 cents.

Professor Vreede has edited the first No. of *Le Conservateur, Revue de Droit International.* Several Dutch, Belgium, and Swiss publicists appear amongst his collaborateurs. The purpose of this periodical is to protest against the aggressive and annexing policy of some large Powers.

COMMERCIAL.

COFFEE.—Since the sale of the Dutch Trading Society the market has been very firm, and there was a good demand at sale prices to ½ per cent. higher. There was, however, but little offered, whilst the deliveries are very great; they amount to 127,247 bags, against 91,334 b. in October. From 1st January 858,840 b. against 764,860 in 1866. Stock on 1st Dec. 339,188 b., against 345,616 in 1866. The stock on warrants at the Dutch Trading Society amounts to 197,088 b. The private stock amounts to 20,850 b., and there are floating 33,178 pic. Java for private account, and 309,000 b. for the Trading Company. There were, since my last report, no private transactions, except 1,270 b. fine green West Indian sorts ex President van Ryckevorsel at 43½c.

RAW SUGAR.—For the Trading Company's sale, in which 21,180 baskets Java were offered, 1½f. to 1¾f. was paid above the September sale price. For the white sorts there was much demand, but the quality was on the average not very fine. For export 5,000 b. were taken. No. 16 was paid with 34½f. Since the sale the market remains very firm, but the transactions were unimportant, because the holders decline to operate without a further advance. Only 570 baskets Sourabaya No. 11¾ floating per Herald of the Morning were sold at private terms.

RICE.—Of uncleaned 1,500 b. Java per Dordretcht were brought on the market. The quotations are:—For 1st Table Rice, 16 to 17f.; 2nd, 11½ to 12f.; good White, 9½ to 11f.; White, 8½ to 9½f.; Sourabaya, 8 to 8½f.; Rangoon, Bassein and Necransie 8½ to 8f. and 7¾f.

TIN.—A decidedly better market is to report. In the beginning of November Banca Tin was sold at f.53¼ to f.53½, but a more regular demand springing up on these prices, an advance was again very soon obtainable, and large sales were made up to f.54½. Holders now demand f.54½. For delivery ex next sale large quantities changed hands on speculation from 55fl. to 55¼, at which price there are still buyers. Billiton Tin was sold from f.52¼ to f.53¼, and a good business was done, f.53¼ being now asked.

LONDON: SATURDAY, DEC. 14, 1867.

SHANGHAI TRADE RETURNS FOR 1866.

SOMEWHAT late, but nevertheless very welcome, the *Report on the Trade at the Port of Shanghai for the Year* 1866 has at length reached us. After the elaborate and exhaustive statement made by Monsieur GIQUEL at the close of 1865, Mr. FITZ ROY's task was apparently an easy one, yet really difficult in the extreme. He had to produce a report that should not compare unfavourably wth that drawn up by his talented predecessor, whose vast experience and intimate acquaintance with Chinese and the resources of the empire gave him an unspeakable advantage as a writer upon Chinese subjects. It is not too much too say that, without recapitulating any of the valuable facts wherewith M. GIQUEL's report was filled, Mr. FITZ ROY has, in addition to mere statistical details, contributed no mean quota to our general fund of knowledge respecting China and the interests of foreign trade with that empire. Last mail, which brought us the report, brought also the comments made upon it by our Shanghai contemporaries, among whom the *Friend of China* takes a prominent position. Its editor enters into a curious if not very valuable calculation suggested by the increase in the trade, to which we shall immediately refer, and arrives at the conclusion, which we are not disposed to question, far less to verify, that if to each day of the three hundred and sixty-five eight working hours be assigned, for every such working hour of every day in the year no less a sum than £5,000 sterling passed through trading hands in Shanghai, and necessarily yielded to some one or another a commission either small or large. The upshot of the matter is, that the Shanghai import trade of 1866 exceeded that of 1865 by nearly three million sterling; or, in other words, that during last year foreign imports to the amount of more than fourteen millions and a-half sterling entered the port. This does not, however, represent an exactly corresponding increase in the total trade, for exports fell off nearly a million and a-half, which reduces the addition to the figures of 1865 to five millions of taels, or say one million and three quarters sterling. Mr. FITZ ROY enters into a careful review of the silk trade for the past seven years, from which it appears that the export attained its largest dimensions during the rebel occupation of the producing districts, and that since that period it has (with the exception of the season 1865-66) steadily decreased. We are glad to perceive that the opinions which we have frequently pronounced as to the cause of the vast increase in the silk trade during the year 1859 to 1863 are fully endorsed by the Commissioner. He ascribes it "not to the fostering care the Tai-"pings manifested for trade, but to the total cessation "of native manufacturing through death or flight of the "manufacturers." That the silk trade during 1866 was highly remunerative was not, in Mr. FITZ ROY's opinion, due to the good management of the merchants. Luck, in the shape of European complications, which diminished the demand in the early part of the season and brought down prices, befriended the foreign traders. "The system of contracting before-"hand for delivery has prevailed to a large extent of late "years, and now instead of merchants awaiting the arrival of "produce on the market, they send large sums of money into the "country by their Chinese servants, who make advances to and "make contracts with the hongs. This is a system which may "eventually prove extremely dangerous, and *certainly tends to "throw all the advantages of trade into the hands of the Chinese.*" Year after year in the consular reports, in the customs reports, and in these columns, as well as in those of every newspaper published in China, this warning has been reiterated, but without effect; and still, as each season opens, merchants plunge into reckless speculations, which, without some specially happy accident, can have but one result.

Turning now to imports, M. GIQUEL's anticipations of a considerable increase in the consumption of cotton goods have been realised, as the following figures will show:—

	1865. Pieces.			1866. Pieces.			Increase.
Grey Shirtings	1,291,865	...	...	1,970,316	...	...	678,451
White ditto	212,097	...	...	383,904	...	...	171,807
Amer. Drills	2,738	...	...	28,753	...	...	26,015

The import of woollens rose from 401,090 pieces in 1865 to 496,008 pieces in 1866. Opium comes next in order of importance, and this, too, displays a satisfactory increase, having risen from 36,689 piculs in 1865 to 41,698 piculs in 1866; of this latter 29,297 piculs were reshipped to other Chinese ports, and 718 piculs were re-exported. The consumption of foreign duty-paid drug in the province of Kiangsu and the northern towns of Chekiang may therefore be estimated at 11,683 piculs for the year. The duties on opium paid into the Government Bank during 1866 amounted to taels 767,383, or at the rate of taels 30 per chest; but it is probable, if not absolutely certain, that this forms the smallest part of the imports to which it is subjected before it finally reaches the consumer in the interior. Coals are even now an important article of import, and until the native fields are scientifically worked they will, in consequence of the rapidly increasing manufacturing energy of the Chinese Government, become yearly more and more in demand. With a remnant of the old short-sighted policy, which we are thankful to be able to say is rapidly disappearing under foreign moral influence, the carriage of Chinese coal in foreign bottoms from one port to another is virtually prohibited by the exorbitant duty levied. Thus the duty paid on two cargoes of coal imported from Formosa as an experiment by a foreign merchant in Shanghai amounted to 23 per cent. *ad valorem*, and as a necessary consequence all the coal consumed is imported. Notwithstanding this, the empire is wonderfully rich in coal fields, the extent of those in the north alone being estimated by Mr. KINGSMILL, who is a very competent authority upon the subject, at 87,000 square miles. Munitions of war swell the list of imports even in spite of the factories recently established at many of the principal ports. In 1866, 100 millions of percussion caps, 2½ millions pounds of gunpowder, 30,000 muskets and rifles, 4,400 pistols and revolvers, 42 guns, 1,000 shot and shell, and 700,000 cartridges passed through the Custom House, but being the property of Government, and therefore exempt from duty, they are not included in the estimate of the value of imports briefly summarised above.

These are the most important matters treated of in the report before us. It also contains many interesting details regarding the opening of bonded warehouses, the Government factories in operation, the mail services, lighthouses, &c., which we have from time to time discussed fully in these columns. One remark, however, we would make upon the most interesting of the miscellaneous topics introduced. It must not be forgotten that in June, 1866, the payments to the British and French Governments on account of the indemnities exacted under the convention of 1860, ceased. Where is now the realisation of those gloomy anticipations in which so many indulged? Eighteen months have passed over us since we lost one of our strongest holds upon the native Government, yet these have been eighteen months of steady and rapid progress not only in the arts of civilised life, but in friendly relationship with foreign Powers.

THE PROPOSED CONTRIBUTION TO THE POSTAL SERVICE.

IF the suggestion of the Postmaster-General that Hong Kong should be called upon for a yearly contribution, in conjunction with Ceylon and Mauritius, towards defraying the subsidy to the P. and O. Company should be actually carried into effect, it will certainly raise the ire of the colonists, as the financial affairs of the colony are not in a position to bear any extra weight. It is but a short time since the Governor was actually compelled to take the judicial deposit money, in order to pay the salaries of the civil servants of the Crown; he had also been compelled to borrow money for Government purposes on his own security; and further, in order to provide for the £20,000 military contribution *octroye* by the Home Government, he has had to raise funds by a stamp tax and by licensing public gambling. How then is the colony to bear any further imposition, or rather, how is its indefatigable Governor to put on the screw effectually to extract it? There is no doubt that, looking at it from a home point of view, it

Digitized by Google

seems an equitable arrangement that a colony should contribute its quota towards the support of its postal communication, and the same might be said of its liability to pay a military contribution; but, that there is ample room for a difference of opinion on this point, is patent by the fact of all the *non*-official members of the Legislative Council of Hong Kong having voted against the military contribution, and since its imposition by command of the SECRETARY of the COLONIES, they have never ceased to protest against its continuance. The colonial argument, is, as far as regards the military, that they are there for Imperial purposes and not to supply a colonial exigency, and they very properly will hold that the commerce between England and China is an Imperial benefit; and that the colonists, who carry on that commerce for the benefit of the mother-country, ought not to be weighed down with taxation. There are many more points that suggest themselves in connection with this subject—such as how our Post-office is going to collect their quota from the inhabitants of the treaty ports? How would the imposition fall upon the inhabitants of Hong Kong, with its 1,000 European correspondents and 100,000 Chinese who never send or receive a letter from Europe? And how would our Government compare with the French, who deliver the mail without a grant in aid? We have a word of comfort in conclusion. The SECRETARY of STATE for the COLONIES will not, we believe, sanction the suggestion of the Post-office if the GOVERNOR advances the very patent objections which are amply at his command.

THE STRAITS SETTLEMENT SUPREME COURT.

THE reconstruction of the Supreme Court of Singapore is a measure of great public importance, and excites so much interest that we cannot help expressing a regret that our information regarding the discussion that took place on the subject in the Colonial Legislature is so meagre in its nature. Much has been said, and more might be said, relative to the abuses that notoriously exist in the Supreme Courts of the East; but no view of the case could be so interesting, or carry so much weight, as that emanating from a free discussion of it by the members of the Legislative Council. The paucity of information regarding the course of public affairs of which we have to complain, arises from the exclusion of the representatives of the press from all meetings of the Council, a resolution to that effect having been passed at its first meeting. We can hardly doubt that this policy was adopted at the instigation of Colonel ORD, who would appear to differ widely in his views of such matters from Sir RICHARD MACDONNELL, the Governor of Hong Kong; the latter having consistently done all in his power to promote the most complete publicity of all matters connected with the Government of the colony. There is at least one source of satisfaction in the scanty report published of the proceedings of the Legislative Council in reference to the Supreme Court Bill, and that is, the independent course pursued by the non-official members of the Council. We trust the expression of their opinion will be received with due respect by the Governor, for the non-official members form a most important element in every legislative body, and no good can come of that contemptuous disregard of their opinions which is sometimes displayed.

MACHINERY FOR PREPARING TEA.

WE have recently inspected some very ingenious machinery, worked by steam-power, designed to supersede the employment of manual labour in the preparation of tea for exportation. The apparatus is the invention of Mr. T. WATERS, Engineer, of Japan; it is in process of construction by Messrs. J. and H. GWYNNE, the eminent engineers of Hammersmith, and when complete will be forwarded to Japan, and at once put into operation there. Many of our readers are probably unaware of the totally different systems that prevail in China and Japan with regard to the export of tea. In China it comes into the hands of the exporter all but ready for shipment; whereas in Japan the leaf is delivered by the native merchants almost in a raw state, and the various processes of sifting, sorting, firing, and colouring, are performed by some hundreds of native "hands" on extensive premises erected for the purpose, which now form an important part of every large mercantile establishment there. In this entire system the machinery now under notice is destined to work a complete revolution, by economising both time and labour, and, we may safely predict, by producing infinitely more certain results. Although exceedingly simple in construction, it covers a good deal of space, and performs many different operations, the details of which cannot easily be described without the aid of diagrams. The tea is first put into a hopper at the top of the apparatus, whence it passes over a graduated series of sieves, fixed in horizontal frames slightly inclined, to which a constant oscillating motion is imparted. These sieves being of wire gauze with square meshes of various degrees of fineness, the leaf as it passes over them is sorted into sizes, and falls into separate "blowing chambers" below. Each of these is connected at one end with a shaft, through which a blast of air is driven, and at the other opens into three shoots, somewhat after the fashion of the hand-winnowing machine now in use; this effects a further separation into three classes according to the *weight* of the leaf. The wind is supplied by a revolving fan, and the force of the blast regulated by throttle-valves. The leaf is then conveyed to another set of sieves, called the "hyson-sieves," similar in form to the first set, but with meshes three times as long as they are wide; these allow the long or hyson-shaped leaves to fall through, while the round ones pass over the end of the sieve into a separate receptacle. All the various parts of this apparatus are worked simultaneously by a steam-engine of 8-horse power, and a similar engine works the firing machine, which is of course a separate apparatus. This consists of a long iron trough or jacketed half-cylinder, which is heated to the requisite degree by the waste steam from the engine, and in which the tea is put instead of the old-fashioned iron pans over charcoal stoves. A shaft revolves throughout the length of this trough, to which a sort of spiral fan is attached; this keeps the tea in constant motion, and at the same time moves it steadily from the feeding end of the trough to a reservoir at the other, the operation requiring about 40 minutes. The angle of the fan-blade can be regulated so as to accelerate or retard the progress of the tea through the trough, according to the amount of firing it requires. Another smaller machine has also been devised to facilitate the operation of colouring. The whole has been constructed by Messrs. GWYNNE, and with a degree of excellence that does great credit to their workmanship. The inventors have patented the apparatus, and when it has had a fair trial we have little doubt that it will be extensively introduced, not only into Japan but into China, and other tea-producing countries also. The Secretary of the Assam Tea Company has witnessed some trials of the machinery, and expressed a high opinion of its capabilities.

IN our Parliamentary reports will be found a notice of the Hong Kong Gambling Ordinance. This is not, we are aware, the correct title of it, but it is better known by this than its actual title. The Duke of BUCKINGHAM, it will be seen, ignores any profit to be derived from this tax, and the nature of his speech altogether points to a disapproval of the Ordinance as it is now in force. Meantime the Governor has very cleverly secured a good round sum for the first year, and at its expiration will gracefully bow to the decision of the Duke. Sir RICHARD is a very canny chiel, and although not popular at present with the colonists, we venture to say he will be before the conclusion of his term. We hear it rumoured that Colonel ORD, the Governor of the Straits Settlements, has an idea of introducing a similar measure, and we believe the community in Singapore are to a great extent in favour of it. The merits and demerits of this novel Ordinance we have already discussed, and we are still of opinion that it is better than the present bribery and corruption which exists amongst the police at Singapore.

CHINESE AND JAPANESE CHRONOLOGY.

OUR attention has recently been drawn to a paper communicated to the Numismatic Society of London by the eminent antiquarian, JOHN WILLIAMS, Esq., F.S.A., in which an account is given of the Japanese *Nen-go*, or epochs; and, incidentally, mention is made of the corresponding chronological arrangements adopted in the Empire of China. Mr. WILLIAMS has reproduced the table of epochs given in the Japanese work *Sin Chuan nien piao*, his object in so doing being to facilitate the identification of Japanese coins, a task hitherto of no ordinary difficulty. We are not aware of any attempt made by Chinese scholars to bring the remarkable work from which Mr. WILLIAMS has derived his materials under the notice of the large class of readers now interested in all Eastern matters, unless indeed we except a paper which we have not seen, but which is referred to in the article before us as having been read before a meeting of the Chronological Institute in 1863. We are therefore induced to give a description of the work in question, and the curious in

Digitized by Google

such subjects may verify our statements by referring to the volume itself, a copy of which has been presented to the library of the British Museum.

The *Shi Chuan nien piao*, or "Newly Compiled Chronological Conspectus," was forwarded to us some time since rather as a curio than as anything remarkable in a literary point of view. It was at the time of its publication ascribed to the Prince of MITO, and was said to have been published at his expense. Apart from its intrinsic value the book claimed attention on account of its associations, for when princes, whether Eastern or Western, condescend to enlighten the world, their labours, however worthless, must of necessity be accorded a certain definite place in contemporary literature. We have already given the title of the work, and the arrangement adopted, as well as the information conveyed, correspond exactly with the name under which it is introduced to us. It is a synchronological table of the dates of most of the important events which have taken place in the world's history. The pages are divided transversely into three parts, the uppermost of which is devoted to the history of Japan, the middle to China, and the lowest to the "Western Seas." Across these divisions are drawn vertical lines separating the years from one another. In the upper compartment (Japan) the cyclic characters are used to denote the years; in the middle (China) the dates are referred to the years of each Emperor's reign, and the Christian era is taken as the starting point for the chronology of the West. The birth of Christ is placed under the year 1 B.C., and his death in 32 A.D. The former corresponds to the year *Keng Shen*, or 57th year of the eleventh full cycle of sixty, the first cycle commencing 657 B.C. So much for the general arrangement of the work. After the title page (which contains the title, the name of the teacher who revised or read the manuscript before it was sent to the printers, and the announcement that at *Tso tsang* at the shrine of Heavenly prosperity, the blocks are deposited) comes a preface written by the compiler, and evidently intended not only to afford information, but likewise to dissipate any impression that might be conveyed to the reader that admiration for the Western nations and their devices prompted him to undertake the task. This will be easily understood if we accept the report regarding the authorship, for it is well known that the Prince of MITO was long the most prominent member of the anti-foreign party, and that to his influence was ascribed much of the opposition, and to his instigation many of the outrages, which at one time threathened the destruction of the Empire, by bringing it into collision with England and France. This hatred to foreigners which made him worthy of the confidence reposed in him by the Mikado, is fully exemplified in the preface to his book, of which we give a rough translation :—

"It is difficult to come to an understanding regarding the ages which have long passed by, principally because the seats of Empire in the world were so frequently changed. The remotest epoch of which we possess any certain historical account is distant no more than 2,515 years, yet from that time, Emperors following one another in uninterrupted succession bore sway. In what place then was the greatest excellence displayed? Even in the land of Han (China) learned men were ever to be found, nevertheless, the kingly line was constantly changing. As to the years of which there is any certain account, they are extremely few in number. With regard to the foreign barbarians who come from the outer countries, they were sometimes rich and numerous, at others poor and scattered—never the same for any length of time. They count back for something over eighteen centuries, but cannot go beyond Jesus' natal year. They must not, therefore, be compared with the sages and emperors, nor even be spoken of in the same breath; nor can we forget the myriads of years which witnessed no change in our country. The writer of this book has drawn it up in three synchronological tables, the first of which refers to the spiritual land (Japan), the second to the land of Han, and the third to the foreign barbarians. Thus a general view is given of the state of all the nations of the universe year by year. For the future, therefore, it will be possible to see at a glance all that is to be known about the imperial dynasties, and the inferior races of the globe. There is no need for further explanation. If any of those crab-like, so-called learned barbarians, assert that foreign nations were always rich and always formidable, that they have always had fire-arms, and steam-boats, and that they were always inventing extraordinary things, this of itself will show that their hearts were wrapped up in wickedness. They are like the swine of the Feng country and the trailing serpent which, even in time of peace, are not regardless of danger. The holy sages of by-gone days are wanted now. They were both excellent writers and skilled warriors, but as for the princes of the present day they are ever among scenes of war, and are therefore always concocting new inventions. There is no period to it. You who are thus engaged should carefully study this book."

This preface is of itself sufficient to afford an insight into the character of the writer; the information, however, contained in the tables is given apparently without prejudice, although, as might be expected, it is occasionally incorrect. After the preface, which, by the way, is written in Chinese, comes a long explanation in Japanese, which we do not attempt to reproduce. Then come various genealogical tables, a list of Emperors and Tycoons, and a view of the dynastic history of China. After this is "a detailed description of the countries of the Western Ocean," in which the history of the world, commencing with NOAH, is traced with very tolerable accuracy. A list of the Presidents of the United States, beginning with WASHINGTON and ending with BUCHANAN, follows, then a map of the world copied from some Dutch original, then a dissertation in Japanese, and finally the "newly compiled chronological conspectus." We have already given a general idea of the manner in which this is constructed, and as it is manifestly impossible to go through the tables in detail, we must content ourselves and our readers by stating that the pre-historic periods in Chinese and Japanese history are made to open simultaneously with the creation of "ADAM and EVE, who existed 3,984 years before the "commencement of the present reckoning," and that NIMROD, NOAH, SEMIRAMIS, and numberless other ancient worthies with whose names we are familiar, but whom we should hardly expect to meet in this work, swell the roll of fame which is now handed down to the coming generations of Japanese. Rather than follow the eastern historian through his list of events, we will take up the history of the present century, and give the most important occurrences as chronicled by our author. They are as follows :—

1800. France made a commercial treaty with the United States.
1802. England takes over Ireland. War between England and France.
1803. Napoleon made Emperor, and announced to the world as such.
1807. An Englishman invents steamers.
1809. A three years' war between America and England commenced.
1811. The English burned Washington city.
1812. Napoleon defeated in his Russian campaign, and all the nations unite and fall upon him.
1815. French King restored, and treaties made with France.
1821. Napoleon died at St. Helena.
1829. War between Turkey and Russia.
1840. The English take Tinghai and Canton.
1841. The English fought at Canton.
1842. The English make a treaty with China.
1849. Hung and Ping (the *Tai-ping-wang* and one of his disciples) raised a rebellion.
1853. Wellington died.
1854. England and France join to help Turkey against Russia.
1856. Hung Siu-tsuan (Tai-ping-wang) killed the rebel Yong (the Eastern King) and 50,000 men. A misunderstanding arose between England and China.
1857. The telegraph was brought into use.
1859. England and France gained a victory over China. The use of opium forbidden in China. A treaty was made between Japan and the Western States.
1860. English and French troops invested Peking, and the Emperor fled to Jehol. China ceded to Russia 1,700 li of territory on the Black Dragon River in consideration of obtaining certain large guns.
1861. A treaty was concluded between China and England and France. The French went to Annam. The district of Shanghai was devastated by the Taiping rebels.

This brief sketch will give our readers a very fair idea of the nature of the work to which Mr. WILLIAMS refers. An examination of the book itself will amply repay the attention of the curious, but many will probably be satisfied with our description. We have for so long regarded the Chinese and Japanese as completely isolated, or only compelled by violence to come into contact with us, that outside the circles of those interested in Eastern trade, and those who have friends resident in one or other of the countries, few possess clear notions regarding even the relative positions of the great centres of foreign trade on the coasts washed by the Western Pacific. We now learn that the Chinese and Japanese, far from emulating our ignorance, are busily engaged in collecting facts respecting us and our history. We need not be ashamed to learn a lesson from them; indeed, the growing importance of our relations with the East renders it incumbent upon us to gain some insight into the nature of its people, their history, and institutions.

GRAMMAIRE ANNAMITE, &c.

Annamite Grammar, with French and Annamite Vocabularies; by Capt. G. Aubaret, of the French Navy, Consul at Bangkok. (Published by order of the Minister of the Marine and of the Colonies.)

The language commonly spoken by the Annamites, says the introduction to the volume, is a dialect of the Chinese, but the differences between the two are great, and increase with the inferiority of the persons who make use of the former, which tends to prove that a large number of native words are mixed with the Chinese. It is evident that the original native language was allied to the Chinese, but very little, if anything, seems to be known about it; but all Annamite words are mono-

Digitized by Google

syllabic, and are further pronounced with those peculiar intonations which belong to all the Chinese dialects, intonations which present the greatest difficulty to the learner. Apart from these intonations there is little difficulty in the sounds of the Annamite tongue. The sounds of the words are given in the two vocabularies, French in Annamite and Annamite in French, in Roman characters, of course with French pronunciation, and with the aid of several vowels with special accents or marks; these latter were invented by ancient missionaries, and are admitted to be defective, but are retained as having become known by the teaching of the missionaries. As M. STANISLAUS JULIEN said of the Chinese, so Captain AUBARET says of the Annamite language, that it presents no greater difficulties than any one of the European languages.

The grammar and vocabularies in question are intended as a practical guide for officials, merchants, and others, and therefore no expressions have been admitted but such as are in common use with the people. The examples are taken from a book called "Luc-van-tien," which is said to be the best specimen of ordinary Annamite extant. This book does not, therefore, supply a manual of the written language of the country, which consists of Chinese or rather of a conventional Annamite in Chinese characters. The conventional signs or accents already referred to are five in number, and are placed over the vowels; they mark the rising and falling inflections, the grave and the acute accents and the interrogative modulation, the acute and the grave accents being the same as in French; there are in fact but three new marks. There are, however, introduced some conventional consonant marks to illustrate pronunciation. The vocabularies occupy, properly, by far the greater portion of the book, and in each the leading words are arranged alphabetically, a plan which on the whole is preferable to that imperfect division under subject heads so common in vocabularies. Various phrases or applications of the main words are added however in many cases; for instance, under *Abattre*, to throw down, we have *Làm ngã xuống*, to bring down: *chém cây*, to fell trees; and *cây nga xuống dât*, that tree is felled.* There is one omission which we regret, namely, that the equivalents are not given in English as well as French, as is the case in some other works on Eastern languages, published under the authority of the French Government. The volume is from the press of the *Imprimerie Imperiale* of Paris, and is a most beautiful specimen of typography, impressed on excellent paper; but the very fulness and beauty of the work render it somewhat bulky, forming as it does a large octavo of very nearly six hundred pages. The copy with which we have been favoured is on large paper, which, of course, adds greatly to its weight; probably there will be other editions of a more portable size. We had almost forgotten to mention that the volume has been printed under the superintendence of the eminent Oriental scholar, M. Leon Pages, a fact which presents an excellent guarantee of its accuracy. Works of this kind reflect the highest credit on such Governmental establishments as the *Imprimerie Imperiale* for it would be hopeless to expect them to be produced in the ordinary way of business.

THE MAIL SERVICE TO PENANG.

The following letter refers to the stoppage of the mail service to Penang. The Post-office and the Treasury have been so pressed to shorten the time to China, that they have reduced the time of stopping to twenty-four running hours at Singapore, and excluded Penang altogether. This is a great hardship on the Penang community, who have so long possessed a direct service, and we hope some measure of relief will be introduced:—

(To the Editor of the *London and China Telegraph.*)

Sir,—As your paper is understood to look after the interests of the Straits, I think it is an omission of its duty taking no notice of this gross injustice on the part of Government to the interests of the important and thriving colony of Penang to stop the direct mail service so long in existence. I have been in correspondence with members of Parliament on the subject, and they are equally surprised at the injustice done by Government to Penang. No doubt it will benefit the P. and O. Company, not to call there, but had Government insisted on it, the P. and O. Company would have been obliged to give in without any additional subsidy.

The present is just an instance of how little care the Colonial-office takes of its far-off settlements, and tends to prove what a mistake it was of the Straits merchant wishing to be under the Crown.—Your obedient servant,

A PENANG MERCHANT.

December 10th, 1867.

*We are compelled to omit some of the special marks for want of type.

THE P. AND O. COMPANY'S MEETING.

THE twenty-seventh annual meeting of this company was held at the company's offices on the 6th inst., ARTHUR ANDERSON, Esq., in the chair. After the usual reference and explanatory remarks on the report—which will be found in another column—the Chairman alluded to the factious conduct of a few of the shareholders, and for the information of the general body he had ordered the correspondence on the subject to be printed. This consisted of a letter from J. CORRY CONNELLAN and EDWARD CANE, of Dublin, addressed to their brother shareholders, asking them to entrust their interests to Sir PATRICK COLQUHOUN. This does not seem to have drawn a number sufficient to give that gentleman a chance of meeting with success. Sir PATRICK, however, addressed a letter to the secretary, pointing out the alleged grievances against the directors, all of which were noticed by the chairman. The reply to this letter from the secretary was that Sir PATRICK not being a proprietor he could not take part in the meeting; that meant, we believe, that he had not held his shares long enough to entitle him to the privileges of a proprietor. It will be seen by the report of the meeting that the large body of shareholders present were unanimous in condemning this attempt to disparage the conduct of the directors. A reference to this subject was made in the *London and China Telegraph* of the 5th—the day before the meeting—and will be found in another column. The following is a report of the proceedings, the result of which did not influence the market value of the shares, which stand at £58 to £60 for the £50 share, while a few months since they were quoted at £40.

The CHAIRMAN: I rise to move the adoption of the report, and I shall call your attention to a few brief facts. The attainment of the position, I can assure you, has caused us, your directors, no little amount of anxiety and arduous exertions. We have had difficulties on all sides to contend with, which required a considerable amount—I will say, without taking too much upon ourselves—of tact and energy. (Cheers.) To enter into full details of our proceedings for the last three or four months I am aware would take up too much time now, and therefore I shall merely refer you to the documents in the appendix to the report, the papers published by the House of Commons, and the discussions which have taken place in this room, as well as in the public press. The result, I think, cannot but be satisfactory. We have now a partnership of 12 years with the Government, and I think a tolerably secure guarantee that our dividends shall never be under 6 per cent.—(loud cheers)—and I am sanguine enough to think from the prospect we have before us, that we shall have something more than that, and if we have to give that quarter of surplus to the Government I am sure none of us will grudge it—that is, the surplus over 8 per cent.

We sent round a circular to all our managers and agents in foreign stations, urging them most strongly to use every effort to economise the expenses of their establishments; and following that up, we sent a gentleman connected with the management, in whose judgment and energy we had full confidence, to these foreign stations on a tour of inspection, giving him power to adopt all such proper measures as he might think proper to carry out the objects of his mission. And concurrently with that, we formed a committee for the revision of the company's expenditure both abroad and at home, consisting of some of the ordinary members of the board, acting with the managing director. They have been working very hard upon it, and I will now give you a short summary of the result of their labours. Well, the directors in their home establishments, that is, London and Southampton, have made a reduction of about £4,000, in round numbers. I may mention that in effecting this reduction the directors have had a very painful duty to perform in many instances by discharging old servants, whom, under ordinary circumstances, they might have kept on longer; and by reducing the salaries and allowances to others. At Suez there has been a reduction of £4,000, and at Bombay £39,000; but I must explain that much of this reduction arose from the completion of extensive works at both places, particularly at Bombay, such as the making of docks and other works, which were essentially necessary to maintain the company in efficient working order. Well, now, added to these items I may mention what does not exactly come in the committee's duties—namely, that there is a sum of £12,000 of which the expenditure has been relieved since the 30th July last. That arose from a commission which I relinquished about thirteen years ago, in order to form a good-service fund; that fund being considered sufficient for the purpose, the amount will be no longer charged. There is another item I may refer to; we were fortunate enough to make an arrangement with the Egyptian Government to have our coals carried cheaper, and also the stores and bulky goods, and we estimate that saving to be equal to £15,000. Putting the whole together, there is a gross sum of £74,000; I do not mean to say that will be an annual reduction, for, as I have said, a great part of the reduction at Bombay and Suez arose from the cessation of works there. You will see by the accounts that the great deficiency of our revenue arose in the first half of the last financial year; it was £153,000, but in the last half-year it is only £24,000; and I am happy to say that since the conclusion of the financial year it has been progressing favourably. Therefore, I think, looking to all these circumstances, that is, the increased and efficient subsidy we have got, and the favourable turn which our commercial traffic is taking, together with the reduction which I have just mentioned in the expenditure, we may reasonably look forward to the future with confidence and satisfaction. (Cheers.)

I will now add a few words in reference to a movement which has been made, and which I think is a very ungracious one after all we have been doing for the interest of these very parties. (Cheers.) There has been a movement which really, in the way in which it has been got up, I can

Digitized by Google

hardly characterise in any other way than as a Fenian conspiracy—(a laugh); what the object is I cannot say, except it is to damage the interests of the parties themselves, and also of their brother shareholders. We have nothing whatever to conceal, and we are perfectly willing to have our transactions exposed to any persons, provided they are competent to look into them. The way in which the movement was got up was not candid and straightforward, for the directors only happened inadvertently to know of the movement; but when we did hear of it we took immediate steps that all the shareholders should know it, and not a select few. It appears there has been a gentleman—I don't know whether he is here or not, and it does not matter—(a laugh)—who has been chosen as what I call the champion of these parties—I will not say Fenians—and he has written a letter in order to show how much he is competent for an investigation of this sort. He has written a letter to the secretary, which you have all seen, I have no doubt, and which contains a summary of the delinquencies of these unfortunate directors. (A laugh.) Whatever ability this gentleman may have for a member of a committee of investigation at any rate he has one talent very considerably developed, and that is a talent for discovering "mare's nests." In his letter he says—"That completes a whole year, during which the proprietors have been deprived of interest on £4,500,000." Well, at any rate he has discovered £2,000,000 of capital which we have not got. Then he says, "The directors received a large sum of money under the pretence of increasing the fleet; this sum has been misapplied to the payment of debts and expenses which have been concealed from the shareholders and the public." Well, now, I do not know that it is a misapplication of money to pay the debts—(hear, hear),—besides which we have had no debts to conceal, but the calling up of the money at that time was a point of vital importance, and without it we could not have attended to the contract. He also says that we volunteered no excuse for the repurchase of vessels. The fact was this, we had a vessel on the Indian station which required extensive repairs and overhauling. A party wanted a vessel, and he agreed to take the vessel off our hands at the same price we paid at first. Well, he gave her a thorough overhauling; but shortly after we wanted a ship, and, therefore, we bought the ship back again. He also says that the shareholders were not informed why the provisions and accommodation were inferior to the French company, and why the freight was greatly in excess of the other companies. The fact is there is no truth in that; our fares are the same as the French company, and as to the accommodation and the provisions, they are equal to those of the French company, and we have very good testimony of it. (Cheers.) He then goes on to say that the shareholders have no satisfactory information as to this company's connection with the Parcels' Company, and how far the directors are interested in that undertaking, and also the amount of remuneration awarded to the directors. Now, with respect to the Parcels' Company; it is unintelligible to me; I am not aware there is any Parcels' Company with which we are connected.

With regard to the amount of remuneration awarded to the directors, I will take myself to begin with: the amount of remuneration to me amounts to nothing at all this year. The shareholders perhaps are aware of the fact that I relinquished a large portion of my commission thirteen years ago, in order to form a good-service fund for benefiting the *employes* of the company, and it has been a great benefit to them. (Cheers.) I retained at the time a small commission, which was my share of 2½ per cent. on the postal contract money, but that I gave up some seven or eight years ago, and applied it towards the expenses of the management department, which had become, of course, very heavy, and I thought I would relieve the revenue of the company by relinquishing that portion of my commission, which was about £3,000 a year. (Cheers.) I gave it up, and I had nothing remaining then except what was secured to the original managing directors—my share of the commission of 5 per cent. on the net profits. Well, I consider by doing that I identified my interests with yours, and, of course, as there has been no profit during the year, I get nothing. I may add that had I retained this commission, which I was undoubtedly entitled to, I should have been to-day just £150,000 richer than I was then, and I might have bought myself a very handsome little estate, which I have not got. (A laugh.) Now, after stating these facts, and looking at the criticism to which I have referred, I will put one question to the shareholders; I hold 800 shares in this company, being a very large proportion of the property, and of course it is to my interest, as well as my colleagues, that the dividend should be as large as possible. With these observations I conclude by moving the adoption of the report. (Cheers.)

Mr. HADOW seconded the resolution.

Mr. GLEDDEN was sure there would be no difference of opinion as to the able manner in which the directors had negotiated the contract with the Government, and that the board deserved the warmest thanks of the shareholders for the manner in which they had conducted the business. Notwithstanding this, however, they must look the circumstances of the company in the face, and he contended that, looking at the accounts, the company had lost one-third of a million of money during the year. ("No, no," and "Nonsense.") He also said that the company had earned £150,000 less during the year, and had spent £177,000 more in earning that. He did not say that the directors were responsible for this, for perhaps it may have arisen from incidental circumstances—from the completion of the French company and other circumstances; but, whatever the cause might have been, the fact remained the same. He referred at some length to the different items in the accounts, and said that it was difficult, on the face of the accounts, to make out how the £177,000, or nearly one-third of a million, had been lost. The question was, what was to be done in the future? It was no use "crying over spilt milk," but the shareholders must really look matters in the face. He believed that this would be the last contract with the Government, for possibly at the end of 12 years the communication with India would principally be by means of continental railways down the Euphrates Valley. He trusted, under these circumstances, and looking at the fact that there was great competition on the part of other companies, that the directors would push on the business of the company with all possible vigour and energy, and he also hoped that the directors would take into consideration the desirability of establishing second-class fares, believing that the establishment of such fares would be the means of greatly increasing the business of this company.

Mr. MULCAY said he thought that although it was not at all pleasant to the shareholders to hear that there was no dividend, yet he thought great credit was due to the directors for the straighforward manner in which they had laid before the proprietors the exact position of the company, and not endeavoured to blind them by any complicated arithmetical calculations, which had been resorted to by some other companies. For his own part, he did not at all despond with respect to the position of the company, for he could call to mind that at one time the Cunard Line was in anything but a prosperous condition; and he saw no reason why this company should not attain a position equal in its financial results to any other steam company. He went at some length into the circumstances of the company, and said that he had made the remarks he had done in order to point out that, although he knew that the directors were actuated by the best possible desire for the interests of the company, still it would require all their energy to meet the altered state of affairs.

Mr. LEWIN said he thought it was a matter of deep regret that some of the old servants should have been discharged; those old servants had stood by the company for many years, and, unless it was shown that they really could not be retained, he certainly thought that they should not have been subjected to the hardship of a dismissal. He also expressed his opinion that it was perfectly unnecessary for the chairman to have taken any notice of the movement which had been taken by some shareholders, seeing that it had not been brought before the body of the proprietors by the shareholder himself.

Dr. BEATTIE expressed his approbation generally of the terms of the contract, and said that the able manner in which the contract was negotiated by Mr. Scudamore reflected great credit on that gentleman.

The CHAIRMAN said that he might here mention that the company had seven ships chartered by the Government for the Abyssinian transport service at a fairly remunerative rate, and they had also undertaken to supply the Government with 70,000 tons of coal, on which of course they would receive a fair profit.

Mr. JONES (the well-known watchmaker in the Strand, who is notoriously energetic at meetings), said he thought that the diminution of the dividend might to some extent be explained by the greatly increased tariff of freight for coals, by the expense of the experiments which had been made with new ships at Bombay, and from other causes, which had absorbed the amount which would otherwise, perhaps, have been applicable for the dividend. He thought that a great saving might have been made in the amount of repairs, for he certainly did think an amount of £356,000 for repairs on a capital of £3,500,000 was a very large proportion indeed. The expenses of £500,000 for labour was also very large, and he thought that in one or two cases vessels had been sent home for repair sooner than was absolutely necessary. However, all these circumstances would not, he was sure, in the least tend to diminish the confidence which the shareholders felt in the directors. He would justify a liberal payment to the *employes;* he would not sanction a scanty payment, but at the same time he thought all parties connected with the company ought to bear some part in the loss, and he thought that 10 per cent. reduction should be made monthly in all the salaries—("No, no," and hisses)—and of course they could be restored to their present amount whenever the income of the company justified it—("Time, time")—upon which suggestion as a professed time-keeper he sat down.

Captain ENGLEDUE, referring to one or two remarks of Mr. Jones, said that he believed the directors were perfectly justified in the experiments which had been made with the ships, for it had the effect of making a material saving in the working of the vessels. He also said that although it was very easy for Mr. Jones to sit in the room and make a suggestion that the salaries should be reduced, he must remember what a hardship this would be, not only to the *employes* of the company in this country, but also those who were undergoing all the hardships and risks of working the vessels in the East.

Mr. P. D. HADOW briefly replied to the observations which had been made. Replying to Mr. Gledden, he said that the deficiency in the accounts compared with former years was accounted for very easily; there had been a decrease in the receipts for carriage of specie alone of £189,000, and £69,000 more had been paid for coal. There were other items, but these alone made up the loss. With respect to repairs, he might state that the cost of repairs were this time £349,000, against £439,000, a diminution which he was sure the shareholders would be glad to see. As the fleet was now in good order, the cost of repairs might not, perhaps, be so heavy in future, but at the same time it was absolutely necessary that the vessels should be kept in the most perfect order, as heavy penalties attached to the nonfulfilment of the contract with the Government, and therefore the item of repairs would always be a rather heavy one, although, of course, it would be kept down as much as possible, consistent with the efficiency of the fleet. With respect to the reduction in the number of the company's servants, he might state that great care had been taken to make it bear as lightly as possible on those who had been dismissed. In answer to one or two further questions, Mr. Hadow said the directors had no intention to allow proprietors to pay up their shares in full. With respect to a call, he expected ac all on the new shares would be made about the 1st of April. The directors had no intention to pay an interim dividend, even supposing they had the funds in hand, but they would follow the course which the company had hitherto pursued.

The resolution for the adoption of the report was put to the meeting and carried unanimously. The retiring directors, Mr. J. C. Ewart and Mr. E. Thornton, were re-elected, and the election of Mr. Henry Bayley confirmed. The auditors, Earl of Leven and Melville and Mr. Alexander Mackenzie, were then re-elected, and a cordial vote of thanks having been passed to the chairman and directors, the proceedings terminated, with the utmost goodwill and unanimity.

PARLIAMENT.

HOUSE OF LORDS.

GAMBLING IN HONG KONG.

(Dec. 3rd.) Lord TAUNTON wished to ask two questions deeply affecting the honour and character of this country. He was induced to do so because he understood that an ordinance had come home from Hong

Digitized by Google

Kong licensing some gambling houses in the colony. At the time that he held the seals of the Colonial-office a similar ordinance came home, and he felt it his duty to recommend that the sanction of the Crown should not be given. It was reported in the papers that the sanction of the Crown had been given in the present instance, but he had since received information which led him to doubt that such was the case, and the noble duke probably would have no objection to give their lordships accurate intelligence upon the subject. At a place nearer home there was reason to believe that a notorious public gambling house had also been established. Heligoland during the summer was very much resorted to for purposes of health and bathing, especially by the citizens of Hamburg; and these complained that their young men, belonging principally to mercantile houses, were there attracted to the gaming table to the serious injury of their interests and prospects. It certainly was not creditable to this country that a gambling house should exist under British protection so close to our own shores. He remembered that when at the Colonial-office he had sent out peremptory instructions to put an end to the system, and he now heard with some surprise that it was still in existence. He wished to ask the noble duke whether he was prepared to lay upon the table any papers showing what the facts in these two cases really were.—The Duke of BUCKINGHAM said it was quite true that at Heligoland the gambling house was still in existence, and was no doubt a very great evil, which ought to be put an end to at the earliest possible opportunity. But the last renewal of the lease under which the property was held, granted in 1855, would not expire until January, 1871. He had been in communication with the authorities of the island, and also with the Governor, as to whether the practice could be discontinued earlier; but it was very doubtful whether, under the peculiar arrangements of the colony, that would be possible. Certain funds belonging to the orphans of the island had really no other security than the income derived from this property, let and used as a gambling-house. Peremptory instructions, however, had been given to the Governor to see that during the current year, and as far as necessary during the remainder of the lease, the revenues should be applied to no other purpose than to the reduction of the debt charged upon this property, so as to facilitate the abolition, at the earliest moment, of what really might be called one of the institutions of the island. There would be no objection to lay on the table a copy of the lease, if one existed in this country, and, if not, one could be applied for. With regard to Hong Kong, it was quite true that an ordinance was sent home from the colony in 1866, which provided for the general improvement and for the maintenance of order and cleanliness in the colony. That contained a clause to the following effect:—"And whereas the evils of gambling in the colony are found to be on the increase notwithstanding the application of the penal laws in force for their prevention, and it is expedient to devise and adopt further measures for the gradual control and ultimate suppression thereof; be it therefore enacted that it shall be lawful for the Governor in Council from time to time to frame and pass such rules, regulations, and conditions as may be deemed expedient for the total suppression, or in the meanwhile for the better limitation and control, of gambling in this colony, with power from time to time to alter and amend such rules and regulations or repeal the same or any part thereof." A copy of that ordinance arrived in this country in the latter part of the year 1866, and came under the notice of the noble lord who was then at the head of the Colonial-office and, after some considerable investigation, the noble lord came to the conclusion which was expressed in his despatch to the Governor of Hong Kong, to the following effect: "Looking at the special circumstances and the state of society to be found in the Chinese community at Hong Kong, I am led to the conclusion that the evils arising from this apparently irrepressible vice require and justify exceptional treatment." That despatch of the noble lord was dated in November of last year, and on receiving it the Governor of Hong Kong remonstrated against the limitation proposed, and argued very strongly in favour of a practice which appeared to have been very common in some of the Chinese cities—namely, that of granting Government licenses to gambling-houses, not with the view of putting them down, but with the object of obtaining a large revenue from them, and of insuring that no other such houses should be opened. This remonstrance from the Governor came into his (the Duke of Buckingham's) hands almost immediately after he had undertaken the duties of head of the Colonial-office, and he at once proceeded to review the circumstances which had induced the Earl of Carnarvon to give the instructions objected to by the Governor. In the course of his investigations he found that the view taken by the Governor had frequently been put forward by the authorities of Hong Kong. At the time when the noble lord (the Earl of Carnarvon) and Lord Stanley were at the Colonial-office a long correspondence took place upon this subject, in which it was distinctly announced that Her Majesty's Government could not and would not sanction the raising of revenue from such a source. He further found that under the system hitherto adopted by the police the number of gambling-houses and of those frequenting them had considerably increased instead of diminishing, and that the Government of the colony had found themselves unable to put down the evil. The facility with which the practice was carried on he found to result from the system adopted by the proprietors of the gambling-houses of regularly bribing the police—a system which, of course, had a most demoralising effect upon that force. After a careful consideration of the whole subject, he had come to the conclusion that the decision arrived at by his noble predecessor was an upright one, and that the first step towards the suppression of these houses was to obtain a full knowledge of them by means of a compulsory registration. Under these circumstances he informed the Governor that he declined to sanction any departure from the previous instructions, and that any charges that might be made on the registration of the houses should be such as should merely meet the expenses incurred in keeping them under surveillance and the control of the police. In the meanwhile, the rumour that it was the intention of the Governor to grant licences had spread through the adjoining towns, and numerous offers were made to the Governor of large sums for the privilege of keeping gaming houses in Hong Kong. In consequence of the spread of these rumours, he had considered it necessary to repeat to the Governor his instructions that no revenues could be permitted to be raised through granting such licences, and that his attention should be directed towards the ultimate suppression of these houses, and not towards drawing a revenue out of them. It appeared that, subsequently to the despatch of those instructions, a certain number of these houses had been registered, and that considerable fees had been paid by their proprietors; but at the present moment the Government had not received from the Governor a copy of the rules and regulations under which the registration had taken place, neither were they aware of the steps that the Governor had taken in the matter. The object which both he and his noble predecessor had in view in the instructions they had sent to the Governor of the colony, was to secure the ultimate suppression of these gaming-houses, and they never for one moment thought of permitting revenue to be raised by means of licensing such places. There certainly appeared to be an inordinate desire in the colony that the revenues should be raised by any means except that of taxation; but those who advocated such a system would receive no support from Her Majesty's Government. The Governor had intimated his opinion that in a very short period, if stringent means were adopted, the evil of gaming would be extirpated in the island in the same manner that piracy was put down; but the opinion of Her Majesty's Government was that the spirit of gambling was so innate among the Chinese population that, although it might be greatly mitigated, the evil would not be entirely removed within the time contemplated by the Governor. In conclusion, he had to say that he had no objection whatever to laying the ordinances upon the table of their lordships' house, but that he was not quite content to lay upon the table a correspondence which was not yet brought to a conclusion. (Hear, hear.)

Monetary and Commercial.

The Crown Agents for the Colonies disposed of £100,000 Ceylon Government Six per Cent. Debentures at their offices by public tender. The applications were 97 in number, and amounted altogether to £572,200, at rates varying from £90 to £109 3s. The *minimum* was fixed at £108, above which rate £319,500 were applied for. All tenders at and above £108 13s. 6d. will receive in full, and one at £108 13s. to the extent of about one-third. This is the last instalment of the sum of £700,000 required for the completion of the Ceylon Railway from Colombo to Kandy. The debentures are redeemable at par in 16 years.

By the last mail we received the report of a meeting of shareholders in the North China Insurance Company, together with the report and balance-sheet issued by the directors, which shows a very satisfactory increase in the company's operations. But this does not seem to satisfy some of the shareholders, for at the meeting it was proposed by Mr. Maitland that a separate office should be established in London in place of Messrs. Ashton and Co., the present agents; not on the ground of any dissatisfaction; on the contrary, Mr. Maitland considered they were much indebted for their prosperity to Messrs. Ashton and Co., but that the time had arrived when an independent office would be more conducive to the interests of the company. We hardly think that the directors will take this view; they can probably tell Mr. Maitland that any such step would certainly not produce the desired result. Underwriting in London, like other business, is procured through influence, and the directors must know sufficient of the connection procured through their present agents to recommend the shareholders to "let well alone." The proposition is the exact reverse of a prudent one. If the office found that they did not make that progress which they expected, it would be policy to try a change. Unfortunately it is the error of the present day to do everything "big," *i.e.*, have extensive establishments.

According to a Customs' return of bonded goods at 31st October, it appears that the quantity of tea in bond was then 80,484,589 lbs., against 77,767,313 in 1865, and 86,171,764 in 1866. Of coffee 45,274,933 lbs. in 1867, against 30,332,937 in 1865, and 32,767,941 in 1866. Sugar is about 1,000,000 lbs. less in 1867, and tobacco 10,000,000 lbs. less.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton, on the 4th instant, was, in gold, to Alexandria, £2,000. None to India or China.

At a meeting of the China Steam Ship and Labuan Coal Company, on the 5th inst., the shareholders agreed to the following resolution:—

"That this meeting considers it is not desirable that the liquidators take any steps to have the old agreement sanctioned. That a committee of seven be appointed with full powers to act on behalf of the shareholders, and take such measures as they think necessary for buying or otherwise acquiring the property on the basis of giving every shareholder the option of taking a further interest therein, with power to add to their number and fill up vacancies. That the following gentlemen be such committee: Major Sinclair, Mr. Jas. Levick, Major Yelf Sharpe, Mr. Bergtheil, Mr. G. Lathom Browne, Mr. S. Gedge, and Mr. Blyth, jun.

A long report has been received from Mr. C. J. Appleby, the creditors' representative, on the affairs of the Blakely Ordnance Company; but it appears no great progress has been made in the liquidation, in consequence of the position assumed by Captain Blakely. The total

Digitized by Google

estimated assets of the company are about £84,525. An appeal from the Master of the Rolls was argued last term, and judgment was delivered. The facts were as follows:—In June, 1865, Messrs. Blakely and Dent, who carried on the business of a gun factory, entered into an agreement with a Mr. Hardwick to sell their business and plant to an intended company for a large sum of money. This sum was to be paid partly by the issue to Messrs. Blakely and Dent of debentures of the company to the amount of £150,000, "payable to bearer," in three years, with interest at £6 per cent. The company was formed under the name of "The Blakely Ordnance Company (Limited)" and the debentures were issued to Messrs. Blakely and Dent. The articles of association of the company referred to the agreement with Messrs. Blakely and Dent, and then provided by the first clause that the agreement should be binding on the company, and should be carried into effect. In February, 1866, £10,000 worth of these debentures was deposited by Messrs. Blakely and Dent with the New Zealand Banking Corporation, who gave value for them, and notice was given to the Blakely Company. The Blakely Company was afterwards ordered to be wound up. The New Zealand Banking Corporation sought to prove against the estate of the other company for the debentures which they held. The official liquidator of the Blakely Company contended that the proof could only be made in the names of Blakely and Dent, the original holders of the debentures, against whom the Blakely Company claimed a large set off. The Master of the Rolls allowed the New Zealand Banking Corporation to prove in their own name, and from this decision the official liquidator of the Blakely Company appealed. Mr. Baggallay and Mr. Higgins appeared for the appellant; Mr. Jessel and Mr. Wickens for the respondents. Lord Justice Rolt said that though he did not doubt that the debtor on an obligation might, if his power of contracting were unlimited, contract himself out of the right of resorting as against the assignee of his creditor, to his equities as against the creditor himself, yet his lordship was not satisfied that the mere power of issuing debentures would authorise the directors of a company to bind the company at large by any such contract. It was unnecessary, however, to consider this, as his lordship thought that the present case turned wholly on its special circumstances. The agreement with Messrs. Blakely and Dent having been confirmed by the articles of association, it was impossible for the company to say that what the directors did under the agreement was *ultra vires*. The debentures, even if invalid at law, were evidence of the terms upon which the money became due from the Blakely Company. The right to that money was assignable in equity, and though, in the absence of anything more than a mere assignment, the assignee would take subject to the equities subsisting between the original parties to the contract, his lordship was of opinion that there would be nothing inequitable in allowing the debtor in an obligation to contract with his creditor that he would not avail himself of any such equities. This was what had been done in the present case, and it would be inequitable not to allow the holders for value of the debentures to prove in their own names. The appeal must be dismissed with costs, the liquidator of the Blakely Company to have his costs out of the estate.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of October show a falling off of £1,046,782, or about 6 per cent., in the declared value of our exportations compared with the corresponding month of last year. As against the same month of 1865, however, they show an increase of 2 per cent. Much of the reduction from last year is due to the decline in the price of cotton and not to any diminution in the industry of the country, our shipments of cotton goods having been of 8 per cent. less money value than in October, 1866, although in their quantity there was an increase of 11½ per cent. Of cotton yarn the value of our shipments was only fractionally greater than in October of last year, while in quantity they experienced an augmentation of 16 per cent. As regards most other branches of business these returns indicate much dulness, iron manufactures, which show an increase of 13 per cent., again forming the most prominent exception. There has been a decrease of 3 per cent. in our shipments of earthenware, of 16 per cent. in haberdashery, 9 per cent. in hardware, and 6 per cent. in silk manufactures. Linen manufactures also figure for a falling off of 22 per cent. in value, and 17 per cent. in quantity. In the exportation of woollen yarns there has been an increase of 10 per cent. The value of the exports for the ten months ended 31st October was £153,051,639, against a total of £158,832,792 for the corresponding period of last year, showing a decrease for the present year of £5,781,153, or 3 per cent. The value of the total imports into this country in the month of September last was £20,515,695, against £18,356,015 in September, 1866, showing an increase in favour of the present year of £2,159,680, or 10 per cent. Taking the whole period of nine months into consideration there is still noticeable a falling off, the imports during that period of the present year amounting in value to £161,963,750, against £174,168,898 for 1866, exhibiting a decrease for this year of £12,205,148, or 9 per cent. As regards the imports in October, that important article—cotton—shows remarkable uniformity, upon a comparison of the three years, but there is more fluctuation in breadstuffs. The imports of wheat in October, 1867, were 2,874,854 cwts., against 1,830,569 cwts. in October, 1866, and 3,058,269 cwts. in October, 1865.

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and ten months ended 31st Oct., and the value to the 30th Sept., are thus given:—

From	1865.	1866.	1867.
	Quantity for the Month ended 31st Oct.		
China	7,506	1,380	— cwts.
British India	544,496	640,435	743,989 „
Egypt	150,622	13,083	10,841 „
Total from all parts	855,495	819,957	839,313 „
	Quantity for the Ten Months ended 31st Oct.		
China	309,031	34,767	4,707 cwts.

ARTICLES OF IMPORT.

TEA.—The market has been very quiet, with a moderate business doing; prices generally show but little alteration; there will be only a small business done during the remainder of the year, it is daily decreasing. Congous—Siftings, both Moning and Kaisow kind, continue in demand, and prices show a further rally of ½d. per lb. Broken-leaf are steady at full prices. Fair to good common have been sold from 11½d. to 11⅝d. per lb. fair to good flavoury kinds remained difficult of sale at from 1s. to 1s. 5d. per lb. Good to fine Kaisows show no alteration. There has been a moderate inquiry for the finest. Pak Lings remain as before. Common to fair black-leaf have been sold from 11½d. to 1s. per lb., being previous prices; in good qualities of old import a few sales have been made at former prices. In new teas a chop of common has been sold at 1s., fair from 1s. 5d. to 1s. 8d., and good from 1s. 9d. to 2s.; fine have been dull of sale, but a few finest have been sold at from 2s. 5d. to 2s. 7d. per lb. Fair to good Oolongs have sold without reserve at public sale at a decline of 1d. to 2d. per lb.; fine to finest remain better supported. Souchongs have become difficult of sale, owing to further arrivals, and prices have ruled lower—from 2s. to 2s. 8d. per lb. for good to finest. Scented Capers show no material alteration, except that fine kinds have sold easier. Canton Orange Pekoes remain difficult of sale, and at public auction went fully 1d. per lb. lower. Foochow kinds have sold to some extent from 2s. to 2s. 4d. per lb. for good to fine kinds. Capers also selling well. In Uncoloured Japans there is not any new feature. Green Teas: These have sold steadily, nearly the whole of those per Agamemnon and a portion per Lennox Castle having found purchasers at very full prices. Finest No. 1 Pingsuey gunpowders have sold as high as 4s. 2d. per lb., with other kinds in proportion. Canton Gunpowders show no alteration. The public sales of China teas on the 3rd instant comprised only 7,917 packages, of which 7,577 packages were sold, all being without reserve. The stock in the United Kingdom on the 30th ult. was estimated at 74,000,000 lbs., against 89,500,000 lbs., and the quantity afloat at 42,636,700 lbs, against 40,274,000 lbs.. The deliveries for home consumption during the first ten months of the current year amount to. 90,068,124 lbs., against 85,830,602 lbs. in 1866, and 82,096,421 lbs. in 1865. The imports at the end of October, 1866, were nearly twenty millions in excess of the imports in 1865, being 103,057,208 lbs. in 1866, against 83,908,179 lbs. in 1865. During the present year the imports have amounted to 98,320,414 lbs., a quantity which, though more than four millions below the imports of 1866, is almost fifteen millions over those of the first ten months of 1865. The exports show but little variation, amounting in round numbers to twenty-eight, twenty-five, and twenty-seven millions, for the years 1865, 1866, and 1867 respectively.

SILK.—In China Silk, chop Tsatlees are in great demand, and 29s. has been paid for No. 3; medium and fair descriptions have also been largely dealt in at improved prices, 25s. 6d. being to-day the quotation for Red Peacocks; inferior qualities, both of Tsatlee and Taysaam, are however comparatively neglected. Japans are scarce and much wanted, and the next arrivals, if good, will doubtless realise higher prices. Deliveries from 1st to 7th inclusive: China, 757 bales; Japan, 163 bales; total, 920 bales.

COTTON.—The cotton market has been subject to more fluctuations during the fortnight than for some time past; rates had suffered an average fall of quite ½d. per lb., but more than half the decline has been recovered, and decided firmness prevails at the close. Trade in the Surat varieties, whether on the spot or for arrival, continues to be most limited. Latest quotations: Broach, ordinary to fine, 5d. to 7½d. per lb.; Dhollerah, ordinary to fine, 5d. to 7d.; American, 7d. to 9d. There have been no transactions in China or Japan.

COFFEE.—Buyers, as usual at this period of the year, being mostly unwilling to increase their stocks, the market has been exceedingly quiet, and importers wishing to sell have had to submit to a reduction of fully 1s. per cwt. on Plantation Ceylon. There has also been less demand for Native, and the prices lately ruling are scarcely obtainable. Of Ceylon 1,210 casks and 830 barrels and bags Plantation sold—ordinary to fine fine ordinary, 68s. to 71s.; low middling to good middling, 73s. to 81s. 6d. Of 165 casks, 760 bags Native, small part sold, barely good ordinary at 52s. to 52s. 6d. By private contract a sale is reported of 150 bags Java at 71s. per cwt.

CAMPHOR.—Transactions to a limited extent are reported in Japan descriptions at £6 15s. for landing weights, and £7 2s. 6d. reweights, but China still remains without inquiry.

COCOA NUT OIL.—This market continues extremely flat, no business worth reporting having been done.

GUM BENJAMIN.—Prices have slightly receded, and of 65 cases Sumatra at auction, two-thirds sold at £11 5s. to £11 10s. for fine 2nd quality; £8 10s. to £8 15s. false packed; and £5 17s. 6d. to £6 12s. 6d. middling to fair 3rds.

JAPAN WAX.—There have been no offers since our last report.

MANILA HEMP.—Transactions to a limited extent have taken place by private contract, but there have been no public sales.

PEPPER.—Black: The demand is not general, but about 2,300 bags have changed hands, the bulk Penang at 3d. to 3⅛d. 753 bags damaged Trang sold by auction at 3⅛d. to 3⅜d. White: Of 685 bags Singapore, about two-thirds were disposed of at 5d. per lb., and 120 bags have been sold to arrive at 5⅛d.

PLUMBAGO.—The market is firm, and of 400 barrels at auction, three-fourths sold at 15s. to 32s. for middling to fine lump, 17s. 6d. for chips, and 11s. to 11s. 9d. per cwt for dust.

RICE.—The market has had a quiet tone, and sales (excepting soft grain for the Continent) have been less readily effected at the former currency. The business reported has been entirely for arrival as follows:—500 tons Bengal, Cazlar at 9s. 9d., yellow 10s. 1½d. to 10s. 3d., Ballam at 10s. 6d. (ex ship), Dacca at 11s. to 11s. 3d. landed, 200 tons Rangoon at 12s., 200 tons Bassein 11s. 10½d., and 200 tons Nakrenzie at 11s. 9d., supposed to be ex ship; also two cargoes, together 2,800 tons, from Saigon for a Continental port, at about 11s. 9d.

SUGAR.—There has been no revival of demand, and the market has been dull and inanimate. The business reported is of trifling amount, and although sales are not freely practicable at quotations, we do not reduce them, as there still appears to be little general desire to realise, and purchases can rarely be made except at full prices. Of Manila by private contract 3,000 bags good Muscovado realised 28s. 6d., and 7,000 bags clayed (duty 8s. to 9s. 7d.) 31s. to 31s. 6d. per cwt. The imports of Sugar into the United Kingdom during the first eleven months of the year are estimated at 535,000 tons, against 539,500 tons in 1866. The clearances for home consumption were 567,500, against 523,530 tons. The stock at the end of November was 135,100 tons, against 192,700 tons.

SAPANWOOD.—The market is firm, and at auction 39 tons Siam realised £10 5s. to £13 10s. per ton, and 24 tons Ceylon were withdrawn.

TIN.—The Banca prompt of 26th ult. being met with punctuality, prices rose from 53¼ guilders to 54¼ guilders, at which the Dutch brokers report buyers. As to the quantity to be offered at the next Spring sale, it is important to notice that the exports from Java the first nine months of the present year are 1,243 tons less than in the same time last year. Straits has varied but very slightly, the price continuing at £90 for cash, £91 floating; the purchases for cash being all for immediate delivery. It is not usual to have a very active demand in December, as manufacturers prepare for their stock-taking. The last shipments from the Straits must cost the importers some pounds above present quotations.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 5s. to £7 15s.; hoops, £8 7s. 6d. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 5s. to £7 15s.; rails, £5 10s. to £6.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £80 to £82 per ton; yellow metal, 7d. per lb.

LEAD, &c.—English pig, W.B., £21 5s.; shot, patent, £22 10s., sheet, £20 10s.; spelter, £21 5s.; zinc, English sheet, £28; quicksilver, £6 17s., in bottles of 75 lbs. each.

The following is from the Circular of Messrs. French and Smith:—

There is still no improvement to notice in the Metal Market; indeed, after having gone through the year thus far with so little activity, it would be unusual to meet with improvement in the closing months.

IRON of all descriptions is dull, and prices in favour of buyers.

COPPER.—The prices have varied but slightly during the past month. Chili Bars have improved from £1 to £1 10s. Ores are also a little dearer, but Australian is weak, and all descriptions of English. We quote:—Chili Bars, £69 10s. to £70; Ores, 14s. 3d. per unit; Burra Cake, £83; Wallaroo, £80 10s.; Tough English, £75; Sheets, £79 to £80.

TIN PLATES have been again easier in price, and the demand has rather fallen off. The last few days, however, the inquiry is more active. The shipments in November amount to about 97,000 boxes, against 84,000 boxes last year same month. The Board of Trade Returns give the shipments, January to October, 68,080 tons, against 61,800 in 1866.

LEAD has continued dull during the entire month, and prices are lower. We quote W.B. £21 5s.; L. B. and Co., £19 12s. 6d.; other best brands, £19 5s.

SPELTER.—A fair amount of business has been transacted, but the late high prices have rather given way. We quote £21 5s. to £21 7s. 6d. ex ship. The stock here on 30th November was 2,739 tons, against 4,168 tons last year.

MANCHESTER MARKETS.

Mr. Sam Mendel's report states:—On the 4th inst., and for several days after, a more active demand succeeded the previous dull feeling with higher prices quoted. The improvement is not maintained, and any advance is nominal, yet sellers refuse the previously accepted lowest prices.

Quotations are:—Grey Shirtings, 7 lbs., 7s. 6d. to 8s. 1½d.; 8½lbs., 9s. 6d.; Cotton Yarn, Nos. 16-24, 11½d. to 12½d.; Nos. 28-32, 1s. 0½d. to 1s. 1½d.; Maddapollams, 3s. 4½d.; Long Cloths, 8s. 9d.; T-Cloths 5s. 9d.; White Spot Shirtings, 10s. 3d.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports remain firm at previous quotations. Coal freights from the Northern outports are fully maintained at, in some instances, increased rates.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow: 45s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £54. For Shanghai: £56. For Hong Kong: £47. For Saigon: £50. For Singapore: £34. For Batavia: £32. For Colombo, £30. For Galle, £34. From Newport, Cardiff, or Swansea, per ton.—For Yokohama: £2 12s. 6d. For Shanghai: £2 15s. For Chefoo, £2 15s. For Hong Kong, £2 5s. For Manila, £1 15s. For Saigon: £2 8s. For Singapore: £1 12s. 6d. For Batavia, £1 10s. For Trincomalee, £1 17s. For Galle, £1 12s. For Colombo, £1 9s.

CASUALTIES.

The Horatia Harris, Humphreys, which sailed from Sunderland Nov. 28, for Galle, arrived at Portsmouth on December 5, with loss of her anchors and chains.

MISCELLANEOUS.

At PERNAMBUCO.—Nov. 11, Sir Harry Parkes, Chapman, from Manila, and sailed 12 for New York.

Off PERNAMBUCO.—Oct. 17, Leon Crespo, from Liverpool, for Shanghai.

At ST. VINCENT, C.V.—Oct. 25, Warrior (s.), Patterson, from New York, and left Nov. 5 for China; 26, Sumatra (s.), Droukers, left for Batavia; Nov. 2, Tamar (troopship), from Gibraltar, and left for China.

At MAURITIUS.—Oct. 28, Achilles (s.s.), Russell, from China, and left 31 for London.

PORT OF AMOY, CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facilities for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring espatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers &c.

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

REPORT presented to the Third Ordinary Meeting of the Shareholders, held at the Offices of the Company, Shanghai, on the 18th October, 1867.

In submitting the statement of accounts for the half-year, January—June, 1867, the Directors have little to remark beyond congratulating the shareholders on the continued prosperity of the Company, there being on 30th June, 1867 (in addition to the paid up capital) a balance in favour of the Company of Tls. 495,468.22, to meet claims on outstanding risks, against Tls. 342,718.40 on 31st December, 1866.

Owing to the large reserve kept in London, and the low rates of interest ruling there, a much smaller sum has been received from that source of profit than in the previous half-year.

Exchange account has been affected in a similar manner, by the lower rates of exchange on London which have been ruling in Shanghai.

In order to protect the Company's interests in case of claims on risks to New York, Messrs. Bell and Hayward have been appointed agents there; agencies have also been established at Macao, under the care of Messrs. Margesson and Co., and at Kurrachee, under that of Messrs. Fleming and Co., where it is hoped a profitable business may be transacted.

By order of the Court of Directors, JOHN S. MACKINTOSH, Secretary.

Billiter-square, November, 1867.

THE HONG KONG AND SHANGHAI BANKING CORPORATION.

LONDON OFFICES:

32, NICHOLAS-LANE, LOMBARD-STREET

THE ORDINANCE of INCORPORATION having received the Royal assent, a London Register of Shares has now been established, and shareholders in the company desirous of having their shares transferred from the Hong Kong Register, can do so upon application at this office.

Certificates for shares so transferred will be granted in exchange for the original certificates, the conversion being effected from dollars into sterling at the rate of 4s. 6d. per dollar.

The Ordinance, Deed of Settlement, and London Register of Shareholders can be inspected by shareholders at this office on application to the manager.

Purchasers of shares can have their transfers registered at this office, and also obtain new share certificates in lieu of those surrendered by the transferrer.

Forms of transfer (according to the Ordinance of Incorporation and Deed of Settlement) can be obtained on application at this office.

Dividends on shares on the London Register will be paid in London, in sterling, at the rate of exchange for Bank bills at sight by the mail leaving Hong Kong after the declaration of each half-yearly dividend.

The transfer books for shares on the London Register will be closed for fifteen days previous to the 25th day of June and 25th day of December in each year.

By order of the Court of Directors,
W. H. VACHER, Manager.

Bostonite Music Slates, 6d. each.
Bostonite Purses, from 1s. 6d. each.
Bostonite Multiplication Tablets, 4d. each.

HOLLOWAY'S PILLS.—These Pills are better for strengthening a debilitated constitution than any other medicine in the world. Persons of a nervous habit of body, and all who are suffering from weak digestive organs, or whose health has become deranged by bilious affections, disordered stomach, or liver complaints, should lose no time in giving these admirable Pills a fair trial. Coughs, colds, asthma, or shortness of breath, are also within the range of the sanitive powers of this remarkable medicine. The cures effected by these Pills are not superficial nor temporary, but permanent and complete. They are as mild as they are efficacious, and may be given with confidence to delicate females and young children.

To Singapore: Mr. James Miller, Rev. G. F. and Mrs. Hose. To Ceylon: Miss Robinson. Mr. J. G. Morley.

From Marseilles, Jan. 13.—To Shanghai: Mr. Ellis Elias, Mr. F. Cox. To Singapore: Mrs. F. Brenkmann. To Ceylon: Mr. J. S. Findlay.

Per P. and O. steamer, from Marseilles, Jan. 28.—To Hong Kong: Mr. J. and Mrs. O'Dell, Mr W. L. O'Dell. To Singapore: Miss Mary Thompson.

THE MAIL SERVICE.

The new postal service will be commenced by the Peninsular and Oriental Company with the mail from Southampton on Saturday the 29th February, and from London *vid* Marseilles on Friday the 6th March. This mail is due in Hong Kong on the 15th April. Commencing with the 6th of March, the outward mails will be despatched every alternate Friday. The homeward service commences on Wednesday the 12th February from Hong Kong, and will be continued on each alternate Wednesday. The mails from Japan, Shanghai, &c., will be made up fortnightly to meet at Hong Kong. The Marseilles steamers will pass through the Straits of Messina, and will be signalled from Messina, but will not stop there. A remonstrance against the omission of Penang in the new contract has been addressed to the Postmaster-General, and the reply stated that the India Government would arrange to convey the English mails to that port. The directors of *Messageries* have not yet decided on their scheme.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have intelligence to the 30th Oct. (nine days later). The outward mail of Aug. 26 was delivered on the 20th Oct. The *Japan Times* still maintains the correctness of its assertions regarding the abdication, or, rather, retirement of Stotsbashi from the Shiogoonate, as will be seen from the following extract:—

"We remain without much decisive news of any importance from the South. Two days ago we received a despatch informing us that orders had been issued to the Hatamotos to disband their troops; the negotiation with Chiosiu having been brought to a satisfactory termination. This is strikingly confirmatory of the news we were lately enabled to publish of the retirement of 'Stotsbashi from the Shiogoonate; as every student of Japanese politics with the least knowledge of his subject is aware that the victorious chief of Nagato made his acceptance of the Mikado's terms and the laying down of his arms conditional on this concession being made to his personal and family pride. In due course of time the fact will be admitted. Meanwhile M. Roche, the French Minister, whose designs 'Stotsbashi's retirement would materially thwart—even probably to the extent of disturbing some advantageous arrangements in Europe—is understood to be terribly annoyed by our persistence in giving currency to such inconvenient truths. It is reported, but on what foundation of authority we cannot state, that he has even gone so far as to make inquiries as to the amount of control over the press possible to an English executive abroad!

"We foresee some considerable evil from this move of disbanding the troops. Should the order be obeyed, and, in the case of most of the Daimios such will properly be the case, some 50,000 armed men, with no present means of livelihood, will be thrown upon their own resources: and though doubtless many of them will return to the tillage of the field and other occupations from which they were taken two years ago and thus be re-absorbed into the community, still there will remain a proportion whose tastes or habits will render them averse to peaceful labour, and a considerable addition to the *Lonin* class mus

Digitized by Google

naturally be expected. The Shiogoon's Government offers to take into its employ all above the rank of private soldiers—an excellent stratagem to deprive other daimios of the flower of their officers. As bearing upon the opening of Osaka, however, this news must be considered good, inasmuch as it would appear to indicate a withdrawal of the threatened opposition to our residence at Osaka. All we have to fear is the increased chance of isolated assassinations by discharged soldiers, whom poverty may turn into desperate bravoes, and who may choose to think the foreigner responsible for their misfortunes."

The following items are also from the *Japan Times*:—

The all-engrossing subject of attention at present is the approaching opening of the new ports. Merchants are exceedingly, and most justly, indignant at the apathy, or worse, of the Ministers who have kept for so long a time from us the information in their possession, which even if grudgingly given to us now will come almost too late. It is a shameful thing that the representatives of great commercial countries, which have made commercial treaties with Japan, and equip, send out, and largely pay these representatives specially to protect and advance commercial interests, should so completely fail in their duty as to deliberately withhold from commercial men information urgently wanted—should snub the Chamber of Commerce at every possible opportunity, and should leave it to a Japanese official at Osaka, Mr. Scare, to furnish the mercantile community with such intelligence as his condition of carefully-watched State imprisonment permits him to gather. His letter to the Chamber of Commerce contains probably little—except his corrections of the Ministers' mistakes—that these Ministers could not have told us months ago.

The fortnight has been fruitful of material for sensational paragraphs. The Dutchman against whom an English coroner's jury found a verdict of wilful murder in the unfortunate case to which we referred last mail, has been sent home for trial. The decision indicates that his punishment is not likely to be a severe one.

Then we have had the usual fire in the Japanese town, a most exciting burglary, in which a Chinaman was nearly done to death with a carving knife, one or two less noticeable robberies, and, we are exceedingly sorry to say, a fatal case of poisoning. This latter happened in the stables of a European firm, the victims being three horse boys, who had made their midday meal from a poisonous description of fish. Unhappily, circumstances prevented their getting proper medical assistance early enough, and in spite of all that could be done for them two of them died. Luckily, the fish is of a variety never seen upon foreigners' tables.

Captain Hodson's Court Martial is over, but the result is not yet known.

H.M.S. *Pearl* left for Nagasaki on the 22nd Oct., *via* the Inland Sea. There will be a rendezvous at that port of a considerable force of British ships in time for the projected opening of Osaka on Jan. 1st, 1867. The *Vineta* (Prussian) has also left for the same port. We must not omit to note the arrival of Capt. Tracy, R.N., formerly gunnery lieutenant of H.M.S. *Euryalus*. This officer is the first of a number permitted by H.M. Government to take service under the Japanese as naval instructors. Our allies here have, rather more quickly than most Eastern nations, got tired of the French. A line of steamers has been started by the Japanese, between Yokohama and Osaka.

Sir Edmund Hornby's judgment in the case of P. B. Walsh *v.* the Oriental Bank Corporation—in favour of the latter—arrived by the *Ganges*. It has given universal satisfaction. It was seriously feared that the Judge would attach to a pass-book a legal, technical value, as a receipt, which it has never yet possessed in the opinion of mercantile men in the East, whether bankers or merchants. Had he held so, the immediate result would have been the abolition of pass-books altogether, to our great inconvenience.

Apropos of the opening of Osaka, the *Japan Gazette* writes:—As the time approaches for the event, there does not appear to be any of that movement among our residents that would be expressive of a desire to go there; and according to the information given by Mr. Benjamin Scare—who, according to his own description, has been "detailed on special business by the authorities at Yedo to the Governor of Osaka"—the preparations for them in the city are far from what might have been expected. They consist of nineteen lots of about a quarter of an acre each; and such lots are quite inadequate for the wants of even a very moderate mercantile establishment in such a country as this. We can hardly conceive that our ministers should have been so easily satisfied—for whatever decrease there may be in the number of foreigners that actually go there to settle from what was expected, such a space as that agreed upon is far too limited. It is the clever wily Asiatic once more showing his superiority *in finesse* over the European. The Government had it their own way in squeezing us off the Tokaido—and compelling us to locate at Yokohama instead of Kanagawa—and it will be the same thing at Osaka—the place accorded is so small, that whilst opening the city to foreign residents according to treaty, the number that can reside there is infinitesimal, and the majority will be compelled to adopt Hiogo.

As to the opening of Yedo, at present it looks very mythical. An immense hotel is being prepared by the Government itself, where foreigners will be mulcted, squeezed, and cheated, to an extent even yet unknown. In fact, the whole arrangements, with the kind of semi-secrecy that pervades them, are highly unsatisfactory, and many who are desirous of learning what chances there are of their being able to open business in either Yedo or Osaka are totally unable to judge of their being able to do so.

From Hakodadi we are without any news whatever. The Russian encroachments, to which we made allusion some time ago, continue, and, as we predicted, they are creeping gradually farther south.

NAGASAKI.

The "Attack on two foreigners" reported to have occurred at this port proves, as we anticipated, to have been an affair of slight importance. It seems that the two foreigners were the aggressors. They were returning home about 2 P.M. from some evening entertainment, when they met a Japanese officer accompanied by two women. These they addressed with that cheerful disregard of *les convenances* which distinguishes Europeans among Eastern peoples, and on the officer remonstrating one of them struck him. Of course he drew and inflicted slight wounds on both his assailants, wounding one in the arm, the other in the shoulder. He appears to have behaved with great forbearance. The affair had been quietly compromised. The demand for vessels of war at the Southern port appears to be unabated, and there is continued inquiry for steamers of the gun-boat class. The following were in harbour for sale to the Japanese:—Kango-no-Kami, Kiang-soo, City of Nantes:—Thames, Staunch, Dragon, Coromandel, Orphan, Whampoa and Argus refitting.

One of the Japanese Daimois has in course of erection a steam power loom factory for the manufacture of cotton piece goods. One hundred looms are to be started as a commencement. Six experienced Lancashire operatives are to superintend operations and to teach the Japanese. It is expected that the factory will commence business within a couple of months.

CHINA.

—o—

TIENTSIN.

During the forenoon of the 19th Oct. the Tientsin foreign community received the agreeable intelligence of the arrival at Takoo of the British barque *Our Queen*, direct from Liverpool, laden with British manufactures, and other British exports for sale in the Tientsin market. The arrival of this vessel with direct shipments of merchandise from England, and the establishment of an agency by the Comptoir d'Escompte at this port, are deemed of such vast importance for the pecuniary interests of the foreign mercantile community at Tientsin that I presume I shall be excused if I take the liberty of again adverting specially to the two subjects.

Letters have come to hand from Tientsin stating that the Yellow River has burst its banks and done incredible damage in Shantung, inundating its north bank for a distance of 100 li. The spring crop had failed before, and now the autumn crops, which were very fine and just ripe, are utterly lost. Many villages are submerged, much life has been lost, and desolation and misery untold prevail.

CHEFOO.

The effect which gold discoveries have had in other parts of the world gives importance to what appears to be a fact, that a great discovery of gold has been made by two gentlemen at a place called Pingtu, about 105 miles from Chefoo. The mine was worked by the Chinese 15 years ago, and 70,000 taels taken out in 40 days, when it was again closed. The gentlemen who

Digitized by Google

have now rediscovered it got a little gold which they took to Chefoo, but the mandarins soon prevented them from working. The *Daily News* correspondent says :—"Once let a tide of foreign gold diggers set in to Shantung, and the questions of residence in the interior, of railways and other improvements, would be soon settled." The remark is perfectly justifiable ; the Californian and Australian miners would be difficult subjects to deal with under the necessarily ineffective native government, which would not like to employ foreigners as inland police. If they did, the inevitable result, which diplomacy has not yet reached, would very soon be attained, and among the greatest "reformers" would probably be the Chinese who would return from foreign fields to fatten upon the auriferous pastures of their own, their native land. It is quite consistent with Chinese policy to discourage all attempts at gold-seeking in China.

HANKOW.

Another freshet has occurred in the Han, but of less consequence than the last. This is the third during the current year. The *Hankow Times* says—"The salt trade at this port, which was formerly a most profitable and extensive branch of business, has for some time past shown signs of recovering its former importance." A meeting of subscribers to the Church Building Fund has been held, at which it was announced that a grant had been obtained from the Home Government, and that sufficient funds were now available for building the Church. The committee was accordingly authorised to take the necessary steps for carrying out the plans.

We understand that a rule *nisi* has been obtained by the counsel for the creditors of Mackellar and Co., calling upon the bankrupts to show cause why the order of discharge granted by the consul should not be cancelled, and the appeal to the Supreme Court granted.

It is stated, "on reliable authority," that the refusal by H.M. Consul, Mr. Medhurst, to entertain the application of the creditors of Mackellar and Co., at Hankow, was in consequence of wilful delay on their part. Mr. Medhurst fixed 10 o'clock in the forenoon of the day following the expiry of the legal time for appeal in order to give ample time to the Chinese who might be unacquainted with British law, and further warned them that if they exceeded this time their application could not be entertained. Nevertheless Mr. Medhurst remained in his office until 12.30 P.M. in order not to seem desirous of cutting the time "too fine." At that hour he left, and on the applicants appearing at a quarter to one, he informed them that having given them an extension of the time of grace and further delayed closing the matter for over two hours after the extreme limit named, he could not in fairness to the bankrupts now receive their appeal. The truth appears to be that the Chinese could not make up their minds what to do, and delayed until a time when the bankrupts themselves could have legally protested against an appeal.

SHANGHAI.

Dates hence are to the 9th November. The English mail of 10th September arrived on the 29th October, and the French mail of 19th September on the 5th November. The latter brought tetegrams to 5th October, but later advices to October 8th had been received via Kiachta.

The following items are from the *North China Herald* :—

A meeting of residents interested in the erection of the new church has been held, at which reports by the architect, trustees, and treasurer were read. The satisfactory announcement was made that more than 8,000 taels had been subscribed by the community, conditionally on the trustees being able to raise the remainder of the sum required for the completion of the building. This they proposed to do by a loan—leasing a slice of the western portion of the church compound, including the site of the present church, for 1,200 taels a year, to guarantee the interest on the amount. Much discussion arose, in the course of which several restrictions were proposed, in consequence of which it was announced that the offer on which the trustees had based their scheme was withdrawn. An impression, however, seemed to prevail that a better might possibly be obtained, and tenders have been asked for. Some discussion arose in regard to the amount of further support which Government might be induced to afford, and a proposal that the trustees be empowered to solicit further subscription from H.M.'s Government was carried. The meeting was then adjourned to the 15th November.

The Shanghai Chamber of Commerce has compiled a voluminous memorial to Sir Rutherford Alcock, in reference to the treaty revision. The Chamber urges the necessity that foreigners should be allowed to reside and trade in the interior, and holds that Art. XII. of the present treaty gives the required privilege, if liberally interpreted. The questions of transit dues, and of salt import, are also dwelt on.

Several large sales of land and house property have been made, mostly at low prices. A plot of land in Foochow-road measuring 4*m.* 9*f.* 11*l.* 6*h.* was sold for taels 2,650, and the houses on it for taels 1,350. Another larger plot, bounded by the Peking, Kansuh, Woosih, and Fohkien roads, bearing 53 houses, brought taels 5,000. A plot in Szechuen-road, consisting of 4*m.* 3*f.* 6*l.* 8*h.*, with the houses thereon, leased at an annual rental of taels 2,675, brought taels 7,200. The plot situated between the Sungkiang and Canton roads, 3*m.* 2*f.* 4*l.*, with foreign built dwelling-houses, &c., thereon, taels 6,800. A plot of ground of about 1*m.* with 32 Chinese houses thereon, brought taels 1,800. Four shares in the Shanghai Gas Company were sold at taels 55 each. Eleven Old Dock shares, taels 150 each. One Shanghai Wharf Company share, tael 1. Ten shares in the Masonic Hall, taels 10 each.

Yutang, a well-known large dealer in piece goods, has bolted, leaving large liabilities. This is his second failure within about twelve months. He compromised with his creditors on the first occasion.

The hull of the barque *Siam* has been sold by auction for 3,600 taels, and the sails and stores for 460 taels, altogether 4,060 taels. About forty tons of the coal stolen from the *Vesta Vezis* have, we learn, been returned from Anwhey, confirming the suspicion that the larger portion of her cargo was carried away up the river, and not landed near the scene of the wreck.

Apak, the well-known pirate chief, who assisted Captain Dew in the capture of Ningpo from the Taepings, died a few days ago in that city. Deprived of the exitement of his previous career, he took to smoking opium, which, with other dissipations, has hastened his death. His family are celebrating the obsequies with much pomp.

A gorgeous procession was got up to grace the public entry into Shanghai of the successful candidates from this district at the recent Nanking literary examinations.

Unusually strong winds have prevailed during the past fortnight, and several accidents are reported in the river. Amongst others, a ferry-boat was upset in the river, and a large number of Chinese drowned.

A daring robbery has been committed in the city by some Fohkien men. They broke in to a pawnshop, carried off property worth 20,000 taels, and escaped through the South Gate, cutting down one of the sentries. Four of the culprits have since been captured.

The N. C. *Daily News* says :—With reference to the rejection of the creditors' claim to appeal against the decision of the Hankow Consular Court in the case of Mackellar's bankruptcy, we may add that, however close the question of time on the 18th, the creditors had then had forty-eight hours' grace. The date originally fixed was the 16th inst., thirty days after the delivery of judgment. The day on which the discharge was granted was the 18th. If we are rightly informed, some difficulty in verifying the signatures of Chinese creditors was the cause of the delay.

The *Herald* and *Recorder* announce that a criminal prosecution has been commenced against Mr. C. Treasure Jones, late assistant in H. B. M. Consulate, for alleged embezzlement of moneys entrusted to his charge. The charge is said to be laid under instructions from Lord Stanley. It appears that Mr. Jones has recently started a newspaper called the *Shanghai Evening Express*, and an "extra" to this paper issued on the day of the mail's departure is to the following effect :—

"It is with extreme regret we observe the paragraphs which have appeared in both our contemporaries this morning regarding the charge of embezzlement made against Mr. C. T. Jones. Notice was only given to the accused at 5 P.M. on Thursday evening, and he was required to attend at 2 P.M. on Friday. In this brief space he naturally had not time to examine his papers and accounts of matters occurring two years ago, and he applied for an adjournment till Monday at 2 P.M., at which hour he would be quite prepared to show that no such charge could be maintained against him. This was at once granted with the sanction of Mr. Mowat ; so the reason for calling on the case in Mr. Jones's absence is not obvious, except to secure the ear of the public in the first instance, and place the defendant at a decided disadvantage. This would be the result gained by the prosecution.

"To the journals so hastily promulgating the report the result is clearer still. The *Evening Express* is edited by Mr. Jones, and, if they could, by any means, shut him up suddenly, the whole thing might fall through, and a formidable rival be removed from their paths. That this is their sole

Digitized by Google

reason for their undue haste we can but little doubt, but the good they expected to derive will hardly accrue to them.

A gentleman thoroughly capable of editing the journal has consented to take temporary charge on Monday next, and will continue to do so until this formidable case has been disposed of, and Mr. Jones, once more able to devote his entire energies to its success, and relying, as he does, on the rectitude of his conduct, and feeling confident that, even if the case goes beyond a preliminary hearing and is sent before a jury, it will be but a very short time before he again occupies the editorial chair of the *Shanghai Evening Express malgré* the petty spite he has to bear from his editorial colleagues and others, whom he doubtless will shortly be in a condition to repay in their own coin."

FORMOSA.

The Formosan semi-savages who murdered the crew of the American vessel *Rover* have been brought to terms. General Le Gendre, basing his demands upon treaty stipulations, succeeded in inducing the Chinese authorities to despatch a military expedition from Taiwan to the South Bay for the purpose of bringing the guilty savages to justice. He himself, having determined to accompany the expedition, embarked on the 5th July in the Chinese gunboat *Volunteer*, that vessel having been put at his disposal to convey him to Formosa. Twelve junks had been appropriated to the transport of artillery and heavy baggage. Five hundred men, armed with English rifles or muskets, formed the nucleus of a force which was subsequently to be reinforced by a body of fifteen hundred militia levied on the frontiers of the Chinese settlements. The expedition quitted Taiwanfoo on the morning of the 10th July, and passing by A-kung tien, Pitao and Tong kung arrived on the even- of the 15th at Taugliao. Their appearance with so numerous a military force, hitherto unseen in the island, threw the population into a state of wonder and stupefaction.

The expedition arrived on the evening of the 23rd July at Lang Kiou, the last town in which Chinese authority (practically at least) is recognised. This was madeby Liou, the Chinese General, the base of his operations. He had within half an hour's reach the little port where the flotilla of junks was to anchor; on the left his artillery commanded Poliau, the centre, sufficiently hostile, of Cantonese Achas—the usual arsenal of the savages; he could thus advance by a sufficiently good route over the heights to Tossupon, the extreme Chinese settlement, and thence descending upon the murderers of the Coalut tribe leave them no way of escape except the waves.

Before hostilities were actually commenced a Chinese deputation of chiefs of villages presented themselves on behalf of the savages to express their repentance for their past outrages, and to promise, if war was not commenced, hospitable and humane treatment of shipwrecked or other foreigners in future, and for the fulfilment of this promise the Chinese offered to be come security. It appears that the Mandarin Liao, who saw the chance of reaping a few laurels in the impending fight, was inclined to reject these overtures, but the U. S. Consul was of a different opinion. He therefore demanded that the supreme chief of the Southern savages, Toketok by name, and the chiefs of the 18 tribes should present themselves in person in order that he might hear from their own mouths the excuses and reassuring promises of which they spoke. An interview was accordingly arranged at a certain spot in the tribe of Savari.

The Chief excused himself by saying that at a previous and remote period the whites had ravaged the south of the island and massacred all the inhabitants save three; and that, having no ships in which to set forth and inflict justice, they had always, according to tradition, revenged themselves upon those who were shipwrecked upon their shores. Questioned as to his future intentions, the Chief replied that if it was intended to fight with him he would fight also, and bind himself to nothing; but if, on the contrary, he was generously dealt with as regarded the past, he promised that no stranger should hereafter be murdered. The Consul agreed to say nothing about the past, but in that case demanded not only that they should do no harm to strangers, but also that they should supply them if in want, and receive them in a friendly manner if they landed to procure water or other necessaries. Toketok promised this also if it were agreed that a red flag should be hoisted by vessels to announce their intention of landing peaceably. Satisfied with these promises General Le Gendre wished only to assure their due execution. He therefore suggested that the Chinese authorities should regulate the guarantee offered by the inhabitants, and that upon the heights of Tossupon they should erect a fort which would alike be a perpetual menace to the savages and a centre of refuge to shipwrecked mariners. The fort was at once erected, and we learn that an English gunboat has already seen a Chinese flag floating over its walls. On their part the Chinese of the neighbourhood willingly signed a formal agreement that if, contrary to promise, any stranger fell a victim to or was badly treated by the aborigines of the south end of Formosa, they would themselves seek out the guilty parties in order to deliver them into the hands of the authorities, their persons and goods being considered as security for the due execution of this condition.

On the 15th of October last, as we are informed, a copy of this declaration was sent to the United States' Consul, who relieved the commandant of the expedition of his responsibilities and then set out on his return, bringing with him the body of Mrs. Hunt, and some relics of the late *Rover*. Not the least of that which he brought with him was a well-grounded confidence that the Southern end of Formosa had been rendered safe to those who may be driven on its coasts by distress—an end which he has obtained by a rare mixture of firmness and humanity.

HONG KONG.

From this port our advices are to the 15th November. The outward mail of September 26th, conveying also London telegrams to October 16th, was delivered on November 8th. By way of Calcutta, London telegrams of October 24th were received in Hong Kong on November 13th—only twenty days. On the 14th November the Pacific Mail Company's steamer *China* arrived, with dates from San Francisco to the 14th of October, and nearly 1,000 Chinese passengers.

The "Hong Kong Association for Promoting the Interests of the Colony" is formed—Hon. Mr. Keswick, M.L.C., president. It has been decided to petition Parliament against the military contribution. The *China Mail* reports the proceedings at a meeting held in the Chamber of Commerce rooms to consider what steps should be taken in order that the community might be relieved of the burden imposed by the military contribution. Some twenty-eight gentlemen assembled, amongst whom were—The Hon. Messrs. Keswick and F. Parry, Messrs. Heard, Whyte, Duncanson, Bosman, Hitchcock, Lemann, J. Lapraik, Parr, Fraser, Holliday, Arnhold, Berwick, Jackson, Kaye, Sinnett, Dennys, Coxon, Gaskell, Falconer, Norris, D. Ruttunjee, and J. J. dos Remedios. The Hon. Wm. Keswick was called to the chair.

The Chairman, in opening the meeting, said that he was sure there was no difference of opinion concerning the unwarrantable exaction of the military contribution. So long as there were so many works and improvements in the colony to be carried out, they had the greater reason to get rid of this financial burden. He would leave the matter in the hands of the meeting.

Mr. J. C. Whyte rose, and stated that he had been asked to put a resolution. Everything had been tried to get out of the present financial difficulties of the colony, which were doubtless caused by the military contribution, except one thing—viz., a petition to Parliament. The more influential the men who presented that petition the better, and the larger the number of supporters of that petition the more weight would it have. It would be well were they all to agitate, as much as possible, their friends at home, and thus act upon those in Parliament and ensure support at home. Mr. Whyte concluded by proposing that a petition be framed and presented to Parliament for the abrogation of the military contribution. The Hon. Mr. Parry seconded this resolution, which was carried.

Mr. Kaye, however, here rose and said that he strongly objected to any course being taken different to that which had been privately agreed upon; which was, that an association should be formed with funds in hand, to be in a position to take up any subject which presented itself in the colony, such as this of the military contribution. The meeting was called not for the mere sending of a petition, but also to carry out the idea of an association. He would therefore propose that the meeting resolve itself into an association for the purpose of preparing a petition for presentation to Parliament against the military contribution, and for promoting the interests of the colony generally. This resolution having been handed round, was signed by nearly all the gentlemen present.

Mr. Parry here remarked that probably the Chamber of Commerce Secretary would give permission for it to lie on the table. Mr. Keswick: The Club would be better. Mr. Parry then sat down, and the resolution as signed was allowed to lie on the table.

Mr. Kaye, however, again rose, and said that as the association was formed, he did not see why they should not proceed at once to elect a committee.

Mr. Whyte quite agreed in what Mr. Kaye had said, and he therefore proposed that Mr. Keswick be elected president; that Mr. Sinnet be elected secretary of the association; and that five of a committee be elected by ballot. Mr. Hitchcock seconded this motion; which, having been carried unanimously, the association proceeded to elect the five gentlemen to act as a committee. In the order of their election the names are—Messrs. Parry, Kaye, Whyte, Lemann, and Duncanson.

The Chairman then stated that the only thing which remained to be done was the naming of the association.

Mr. Gaskell moved that the society be called "The Hong Kong Association," in accordance with the original circular; which, after an addition, was duly carried—the name now being "The Hong Kong Association for Promoting the Interests of the Colony." The meeting then broke up.

Although H.E. the Governor has made some well-directed

Digitized by Google

attempts to clean the Augean stable of the police force here, many things, not new, but strange, continue to crop up. "Squeezing," the old stumbling-block of this department, and the riddance of which formed one of the Governor's arguments in favour of the gambling license, appears to have burst forth into light at Sowkewan Station, where is stationed one of the inspectors who carry out the provisions of the new Ordinance relating to junks and boats. One of this inspector's boatmen (who curiously enough speaks English well) was charged by one or two of the principal villagers with extortion; but, as is not unusually the case, in their eagerness to bring home the charge, the four villagers (complainant and witnesses), in their evidence, so "piled the agony," that the result was a counter charge against the villagers of conspiring to bring a false charge against the police boatman. Lawyers having been engaged, a long and somewhat brisk trial followed, which ended by the four villagers being committed for trial at the Supreme Court. But the case ended not here. Another charge of extortion was brought forward against the police boatman, in which it was alleged he had extorted or "squeezed" $20 from certain villagers holding squatters' licenses. During the hearing of this case very grave suspicions fell upon the whole police staff at Sowkewan Station, from the inspector (Anningston) downwards, and a painfully reticent and defensive tone was assumed by the police witnesses called by the prosecution. Mr. May (the Magistrate), however, refused to add the names of the inspector and P. C. Williams to the charge, although Mr. Barnard (counsel) requested that they should be also charged with extortion; but the boatman was committed to the next sessions of the Supreme Court. So at present the matter rests.

The Colonial Government and the marine lotholders on the Praya are at issue on the question of who shall bear the expense of maintaining and repairing damage done to the sea wall and Praya. Government plead poverty, and lotholders say they have no right to bear such expense.

A meeting of the shareholders of the Canton Insurance Company was held on 2nd Nov., when a favourable state of accounts was laid before them and approved.

The managers of the various banking corporations have petitioned the Governor on the subjects of stamp duty on letters of hypothecation and on bank notes. In reply, his Excellency reduced the duty on the first, but declined to alter that on the notes.

Some time ago the proprietors of the *China Mail* announced that there would be occasionally issued with that journal lithographic sketches, illustrative of places or events in the Far East. The first is given with the present "Overland" edition. It is a plain lithograph of "Victoria, Hong Kong, in 1867," from a water-colour drawing by Mr. Baptista, and is 42 inches in length by 12 in depth. Every regular subscriber is entitled to a copy. The price of subscription remains unaltered.

The P. M. C. S. S. *China* is the third of this splendid line which has visited Hong Kong. It is needless to enter into details of her build, &c., she being a sister ship of the *Great Republic*. We cannot, however, omit to notice the fine appearance which she presents. To say the *China* is a splendid ship hardly does justice to this graceful craft, the lines of which are so well drawn that her immense size does not appear to the beholder other than pleasantly. She is provided with everything in the way of luxury that a ship can have, whilst her cabins are fitted, trimmed, and upholstered like a drawing-room ashore. Her cooking arrangements, silver plate, and crockery are equal to any first-class hotel, whilst the latest inventions for the safety of passengers are seen on every hand. The *China* is commanded by E. W. Smith, an experienced clipper and steamer captain. The kitchens, pantries, bakeries, and butcher's quarters, are all provided with ample stores and requisites to the proper discharge of the dutles of those who conduct those departments in the ship's economy. The capacity for freight of the *China* is, it is said, 2,800 tons, and of this amount the ship has all it is desired to take of it.

A considerably complicated and curious case of larceny—or system of larceny—has been discovered at the Mint. It appears that the ashes of the silver ore, even after a refining process, continues to contain a certain quantity of the precious metal; but that, from want of the machinery necessary, the process of refining to any extreme degree would not repay the labour. This ash, however, is worth $8 per picul, and lies in the Mint yard, intended to be used in time for flooring, or in some such way when wanted. A short time ago, however, Mr. Inglis, superintending engineer, was informed that a quantity of this ash was deposited in a shop in Wanchi, and the affair had then to be investigated before Mr. May at the Magistracy. Yip Amow, Chinese stoker, and the Chinese shopkeeper, Chun Hing-kee, were placed in dock and charged with the offences respectively of selling and buying the ash, knowing that to do so was unlawful. Mr. Inglis stated that, although he had often seen coolies taking away ashes, he never dreamed but that they were dust-bin coolies going about their usual occupation. His suspicions, however, were aroused by the attempt to maintain the size of the ash heap by replacing the stolen ash by ashes of a different kind. The prisoners were committed for trial.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Advices from this port are to the 22nd November. The London mail of the 10th October reached Singapore on the morning of the 11th November, telegrams by that opportunity reaching up to the 28th October. On the evening of the 19th November the French mail with London letters to the 17th October arrived, and telegrams to the 8th November.

The *Straits Times Overland Journal* says:—"The Legislative Council has been pretty busily engaged during the fortnight over the Supreme Court Reconstitution Bill which we alluded to in our last summary. The Bill was viewed with considerable jealousy by a large section of the community, as it was thought to strik at the independence of local authority which it is considered so desirable the Council of the Court should possess. So far did this opinion gain ground, that the unofficial members chronicled in Council a protest against its introduction or consideration at the present season. As the Bill came to be considered in detail however, it was apparent that the Goverment had no intention to set it up as a measure by which they must stand or fall, but that it was placed on the Council table as a draft merely, open to correction or amendment where necessary. The amendments which have been made to it are considerable, and appear to meet at least all the more serious objections that were at first raised against it; the judges are to hold their appointments under Her Majesty's letters patent as before, and that part of the Bill affecting the procedure is to remain over until further experience can be brought to bear on its discussion—probably until the return to the colony of Chief Justice Sir Benson Maxwell. In this form the Bill has been passed, and the unofficial members have withdrawn their protest.

Mr. Pope Hennessy arrived by last mail, and after a stay of about a week proceeded to Labuan in H.M.'s steamer *Zebra* to take up the Governorship of that island. The Governor and Lady Ord and suite will leave for Penang early next month on their annual visit.

Admiral Ohier, the newly-appointed Admiral of the French squadron in the Chinese seas, was a passenger by H.I.M.'s steam transport *Creuse*, which arrived on the 9th of November from Suez, and sailed on the 11th for Saigon.

On the 13th of November the Acting Chief Justice assessed damages in the collision case between the steamers *Agamemnon* and *Mona* in favour of the former vessel, at £5,450. 8s., at the current rate of exchange for a bill at sight (to be ascertained on reference to the leading bank in the place), at the date of the passing of the judgment in April last. The interest is to be paid at the rate of 5 per cent. per annum, from the date of the filing of the petition. Should the whole amount of damages assessed not be paid within five days, the *Mona* was to be sold.

LATEST TELEGRAMS.

(RECEIVED VIA GALLE, Dec. 25.)

HONG KONG, Dec. 1.

An extensive fire has occurred here; 7,000 bales of Indian cotton were burnt. The loss is estimated at $400,000.

Continued stagnation prevails in the piece goods' market, and trade in East Indian cotton is completely stopped. Total exports of tea to date, 90,000,000 lb.

SHANGHAI, Nov. 25.

Grey shirtings, 6¼ catty, 2.5.5 taels.
Tea—Green, well maintained.
Silk unchanged.
Settlements in fortnight, 2,600 bales; expor o date, 35,750 bales
Exchange on London, 6s. 0¼d.
Freights, £3.

BIRTHS, MARRIAGES, AND DEATHS.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANNESLEY—On the 27th Sept., at Nagasaki, the wife of Adolphus A. Annesley, Esq., of a son.

CAIRNS—On the 9th Nov., at Hong Kong, the wife of R. H. Cairns, Esq., of a daughter.

FRASER—On the 21st Oct., at Yokohama, the wife of James Campbell Fraser, Esq., of a daughter.

HOGG—On the 22nd Dec., at 6, Grosvenor-road, Highbury New-park, the wife of Frederick Hogg, of a son.

WADMAN—On the 4th Nov., at Ningpo, Mrs. Edwin Wadman, of a son.

MARRIAGES.

CAMERON—BROWN.—On the 11th Dec., at Longformacus House, Berwickshire, by the Rev. Daniel Cameron, of Ayton, father of the bridegroom, assisted by the Rev. John Macleod, of Dunse, the Rev. Daniel Cameron, M.A., minister of Mount Steware Chapel, and chaplain to the Most Hon. the Marquis of Bute, to Elizabeth Waller Doling, eldest daughter of Forbes Scott Brown, Esq., of Glugar, Penang.

HELLAND—BROWNE.—On the 6th Nov., at Hong Kong Cathedral, by the Rev. John Wilson, Acting Colonial Chaplain, George J. Helland, Danish Consul at Hong Kong, to Josephine Isabella, eldest daughter of John Nicholls Browne, Esq.

LAMB—BROWN.—On the 27th Sept., at St. George's Church, Penang, by the Rev. J. Mackay, B.D., James Lamb, Esq., to Lucy Scott, second daughter of Forbes Scott Brown, Esq., of Glugar, Penang. No cards.

DEATHS.

CONWAY—On the 9th Nov., at Double Island, Swatow, Robert Conway, Pilot, of Killard, Co. Down, Ireland, aged 32 years.

GUNN—On the 8th Nov., at Saigon, Mr. John Gunn, late of Bangkok.

KRAYER—On the 4th Nov., at Shanghai, Edward Krayer, a native of Basle, Switzerland.

NEILL—On the 2nd Nov., at Hong Kong, George M. Neill, Esq., of Edinburgh, aged 25 years.

SILLAR—On the 13th Dec., at Matheran, Sydenham-hill, Margaret Christison Cameron, infant daughter of W. C. Sillar, aged 8 months.

WHITE—On the 22nd Dec., at Tunbridge Wells, Anne Gordon White (born Hubbard), the beloved wife of James T. White, Esq., of Colombo, Ceylon.

Commercial Report.

CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Deliveries of old contracts for staple goods have been satisfactory during the fortnight, but the business originated has been small, owing to a variety of causes. Among these we may enumerate the quiet state of the silk market, the absence of the principal Osaka buyers, and a good native cotton crop. These have combined to stop the demand and to lower rates for most manufactures. The P. and O. and P. M. S. S. Co's. steamers having brought supplies of Yarns and Shirtings and heavy arrivals of these goods impending, we do not look for immediate improvement. What business has been done has been confined to a few parcels of 28—32's Yarn and good 8-lbs. 4 Grey Shirtings at about our last quotations, and some Black Velvets at from $0.25 to $0.50 lower. A sale of 1,000 short Enfields, five groove, at $12.50 has come to our knowledge. The trade in arms generally is rather active. Yarn: 28—32's are the only counts in demand, and for these even prices are weak. Other numbers are not in any inquiry. The stock has been increased from China. Grey Shirtings: Business has been nearly confined to deliveries of old contract goods. They remain at last mail's rates with little inquiry. A few 7-lbs. have been sold at $3 30.

SHANGHAI.—Soft Goods: The demand for the Tientsin market still continues and prices have ruled a shade higher, 8lb. 4oz. cloth being worth 2.6.2 to 2.6.6 tls. per piece, and of 7lb. goods moderate sales are reported to 2.3.3 to 2.3.6 tls. The levanting of one of the largest dealers in soft goods has tended to weaken the market which otherwise would have been much firmer—in fancy goods no change. Woollens: Continue neglected, transactions being quite nominal. Metals: No additions made to stocks and prices remain firm. Coals: There have been no arrivals since our last, and little change to note, prices are possibly a shade weaker from anticipated supplies.

HANKOW.—The demand has been more varied, but the business transacted has continued on a very moderate scale, the dealers in most cases only supplying their immediate wants. Quotations are:—Grey Shirtings, 7 to 7½ lbs., 2.3.5 to 2.4.0; 8¼ to 8½ lbs., 2.5.5 to 2.5.8; 9 to 10 lbs., 2.7.0 to 3.2.0. White Shirtings, 56 to 60 reed, 2.4.5 to 2.6.0; 64 to 66 reed, 2.6.0 to 2.7.0; 68 to 72 reed, 2.8.5 to 2.9.0. T-Cloths, 6 to 6½ lbs. 32 inch wide, 1.7.0 to 1.7.5; 7 to 7½ lbs. 32 do., 2.2.0 to 2.3.0; 8 to 1¼ lbs. 36 do., 2.6.0 to 2.8.5.

FOOCHOW.—Import sales are as follows:—American Drills, 600 pieces, $6.30 per piece; Bombazettes, 100 pieces, $8.50 per piece; Lead, 300 pigs, $8 per picul.

HONG KONG.—Raw Cotton: The demand has been moderate, and sales have only been effected by making concessions, although there has been a slight recovery, owing to increased inquiry to supply wants. Yarn continued in fair request at last quotations during the early part of the interval, but of late has been entirely neglected, advices from Amoy and Japan not being so favourable, and a general decline of $5 per bale has resulted. Cotton Goods: Considerable parcels of Shirtings and T-Cloths have been received from Bombay and Singapore, and holders are offering them at low rates, which has weakened the market for goods of direct import, closing quotations for which show a decline. White Shirtings are entirely out of favour, and are again lower. Turkey Reds are saleable only on easier terms. Drills, both American and English, are in small supply, and very firmly held. Woollens: A fair business has been done in Spanish Stripes at lower prices for scarlet, and higher for assorted; the sales have been mainly for parcels of Singapore import. Lastings and Camlets are both lower, the former being in moderate inquiry at a decline. There have not been any transactions in Long Ells, but holders are firm and asking a slight advance for scarlet, stocks of which are light. Metals: Nail Rod and Bar Iron are in fair demand, but at a reduction from former value, while Hoop continues to command last quotations. Lead is quiet. Tin unchanged in value, but only dealt in to a moderate extent. Tin Plates are wanted at an advance. Quicksilver firm. Coal: Small sales of English, ex godown, have been made at $14 per ton, the reduction in prices being made solely because the Coal was depreciating from having been some time on hand. New arrivals would realise former quotations. Other descriptions are very firmly held, but no transactions have been reported.

CHINA AND JAPAN EXPORTS.

TEA.

YOKOHAMA.—A fairly active demand has existed throughout the fortnight, but in consequence of the paucity of supplies settlements have not been large, amounting in all only to about 1,700 to 1,900 piculs. These consist principally of common up to good medium sorts, the finer kinds not having been bought in any quantity. The teamen show a greater willingness to sell, but no decline has yet been established in quotations, which have remained unchanged throughout. Stocks were much reduced during the early part of the fortnight, but arrivals have latterly taken place much more freely, and are likely to continue doing so for some time. The supply on offer is estimated at 4,500 piculs. Quotations are:—Good Common, 24 to 26 dols. per picul; Medium, 27 to 28 dols. per picul; Good Medium, 29 to 31 dols. per picul; Fine, 32 to 35 dols. per picul; Finest, 36 to 38 dols. per picul; Choice, 39 to 40 dols. per picul.

SHANGHAI—Black Teas: There has been practically nothing doing in this market, only 3 chops having been settled at irregular prices, that do not establish any quotations. Teamen are very firm still, and as supplies begin to fall off they will very probably succeed in placing the Teas that remain, on their own terms. The stock has been increased to 38,000 chests. Settlements have been as follows: 400 chests common Oonam, at tls. 17.5, equal 1s. 0¾d., 1,100 chests fair Ningchow, at 18.5 to 20 taels, equal 1s. 1½d. to 1s. 2¼d. Green Teas: The occurrence of the autumn holidays has not prevented a large business being again done in these kinds, without any material reduction in prices. All fine teas have been readily purchased on arrival, and as much as taels 45.5 has been paid for a fine Teenkai. Although the majority of the purchases are for America, considerable shipments continue to be made to England. The stock is still large, but most of the really desirable parcels are picked out of it, and the Moyunes, of which it is mainly composed, are this year decidedly inferior to the average in quality. Fine and finest teas must be quoted fully up to last rates, although a slight reduction might be obtained on medium kinds. The fortnight's settlements comprise:—29,600 half-chests Teenkai and Moyune at taels 35 to 45.5; 5,300 half-chests Fychow, fair to good at taels 29 to 34; 2,700 half-chests Pingsuey, common to fair at taels 28.5 to 33.5.

HANKOW.—Only a trifling business had been done, there having been no arrivals from the interior. The whole amount sent forward was only 4,600 chests, made up of 2,800 chests settled (chiefly Oopacks, at 13.1.5 to 16.5 taels), and 1,800 chests shipped on native account. The total stock was within 3,000 chests. Quotations were:—Oopacks, common to fair, 13.1.5 to 16.5 taels; Oonams, common, 11.25 to 12 taels.

KIUKIANG.—About 15 chops Green teas have found buyers at previous rates, and shipments to Shanghai on native account have about equalled the settlements. Holders are very firm in demanding an advance in prices, but buyers show no inclination to accede to their demands.

FOOCHOW.—Congou: A moderate business has been transacted during the fortnight, and prices have been fully maintained. Prices continue to show a margin for loss on rates ruling in London, and the larger proportion of settlements are probably intended for shipment to the colonies. Souchong: Common qualities have been in some demand at advancing rates. Oolongs: Settlements are limited, and prices do not show any alteration on previous quotations. Flowery Pekoe: No transactions are reported in these. Scented Teas have been inquired for, but the teamen are holding the small stock for advanced rates. The flowers of the Mût-lee being nearly exhausted, the teas now coming forward are scented with the Lan-fa, a much coarser scent.

CANTON.—A very quiet tone has pervaded the market, and there is no change to note in prices. Country Congous: Three chops have arrived, and the stock, therefore, is 13½ chops, or 7,000 packages, for which there appears a total absence of demand. Country Greens remain as last advised; stock of old season's is about 800 packages. There are no arrivals of new season's yet reported. Canton-made Teas: A very moderate amount of business has been transacted. Stocks of leaf are getting very short, especially of Scented Orange Pekoe. The market is very quiet, and there are no new features to report.

SILK.

YOKOHAMA.—The market has been greatly depressed in consequence of the discouraging advices from home, and purchases have been upon a very limited scale. Holders generally have shown more disposition to realise, and although no change can be made in the finer grades, inferior sorts may be bought $15 to $20 cheaper. Settlements, including a few purchases made at the close of last mail and the shipments per Great Republic, amount to 500 bales. Supplies have been upon an average scale, but include a good many inferior parcels. Silk Worms' Eggs: The season may now be considered closed. Arrivals have been but trifling and unsold stocks are quite nominal. For the small transactions of the fortnight prices have been well maintained. Total settlements for the season, including the Hakodate export, may be put at 800,000 cards, against total for last year of 950,000.

SHANGHAI.—Mr. Holdsworth's Circular is as follows:—There has been considerable business transacted in this market during the fortnight, and settlements estimated at 2,000 bales have been made. Contrary to the expectations of many intending purchasers, the market was reopened immediately after the departure of last mail at a slight advance in prices; since then transactions have continued to be made to a considerable extent at gradually advancing rates. The limited stock of Silk on offer coupled with the great advance in the rate of Carolus dollars, has enabled the Chinamen to demand, and succeed in realising, this increase in rates, even in the face of the continued unfavourable advices received of the Home Market. The demand has again been chiefly for the Market and lower descriptions of Tsatlees, though some inquiry has existed for good Karshing Taysaams and Hainings; but as there were but few parcels of this class of Silk on the market, the holders of such lots asked and obtained full rates for them. The arrivals from the interior for the past interval are estimated at only 1,000 bales; consequently the unsold stock is reduced to 2,000 to 3,000 bales, chiefly common descriptions, including many parcels mixed with second crop and undesirable Silk. The absence of truly fine Silk is noticeable, nearly all arrivals lately to hand being full and coarse size. The advices from the interior report an advance in prices ruling there, consequent on the advance in this market and the higher rate

Digitized by Google

of dollars—people there collecting for the Shanghai hongs complained of the difficulty they experienced in obtaining any good or desirable Silk, the bulk offered being common, and some too inferior to be classed, for which they were asking the equivalent of 330 taels per picul laid down in Shanghai.

CANTON.—A lower range of prices was established just before departure of last mail, and considerable settlements of Tsatlee Reel have resulted; some few went forward by last mail, but the bulk by the present; prices were rapidly declining, but an eager buyer entering the market effectually checked the inevitable fall in prices that would have been submitted to by native holders had a little more firmness been exercised. The settlements of Tsatlee Reel and Loongkongs are supposed to be destined for the London market, the Re-reeled Cumchuck for America, and the common sorts for India.

EXCHANGES ON LONDON.

[For dates, see first page.]

At	Bank. 4 months' sight.	Bank. 6 months' sight.	Private. 4 months' sight.	Private. 6 months' sight.
Yokohama	4s. 5d.	4s. 5½d.	4s. 5¾d.	4s. 6¼d.
Shanghai	6s. 1d.	6s. 1¼d.	6s. 1¼d. to 6s 2d.	6s. 2d to 6s. 2¼d.
Canton Hong Kong Macao	—	4s. 4¾d.	—	4s 4¾d to 4s 5¾d.
Singapore	4s. 4¼d.	4s. 5d.	—	4s 5¼d to 4s 5½d.
Manila	—	4s. 3d.	—	4s. 4d.

At Shanghai, bills on India, Rs. 302 to 303 per 100 taels. At Hong Kong, Rs. 218 per $100. Bar Silver at Shanghai, taels 111.4.0; at Hong Kong, 11¼ per cent. premium. Mexican dollars at Shanghai, tls. 73.1.0 per 100; and exchange on Hong Kong, 28¼ discount. Bous at Yokohama, 322 per $100. Hong Kong and Shanghai Bank shares, new, ½ dis.; Gas Company, par; Hong Kong and Whampoa Dock, 11 to 16 per cent., prem.; Union Dock Company, 30 per cent. dis.; China Traders' Insurance, $250 per share premium.

The following is from Messrs. Sharp and Co.'s Circular:—

Exchange.—An active business has been done in sterling exchange, and rates have fluctuated during the fortnight under notice to an extent unusual in Hong Kong. The last inward mail from Europe, that arrived on the 8th instant, brought telegraphic advices that the six months' usance was to be resumed, and the banks immediately declared themselves buyers as heretofore. The market opened, however, with rates firm at 4s. 5½d. for six months' credits, and several transactions took place at that rate, while Bank bills at four months were sold at 4s. 4¾d. A large demand for private paper subsequently ensued, and competition caused the rate for first-class six months' credit to recede to 4s. 4¾d., a considerable business having in the mean time been done at 4s. 5¼d. to 4s. 5d. Transactions at four months' sight are now of course more exceptional than ever, and quotations will in future be unnecessary.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From Marseilles, Oct. 24, Mathilda.

At NAGASAKI.—From London, Oct. 21, Adeline.

At SHANGHAI.—From London, Oct. 26, Dilpussund; from Newcastle, 28, Onyx; from London, Nov. 25, Patna (reported by telegram).

At HONG KONG and CANTON.—From London, Nov. 7, Southern Cross; 12, Art Union; from Shields, Oct. 31, Jane Avery; from Cardiff, Nov. 12, Antares; from Havre, 11, Aline; from Liverpool, Nov. 17, Petchelee (reported by telegram).

At MANILA.—None.

At SINGAPORE.—From Liverpool, Nov. 16, Heather Bell; 17, Bogota; from Glasgow, 15, Jane Blythe; from Cardiff, 10, Alvington, Maria Diederika, Concurrent; 16, Eldorado; from Newcastle, 10 Neptunas; 21, Lawrence Brown; from Sunderland, 10, Blanche; 16, Varuna; from Newport, 10, Nereus; 16, Schelde; 20, Akershus; from Shields, 13, Leopold Graaf van Limburg Stirum; 14, Gezina Maria; from Hamburg; 11, Soon Kong; from France, H.I.M. str. Goeland; from Rio de Janeiro, Gica.

At PENANG.—From London, Nov. 18, Florence Nightingale.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, Nov. 7, Zodiac; for New York, Fairleader.

From FOOCHOW.—For London, Oct. 26, Finzel; 31, Laurel; Nov. 5, Hotspur; for Boston, Oct. 26, Meteor; for New York, Nov. 7, Ocean Chief.

From AMOY.—For New York, Nov. 11, Banion.

From HONG KONG and CANTON.—For London, Nov. 8, Polmaise.

From MACAO.—For London, Oct. 23, Kelso; 7, Chetah; for Hamburg, 16, Vampyr; for Havana, Nov. 6, Maria Pia; 7, Carmeline.

From MANILA.—For London, Oct. 23, Fortuna; 28, via Cebu, Noranside, for Cork; Nov. 6, Cotherstone; for Boston, Oct. 25, Herald; for New York, Nov. 2, Ashburton.

From SINGAPORE.—None.

From PENANG.—For Boston (via Padang), Nov. 13 Rainbow.

VESSELS LOADING.

At YOKOHAMA.—For New York, Swanley, Chrysolite.

At SHANGHAI.—For London, John Lidgett, Emperor, Minnie, Tamerlane, Tyburnia, Vigil; for New York, Etha, Rickmers, Madura, Royal Berkshire, Yeavering Belle, Delpussund.

At FOOCHOW.—For London, Cora Linn; for New York, Margarita, Solent, Dannevirka.

At HONG KONG and CANTON.—For London, Corea, Auburn; for New York, Nellie Chapin, Atlantic.

At MANILA.—For London, Ospray; for Liverpool, Glentheria; for Cork, Doriga, Ercilla; for Copenhagen, Havfruen; for Hamburg, Voladoro; for Cadiz, Concepcion; for New York, Caducus.

At SINGAPORE.—For London, Ann Adamson, Ramsey; for Glasgow and Liverpool, Bothwell Castle, Bogota, Jane Blythe; for New York, Dunmore.

At PENANG.—For Bordeaux, Imperatrice Eugenie.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Tea, £3 10s.; silk, £4 nominal.

At SHANGHAI.—Vessels on the berth for London are fitting up slowly at £3; the rate is the same to New York. Tonnage is not plentiful.

At FOOCHOW.—To London, £3 10s. per ton, of 50 cubic feet. To New York, £3 10s. per ton, of 40 cubic feet.

At HONG KONG and CANTON.—Tonnage remains somewhat scarce, and rates are well maintained. To the rice ports there has been considerable activity at 47½ to 52½ cents per picul.

MANILA.—The Eleutherea to Liverpoool has engaged sugar at £3 10s. and hemp at £3 10s. per 20 cwt. The Southern Belle 1,129 tons, has engaged 900 tons wet sugar for London at £3 10s. per ton. The Ospray 598 tons, has engaged dry sugar for London at £3 5s., and wet sugar at £3 10s., but her sugar room is now taken up. The Caduceus 1,116 tons, is loading for New York, and will take 300 tons sugar at $11-25 per ton of 20 cwt., and remainder hemp at $12 per 4 bales.

At SINGAPORE.—Tonnage in harbour is more plentiful but rates remain firm.

An advance has been established on last rate, and £3 5s. is now readily paid to loading ships, The ship Ann Adamson is a full ship for London at that rate, and the Ramsey is filling up on same terms. The Jane Blyth gets the same rate to Liverpool.

LONDON: SATURDAY, DEC. 28, 1867.

A GERMAN SETTLEMENT IN THE CHINA SEA.

IN 1865 some attention was excited by the alleged intention of Prussia to take possession of the Island of Formosa. The rumour was noticed in these columns just two years since, and the idea of its ever becoming a fact was dismissed almost with ridicule. Still, there was evidence that such an intention had really been entertained by the Prussian Cabinet, in a series of articles published in the official journal at Berlin, which openly advocated such a step. Either the manifest impracticability of the scheme, or the advent of stirring times in Europe, caused it then to be abandoned, or, more correctly speaking, postponed; for it has now been revived in a somewhat different form. Our Hamburg correspondent advises us that "a rumour is current at Berlin that Count Bismark will propose to the "Federal Parliament, when it meets in February, a scheme "he has now under consideration for taking possession of "some suitable island in the Eastern seas on which to establish "a penal colony, that may be common to all the States forming "the North-German Confederation. Criminal statistics go to "prove that the German prisons are swarming with convicted "murderers and felons, who live in idleness and cost the State a "deal of money every year, whereas it is assumed that in a distant penal settlement their power of labour might be utilised, "and the colony thus rendered self-supporting, whilst it relieves "the home Governments of a great annual expense for their support and safe-keeping. Rumour adds that the island of Chusan "has been selected for this experiment, and that negotiations "have already been opened with the Chinese Government to induce them to transfer the sovereignty of that island to the "German Confederation by purchase or otherwise. The idea has "been favourably received at Berlin."

This, as it stands, appears almost as unpractical a proposition as the former one. The China sea would be a most out-of-the-way place for a German penal settlement, and, to say nothing of this inconvenience, the idea of "utilising" European labour in such a climate is absurd. But the truth of the matter probably is that Count Bismark, the genius of the newly-born great German Power, is jealous alike of Russian encroachments in China and Saghalien, of French progress in Cochin-China and possible movement on Korea, and of English supremacy in the East generally. So, under the pretext of looking out for a penal settlement, Count Bismark is in reality feeling his way towards the establishment of a colony and naval station in China waters. The project has doubtless been "favourably received" in Berlin, but, before anything can come of it, it has to be "favourably received" at Peking also; the probability of which we take the liberty of doubting.

THE BRINDISI ROUTE.

CORRESPONDENCE from India and China transmitted by the Brindisi route last mail reached London on the evening of the 12th, while the general mails, *via* Marseilles, arrived on the following evening. The latter were detained in Egypt two days waiting for the P. and O. steamer at Alexandria. When the new contract comes into operation this will not occur, as the service is so arranged as to have a steamer always ready at that port. If the Brindisi route—that is, the line from the port of Brindisi, including the pass over Mont Cenis—had been in good working order the mail would have been delivered several days earlier, as the Italian steamer from Alexandria starts within a few hours after the arrival of the mails and passengers. The time lost, therefore, is *en route* from Brindisi to London, and this must continue to be so until the tunnel through the Alps is completed, and a double line of rail laid down throughout to Brindisi. The rail laid over Mont Cenis, with its peculiar engine intended to supersede the *diligence*, it appears, is not to be trusted, and its opening has been postponed from time to time during the summer, until the severity of winter is now upon us. The Italian steamers running between Alexandria and Brindisi perform the passage with regularity, and the delay in the arrival of the mail in London is universally to be attributed to its land passage. For several months it has not anticipated the Marseilles mail, and when the P. and O. Company commence running direct between Alexandria and Marseilles without calling at Malta, as at present, the difference between the two routes will hardly be appreciable. As an agreeable change however for passengers Brindisi will still be deserving of notice. The deepening of the harbour is making progress, although certainly very slow, in the hope that the British Government will yet avail of it for the transmission of our mails. When the harbour is deepened sufficiently and has a dock and other appliances indispensable for a mail packet station, when the line of rail is doubled, and the tunnel through Mont Cenis is completed, then our Government have left the door open to negociate with the P. and O. Company for the substitution of Brindisi for Marseilles. In the present condition of the Italian route however it is out of the question, and the incorrect statements which have lately appeared on the subject are to be attributed to the want of a proper knowledge of the facts.

MR. LOCOCK'S REPORT ON OSAKA AND HIOGO.

THE object of Mr. LOCOCK'S report on the above named places, which has recently been published, is to give a *resumé* of such information as he was enabled to gather during the late visit of the foreign representatives. Commencing with a description of the relative situations of the two towns (with which most of our readers are by this time tolerably familiar), Mr. LOCOCK goes on to state that to insure the safety of foreign vessels trading thither, the Japanese Government is about to erect a lighthouse at each entrance into the Bay of Osaka, as well as one at Hiogo, the apparatus for which will be supplied from Europe. Osaka, as regards its general appearance, does not compare favourably with Yedo, being deficient in the open spaces, gardens, and fine trees that adorn the latter. On the other hand, the streets are better paved, and earthquakes being rare the houses are more lofty. The inhabitants, too, are said to be more industrious and orderly than in Yedo, consisting chiefly of the mercantile class; and foreigners are treated with uniform respect and civility. Mr. LOCOCK lays especial stress upon the fact, that while in Yedo strangers can rarely show themselves without the risk of insult, in Osaka they are able to roam about at will, without meeting so much as an angry look or offensive word.

The population of the city itself is set down at 320,000, or, including its suburbs, 373,514. Mr. LOCOCK found it impossible to ascertain the quantity of goods imported into Osaka, but an approximate table for the year 1866, furnished by the GOVERNOR, includes amongst others the following items:—Rice, 311,258 kokus; tea, 5,779 piculs; paper, 134,000 bundles; floss silk, 22,500 bundles; vegetable wax, 47,290 cases; raw silk, 306 piculs; iron, 31,500 bundles; tobacco, 23,280 packages. 1,967 junks of 200 kokus and upwards entered Osaka during the year. The traders of Osaka are divided into guilds, of which there are about 200; Mr. LOCOCK was invited to visit one of these, that of the foreign goods' merchants. Here he learnt that this branch of trade was rapidly increasing, from the growing desire of the Japanese to obtain foreign articles, which are eagerly bought up as soon as landed. The difference between the Yokohama and Osaka prices of foreign imports ranges from ten to twenty per cent.; and no additional duty is levied on goods brought from Yokohama, although there is a trifling tax on entering and leaving a Daimio's territory. At present very little raw silk finds its way into Osaka, the centre of silk weaving industry being Kioto (the capital), thirty miles distant. Mr. LOCOCK arrives at the conclusion that as a place of foreign trade, Osaka would by itself be almost worthless, the river being quite inaccessible to large vessels Hiogo, however, affords a capital anchorage, where

Digitized by Google

ships of 1,000 tons can ride safely within a few yards of the shore. Coal exists amongst some hills about four miles from Hiogo; it is a kind of anthracite, of inferior quality, and very badly worked. In opening up a trade here, Mr. LOCOCK observes, there is little prejudice to overcome, for a perfect *furore* exists for everything foreign. As an instance of this he found no less than forty native photographers in the city, who obtain their materials from Europe, and all find full occupation. In conclusion, Mr. LOCOCK apprehends that some difficulty will be experienced in the transport of merchandise between Osaka and Hiogo, but those surmounted, he considers there is no reason why the settlements at both places should not become as thriving and important as any other in Japan.

THE CASE OF MACKELLAR AND CO.

THE case of Mackellar and Co., of Hankow, is likely to be a fruitful source of controversy. The last mail brought us intelligence that, because the parties who opposed their order of discharge did not comply with the requisite forms of security until an hour past the time appointed, they were excluded, and the order of discharge granted to the bankrupts. This is a very unfortunate circumstance, considering that the parties who have been most grievously wronged were Chinese. Their faith in Consular justice must be very much shaken by this act, for they had already become incensed at the forms of English law, which allowed their property to go down to Shanghai unpaid for, and yet made it legally the property of Mackellar and Co., or rather of the banks to whom they had pledged it as security for advances and over-due engagements. We are the more astonished that this procedure was adopted by the Consul, Mr. MEDHURST, when he returned to his post and relieved Mr. GIBSON, whose extraordinary vagaries in this case we have already noticed. It is to be hoped that the whole of the case will be thoroughly sifted in the Supreme Court, and that the Chinese will be better impressed with our forms of law at the conclusion than at the first stage.

THE SHANGHAI STEAM FLEET.

NOTWITHSTANDING the gloomy accounts we have received from Shanghai during the whole of 1867, it is some comfort to find that it has not dropped into a moribund condition. We gather our assurance of this from a list of steamers engaged in the trade of Shanghai, which we believe was published in a new paper called the *Shanghai News Letter*, intended for despatch to the United States by the San Francisco line of steamers. The correspondence by this route was delivered in London on the 16th inst., but was anticipated, as far as the China ports are concerned, by the Suez route by eleven days, the mails which left Shanghai on the 23rd, and Hong Kong on the 28th of October having been delivered in London on the5th inst. To return to our subject, this list comprises no less than a grand total of 48 steamers of 39,382 tons, which are divided over various voyages to the ports on the Yangtsze, the coast ports, Japan, India, and England. The list also includes five tug steamers engaged in towing sailing vessels in and out. We may reasonably conclude that a port which can employ such a steam fleet in its regular trade, independent of other chance steamers calling in, is a long way from being dead, and must at least have retained some elements of prosperity.

THE Russian consul at Hakodadi has announced to his Government that, "in accordance with the treaties concluded with Japan by England, France, the United States, and the Netherlands, Yedo and Osaka will be opened for trade with the contracting Powers upon the 29th of January, 1868." This news was received here by telegram from St. Petersburg on the 22nd instant. The date on which the new ports should be opened is the 1st of January; if the above information be correct, the delay of a month before actual trade commences is probably to allow time for the various consulates to get settled and fairly in working order, and also for Custom-house arrangements to be perfected.

IT is generally believed in Singapore that in criminal cases there is no appeal from the judgment given in the Supreme Court. We are, however, glad to be able to state that such is not the case, as in the Royal Charter by which the colony was created a possession of the Crown a provision is made enabling the GOVERNOR to grant leave to appeal in such cases as he may deem fitting.

IN our last issue it will have been doubtless noticed that the steamer *Achilles*, belonging to Holt's line, from Liverpool, is not to load for China but for Calcutta. This is not the way to gain the permanent support of the merchants in the China trade. The owners of clipper ships will no doubt know how to make use of this breach in the screw steamer line.

THE following appointments have been gazetted:—Thomas Braddell, Esq., to be Attorney-General; William Willans Willans, Esq., to be Treasurer; Charles John Irving, Esq., to be Auditor-General; and Captain John Frederick Adolphus M'Nair, R.A., to be Colonial Engineer, for the Straits Settlements.

Continental Intelligence.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Dec. 14.

According to private letters received here from Yokohama, the draft of an agreement has been signed between the foreign Consuls at that port and the Government of Japan, having for its object certain preliminary measures for the establishment of a quarter exclusively devoted to the use of foreigners. The part selected for this purpose is a rather extensive and well-situated area in the vicinity of the mercantile quarter and at a distance from the official residences, at the mouth of the Ogawa, where all foreigners may build or rent houses, subject only to the taxes raised at present on the land by the Japanese Government. On the other hand, the latter is bound to keep in order and cleanliness the canals surrounding and dividing the spot, as also to lay out wide streets, and to build a custom-house, warehouses, and an hotel.

It must be confessed that the Austrians, and more particularly the Chamber of Commerce and the Trieste merchants, are most persevering in their efforts to induce the Government to undertake the long projected and often postponed diplomatic expedition to Siam, China, and Japan. In addition to the late renewed representation of the Trieste merchants, ten members of the Austrian Parliament have sent to the Chancellor, Baron von Beust, an "interpellation" in writing, in which they state that, in consequence of the urgent request of the Trieste Chamber of Commerce, the Emperor was pleased to ordain that a maritime expedition should be sent out to the Far East in 1866; but the hostile operations of that year prevented the execution of the project at that time, the vessels of the Austrian navy having had full employment in maintaining the honour of the national flag nearer home. On the conclusion of the war the Government of the kingdom of Italy took, without loss of time, steps similar to those recommended by the Austrian merchants. The Italian Government succeeded perfectly in their object, as a very few months sufficed to negotiate and conclude highly favourable treaties with those Eastern countries, and to be enabled to carry on commerce with them, not merely on sufferance, but as their stipulated right. In the face of this state of affairs the Trieste Provincial Estates, before the close of the year, passed a resolution to send to the Emperor a humble petition praying his Majesty to give orders that the expedition be fitted out without further loss of time, which is the more important as Austrian subjects are prevented from taking a share in the commerce and navigation of those distant trading marts. In reply to this humble representation, the magistracy of Trieste received a communication from the Chancellor of the Empire, stating that H.M. had been pleased to accept graciously the prayer of the petitioners, and, by a decree dated the 27th of February, 1867, to ordain that the trans-oceanic expedition, as suggested, should be sent out in the autumn of 1867. The year, however, is drawing to a close, without anything further being done, or even preparatory steps taken; and yet the result of the late Paris Exhibition has elicited the expression of the Emperor's satisfaction at the manner in which the produce and manufactures of the Empire were so ably represented in competition with the rest of the world, and should serve as an additional impulse for opening foreign markets to Austrian industry and enterprise. These considerations have induced the undersigned members of the Imperial Parliament to ask the Chancellor whether the Government intends to put in execution with full energy and without delay the repeated promises made by the Emperor for the long-projected expedition to the Far East.

The *Trieste Zeitung*, in a leading article on the above, observes, very truly, that several of the lesser European States—such as Portugal and Switzerland, and now, lately, Belgium and Denmark—have succeeded in making favourable treaties with China and Japan without sending out expensive expeditions; and adds the caustic remark that "we should probably be in a very different position were the Department for Trade to employ half the time and energy to this subject of paramount importance that they devote to the ice export trade and other matters of secondary consideration."

Mr. P. Pels is appointed Consul at Batavia for the Grand Duke of Mecklenburg-Schwerin, *vice* Mons. H. Vaupel, retired, and has received his exequatur from the Dutch Government. It has caused much astonishment that when the consulates of the separate States of Germany are on the eve of being abolished, to be succeeded by Federal consuls appointed by the King of Prussia as President of the German Confederation, the Grand Duke of Mecklenburg should make this appointment, which, however, can only be considered as temporary, and can last but a very few months.

HAMBURG, December 23.

A letter from Jeneisseisk, in Siberia, states that the dearness of all provisions is so great as to oblige the enterprising gold seekers to postpone their operations till the spring. For the same reason they have latterly discharged a large number of their workmen, so that instead of the 8,000 employed in the summer they had been gradually reduced to 2,000.

A scheme for altering and greatly facilitating the present tedious mode of judicial procedure in the Siberian courts of law has been drawn up in the office of the Governor-General, and sent to St. Petersburg for the approbation of the Emperor.

The Danish Government demands from Parliament an annual increase of 2,000 rix-dollars for the Consular establishment, as by the late treaties with China and Japan greater expenses are incurred by the Foreign Department.

The Swedish Government has resolved to take measures for increasing the trade of Sweden with the Chinese open ports, which is believed to be capable of great extension. For this purpose First-Lieutenant Annerstedt has been sent out on a special mission, during which he receives a salary of 32,000 Swedish rix-dollars.

From Munich we learn that on the proposition of the Minister for Public Education the King of Bavaria has given orders that all the different ethnological collections now dispersed over the kingdom shall be brought together and form one Bavarian National Museum at Munich, in which the lately acquired valuable Japanese collection of Colonel von Siebold will occupy a prominent position.

COMMERCIAL.

On account of the approaching holidays the markets are all very quiet, and but little business has been transacted in any article. Funds and shares are firm. The shares of the above-mentioned Hamburg-American Steam Company are in request at 17.50 per share of 1,000 marks banco, or 75 per cent. premium. Discount 2½ per cent., and money abundant.

SHIPPING.

LOADING.—The only vessels now on the berth are the Prussian three-masted schooner Schulze-Delitsch, for Singapore, and the Hamburg barque Antelope, for Shanghai.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Dec. 23.

The First Chamber of the States General finished its business on Saturday last. All the credit laws passed, and some Bills of local interest were approved of. The day before the recess, all the members of the First Chamber were received in audience by H.M. the King, one by one, and though nothing official has transpired, it is certain that they were consulted about the steps which should be taken with regard to the ministerial crisis. Contrary to the fervent hopes of the people, the King has not accepted the resignation tendered by Ministers, when the Budget for Foreign Affairs was rejected by the Second Chamber. A telegram from the Hague says, "It is asserted that the session of the States General will be closed, and the Second Chamber be dissolved, on Friday next, the 27th."

H.M. has appointed a commission to report if it be expedient to indemnify some firms connected with the Japan trade for losses which they suffered by the last war. I have already told you that these claims have been urged repeatedly.

H.M. war steamer *Timor*, bound for Java, left Hellevoetsluys on the 14th.

COMMERCIAL.

COFFEE.—The market is unaltered, but firm on the prices of the late Dutch Trading Company's sale. The quotation is for good ordinary Java private import, 37 to 37½c.

SUGAR (RAW.)—Market very quiet; little offered at the market value of 1f. below the September prices. For a floating lot of 788 mats Syrup Sugar per Dordrecht 23f. was paid.

TEA.—Good ordinary China Congou, 85 to 90c.; ordinary, 80c.; ditto Java, 80 to 85c., and 75c.

RICE.—Java table, 16f. to 17f.; second, 11f. to 12f.; fine white, 9½f. to 11f.; white, 8¾f. to 9½f.; Sourabaya, 8f. to 8½f.; Rangoon, Bassein, and Necranzie, 8½f., 8f., and 7¾f. Imported 16,000 b. Necranzie.

SPICES.—Quiet; Nutmegs No. 1, 78c.; first quality Mace, 115c.; Cloves No. 2, 28c.; and Pepper, 17c. 2,000 b. Pepper were imported, per Henrietta Maria, from Batavia.

TOBACCO.—Very dull, and no transactions took place.

TIN (BANCA).—2,500 slabs were sold from 53¼f. to 53f.

CAMPHOR.—China and Japan, 83c.

MANUFACTURES.—The market is unaltered.

STOCKS AND MONEY.—The majority of securities have been dull. The demand for money is moderate, and the rate of discount is unaltered.

SHIPPING.

ARRIVALS.—Dec. 16, at Brouwershaven, from Batavia, Ary Scheffer; at Texel, from Batavia, Guurtze and Maria; from Tjilatjap, Boni; 17, at Brouwershaven, from Batavia, Noachy; at Texel, from Batavia, S. van Heel; 19, at Zierikzee, from Batavia, Johanna Maria, Julie.

DEPARTURES.—Dec. 20, from Texel, for Sourabaya, Ida Gertruda; 21, from Brouwershaven, for Samarang, Ida Elisabeth; for Singapore, Pantalon.

PASSENGERS OUTWARD.—For Java: Per Maarten van Rossum, Mr. W. Pas and family; per Goede Verwachting, Messrs. Enschut and family, Van Beuningen, Van Helsdingen and family, De Haan, Vechtman, Rappard, Van Minkelen, H. and A. E. Pool, Warnink, Mrs. de Nys and son, Miss Evers.

PASSENGERS INWARD.—From Java: Per Boni, Mr. T. Brouwer and family, Mr. J. Geelhoed and family, Mr. Edwards; per Ary Scheffer, Mr. M. van der Wal; per Noach, Messrs. Latour and family, Haga and family, Chateleur, Gobée.

CEYLON COMPANY (LIMITED).

A half-yearly general meeting of the shareholders of this company was held on the 17th instant, at the offices, Palmerston-buildings, City; Mr. LAWFORD ACLAND in the chair.

The report stated that the accounts for the half-year ending the 30th September last had been made up, and exhibited an available balance of £13,773 13s. 1d. at the credit of profit and loss. The directors proposed to pay an interim dividend at the rate of six per cent. per annum (being 6s. on each original and 3s. on each A share) on the 19th day of December instant, free from income-tax. This dividend would absorb £9,375, and leave £1,398 13s. 1d. unappropriated.

The CHAIRMAN, in opening the proceedings, said that he presumed the shareholders would take the report as read. The present meeting was for the purpose of declaring an interim dividend at the rate of £6 per cent. The available balance of £13,773 was less by £3,000 than it was this time last year, but that was no indication of any depression in their business, but was accounted for simply by their having brought a larger sum forward by that amount on the corresponding half-year. They had not extended their business in any way during the past six months. Their expectations with respect to raising the remainder of the capital, which two years ago they thought they would have done before this, had been disappointed in consequence of the state of the money market. He trusted that in the coming year confidence would be restored, and that they would be enabled to place the 12,500 shares they had in hand. At present the company suffered no inconvenience in consequence of those shares not being placed, but still it would be more satisfactory if they had the capital, which they could make good use of. At the last meeting they were informed that the proprietors of A shares were at liberty to pay up the additional £5 per share, it being desirable that all the shares should be placed on the same footing. That operation was still going on, and the directors were ready to receive the £5 per share and to allow a discount of £6 per cent. up to the 31st of March last, such shares carrying the full dividend from that date in the same way as the other paid-up shares. The shareholders might, perhaps, have noticed an advertisement which they had of late put out, offering to invest money in Ceylon or the Mauritius at £7 per cent. That advertisement had caused some misapprehension in the minds of some shareholders, who had imagined that they were borrowing money at 7 per cent. and mortgaging their estates. That was not the case, they were acting in the matter simply as commission agents. If any persons were desirous of advancing money in Ceylon or the Mauritius, certain parties were ready and willing to receive it; if done through this company, they charged a commission. Such business as they took of this character was very good, and gave them the agency of estates, which was the most profitable part of their business. He concluded by formally moving the adoption of the resolution declaratory of the dividend.

Mr. D. KAY seconded the motion.

Mr. TURNER presumed that in guaranteeing the loans referred to the directors took an ample margin, because estates in the tropics were liable to very serious risks. He had advanced largely on Jamaica property, and always required a margin of 50 per cent., to provide for contingencies and damage arising from excessive rains, hurricanes, or other calamities, to which property in the tropics was more peculiarly liable. He should be glad to hear that when the board gave a guarantee, a sufficient margin was required.

Mr. SWINTON thought the directors ought to give some more detailed information about their estates in Ceylon and the Mauritius. At the last meeting he put several questions on that subject, and was told that there had been losses on sugar from reduction of price. Every year the dividends were decreasing instead of increasing. If they gave £6 per cent. on debentures and only £6 per cent. dividend on the capital, they could not be making very large profits. He thought the shareholders would like to know how the coffee estates in Ceylon were turning out, whether they were being worked at a loss or profit, and what was being done with the estates in the Mauritius which had been thrown on their hands in consequence of their advancing money on the security of the land; and whether the expenditure in the Mauritius was or not more than the profits derived from the estates.

General LAWFORD would be glad to know whether the charges for management were fixed. He found that the charges last year were £21,616 and the dividend was £26,562, but in all probability this year the charges for management would exceed the amount of dividend.

The CHAIRMAN said with reference to the guarantee they gave to parties advancing money, the price of the estate was calculated with very great care, and they took a mortgage of it and managed it. The advance was calculated at half the value of the estate, taking it at five or six years' purchase, and he thought that that was a perfectly safe rule to act upon. No part of the produce of the company's coffee estates in Ceylon had been included in the present accounts—they would come in at the end of the year. The last year's expenditure had been heavy, but still there was a considerable profit. None of the estates which the company took over in the Mauritius had been sold since the last meeting, but they had turned out very well, and would yield a considerable sum over the working expenses and the interest of the money. The expenses of management were not fixed in any way in reference to the dividend, nor could there ever be a percentage on it. The agents and managers abroad had fixed salaries. The expenses had no reference whatever to the profits of the business.

General LAWFORD thought the cost of the establishment in the Mauritius high, being £8,500.

The CHAIRMAN explained that that was an exceptional amount consequent upon some necessary changes in the management.

General LAWFORD was of opinion that it would be for the benefit of the shareholders if a short manuscript statement of the progress of the company could be placed at the disposal of the shareholders, not for publication, but for their own guidance and satisfaction. He considered that under the present system they could not obtain such information as it was desirable in their own interests that they should possess.

The CHAIRMAN considered that it would be highly inexpedient that the secret working of the company should be thrown open to all shareholders some of whom might possess but a very slight interest in the concern and be rivals in trade. It would be preposterous if a shareholder holding an interest in the company to the value of £5 were to have the power of overhauling the books of the company and exposing their trade.

Mr. SWINTON thought the chairman had put the case a little too strongly. The shareholder did not ask that power should be given to individual shareholders to overhaul the books, but that they should have access to a short manuscript statement of the progress of the company. The shareholders were constantly being taunted with indifference to their own interests, and when anything wrong happened they were told that they ought to have looked more closely into matters. The fact was they had very little power of doing so.

Mr. SAVILL was of opinion that in a trading company like theirs it would be highly inexpedient that every shareholder should have the power of inspecting the books or getting at the secrets of their operations. Not only was it against the general principles of trading that one merchant should disclose the character of his operations to his competitors, but in this case there were urgent reasons why they should not. They were not

Digitized by Google

much beloved in the Mauritius, being considered interlopers by many merchants who transacted the same description of business before they went there. What was to hinder their rivals from purchasing the smallest possible interest in their company for the very purpose of getting at a knowledge of their business, in order as rivals to take advantage of it?

In reply to a question from a SHAREHOLDER,

The CHAIRMAN said that the board had no intention whatever of making a call.

The resolution was then put and carried unanimously, and a cordial vote of thanks to the chairman and directors, manager and staff, concluded the proceedings.

LEGAL.

—o—

COURT OF BANKRUPTCY.—IN RE GEORGE LYALL.—This was an adjourned sitting for examination and discharge. The bankrupt was a merchant of Leadenhall-street, trading there under the firm of Lyall and Still, and at Hong Kong under the firm of Lyall Still, and Co. The joint accounts disclose liabilities to the amount of £76,409, against which there is a claim on the firm at Hong Kong of £75,860; other assets, £500. The partners who were in China had, it appeared, obtained their orders of discharge. Mr. Bagley and Mr. Laurence for the assignees, stated that the books of the bankrupt had been well kept, and they did not desire further inquiry. Mr. Reed opposed for Mr. Liebert, of Manchester, a creditor for £47,000, and asked that the bankrupt's examination should be further adjourned until the pending inquiries were completed. It would be shown that from April, 1866, the bankrupt knew that his firm was hopelessly insolvent, and it was asked that a statement of affairs at that date should be furnished. After hearing Mr. Sargood for the bankrupt, his Honour adjourned the sitting for examination, and directed additional accounts to be furnished.

MODY AND ANOTHER V. GREGSON AND OTHERS.—This was an action for an alleged breach of contract. Mr. Grove, Sir George Honyman, and Mr. Hannen appeared for the plaintiffs; and Mr. Manisty, Mr. Field, and Mr. Kemplay for the defendants. The plaintiffs were a firm of native Indian merchants, who carry on business in London, Bombay, and Calcutta, and the defendants were cotton manufacturers in the neighbourhood of Manchester. It appeared from the plaintiffs' case that they purchased of the defendants 2,500 pieces of grey shirtings, which were described in the invoices as containing seven pounds weight in the piece. The goods were forwarded in the ordinary way to Calcutta, and were stored in the plaintiffs' "godowns," in which they remained about six months. On being examined at the end of that period the bales were found to be thoroughly rotten in the centre, while their exteriors were apparently uninjured. On being submitted to chemical analysis it was discovered that the goods contained over 20 per cent. of matters other than cotton, 14½ per cent. of which consisted of china clay. The scientific witnesses called by the plaintiffs stated that the effect of the clay was to keep the goods damp, and thus to cause them to become mildewed and rotten. The addition of the clay would add considerably to the weight of the article. The defendants' case was that the use of china clay in the manufacture of cotton goods was customary, and was beneficial. In their compound for sizing they only used 2½ per cent. of clay. The plaintiffs complained that upon the facts proved there was a breach shown of the warranty that the goods were merchantable. Mr. Manisty, on behalf of the defendants, submitted that upon a sale of goods by sample no warranty that they were merchantable could be implied. His lordship ruled that upon a sale of goods by the manufacturer the sample was to be taken only as a standard of those qualities which could be ascertained by an examination of the samples, and did not apply to latent defects. Mr. Manisty tendered a bill of exceptions to his lordship's ruling. The jury returned a verdict for the plaintiffs for £1,030.

GREENWOOD V. TONGUE—TONGUE V. GREENWOOD.—These suits, involving a great mass of paper from the evidence and proceedings which have taken place, now came on at the hearing on bill and cross bill. The subject-matter of the suits are certain agreements, or rather the heads of one agreement, designated "Agreement E," entered into with respect to the royalties in respect of certain patented machines for combing and otherwise manufacturing a new fibre known as China grass. The plaintiffs are the makers of the patentee's machines at Leeds, the defendant being an inventor and patentee at Wakefield. The plaintiffs in 1865 agreed to make certain combing and preparing machines for the manufacture of the fibre in question, for the Yorkshire Fibre Company, the defendant being the patentee, and the company were now manufacturing the article. The agreement in question was dated the 27th of October, 1866, and was signed by the parties, and under this instrument the plaintiffs were to be interested in a moiety of the patents, which included those in England, abroad, and in America. The chief question was whether, as the doctrine of specific performance in equity now stood upon the authorities, an agreement involving personal services could be enforced in this court. The defendant resisted the performance on the ground that, such being the scope of the contract, the Court could not enforce it, because if it made a decree there were no means of seeing that it was carried out, the officers of the Court not having the means of doing so. The plaintiffs, however, argued that the Court could make a decree auxiliary to proceedings at law, by which they would get all they asked for, and that the Court having power to decree the execution of instruments, that would give the relief, by affording a means upon which to obtain a legal remedy. Mr. J. Napier Higgins appeared for the plaintiffs; Mr. Glasse, Q.C., and Mr. Bagshawe for the defendant. After considerable discussion, the Vice-Chancellor sanctioned the following order:—Mr. Tongue and all necessary parties unconditionally to assign to the plaintiffs the sole right and benefit of his existing patents for China grass in Great Britain and Ireland, and licences inconsistent with that to be cancelled. A deed to be settled by the Court in case the parties differed. Future duties and patent fees to be paid in moieties, and if the plaintiffs declined they must give up their interest to Tongue and elect, in three weeks. Tongue to retain the right in the patents for anything else than China grass, and the royalties already earned and machines unsold to belong to plaintiffs, who were to receive the £850 in Court and the costs of the litigation fixed at £200, and paid by the defendants in addition to moneys in Court on account of costs, and paid in £50 yearly instalments, secured by promissory notes, and in default to be a charge on the patents. The plaintiffs to undertake to settle with the company, injunction to be dissolved, and mutual releases to be executed.

Naval and Military.

—o—

The Pylades, 21, screw steam corvette, 1,278 tons, 350-horse power, was commissioned at Sheerness a few days ago for service in the Pacific by Capt. Cecil W. Buckley, V.C. The following officers have joined the ship:—Capt. Cecil W. Buckley, V.C.; Lieuts. W. Neilson, H. G. Andre, W. H. Lewin, and S. A. R. Hamilton; Navigating Lieut. Jesse Dixon, Surg. Richard Eustace, and Paymaster Charles D. Lindsay. The Pylades was taken for a preliminary run for the trial of her engines, when the result was considered most favourable. The vessel will not leave Sheerness before next month. The Prussian iron frigate Prins Frederick Carl, from Toulon, which put into Plymouth dismasted some time since, has been removed to moorings higher up Hamoaze, to give place to ships belonging to the Channel fleet, which will winter at Devonport. It is believed that the Prince Consort and the Achilles are two of those named for Devonport.

The Serapis, screw troopship, Capt. Soady, sailed from Portsmouth on the 14th inst. for Alexandria, with the following troops on board for India and the Abyssinian expedition:—For India—F F and G Batteries of the 8th Brigade Royal Artillery—Col. Bruce and Mrs. Bruce, Lieut.-Col. Evans and Mrs. Evans, Lieut.-Col. Smyth, Capt. Collington, and Mrs. Collington, Capt. Brown and Mrs. Brown, Capt. Nicholls; Lieuts. Lowe, Brown, Carr, Nutting, Hauston, Hunter, Tillotson, Gubbins, Buckle, Bigg, Warrington, Shore, and Poole; Assist.-Surg. Boulton and Mrs. Boulton, Assist.-Surg. Davidge; Veterinary-Surg. Hanley and Mrs. Hanley, Veterinary-Surg. Hall and Mrs. Hall; 635 non-commissioned officers and men. Royal Artillery—Capt. Martin, Capt. Campbell and Mrs. Campbell, Capt. Hayes; Lieuts. List, Boucher, and Franks; Riding-master Pawson and Mrs. Pawson, Assist.-Surg. Davidson, Lieut. Godeve and Mrs. Goodeve, Lieut. Talbot, and Lieut. O'Grady; 58 men. First Battalion 3rd Regt.—Ensigns Irwin and Thornton, and 181 men. 102nd Regt.—Lieut. Carr and 61 men; 104th Regt.—Capt. Milne; 106th Regt.—Capt. Caldecott; 1st Battalion 19th—Capt. Marshall; 36th—Lieut. Hartford; 46th—Ensign Searle; 77th—Ensign Thornton; 3rd Battalion Rifle Brigade—Ensigns Sandelands and Harrington; 3rd Battalion 60th Regt.—Lieut. Borthwick; 2nd Battalion 60th—Ensign Brand; Staff-Surg. Miles; Staff Assist.-Surgs. O'Reilly, Macpherson, Miles, Footner, and Green, and Mrs. Green. For Aden, to join the Abyssinian Field Force—Capt. Kilton, 1st Battalion 4th; Lieut. Goring and Capt. Trent, 33rd; Lieut. Crofton, Royal Artillery; Ensign Wright, 45th—total number of all ranks on board, 1,290, exclusive of 121 soldiers' wives and 131 children. The Serapis also took out 36 seamen and bandsmen paid off from the Royal Oak, on passage to Gibraltar for Malta.

On the 20th inst. the gunboats Fly and Flirt were launched from Devonport dockyard by Mr. A. Moore, the master shipwright. The ceremony was performed by Miss Spencer and Miss Matilda Spencer, daughters of the Commander-in-Chief of the Western District, Major-General the Hon. Sir A. A. Spencer, K.C.B. The Fly and Flirt are sister gunboats of 464 tons built on lines supplied by Mr. E. J. Reed, Constructors of the Navy. They will have engines of 160-horse power with double screws.

Monetary and Commercial.

—o—

A further dividend will be paid to the creditors of the Commercial Bank of India next month. The amount is not yet determined, as remittances continue to come forward by every mail. The call of £10 lately made and confirmed by the Court is payable on the 20th of January by shareholders in Europe, and on the 1st of March in India. This should yield £400,000, but the liquidator will be fortunate if he recover the half of it. It will, we fear, be necessary to call up the other £15 per share.

The Chartered Mercantile Bank of India, London, and China have declared a dividend of 3 per cent. for the half-year ending the 31st.

The committee appointed by the shareholders of the Labuan Company have recommended that a new company be formed to purchase the plant, &c., of the mines by the issue of 20,000 shares of £5, and that for every old share one of these be allotted, these shares to be called A. A further issue of 20,000 shares called B to be allotted without payment to holders of A shares. The A shares to have 10 per cent. per annum before B; and when B shares receive 6 per cent., A and B are to share the remaining profits. The applications will be considered early in the new year, and a decision arrived at.

Creditors of the China Steamship and Labuan Coal Company (Limited), resident in Europe, are required to send particulars of their claims to Mr. J. B. Gibbons, one of the liquidators, by the 1st of January, and those resident elsewhere by the 1st of June.

The biddings for bills on India were held on the 18th, at the Bank of England, and Rs. 12,30,000 were allotted to Calcutta. The minimum price was fixed as before at 1s. 11d. on Calcutta and Madras, and all tenders at and above that price were allotted

Digitized by Google

full. In the fact that only a portion of the bills offered have been taken, there is proof that the demand for the means of remittance to the East is still diminishing. The Council of India will receive tenders on the 1st proximo for bills on Calcutta and Madras to the amount of £200,000.

The failure of a Bombay house in Manchester has been announced. It is that of Messrs. Nixon and Kellick, whose liabilities are estimated at from £90,000 to £100,000. There is, it is added, reason to believe the estate will show a very favourable state of assets as soon as the accounts have been prepared.

The goodwill, trade marks, &c., of the firm of B. Gott and Sons, Leeds, who were largely engaged in the export woollen trade to China, are to be sold by public tender.

Messrs. Letts aud Son have issued their almanacks and diaries for 1868. They are as usual replete with information, corrected up to the latest possible date, and in forms to suit all requirements.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 20th inst., was, in gold, to Alexandria, £26,700; to Madras, £290; in silver, to Hong Kong, £24,583; to Shanghai, £6,125; total, in gold, £26,990; in silver, £30,708.

ARTICLES OF IMPORT.

TEA.—A limited business has been done since our last, the trade showing the usual disinclination to increase stocks which prevails at this season of the year. Prices have generally been fairly supported, as Importers have not pressed sales. Black.—Congou: Dust and broken-leaf kinds remain firm at the previous advance, and there is no change to report in common to fair blackish and reddish leafs in which a steady business has been done. Of good to medium qualities only a limited quantity has changed hands; fine Kaisows have been neglected, but sales of fine Monings are reported up to 2s. 3d. Souchongs and Scented Teas are without change and only in quiet demand. Green: The unusually large quantity brought by the Achilles, together with several other smaller arrivals, have caused buyers to act with more caution, but a considerable amount of business has been done, as importers generally have shown a disposition to realise and have freely met buyers; prices of fine and finest qualities may be quoted fully 2d. to 3d. per lb. lower, whilst some of the common to fair sorts of Young Hysons have been difficult to sell at even a greater reduction.

SILK.—The Silk market has been quiet since last mail, but prices are well maintained. In China there is not much business doing, the recent unloadings being mostly of undesirable quality, not easy to sell, but good is readily taken at full prices. Japans have been eagerly bought, both for arrival and on the spot; but the present rates check the demand for actual consumption, except for the very finest and best qualities. Deliveries from 1st to 23rd inclusive: China, 2,051 bales; Japan, 473 bales; total, 2,524 bales.

COTTON.—The general market is dull, and as usual at this period of the year, the business both at London and Liverpool has been very trifling. Quotations remain the same as at our last report.

COFFEE.—The supply by auction has been extremely scanty, and with little general inquiry business has altogether been of light amount, prices remaining without alteration, excepting Native Ceylon, which is lower. The only sales reported are of 103 casks, 60 barrels and bags Plantation Ceylon at 63s. to 84s. 6d., and 1,200 bags brownish yellow Singapore at 72s. per cwt.

COCOA-NUT OIL.—Trade has been extremely limited, at a reduction of 10s. per ton on former rates.

GUM BENJAMIN.—Siam steady; of 10 cases at auction, a few quitted at £24 for good second quality; Sumatra, in consequence of increased supplies 10s. to 15s. cheaper; 195 cases sold at £7 5s. to £8 for fair to good second quality, partly false packed; £6 15s. to £7 very good third quality and £2 to £2 7s. 6d. for fourth.

JAPAN WAX.—There is still a large inquiry but no supply.

MANILA HEMP.—With a greater activity in the market for this import prices have advanced 10s. to 20s. per ton, and a large business has been done both on the spot and for arrival. Of 865 bales at the auctions two-thirds sold at £49 to £59 10s. per ton for superior and fair roping.

PEPPER—Of Black, only 107 bags Singapore have been brought to auction, which sold at 3¾d. and privately transactions have been also limited to small parcels, Penang at 3 1-18d. White: 130 bags Penang at public sale went at 4¼d., and 101 bags Singapore at 5d.

PLUMBAGO.—The market for Ceylon is firm, 396 barrels at auction sold at 29s. 6d. to 31s. for fair to very good lump, 19s. 6d. to 20s. 6d. for chips, and 12s. to 13s. 6d. for dust.

RICE.—There has been a fair demand, and the business done has been at steady prices, viz., 1,000 bags white Bengal at 16s. 9d. to 1,300 bags Ballam at 11s. to 11s. 3d., 1,000 bags Madras at 12s., 2,000 bags Bassein at 12s. on the spot; 250 tons Ballam at 10s. to 10s. 1½d., and 850 tons Rangoon at 12s., ex ship; for arrival 100 tons Madras at 11s. 9d. landed, and 700 tons Bengal, Dacca at 11s. 3d. to 11s. 9d. At public sales 1,996 bags soft grain were mostly sold, Larong at 11s. 6d., siftings at 9s. 6d. to 10s.

SUGAR.—The tone of the market has been rather less dull, but the business doing has only slightly augmented, and the value is unaltered, Of Penang 1,300 bags middling to fine brown realised 30s. to 32s. 6d., and a portion fine soft yellow 33s. to 35s. while of Manila 5,000 bags superior Muscovado sold at 24s. per cwt. The above transactions were effected by private contract, there having been no business at the auction.

TIN.—The market for Tin is flatter, in consequence of rumoured large shipments from Japan; this rumour is at present without confirmation. An increased desire to sell has led to a fall of £2 per ton in Straits; moderate business has been done down to £87 cash, on the spot and for arrival.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 7s. 6d. to £6 10s.; nail rods, £7 5s. to £7 15s.; hoops, £8 5s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 5s. to £7 15s.; rails, £5 10s. to £6.

STEEL.—Swedish kegs, £14 15s. to £15 5s.

COPPER.—Sheet and Sheathing, £79 to £82 per ton; yellow metal, 7d. per lb.

LEAD, &c.—English pig, W.B., £21 5s.; shot, patent, £22 5s., sheet, £20 5s.; spelter, £20 5s.; zinc, English sheet, £28; quicksilver, £6 17s., in bottles of 75 lbs. each.

MANCHESTER MARKETS.

Mr. Sam Mendel's report states:—There is scarcely any demand, and prices are further depressed both for Yarns and Goods.

Quotations are:—Grey Shirtings, 7 lbs., 7s. 1½d. to 7s. 9d.; 8½ lbs. 9s. 3d.; Cotton Yarn, Nos. 16-24, 11d. to 12d.; Nos. 28-32, 1s. to 1s. 1d.; Maddapollams, 3s. 3d.; Long Cloths, 8s. 9d.; T-Cloths 5s. 9d.; White Spot Shirtings, 9s. 9d.

The circular of Messrs. Jorss and Co., Leeds, says:—The business transacted has been barely sufficient to test prices, which are, however, still further against the producer; the near approach of the holidays has contributed to make an unsatisfactory business still worse. In wool the

operations have been on the most limited scale, just sufficient to work out small orders. The stocks in the hands of staplers are extremely small, but the holders of wool in the country are asking prices which cannot by any means be obtained in the market here, and hence the staplers do not buy. In Yarns we hear of some offers being made for shipping, but at rates which are quite out of the question, and the business for home consumption is extremely small. The piece trade is as much depressed as the yarn trade. Manufacturers will avail themselves of the holidays to stand the whole of the week, and with the new year three or four days a week will become the rule, as makers find it impossible to obtain orders.

FREIGHTS AND CHARTERS.

In berth freights to the Eastern ports there is but little change. Coal freights from the Northern outports have slightly declined, but rule firm at the under-mentioned quotations.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. meast., 40s. weight. To Shanghai: 40s. weight, 45s. meast. To Cheefoo: 60s. weight or meast. To Hong Kong: 40s. to 45s. weight, 35s. meast. To Manila: 80s. weight, 50s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 40s. weight, 35s. meast. To Ceylon: 20s. to 25s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £54. For Shanghai: £55. For Hong Kong: £47. For Saigon: £50. For Singapore: £33. For Batavia: £32. For Colombo, £30. For Galle, £34. From Newport, Cardiff, or Swansea, per ton.—For Yokohama: £2 10s. For Shanghai: £2 15s. For Chefoo, £2 15s. For Hong Kong, £2 5s. For Manila, £1 15s. For Saigon: £2 8s. For Singapore: £1 12s. For Batavia, £1 10s. For Trincomalee, £1 12s. 6d. For Galle, £1 14s. For Colombo, £1 8s. 6d.

CASUALTIES.

The Souburg, Zwart, from Batavia to Amsterdam, which put in at St. Helena, with damage Nov. 8, had landed 1,600 bags of coffee, 358 of which were damaged, and recommended to be sold.

The Englishman, Brown, from Newport to Hong Kong, which put in at St. Helena leaky Aug. 20, had been sold with her tackle, apparel, and furniture.

The Jacoba Cornelia, from Batavia to Amsterdam, put in at Mauritius Sept. 26 leaky. She proceeded on Nov. 12.

The Philip v. Marnix, Langenberg, from Batavia to Rotterdam, which put in at Mauritius Nov. 15 leaky, had experienced a hurricane Oct. 25, in lat. 7 S., lon. 102 E., and would have to discharge.

Advices from Mauritius, dated 18th November, state that the "Star Queen" Forbes, from Liverpool to Hong Kong, was then discharging at that port; she had experienced a severe hurricane from W.N.W. to S.S.W., Oct. 22, in lat. 39 S. lon. 59 E., during which she sprung a leak at the stern post and wooden ends abaft, and threw about 30 tons cargo overboard. A few days before her arrival a strong smell of fire proceeded from her hold, but after the water had been allowed to rise six feet through the leak, the smell ceased.

The "Elizabeth," Feenstra, from Batavia to Amsterdam, which put in at Capetown, Oct. 20, with loss of all three topmasts, was also leaky.

The Agnes, Williams, from New York and Pernambuco to Singapore, put into Rio de Janeiro, Nov. 11, leaky.

The Esperanza, Onate, from Cardiff to Hong Kong, put into Rio de Janeiro, Nov. 21, leaky.

The Abbot Lawrence, Bramhall, Cardiff to Hong Kong, put into Rio de Janeiro, Nov. 13, either with damage or to refresh, but sailed again 16 Nov. for her destination.

The Gabrielle Alice, from Saigon to Bordeaux, put into Mauritius, 16 Nov., was leaky, having struck on a reef in going out of Gaspar Straits, Oct. 20, the master did not suppose that her damage was very serious, though much of her copper was carried away; the vessel was at anchor in the roads.

MISCELLANEOUS.

Off ASCENSION.—Nov. 13, Emerald, from Manila, for Queenstown; 14, Hebe, from Batavia, for Amsterdam; 15, Chalmers, from Manila, for Falmouth; 17, Dunmail, from Shanghai, for London; 17, Scawfell, from Foochow, for London; 21, Grasmere, from Foochow, for London; 22, Marion, from Sarawak, for Queenstown; 23, Queen of the Age, from Foochow, for London: Ystroom, from Batavia, and, 24, Viet Gezusters, from Batavia, both for Amsterdam; 26, Titania, from Shanghai, for London; James Russell, from Hong Kong, for the Clyde; Dec. 1, A. H. Wille, from Singapore, for Hamburg; William Naizby, from Colombo, for London.

At ST. HELENA.—Nov. 20, Baron Kellner, Corrich, from Macao, and sailed for Falmouth; 22, Caranjah, Johnson, from Foochow, and sailed for London; 25, Meg Merrilies, Wrightman, from Singapore, and sailed for London; Pegasus, Penrice, from Shanghai, and sailed 26 for London; 26, Annie Storey, Renney, from Batavia, and sailed 27 for Rotterdam; Sir James, Richards, from Penang, and sailed for Falmouth; 27, Nyphoon, Baker, from Macao; Marie and Lucie, v. Bargen, from Macao, and sailed for Hamburg.

At St. Helena, Nov. 12, Sovereign of India, Scott, from Hong Kong, and sailed 13 for London; 14, Maiden Queen, Foster, from Foochow; 16, Telegraph, Jones, from Batavia; Willemina and Clara, Kerwerden, from Batavia.

The Capiolani, from Manila, which arrived at St. Helena, Nov. 5, and proceeded 7 for Liverpool, was in charge of the chief officer, her master (Reid) having died on the passage.

At Callao, Nov. 6, Providencia, Mattini, from Macao.

At Mauritus, Nov. 8, Pocahontas, Graves, from Manila and sailed 12 for Boston; 16, Charles Maureau, Cove, from Saigon; Gabrielle Alice, Lancelot, from Saigon; 8, Garibaldi, Christensen, sailed for Batavia.

The P. and O. Co.'s screw steamship Sumatra, Capt. E. P. G. Browne, left for Bombay, *via* the Cape of Good Hope, for service in India.

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring espatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them

NOTICE TO SHIPOWNERS.

SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute, in the most efficient manner, SHIPS' REPAIRS of all descriptions, under the supervision of European Shipwrights and Engineers.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length with a depth of water ranging to 15½ feet.

Another Dry Dock of larger dimensions, adjoining the above, will shortly be completed, and available for the heaviest Steamers.

There is on the same premises extensive Wharf, with substantial Warehouse and other accommodation, comprising every convenience for coaling Steamers, discharging and storing Goods, together with ample Machinery and appliances for repairing Iron Steamers &c.

Apply at the Offices of Messrs. PATERSON, SIMONS and Co., Singapore; or to W. W. KER, Esq., 101, Cannon-street, London, E.C.

THE ORDINANCE of INCORPORATION having received the Royal assent, a London Register of Shares has now been established, and shareholders in the company desirous of having their shares transferred from the Hong Kong Register, can do so upon application at this office.

Certificates for shares so transferred will be granted in exchange for the original certificates, the conversion being effected from dollars into sterling at the rate of 4s. 6d. per dollar.

The Ordinance, Deed of Settlement, and London Register of Shareholders can be inspected by shareholders at this office on application to the manager.

Purchasers of shares can have their transfers registered at this office, and also obtain new share certificates in lieu of those surrendered by the transferrer.

Forms of transfer (according to the Ordinance of Incorporation and Deed of Settlement) can be obtained on application at this office.

Dividends on shares on the London Register will be paid in London, in sterling, at the rate of exchange for Bank bills at sight by the mail leaving Hong Kong after the declaration of each half-yearly dividend.

The transfer books for shares on the London Register will be closed for fifteen days previous to the 25th day of June and 25th day of December in each year.

By order of the Court of Directors,
W. H. VACHER, Manager.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, RED BULL WHARF, 93, UPPER THAMES-STREET, late of 12, Three King-court, Lombard-street, London, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.
JOHN GOSNELL and Co.'s La Noblesse Pomade.
JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

Orders executed on receipt of 10 per cent. of the amount in cash, the balance being drawn for through a Banker.

Bostonite Music Slates, 6d. each.
Bostonite Purses, from 1s. 6d. each.
Bostonite Multiplication Tablets, 4d. each.

HOLLOWAY'S PILLS. — THE READY REMEDY.—When winter sets in the human constitution undergoes many trials, from some of which disease will spring unless the blood repelled from the surface of the body finds organs capable of receiving it and secretions adapted to consume it. This preservative power is admirably displayed by proper doses of Holloway's Pills, which relieve the liver, kidneys, and bowels from undue congestion by immediately augmenting their secretions, and so diverting any surplus quantity of blood from a situation where its continued presence must be mischievous. With these Pills, and an attentive perusal of their accompanying "directions," neither great judgment nor much experience is required to conduct even the delicate through the trying time of winter.
